Subject Index

Absorption; Sanitary engineering; Sanitary landfill; Sewage sludge; Solid wastes
Water and Sewage Sludge Absorption by Solid Waste, Ralph Stone and Richard L. Kahle, 467

Abstracts; Indexes (documentation); Information retrieval; Reports; Sanitary engineering; Thermal pollution; Water pollution; Water quality
Information Sources on Water Quality, Including Thermal Pollution, the Committee on Thermal Pollution of the Sanitary Engineering Division, Fred A. Limpert, Chmn., 407

Abutments; Canada; Dams (earth); Foundations; Grouting; Settlement (structural)
Foundations and Abutments -- Bennet and Mica Dams, Harold K. Pratt, Robert C. McMordie and Robert M. Dundas, 493

Abutments; Construction; Foundations; Geology; Grouting; Seepage; Soil mechanics; Topography
Current Practice in Abutment and Foundation Treatment, Harris H. Burke, Charles S. Content and Richard L. Kulesza, 489

Abutments; Cutoffs; Dams (rockfill); Foundations; Geology; Grouting; Jets; Rock fills; Soil mechanics
Foundation Practices for Talbingo Dam, Australia, B. J. Wallace and J. I. Hilton, 492

Abutments; Dams; Dams (embankment); Foundations; Rock mechanics; Seepage; Soil mechanics
Abutment and Foundation Treatment for High Embankment Dams on Rock, Reginald A. Barron, 491

Abutments; Dams (earth); Dams (embankment); Dams (rockfill); Foundations; Reports
Foundation and Abutment Treatment for High Embankment Dams on Rock by the Committee on Embankment Dams and Slopes of the Soil Mechanics and Foundations Division, H. Bolton Seed, Chmn., 490

Abutments; Dams (rockfill); Foundations; Geologic investigations; Grouting; Iraq; Philippines; Venezuela; Weathering
Foundation and Abutment Treatment for Rockfill Dams, Richard C. Acker and Jack C. Jones, 494

Acceleration tolerance; Construction; Dams (embankment); Dams (rockfill); Hydraulics; River closures; Rivers; Stability
Stability of Rockfill in End-Dump River Closures, Bishnu P. Das, 567

Accessibility; Calculators; Computer applications; Computer programming; Computers; Costs
Programmable Calculators: A Consultant Reports, D. A. Polychrone and Dieter Franz, 483

Accessibility; Mathematical models; Planning; Traffic surveys; Transit systems; Transportation
Analytical Estimation of Transit Access Impedances, Paul R. Rassam and Raymond H. Ellis, 154

Accuracy; Adjustment; Computation; Control surveys; Surveying
Adjusting Radial Surveys, James R. Baker, 501

Accuracy; Algorithms; Computation; Least squares method; Photogrammetry; Surveying
Nonlinear Least Squares Algorithm, Mohamed F. Madkour, 572

Activated carbon; Adsorption; Irreversible processes; Kinetics; Sanitary engineering; Sorption; Waste treatment
Sorption Kinetics in Finite-Bath Systems, Francis A. DiGiano and Walter J. Weber, Jr., 546

Activated sludge; Anaerobic conditions; Denitrification; Eutrophication; Kinetics; Nitrates; Sanitary engineering; Sewage treatment
Process Kinetics for Denitrification, Walter K. Johnson, 448

Activated sludge; Anaerobic digestion; Anaerobic processes; Computer applications; Mathematical models; Optimum design; Sanitary engineering; Wastewater treatment
Optimal Design of Wastewater Treatment Systems by Enumeration, Gene F. Parkin and Richard R. Dague, 513

Activated sludge; Chlorine; Coagulation; Epidemiology; Filtration; Protamines; Sanitary engineering; Water treatment
Integrated Approach to Problem of Viruses in Water, Gerald Berg, 122

Activated sludge process; Anaerobic digestion; Eutrophication; Iron compounds; Phosphorus compounds
Anaerobic Digestion of Sludge Containing Iron Phosphate, Sudershan Malhotra, Thomas P. Parrillo and Alan Gene Hartenstein, 74

Adaptive systems; Algorithms; Computer applications; Optimum design; Structural engineering
On Adaptive Structural Design, William R. Spillers and Lewis Friedland, 480

Additives; Drag; Fire fighting; Flow resistance; Pipe flow; Polymers; Sanitary engineering
Drag Reduction Application in Fire Fighting Systems, Hillel Rubin, 149

Adjustment; Computation; Control surveys; Surveying; Accuracy
Adjusting Radial Surveys, James R. Baker, 501

Admixtures; Chemical stabilization; Clays; Lime soil mixtures; Soil mechanics; Soil stabilization
Acceleration of Lime-Clay Reactions with Salt, B. Dan Marks and T. Allan Haliburton, 235

Adsorption; Chemical removal (sewage treatment); Filtration; Sewage treatment; Wastewater treatment; Water quality
No Innovation in Wastewater Treatment, Russell L. Culp, 327

Adsorption; Coefficients; Oxidation; Oxygen; Sanitary engineering; Sewage; Sewers; Weirs
Oxygen Adsorption in Streams, John D. Parkhurst and Richard D. Pomeroy, 156

Adsorption; Irreversible processes; Kinetics; Sanitary engineering; Sorption; Waste treatment; Activated carbon
Sorption Kinetics in Finite-Bath Systems, Francis A. DiGiano and Walter J. Weber, Jr., 546

Advection; Evapotranspiration; Frequency distribution; Irrigation; Radiation
Frequency of Potential Evapotranspiration Rates in Great Central Plains, Norman J. Rosenberg, 294

Aeration; Backwater; Dams (movable); Dikes; Gates; Ice; Ice control; Mississippi River; Waterways
Reducing Ice Formation at Navigation Dams, Henry W. Harich, 387

Aeration; Bacteria; Beaches; Chlorination; Sanitary engineering; Water pollution
Pneumatic Barrier and Beach Pollution, Martin S. Hertzendorf, Joseph V. Fiore, Herbert E. Klei and I. J. Kopelman, 304

Aeration; Dissolved oxygen; Rivers; Sanitary engineering; Sewage treatment
Aeration System for Large Navigable Rivers, William Whipple, Jr. and Shaw L. Yu, 135

Aerial photography; Computer programs; Photogrammetry; Surveying; Triangulation
Computer Program System for Aerotriangulation, Kam W. Wong and G. Elphingstone, 470

Aerial photography; Coordinates; Linearity; Photogrammetry; Surveys
Space Resection from Collinearity Conditions, Kunwar K. Rampal, 92

Aerial photography; Environmental engineering; Mapping; Photogrammetry; Remote sensing
Photogrammetry Aids Solution of Environment Problems, Alfred O. Quinn, 228

Aerial photography; Flooding; Lakes; Remote sensing; Streams; Surveying; Water pollution; Water resources
Aerial Photography for Water Resource Studies, Ralph W. Kiefer and James P. Scherz, 149

Aerial surveys; Analytical techniques; Dams (earth); Lakes; Mapping; Photogrammetric surveys; Surveys
Survey Design and Procedures, William E. Kreisle, 77

Aerial surveys; Computation; Geodesy; Surveying; Vector analysis
Three-Dimensional Forward and Inverse Computations, William E. Ball, Jr., 595

Aerial surveys; Computer programs; Orientation; Surveying; Surveys
Comparison of Analytical Relative-Orientation Methods, Santosh K. Mahajan and Singh Vijay, 340

Aerodynamics; Cylinders; Engineering mechanics; Protuberances
Wind Load on Cylinder With Spanwise Protrusion, David F. James and Quan-Si Truong, 543

Aerodynamics; Drag; Loads (forces); Structural engineering; Turbulence; Vibration; Wind (meteorology)
Drag Spectra of Simple Structures in Turbulence, John Brian Roberts, 448

Aerodynamics; Engineering mechanics; Fluid flow; Transmission lines; Turbulence; Vibration; Wind (meteorology)
Galloping Oscillations of Prismatic Structures, Milos Novak, 50

Aggregates; Ashes; Materials; Powerplants; Soil mechanics; Solid wastes
Bottom Ash: An Engineering Material, Roger K. Seals, Lyle K. Moulton and Byron E. Ruth, 224

Aggregates; Highways; Limestone; Pavements; Skid resistance
Sprinkle Treatment Increases Highway Skid Resistance, George W. Maupin, Jr., 86

Agricultural engineering; Irrigation; Irrigation operation " maintenance; Management; Soil moisture; Water consumption
Irrigation Management - A Tool for Agribusiness, Neil W. Schild and Harvey R. Nelson, Jr., 486

Agricultural products; Economic analysis; Evapotranspiration; Irrigation
Water-Yield Relations for Nonforage Crops, Lloyd A. Downey, 157

Agricultural wastes; Erosion; Nutrients; Pollution; Runoff; Rural areas; Sanitary engineering
Agricultural Runoff-Characteristics and Control, Raymond C. Loehr, 520

Agriculture; Aquatic plants; Industrial wastes; Land use; Population; Regulations; Sanitary engineering; Streams
Water Pollution - Facts and Fantasies, John M. Henderson, 390

Agriculture; Aquifers; Artesian wells; Drainage; Irrigation; Pumping; Salinity; Tests
Pumping an Artesian Source for Water Table Control, Eugene J. Doering and Leo C. Benz, 344

Agriculture; Droughts; Economic development; Irrigation; Water deprivation
Water Deficits -Irrigation Design and Programming, Robert M. Hagan and J. Ian Stewart, 318

Agriculture; Hydraulics; Rivers; Salinity; Salt removal; Water resources
Present and Future Salinity of Colorado River, Myron B. Holburt and Vernon E. Valentine, 192

Air conditioning; Computer programs; Electrical design; Heating; Ventilation
Computers: Key to Integrated Building Design, Kenneth F. Reinschmidt, 158

Air cooling; Cooling systems; Cooling towers; Electric power generation; Power; Thermal pollution; Water conservation
Dry-Type Cooling Towers, Edward A. Cecil, Paul R. Cunningham, Clarence J. Steiert and Roger O. Young, 92

Aircraft; Air transportation; Construction; Joints (junctions); Keys (splines); Pavements; Rigid pavements; Transportation
Keyed Joint Performance Under Heavy Loaded Aircraft, John L. Rice, 561

Aircraft landing areas; Durability; Highways; Transportation
Effect of Load Placement on Rigid Pavement Behavior, Harvey J. Treybig, William Ronald Hudson and B. Frank McCullough, 6

Air entrainment; Drains; Dust storms; Engineering mechanics; Fluid mechanics; Friction; Hydraulics; Inlets (waterways); Jets; Meteorology; Momentum; Tornadoes; Vortices
Experiments on Unstable Vortices, Enzo Levi, 249

Air pollution; Benefit-cost ratios; Community development; Noise reduction; Real property; Transportation
Community Values in Transport Network Evaluation, Dan G. Haney and George E. Klein, 449

Air pollution; Environmental engineering; Sweden; Traffic; Traffic control; Transportation; Urban planning
Gothenburg (Sweden) Uses Barriers to Cut Traffic, Curt M. Elmberg, 406

Air pollution; Esthetics; Housing; Land use; Noise reduction; Parks; Urban planning; Water pollution
Esthetic Considerations in Urban General Planning, Wm. H. Claire, 404

Air pollution; Industrial wastes; Municipal water; Research; Sanitary engineering; Solid wastes; Waste water; Water resources; Water treatment
Research Needs in Sanitary Engineering, Sanitary Engineering Research Committee of the Sanitary Engineering Division, Jack M. Betz, Chmn., 321

Airports; Air traffic; Costs; Dikes; Estimates; Jet aircraft; New jersey; New york
Offshore Jetport for New York-New Jersey Megalopolis, Edward G. Nawy and Fred C. Koletty, 179

Airports; Air transportation; Dikes; Environmental engineering; Offshore structures; Urban planning
Trends in Offshore Airports, Richard D. Harza, 497

Airports; Air transportation; Drainage; Embankments; Fills; Settlement (structural)
KCI Airport Planned for Jet Age, Edwin Joe Runyan, 480

Airports; Air transportation; Electronics; Passenger transportation; Systems engineering; Transportation
Satellite Transit at Seattle-Tacoma Airport, Ralph Mason, 566

Airports; Bibliographies; Information retrieval; Publications; Transportation
List of Information Sources for Airport Planners, Robert K. Palmer, 65

Air traffic; Costs; Dikes; Estimates; Jet aircraft; New jersey; New york; Airports
Offshore Jetport for New York-New Jersey Megalopolis, Edward G. Nawy and Fred C. Koletty, 179

Air transportation; Buses (vehicles); Costs; Systems engineering
Airport Access Cost-Effectiveness Analysis, Richard de Neufville and Edward Mierzejewski, 428

Air transportation; Construction; Joints (junctions); Keys (splines); Pavements; Rigid pavements; Transportation; Aircraft
Keyed Joint Performance Under Heavy Loaded Aircraft, John L. Rice, 561

Air transportation; Dikes; Environmental engineering; Offshore structures; Urban planning; Airports
Trends in Offshore Airports, Richard D. Harza, 497

Air transportation; Drainage; Embankments; Fills; Settlement (structural); Airports
KCI Airport Planned for Jet Age, Edwin Joe Runyan, 480

Air transportation; Electronics; Passenger transportation; Systems engineering; Transportation; Airports
Satellite Transit at Seattle-Tacoma Airport, Ralph Mason, 566

Air water interactions; Coastal engineering; Wave energy; Wind pressure; Windward drift
Physical Scales for Generation of Wind Waves, Jin Wu, 281

Airy function; Boundary conditions; Finite difference method; Harmonic functions; Hyperbolic parabolic shells; Structural engineering
Finite Difference Approach to Hyperbolic Paraboloids, M. I. Beg, 146

Airy function; Boundary value problems; Eigenvalues; Elastic shells; Engineering mechanics
End Effects in Truncated Semi-Infinite Wedge, Robert Wm. Little and Tommie R. Thompson, 484

Alaska; Conservation; Oils; Pipelines; Pipeline terminals; Pipeline transportation; Planning
Engineering the Trans-Alaska Pipeline415

Alaska; Embankments; Highways; Permafrost
Alaska Builds Highway Over Muskeg and Permafrost, John C. Becker, 349

Algae; Bacteriology; Enteric bacteria; Sanitary engineering; Waste stabilization ponds
Bacterial Dieoff in Ponds, Ernst M. Davis and Earnest F. Gloyna, 193

Algae; Chlorination; Coliform bacteria; Disinfection; Kinetics; Pollution control; Sanitary engineering; Waste stabilization ponds; Waste treatment
Kinetics of Chlorine Disinfection in an Ecosystem, Leonard W. Hom, 231

Algae; Chlorination; Flocculating; Sanitary engineering; Stabilization
Disinfection of Algal Laden Waters, Wayne F. Echelberger, Jr., Joseph L. Pavoni, Philip C. Singer and Mark W. Tenney, 91

Algorithms; Coefficients; Evaporation; Mathematical models; Predictions; Statistical tests; Temperature; Water quality
Stream Temperature Prediction Under Reduced Flow, William L. Morse, 332

Algorithms; Computation; Least squares method; Photogrammetry; Surveying; Accuracy
Nonlinear Least Squares Algorithm, Mohamed F. Madkour, 572

Algorithms; Computer applications; Optimum design; Structural engineering; Adaptive systems
On Adaptive Structural Design, William R. Spillers and Lewis Friedland, 480

Algorithms; Computer programs; Head losses; Hydraulics; Steady flow; Water distribution (applied)
Computer Analysis of Water Distribution Systems: Part I - Formulation of Equations, Chan F. Lam and M. L. Wolla, 173

Algorithms; Computers; Hydraulics; Pipe flow; Water distribution; Water supply
Efficient Algorithm For Distribution Networks, Pierre F. Lemieux, 545

Algorithms; Computers; Matrices (mathematics); Structural engineering; Topology
Algorithm for Matrix Bandwidth Reduction, Henry R. Grooms, 88

Algorithms; Engineering mechanics; Matrices (mathematics); Revisions; Stiffness matrix; Structural design; Structural members
Reanalysis for Limited Structural Design Modifications, Uri Kirsch and Moshe F. Rubinstein, 75

Algorithms; Matrices (mathematics); Matrix methods; Stiffness; Structural engineering
General Treatment of Structural Modifications, John H. Argyris and John R. Roy, 150

Alignment; Highways; Land use; Pipelines; Regional planning; Right-of-way; Right of way acquisition; Transmission towers
Joint Utilization of Rights-of-Way, Francis J. Stastny, 130

Alluvial channels; Bed load; Hydraulics; Tests; Tractive forces
Bed Load Transportation in Alluvial Channels, Satya P. Garg, Ashutosh K. Agrawal and Prem Raj Singh, 2

Alluvial deposits; Friction factor; Hydraulics; Open channel flow; Ripple marks
Ripple and Dune Phases in a Narrowly Graded Sand, Christopher John Pratt and Kenneth V.H. Smith, 296

Alluvial streams; Bank protection (waterways); France; Inland waterways; River regulation; River training; Thailand
Development of Bottom Panels in River Training, Maurice Remillieux, 300

Aluminum; Aluminum alloys; Field tests; Loads (forces); Structural engineering; Transmission towers
Guide for the Design of Aluminum Transmission Towers, by the Task Committee on Lightweight Alloys of the Committee on Metals of the Structural Division, Robert J. Brungraber, Chmn., 596

Aluminum; Folded plates; Honeycomb cores; Sandwich panels; Structural engineering
Failure Modes of Folded Sandwich Panel Roofs, Paul P. Fazio, 261

Aluminum; Girders; Shear strength; Structural engineering
Thin Aluminum Shear Webs, Maurice L. Sharp and John W. Clark, 5

Aluminum alloys; Field tests; Loads (forces); Structural engineering; Transmission towers; Aluminum
Guide for the Design of Aluminum Transmission Towers, by the Task Committee on Lightweight Alloys of the Committee on Metals of the Structural Division, Robert J. Brungraber, Chmn., 596

Amoeba; Chlorine; Cysts; Disinfection; Dysentery; Iodine; Meningitis; Microorganism control (water); Water treatment
Amoebic Cysticidal Properties of Halogens in Water, Richard Stringer and Cornelius W. Kruse, 98

Amplitude; Bedding materials; Friction; Sedimentation; Sediment transport
Bed-Material Transport and Bed Forms, Marion R. Carstens and Hilmi D. Altinbilek, 273

Amplitude; Chicago; Columns (supports); Loads (forces); Steels; Structural engineering; Tall buildings; Wind (meteorology)
Bundled-tube Structure for Sears Tower, Hal S. Iyengar, 509

Anaerobic conditions; Denitrification; Eutrophication; Kinetics; Nitrates; Sanitary engineering; Sewage treatment; Activated sludge
Process Kinetics for Denitrification, Walter K. Johnson, 448

Anaerobic digestion; Anaerobic processes; Computer applications; Mathematical models; Optimum design; Sanitary engineering; Wastewater treatment; Activated sludge
Optimal Design of Wastewater Treatment Systems by Enumeration, Gene F. Parkin and Richard R. Dague, 513

Anaerobic digestion; Eutrophication; Iron compounds; Phosphorus compounds; Activated sludge process
Anaerobic Digestion of Sludge Containing Iron Phosphate, Sudershan Malhotra, Thomas P. Parrillo and Alan Gene Hartenstein, 74

Anaerobic processes; Computer applications; Mathematical models; Optimum design; Sanitary engineering; Wastewater treatment; Activated sludge; Anaerobic digestion
Optimal Design of Wastewater Treatment Systems by Enumeration, Gene F. Parkin and Richard R. Dague, 513

Analogs; Aquifers; Ground water; Hydraulics; Hydrology; Salt water intrusion; Water pollution; Water resources
Hele-Shaw Model of Long Island Aquifer System, Michael A. Collins, Lynn W. Gelhar and John L. Wilson, III, 489

Analysis; Concrete (reinforced); Cooling towers; Design; Earthquakes; Loads (forces); Moments; Powerplants; Shells (structural forms); Structural engineering; Wind (meteorology)
Analysis and Design of Hyperbolic Cooling Towers, German Gurfinkel and Adolf Walser, 340

Analysis; Damping; Design data; Earthquakes; Repeated loading; Shear modulus; Soils; Stress-strain curves; Vibration
Shear Modulus and Damping in Soils: Design Equations and Curves, Bobby O. Hardin and Vincent P. Drnevich, 354

Analytical techniques; Dams (earth); Lakes; Mapping; Photogrammetric surveys; Surveys; Aerial surveys
Survey Design and Procedures, William E. Kreisle, 77

Anchorages; Bearing capacity; Models; Sands; Soil mechanics; Strains
Anchor Behavior in Sand, Thomas H. Hanna, Robert Sparks and Mehmet Yilmaz, 521

Angle iron; Buckling; Columns (supports); Inelastic action; Slenderness ratio; Structural engineering; Struts; Tees; Thickness ratio; Width
Buckling of Steel Angle and Tee Struts, John B. Kennedy and Madugula K.S. Murty, 547

Animal behavior; Books; Human engineering; Philosophy; Reviews; Technology
Anti-Technology--The New Myth, Samuel C. Florman, 53

Anisotropy; Consolidation; Settlement (structural); Soil mechanics; Time
Consolidation of a Layer Under a Strip Load, John T. Christian, Jan Willem Boehmer and Philippe P. Martin, 374

Anisotropy; Earth materials; Elastic theory; Reinforcement; Soil mechanics; Stratification
Elastic Theory Applied to Reinforced Earth, W. Jill Harrison and Charles M. Gerrard, 575

Anisotropy; Elastic properties; Finite element method; Mechanics; Structural engineering
Finite Element Method for Wood Mechanics, Adam Al-Dabbagh, James R. Goodman and Jozsef Bodig, 174

Antecedent precipitation; Hydraulics; India; Rainfall-runoff relationships; Runoff; Storms
Synthetic Storm Pattern and Run-off for Gauhati, India, M. Bandyopadnyay, 270

Apprenticeship; Construction; Costs; Delay time; Economics; Experience
Learning and Experience Curves, Marvin Gates and Amerigo Scarpa, 232

Aquatic plants; Biodegradation; Environmental engineering; Herbicides; Sanitary engineering; Water treatment
Herbicidal Control of Aquatic Plants, Edward O. Ganstad, 341

Aquatic plants; Industrial wastes; Land use; Population; Regulations; Sanitary engineering; Streams; Agriculture
Water Pollution - Facts and Fantasies, John M. Henderson, 390

Aqueducts; Conduits; Mortars (material); Pipelines; Pipe linings; Protective coatings; Steel pipes; Tunnels
Cement Mortar Lining of 20-Ft Diameter Steel Pipe, James E. Wolfe, 462

Aqueducts; Earthquakes; Manifolds; Pumps; Valves; Water; Water tunnels
Edmonston Pumping Plant: Nation's Mightiest, Robert B. Jansen, 465

Aqueducts; Inspection; Maintenance; Water pipes
The Undersea Aqueduct -- A New Concept in Transportation, Ellis L. Armstrong, 195

Aquifers; Artesian wells; Drainage; Irrigation; Pumping; Salinity; Tests; Agriculture
Pumping an Artesian Source for Water Table Control, Eugene J. Doering and Leo C. Benz, 344

Aquifers; Density; Hydraulics; Underground storage; Wells
Gravitational and Dispersive Mixing in Aquifers, Lynn W. Gelhar, John L. Wilson, III and John S. Miller, 588

Aquifers; Drainage; Ground water; Groundwater recharge; Irrigation; Permeability
Basin Recharge of the Ogallala Aquifer, Vladimir S. Aronovici, Arland D. Schneider and Ordie R. Jones, 104

Aquifers; Ground water; Hydraulics; Hydrology; Salt water intrusion; Water pollution; Water resources; Analogs
Hele-Shaw Model of Long Island Aquifer System, Michael A. Collins, Lynn W. Gelhar and John L. Wilson, III, 489

Arches; Buckling; Engineering mechanics; Sandwich structures
Nonlinear Buckling Analysis of Sandwich Arches, Parviz Sharifi and Egor P. Popov, 11

Arches; Buckling; Fixed structures; Hinged structures; Parabolic bodies; Torque
Lateral-Torsion Buckling of Parabolic Arches, Frank J. Tokarz and Raghbir S. Sandhu, 280

Arches; Design; Education; Moment distribution; Structural engineering
Hardy Cross and the Rise of Numerical Methods, James Michalos, 153

Arches; Dynamics; Engineering mechanics; Numerical analysis; Rings; Structural engineering; Vibration
Free In-Plane Vibration of Circular Arches, Anestis S. Veletsos, Walter J. Austin, Carlos A. Lopes Pereia and Shyr-Jen Wung, 176

Architecture; Bibliographies; History; Lattice design; Stability; Structural engineering
"Bibliography on Latticed Structures," by the Subcommittee on Latticed Structures of the Task Committee on Special Structures of the Committee on Metals of the Structural Division, Donald R. Sherman, Chmn., 365

Architecture; Buildings; Environmental engineering; Planning; Structural engineering; Systems engineering; Urban planning
Tall Buildings--A Technological Assessment, Thomas C. Kavanagh, 54

Armoring (streambed); Bed roughness; Degradation; Egypt; Hydraulics; River beds
River Bed Degradation After Closure of Dams, Hammad Y. Hammad, 220

Artesian wells; Drainage; Irrigation; Pumping; Salinity; Tests; Agriculture; Aquifers
Pumping an Artesian Source for Water Table Control, Eugene J. Doering and Leo C. Benz, 344

ASCE (Activities); ASCE (Policy); ASCE (Research); Civil engineering; Government policies; Professional activities; Research
Goals of Civil Engineering Research -- Its Responsiveness to the Needs, Desires and Aspirations of Man, ASCE Committee on Research, Robert F. Baker, Chmn., 599

ASCE (aims and activities); ASCE (executive secretary); ASCE (professional objectives); Social needs
Some Reflections at Retirement Time, William H. Wisely, 174

ASCE (awards & prizes); History; Hydraulic laboratories; Hydraulic laboratories; Hydraulics; Waterways experiment station
Hydraulicians are Human Too, Hunter Rouse, 257

ASCE (Board of Direction); ASCE (Committees); ASCE (Membership); ASCE (Registration of Engineers)
Changed ASCE Membership Requirements Proposed343

ASCE (Civil Engineering); ASCE (Education); Economics; Employment; Engineering education
A Professor Talks About Civil Engineering Education385

ASCE (Code of Ethics); ASCE (Executive Director); ASCE (Policy); ASCE (Professional Practice); Competitive bidding
ASCE Signs Consent Decree on Competitive Bidding, Eugene Zwoyer, 315

ASCE (Code of Ethics); ASCE (Professional Practice); Bids; Contractors; Contracts; Costs; Turnkey projects
Draft Guide to Turnkey Construction Contracts444

ASCE (code of ethics); Federal government
The Aftermath of Article Three, William H. Wisely, 1

ASCE (Committees); ASCE (Education); ASCE (Publications); Reports; Reviews; Sanitary engineering; Systems engineering
Professional Papers in Sanitary Engineering, By the Committee on Publications of the Sanitary Engineering Division, Roy E. Ramseier, Chmn., 461

ASCE (Committees); ASCE (Membership); ASCE (Registration of Engineers); ASCE (Board of Direction)
Changed ASCE Membership Requirements Proposed343

ASCE (committees); ASCE (professional activities); ASCE (service to members); ASCE (younger members); Reports
The Associate Member in ASCE, Committee on Younger Members of the Member Activities Division (PAC), Norman J. Overbeek, Chmn., 119

ASCE (committees); ASCE (professional activities); Economic factors; Salaries; Unionization
National ASCE Drafts Proposed Salary Guidelines9

ASCE (Committees); Buildings (codes); Lateral forces; Seismic design; Standards; Structural engineering
Basic Design Criteria of the Recommended Lateral Force Requirements and Commentary, By the Ad Hoc Committee on Direction Study of the Joint SEAOC-ASCE Committee on Seismic Forces of the Committee on Dynamic Forces of the Structural Division, Henry J. Degenkolb, Chmn., 433

ASCE (education); ASCE (policy); Minority groups; Professional activities
Training Minorities for Construction Work, Ewell W. Finley, 161

ASCE (Education); ASCE (Publications); Reports; Reviews; Sanitary engineering; Systems engineering; ASCE (Committees)
Professional Papers in Sanitary Engineering, By the Committee on Publications of the Sanitary Engineering Division, Roy E. Ramseier, Chmn., 461

ASCE (education); Careers; Engineering education; Professional development; Universities
University of Wisconsin Offers Professional Development Degree, John P. Klus and C. Allen Wortley, 20

ASCE (Education); Economics; Employment; Engineering education; ASCE (Civil Engineering)
A Professor Talks About Civil Engineering Education385

ASCE (Employment Conditions); ASCE (Professional Activities); Employee relations; Employment; Professional activities
Guideline: Employer--Engineer Relationship, Committee on Employment Conditions of the Professional Practice Division, Charles J. Stevens, Chmn., 583

ASCE (Employment Conditions); ASCE (Salaries and Fees); Collective bargaining; Engineering societies; Salaries; Unionization
Civil Engineer's Compensation - ASCE's Future, Daniel J. Smyers, 500

ASCE (Ethics); ASCE (Presidents); Bids; Civil engineering; Finance; Professional practice; Professional societies
State of the Society, Oscar S. Bray, 602

ASCE (Executive Director); ASCE (Finance)
A Report from the Executive Director on Membership Dues, Eugene Zwoyer, 516

ASCE (Executive Director); ASCE (Finance); ASCE (Members)
Executive Director, Eugene Zwoyer, 437

ASCE (Executive Director); ASCE (Policy); ASCE (Professional Practice); Competitive bidding; ASCE (Code of Ethics)
ASCE Signs Consent Decree on Competitive Bidding, Eugene Zwoyer, 315

ASCE (executive secretary); ASCE (professional objectives); Social needs; ASCE (aims and activities)
Some Reflections at Retirement Time, William H. Wisely, 174

ASCE (executive secretary); Dams; Disease vectors; Drainage; Ecology; Egypt; Erosion; Irrigation
People, Ecology and the Aswan High Dam, William H. Wisely, 67

ASCE (Finance); ASCE (Executive Director)
A Report from the Executive Director on Membership Dues, Eugene Zwoyer, 516

ASCE (Finance); ASCE (Members); ASCE (Executive Director)
Executive Director, Eugene Zwoyer, 437

ASCE (History); ASCE (Outstanding Civil Engineering); Canals; Locks (waterways); Navigable rivers
Great Falls Canal and Locks: Civil Engineering Landmark496

ASCE (History); Biographies; Civil engineering; Civil engineers; History
A Biographical Dictionary of American Civil Engineers, by the Committee on History and Heritage of American Civil Engineering, Neal FitzSimons, Chmn., 137

ASCE (insurance); Insurance; Liabilities; Professional activities; Professional practice
Professional Liability Insurance, Paul L. Genecki, 250

ASCE (local sections); California; Civil engineers; Salaries; Working conditions
California ASCE Sections Prepare Employment Guidelines, George S. Korbay and Ronald P. Gallagher, 25

ASCE (Members); ASCE (Executive Director); ASCE (Finance)
Executive Director, Eugene Zwoyer, 437

ASCE (members); ASCE (membership); Civil engineers; Employment; Professional activities; Professional practice; Registration
A Profile of ASCE Membership, George K. Wadlin, Jr., 312

ASCE (Membership); ASCE (Registration of Engineers); ASCE (Board of Direction); ASCE (Committees)
Changed ASCE Membership Requirements Proposed343

ASCE (membership); Civil engineers; Employment; Professional activities; Professional practice; Registration; ASCE (members)
A Profile of ASCE Membership, George K. Wadlin, Jr., 312

ASCE (membership); Employment; Professional societies; Registration
Profile of ASCE Membership, George K. Wadlin, Jr., 5

ASCE (National Affairs); ASCE (Policy); Buildings (codes); Foreign engineering; Housing; Urban planning
The Challenge to Civil Engineering, Dennis Warner, 339

ASCE (National Affairs); Civil engineering; Civil engineers; Legislation; Professional activities
Legislative Involvement, Stephen M. Olko, 573

ASCE (Outstanding Civil Engineering); Canals; Locks (waterways); Navigable rivers; ASCE (History)
Great Falls Canal and Locks: Civil Engineering Landmark496

ASCE (Policy); ASCE (Professional Practice); Competitive bidding; ASCE (Code of Ethics); ASCE (Executive Director)
ASCE Signs Consent Decree on Competitive Bidding, Eugene Zwoyer, 315

ASCE (Policy); ASCE (Research); Civil engineering; Government policies; Professional activities; Research; ASCE (Activities)
Goals of Civil Engineering Research -- Its Responsiveness to the Needs, Desires and Aspirations of Man, ASCE Committee on Research, Robert F. Baker, Chmn., 599

ASCE (Policy); Buildings (codes); Foreign engineering; Housing; Urban planning; ASCE (National Affairs)
The Challenge to Civil Engineering, Dennis Warner, 339

ASCE (policy); Minority groups; Professional activities; ASCE (education)
Training Minorities for Construction Work, Ewell W. Finley, 161

ASCE (Presidents); Bids; Civil engineering; Finance; Professional practice; Professional societies; ASCE (Ethics)
State of the Society, Oscar S. Bray, 602

ASCE (presidents); Civil engineering; Civil engineers
Annual Address, Samuel S. Baxter, 26

ASCE (presidents); Environmental engineering; Professional activities; Social needs
Antidote for Environmental Hysteria, Samuel S. Baxter, 180

ASCE (professional activities); ASCE (professional practice); ASCE (registration of engineers); Professional activities
Professional Recognition -- How?, James Gordon Clark, 335

ASCE (professional activities); ASCE (service to members); ASCE (younger members); Reports; ASCE (committees)
The Associate Member in ASCE, Committee on Younger Members of the Member Activities Division (PAC), Norman J. Overbeek, Chmn., 119

ASCE (professional activities); Economic factors; Salaries; Unionization; ASCE (committees)
National ASCE Drafts Proposed Salary Guidelines9

ASCE (Professional Activities); Employee relations; Employment; Professional activities; ASCE (Employment Conditions)
Guideline: Employer--Engineer Relationship, Committee on Employment Conditions of the Professional Practice Division, Charles J. Stevens, Chmn., 583

ASCE (Professional Objectives); ASCE (Professional Practice); ASCE (Registration of Engineers); Registration
Specialty Registration for Engineers, Thomas deS. Furman, 522

ASCE (professional objectives); Social needs; ASCE (aims and activities); ASCE (executive secretary)
Some Reflections at Retirement Time, William H. Wisely, 174

ASCE (professional practice); ASCE (registration of engineers); Professional activities; ASCE (professional activities)
Professional Recognition -- How?, James Gordon Clark, 335

ASCE (Professional Practice); ASCE (Registration of Engineers); Registration; ASCE (Professional Objectives)
Specialty Registration for Engineers, Thomas deS. Furman, 522

ASCE (Professional Practice); Bids; Contractors; Contracts; Costs; Turnkey projects; ASCE (Code of Ethics)
Draft Guide to Turnkey Construction Contracts444

ASCE (Professional Practice); Competitive bidding; ASCE (Code of Ethics); ASCE (Executive Director); ASCE (Policy)
ASCE Signs Consent Decree on Competitive Bidding, Eugene Zwoyer, 315

ASCE (public affairs forum); Professional activities
Guidelines for Engaging in Public Affairs Activities, by the Committee on Public Affairs of the Member Activities Division, James W. McPhillips, Chmn., 68

ASCE (Publications); Reports; Reviews; Sanitary engineering; Systems engineering; ASCE (Committees); ASCE (Education)
Professional Papers in Sanitary Engineering, By the Committee on Publications of the Sanitary Engineering Division, Roy E. Ramseier, Chmn., 461

ASCE (Registration of Engineers); ASCE (Board of Direction); ASCE (Committees); ASCE (Membership)
Changed ASCE Membership Requirements Proposed343

ASCE (registration of engineers); Professional activities; ASCE (professional activities); ASCE (professional practice)
Professional Recognition -- How?, James Gordon Clark, 335

ASCE (Registration of Engineers); Registration; ASCE (Professional Objectives); ASCE (Professional Practice)
Specialty Registration for Engineers, Thomas deS. Furman, 522

ASCE (Research); Civil engineering; Government policies; Professional activities; Research; ASCE (Activities); ASCE (Policy)
Goals of Civil Engineering Research -- Its Responsiveness to the Needs, Desires and Aspirations of Man, ASCE Committee on Research, Robert F. Baker, Chmn., 599

ASCE (Salaries and Fees); Collective bargaining; Engineering societies; Salaries; Unionization; ASCE (Employment Conditions)
Civil Engineer's Compensation - ASCE's Future, Daniel J. Smyers, 500

ASCE (service to members); ASCE (younger members); Reports; ASCE (committees); ASCE (professional activities)
The Associate Member in ASCE, Committee on Younger Members of the Member Activities Division (PAC), Norman J. Overbeek, Chmn., 119

ASCE (younger members); Civil engineers; Education; Professional activities; Professional advancement
Professional Development for Consulting Engineers, Gerald L. Baker, 166

ASCE (younger members); Reports; ASCE (committees); ASCE (professional activities); ASCE (service to members)
The Associate Member in ASCE, Committee on Younger Members of the Member Activities Division (PAC), Norman J. Overbeek, Chmn., 119

Ashes; Drainage; Fly ash; Paper mills; Permeability; Sanitary engineering; Sludge; Sludge disposal
Permeability of High Ash Papermill Sludge, Orlando B. Andersland and Robert W. Laza, 576

Ashes; Materials; Powerplants; Soil mechanics; Solid wastes; Aggregates
Bottom Ash: An Engineering Material, Roger K. Seals, Lyle K. Moulton and Byron E. Ruth, 224

Asphalt emulsions; Cationic asphalt emulsions; Cement grouts; Foundations; Grout curtains; Grouting
Experimental Cationic Asphalt Emulsion Grouting, Lloyd R. Gebhart, 446

Asphalts; Bituminous concretes; Concrete; Dams; Dikes; Embankments; Pumped storage; Reservoirs; Sealers; Tests
Bituminous Blanket for Dike, F. P. Robertson and Johannes Lehnert, 537

Asphalts; Dam construction; Dams (rockfill); Hydroelectric powerplants; Seepage control
Stone Asphalt Cores Waterproof French Dams, Victorien Lelu, 206

Assessments; Drainage; Droughts; Environments; Social needs; Water resources
Assessing Social Consequences of Water Deficiencies, William K. Johnson, 60

Astronomy; Computation; Navigation; Surveys
Solar Astronavigation in High Latitudes, Gerald W. Johnson and James L. Clapp, 29

Atmospheric pressure; Barometers; Density; Measuring instruments; Statistical analysis; Surveying; Surveying instruments; Temperature
Barometric Leveling Analysis, James D. Gruendler, Frederick P. Thomack and James L. Clapp, 313

Attenuators; Collisions; Highways; Safety; Safety devices; Tests; Transportation
Recent Developments in Roadside Crash Cushions, John G. Viner, 99

Australia; Box girders; Bridge failure; Bridges (box girder); Buckling
Poor Structural Design Brings West Gate Bridge Failure, John J. Kozak and Charles Seim, 272

Autocorrelation; Hydraulics; Mathematical models; Probability theory; Statistical analysis; Stochastic models; Stream flow
Parameter Estimation for First-Order Autoregressive Model, Luis E. Garcia-Martinez, 426

Automatic control; Elevated railroads; Mass transportation; Tires; Tramways; Urban transportation
Transit System Employs Three Modes, Robert F. Seedlock, 226

Automation; Buildings (hospitals); Design; Professional activities; Public health; Tests
Multiphase Health Screening Facility Design, Paul R. DeCicco, 593

Automation; Computers; Design; Geometry; Optimization; Structural engineering; Trusses
Automated Design of Trusses for Optimum Geometry, Garret N. Vanderplaats and Fred Moses, 202

Automation; Concrete (reinforced); Parking facilities; Rapid transit railways; Transportation
Novel Features on Lindenwold Line, Richard E. Pinkham, 187

Automation; Electric drives; Pallets; Suspension; Transportation; Vehicles
Pallet Systems for Integrating Urban Transportation, David Gordon Wilson, 212

Automobiles; Buses (vehicles); Mass transportation; Social needs; Urban planning; Urban transportation
Shopping and Work Trips in the Black Ghetto, Charles B. Notess, 325

Automobiles; Computers; Dynamics; Highways; Safety; Traffic engineering; Transportation
Vehicle-Roadway Interaction Studies by Math Model, Hayes E. Ross, Jr. and Don L. Ivey, 249

Automobiles; Ethnic groups; Mobility; Passenger transportation; Retirement; Transportation; Urban transportation
Transportation and Retirement, Frances M. Carp, 484

Awards; Civil engineers; Engineering education; Geodetic surveys; Mapping; Reports; Surveys
Status Report of Surveying and Mapping Division, William A. White, 121

Axial compression; Buckling; Elastic-plastic analysis; Imperfections; Structural engineering
Post-Buckling of Axially Compressed Plates, Archibald N. Sherbourne and Robert M. Korol, 477

Axial compression; Buckling; Forecasting; Loads (forces); Plates; Structural engineering; Ultimate strength
Strength Predictions of Plates in Uniaxial Compression, Robert M. Korol and Archibald N. Sherbourne, 444

Axial flow; Boundary layer; Engineering mechanics; Flow resistance; Fluid flow; Shear stress; Turbulence
Helical Flow Through Concentric Annulus, M. H. Abdul Khader and H. Suresh Rao, 231

Axisymmetric flow; Computers; Eddies; Engineering mechanics; Inviscid flow; Shear flow; Velocity
Inviscid Shear Flow with Corner Eddies, P.A. Aswatha Narayana and M.V. Krishna Murthy, 81

Backfills; Corrugated metal pipes; Deformation; Soil pressure
New Design Method for Corrugated Steel Pipe, Alma P. Moser and Reynold K. Watkins, 291

Backwashing; Desorption; Filters; Filtration; Sanitary engineering; Suspended solids; Water treatment
Desorption and Retentivity of Filtering Materials, Andre Leclerc and Truong Tri Vu, 498

Backwater; Dams (movable); Dikes; Gates; Ice; Ice control; Mississippi River; Waterways; Aeration
Reducing Ice Formation at Navigation Dams, Henry W. Harich, 387

Bacteria; Beaches; Chlorination; Sanitary engineering; Water pollution; Aeration
Pneumatic Barrier and Beach Pollution, Martin S. Hertzendorf, Joseph V. Fiore, Herbert E. Klei and I. J. Kopelman, 304

Bacteria; Calcium carbonates; Disinfection; Environmental engineering; Water quality; Water treatment
Effect of Calcium Bicarbonate on Disinfection by Halogens, Lawrence N. Kuzminski, Tsuan H. Feng and Chih C. Liu, 222

Bacteria; Chemical stabilization; Chlorine; Public health; Recreation facilities; Research; Sanitary engineering
Bactericidal Properties of Chlorsulfamates, John E. Delaney and J. Carrell Morris, 209

Bacteria; Chlorination; Coliform bacteria; Sanitary engineering; Sewage treatment; Waste treatment
Problems in Obtaining Adequate Sewage Disinfection, Harvey F. Collins, Robert E. Selleck and George C. White, 66

Bacteria; Chlorine; Detention reservoirs; Filtration; Hydraulics; Pollution; Sanitary engineering; Settling basins; Sewage disposal; Tanks (containers); Trickling filters
Chlorine Disinfection in Final Settling Basins, Darrell W. Monroe and Donald C. Phillips, 296

Bacteriology; Enteric bacteria; Sanitary engineering; Waste stabilization ponds; Algae
Bacterial Dieoff in Ponds, Ernst M. Davis and Earnest F. Gloyna, 193

Baffles; Blocks; Energy; Hydraulic jump; Hydraulics; Loads (forces)
Drag Forces on Baffle Blocks in Hydraulic Jump, David R. Basco and John R. Adams, 72

Baffles; Conformal mapping; Drag; Hydraulics; Supercritical flow; Weir crests
Supercritical Flow Over Sills, John A. McCorquodale and M. K. Giratalla, 239

Baffles; Hydraulics; Sanitary engineering; Siphons; Stilling basins; Storm water; Water pollution
Stilling Pond Storm Overflow Studies, Y. R. Reddy and John Pickford, 428

Balancing; Bridges (cable-stayed); Computer applications; Loads (forces)
Load Balancing Analysis of Cable Stayed Bridges, Benjamin E. Lazar, Michael S. Troitsky and Matthew McC. Douglass, 379

Baling; Magnetic separators; Refuse; Refuse disposal; Sanitary engineering; Sanitary landfill; Solid wastes
Refuse Reclamation and Recycle, Joseph F. Malina, Jr. and William T. Morgan, 564

Bank protection (waterways); France; Inland waterways; River regulation; River training; Thailand; Alluvial streams
Development of Bottom Panels in River Training, Maurice Remillieux, 300

Barges; Bridges (movable); Docks; Harbor facilities; Harbors
Multipurpose Land-Water Transfer Facility, C. Adrian Arnold, 335

Barges; Coastal engineering; Marine transportation; Towing; Tugboats
Ocean Tug-Barge Systems, Lawrence R. Glosten, 243

Barometers; Density; Measuring instruments; Statistical analysis; Surveying; Surveying instruments; Temperature; Atmospheric pressure
Barometric Leveling Analysis, James D. Gruendler, Frederick P. Thomack and James L. Clapp, 313

Bars; Engineering mechanics; Point set topology; Polygons
Torsion of Bars of Regular Polygonal Cross Section, Enrique Romanelli, Mario J. Maurizi and Patricio A. Laura, 191

Bars; Jets; Trashracks; Vibration; Water flow
Flow-Induced Vibrations of Trashrack Bars, J. W. Fortey and Robert F. Tiry, 230

BART; Rail transportation; Rapid transit railways; Transportation; Urban transportation
BART Rail Transit System Begins Operations505

Base courses; Cracking; Shrinkage; Soil cement; Soil mechanics; Stresses; Viscoelasticity
Viscoelastic Shrinkage Stress in Soil-Cement Base, Bal K. Sanan and Kalankamary P. George, 598

Basins; Coastal engineering; Harbors; Wave propagation
Oscillations in Harbors with Connected Basins, Jiin-Jen Lee and Fredric Raichlen, 351

Batter piles; Foundations; Lateral forces; Loading; Pile foundations; Pile groups
Practical Formulas for Loads and Movements in Battered Pile Foundations (without a computer), Murray I. Brill, 284

Bauschinger effect; Beams (supports); Columns (supports); Concrete (reinforced); Flexural strength; Structural engineering
Reinforced Concrete Members with Cyclic Loading, Robert Park, Dudley Charles Kent and Richard A. Sampson, 310

Beaches; Chlorination; Sanitary engineering; Water pollution; Aeration; Bacteria
Pneumatic Barrier and Beach Pollution, Martin S. Hertzendorf, Joseph V. Fiore, Herbert E. Klei and I. J. Kopelman, 304

Beach ridges; Coastal engineering; Equilibrium; Harbors; Hydraulic models; Movable bed models; Profiles; Scale effect
Equilibrium Beach Profile Scale-Model Relationship, Edward K. Noda, 558

Beam columns; Beams (supports); Buckling; Columns (supports); Stability; Steels; Structural engineering
Finite Deformation of Biaxially Loaded Columns, Lawrence A. Soltis and Paul P. Christiano, 568

Beam columns; Bending; Plasticity; Stability; Structural engineering
Simple Interaction Equations for Beam-Columns, Wai F. Chen and Toshio Atsuta, 326

Beam columns; Buckling; Columns (supports); Computation; Dynamic stability; Engineering mechanics; Stability; Torsion; Vibration
Coupled, Nonconservative Stability-Finite Element, C. D. Mote, Jr. and Gerald Y. Matsumoto, 286

Beam columns; Buckling; Dynamics; Engineering mechanics; Mathematical models; Stability; Vibration
Beams Subjected to a Follower Force Within the Span, Jack C. Wiley and Richard E. Furkert, 569

Beam columns; Buckling; Framed structures; Sidesway; Stability; Structural engineering
Approximate Determination of Frame Critical Loads, F. David Edmonds and Ian C. Medland, 161

Beam columns; Buckling; Frames; Stability; Structural engineering
Unbraced Multistory Steel Frames with Wind Load, E. Whitman Wright, 78

Beam columns; Buildings; Columns (supports); Skyscrapers; Steel structures; Structural engineering
Aspects of Column Design in Tall Steel Buildings, John Springfield and Peter F. Adams, 258

Beam columns; Cables (ropes); Economic analysis; Steels
Economical Design of Prestressed Plate Girder, Miloslav Tochacek and Champa L. Mehta, 298

Beams (structural); Composite structures; Concrete (reinforced); Structural engineering; Torsion
Composite Beams in Torsion, Conrad P. Heins, Jr. and John T.C. Kuo, 275

Beams (supports); Bending; Curved beams; Stresses; Structural engineering; Webs (supports)
Bending Behavior of Cylindrical Web Panels, Charles G. Culver, Clive L. Dym and Darryl K. Brogan, 507

Beams (supports); Bolted joints; Joints (connections); Lap joints; Moment distribution; Structural analysis; Structural engineering
Double Overlap Beam, Oliver A. Baer, 542

Beams (supports); Bonding strength; Concrete (reinforced); Cracking; Slipping; Structural engineering
Cracking and Bond Slip in Concrete Beams, Bandaru Venkateswarlu and Hans Gesund, 578

Beams (supports); Boundary value problems; Buckling; Composite structures; Rotation; Structural engineering
Moment-Rotation Curves for Locally Buckling Beams, J. Jay Climenhaga and R. Paul Johnson, 290

Beams (supports); Buckling; Cantilevers; Stability; Structural engineering
Stability of Monosymmetric Beams and Cantilevers, John M. Anderson and Nicholas S. Trahair, 122

Beams (supports); Buckling; Columns (supports); Stability; Steels; Structural engineering; Beam columns
Finite Deformation of Biaxially Loaded Columns, Lawrence A. Soltis and Paul P. Christiano, 568

Beams (supports); Buckling; Deflection; Strength; Structural engineering
Alternative Approach to Light-Gage Beam Design, James Rhodes and James M. Harvey, 9

Beams (supports); Buckling; Floors; Structural engineering; Timber construction; Wooden structures
Lateral Stability of Beam and Deck Structure, Paul M. Jenkinson and John J. Zahn, 181

Beams (supports); Buckling; I beams; Stability; Structural engineering
Elastic Stability of Tapered I-Beams, Sritawat Kitipornchai and Nicholas S. Trahair, 165

Beams (supports); Buckling; Structural engineering; Torsion
Lateral Buckling of Constrained Beams, Thomas G. Morrison, 199

Beams (supports); Buildings; Reinforcement; Stresses; Structural engineering; Tests
Tests on Beams with Reinforced Web Openings, Peter B. Cooper and Robert R. Snell, 189

Beams (supports); Columns (supports); Compaction; Concrete; Consolidation; Distribution; Mass concrete; Placement; Reinforcement; Slabs; Walls
Pertinent Techniques for Compacting Concrete, Shu-t'ien Li and Donald A. Stewart, 429

Beams (supports); Columns (supports); Concrete (reinforced); Flexural strength; Structural engineering; Bauschinger effect
Reinforced Concrete Members with Cyclic Loading, Robert Park, Dudley Charles Kent and Richard A. Sampson, 310

Beams (supports); Concrete (prestressed); Concrete (reinforced); Cracking; Spacing; Structural engineering
Theory of Cracking in Concrete Members, Arthur D. Edwards and Andre Picard, 584

Beams (supports); Concrete (reinforced); Reinforcement; Research; Shear strength; Structural engineering; Tests; Torsion
Total Interaction Method for Torsion Design, K. S. Rajagopalan, Umakanta Behera and Phil M. Ferguson, 467

Beams (supports); Concrete (reinforced); Shear strength; Structural engineering; Tests
Shear Strength of Large Beams, Howard P.J. Taylor, 533

Beams (supports); Contact pressure; Foundations; Isotropy; Soil mechanics; Structural engineering
Behavior of Crossed Beams on Elastic Foundations, Ami Glassman, 125

Beams (supports); Curved beams; Engineering mechanics; Stresses; Torsion; Tubes; Warpage
Torsion and Flexure of Curved, Thin-Walled Beams or Tubes, Ray N. Nitzsche and Robert E. Miller, 382

Beams (supports); Cyclic loads; Earthquakes; Joints (junctions); Structural engineering; Welding
Beam-Column Subassemblages Under Repeated Loading, Vitelmo V. Bertero, Egor P. Popov and Helmut Krawinkler, 268

Beams (supports); Deflection; Engineering mechanics; Mathematical models; Probability theory; Statics
Statics of Random Beams, Devendra K. Shukla and Robert M. Stark, 600

Beams (supports); Deflection; Graphs (charts); Structural analysis
Design Aid for Deflection Calculation for a Uniformly Loaded Flexural Member, Thomas M. Chura, 114

Beams (supports); Joints (connections); Loads (forces); Structural engineering; Tubes
Strength of Square-Tube Connections Under Combined Loads, Roger L. Brockenbrough, 581

Beams (supports); Numerical analysis; Structural engineering; Torsion; Torsional strength
Torsion of Nonprismatic Beams of Open Section, Donald R. Evick and Conrad P. Heins, Jr., 587

Beams (supports); Plates; Runge-Kutta method; Stiffness methods; Structural engineering
Nonlinear Beam and Plate Elements, Jimmy H. Smith, 158

Beams (supports); Specifications; Structural design; Structural engineering; Webs (supports)
Suggested Design Guides for Beams with Web Holes, by the Subcommittee on Beams with Web Openings of the Task Committee on Flexural Members of the Structural Division, John E. Bower, Chmn., 30

Bearing capacity; Bending stress; Bricks; Buildings; Computer programs; Computers; Masonry; Shear; Structural engineering; Walls; Wind (meteorology)
Computer Design of Engineered Brick Masonry, Alan H. Yorkdale and Robert P. Anderson, 271

Bearing capacity; Bridges (piers); Foundations; Piers; Piles (foundations); Settlement (structural); Soil mechanics
Load Settlement Prediction for Piles and Piers, Harry G. Poulos, 439

Bearing capacity; Cohesionless soils; Footings; Foundations; Soil mechanics
Bearing Capacity Theory From Experimental Results, A. Verghese Chummar, 561

Bearing capacity; Deformation; Earth pressure; Ocean engineering; Pore water pressure; Soil mechanics; Time dependence; Underwater construction
Breakout Resistance of Objects Embedded in Ocean Bottom, Aleksandar Sedmak Vesic, 19

Bearing capacity; Deformation; Finite elements; Soil mechanics; Strains; Stresses
Finite Element Analysis of Strain-Softening Clay, Kaare Hoeg, 141

Bearing capacity; Foundations; Pile driving; Pile foundations; Pile structures; Soil mechanics; Soil resistivity
Soil Resistance Predictions from Pile Dynamics, Frank Rausche, Fred Moses and George G. Goble, 481

Bearing capacity; Foundations; Settlement (structural); Shear modulus; Soil mechanics
Initial Settlement of Structures on Clay, David J. D'Appolonia, Harry G. Poulos and Charles C. Ladd, 43

Bearing capacity; Impact tests; Penetration; Projectiles; Sands; Soil mechanics
Low Velocity Projectile Penetration, Wen L. Wang, 104

Bearing capacity; Models; Sands; Soil mechanics; Strains; Anchorages
Anchor Behavior in Sand, Thomas H. Hanna, Robert Sparks and Mehmet Yilmaz, 521

Bearing pads; Bridges (piers); Elastomers; Reinforcement (structures); Rubber
Elastomeric Bridge Bearings, Charles E. Rejcha, 233

Bearing values; Compaction tests; Consolidation; Embankments; Field density; Fly ash; Power; Shear strength
Fly Ash as Structural Fill, Anthony M. DiGioia and William L. Nuzzo, 175

Bedding materials; Friction; Sedimentation; Sediment transport; Amplitude
Bed-Material Transport and Bed Forms, Marion R. Carstens and Hilmi D. Altinbilek, 273

Bedding materials; Gravel; Hydraulic pressure; Leakage; Sanitary engineering; Sewage disposal; Sewage filtration; Sewers
Sanitary Sewer Bedding Scored as Underdrain Conduit, Robert L. McFall, 240

Bedding materials; Hydraulics; Materials; Ocean engineering
Fluid-Dynamic Consideration of Bottom Materials, Hormoz Pazwash and James M. Robertson, 18

Bed forms; Hydraulics; Sedimentation; Sediment transport
Critical Review of Sediment Transport Experiments, Richard H. Cooper, Allan W. Peterson and Thomas Blench, 247

Bed load; Bedload movement; Hydraulics; Rivers; Sedimentation; Streams
Sediment Discharge Computation Procedures, Nick Tywoniuk, 213

Bed load; Bedload movement; Hydraulics; Sedimentation; Sediments; Stream flow; Temperature
Temperature Effects in Low-Transport, Flat-Bed Flows, Brent D. Taylor and Vito A. Vanoni, 412

Bed load; Canals; Channels; Desilting; Hydraulic models; Hydraulics; Sedimentation; Streams; Suspended sediments
Chapter V: Sediment Control Methods: C. Control of Sediment in Canals, By the Task Committee on Preparation of Sedimentation Manual, Committee on Sedimentation of the Hydraulics Division, Vito A. Vanoni, Chmn., 455

Bed load; Channels; Flumes; Hydraulics; Pipe flow; Rivers; Sediments
Friction Factors in Solid Material Laden Systems, Ertan R. Acaroglu, 241

Bed load; Hydraulics; Laboratory tests; Sands; Sediment transport; Streams
Laboratory Study of Transport of Fine Sand, Joe C. Willis, Neil L. Coleman and Wilbert M. Ellis, 183

Bed load; Hydraulics; Open channel flow; Sediment deposits; Suspended load; Temperature
Temperature Effects in High-Transport, Flat-Bed Flows, Brent D. Taylor and Vito A. Vanoni, 597

Bed load; Hydraulics; Rivers; Sedimentation; Sediment load
Sedimentation Transportation Mechanics: G. Fundamentals of Sediment Transportation, Task Committee on Preparation of Sedimentation Manual, Committee on Sedimentation, Vito A. Vanoni, Chmn., 64

Bed load; Hydraulics; Rivers; Sediment transport
Sediment Transport Measurements in Gravel River, Albert B. Hollingshead, 47

Bed load; Hydraulics; Tests; Tractive forces; Alluvial channels
Bed Load Transportation in Alluvial Channels, Satya P. Garg, Ashutosh K. Agrawal and Prem Raj Singh, 2

Bedload movement; Hydraulics; Rivers; Sedimentation; Streams; Bed load
Sediment Discharge Computation Procedures, Nick Tywoniuk, 213

Bedload movement; Hydraulics; Sedimentation; Sediments; Stream flow; Temperature; Bed load
Temperature Effects in Low-Transport, Flat-Bed Flows, Brent D. Taylor and Vito A. Vanoni, 412

Bedload movement; Sedimentation; Sediment load
Einstein Bed-Load Function at High Sediment Rates, Hans Albert Einstein and Farouk M. Abdel-Aal, 117

Bed movements; Channel stabilization; Channels (waterways); Reports; Rivers; Sedimentation
Sediment Control Methods: B. Stream Channels, by the Task Committee on Preparation of Sedimentation Manual, Committee on Sedimentation, Vito A. Vanoni, Chmn., 391

Bed movements; Channels (waterways); Hydraulics; Ripple marks; Sand waves; Sedimentation
Initiation of Ripples by Artificial Disturbances, Philip B. Williams and Patrick H. Kemp, 328

Bed roughness; Degradation; Egypt; Hydraulics; River beds; Armoring (streambed)
River Bed Degradation After Closure of Dams, Hammad Y. Hammad, 220

Beds under water; Dikes; Erosion; Hydraulics; Sands; Scour; Vortices
Erosion of Sand Beds Around Spur Dikes, Mohammad Akram Gill, 476

Behavior; Forecasting; Modal split; Traffic surveys; Transportation models; Urban planning
Behavioral Models in Transportation Planning, Frank E. Horton, 234

Bending; Biaxial loads; Columns (supports); Limit design method; Structural engineering
Interaction Equations for Biaxially Loaded Sections, Wai F. Chen and Toshio Atsuta, 245

Bending; Curved beams; Stresses; Structural engineering; Webs (supports); Beams (supports)
Bending Behavior of Cylindrical Web Panels, Charles G. Culver, Clive L. Dym and Darryl K. Brogan, 507

Bending; Deformation; Engineering mechanics; Finite elements; Plates; Shear
Some Elements for Analysis of Plate Bending, Robert D. Cook, 590

Bending; Deformation; Loads (forces); Pipeline transportation; Pipes; Reactions (mechanics); Structural analysis
Systematic Stress Analysis of Circular Pipe, Junkichi Katoh, 584

Bending; Plasticity; Stability; Structural engineering; Beam columns
Simple Interaction Equations for Beam-Columns, Wai F. Chen and Toshio Atsuta, 326

Bending stress; Bricks; Buildings; Computer programs; Computers; Masonry; Shear; Structural engineering; Walls; Wind (meteorology); Bearing capacity
Computer Design of Engineered Brick Masonry, Alan H. Yorkdale and Robert P. Anderson, 271

Bending stress; Ice; Permafrost; Pipelines; Settlement (structural); Soil mechanics; Thawing
Settlement of Pipeline on Thawing Permafrost, Andrew C. Palmer, 276

Benefit cost analysis; Budget estimates; Investment; Planning; Professional activities
Budget Constraints and Multiobjective Planning, Arthur Maass and David C. Major, 463

Benefit cost analysis; Canada; Economic analysis; Highway engineering; Highway planning; Highways; Investments; Land use; Regional planning; Transportation
Programming of Regional Highway Investments, Bruce G. Hutchinson, 269

Benefit-cost ratios; Community development; Noise reduction; Real property; Transportation; Air pollution
Community Values in Transport Network Evaluation, Dan G. Haney and George E. Klein, 449

Benefit-cost ratios; Construction; Construction industry; Craftsmen; Management; Motivation
Motivation of Construction Craftsmen, Charles R. Schrader, 453

Benefit-cost ratios; Construction; Costs; Financing
Project Selection Based on Benefits and Costs, Michael Raymond Toakley and John F. Brotchie, 308

Benefit-cost ratios; Costs; Federal agencies; Highways; Safety; Signals; Traffic
Federal Experience in TOPICS, Hugh B. Henry, 292

Benefit-cost ratios; Economic analysis; Flood control; Hydraulics; Hydrology; Statistical analysis
Bias in Computed Flood Risk, Clayton H. Hardison and Marshall E. Jennings, 188

Benefit-cost ratios; Esthetics; Planning; Site selection; Systems engineering
Inclusion of Social Values in Facility Location Planning, David Morris, 167

Benthic flora; Estuaries; Nutrition; Plants; Productivity; Sanitary engineering; Sea grasses
Role Of Benthic Plants in Fertilized Estuary, Thomas D. Waite and Ralph Mitchell, 482

Biaxial loads; Columns (supports); Limit design method; Structural engineering; Bending
Interaction Equations for Biaxially Loaded Sections, Wai F. Chen and Toshio Atsuta, 245

Biaxial stresses; Concrete; Structural engineering
Biaxial Stress-Strain Relations for Concrete, Tony C.Y. Liu and Arthur H. Nilson, 247

Bibliographies; Construction; Probability theory; Safety; Safety engineering; Structural engineering
Structural Safety--A Literature Review, Task Committee on Structural Safety of the Administrative Committee on Analysis and Design for the Structural Division, Alfredo H.S. Ang, Chmn., 214

Bibliographies; Engineering education; History; Planning; Urban planning
City Planning Bibliography, George C. Bestor and Holway R. Jones, 266

Bibliographies; History; Lattice design; Stability; Structural engineering; Architecture
"Bibliography on Latticed Structures," by the Subcommittee on Latticed Structures of the Task Committee on Special Structures of the Committee on Metals of the Structural Division, Donald R. Sherman, Chmn., 365

Bibliographies; Information retrieval; Publications; Transportation; Airports
List of Information Sources for Airport Planners, Robert K. Palmer, 65

Bids; Civil engineering; Finance; Professional practice; Professional societies; ASCE (Ethics); ASCE (Presidents)
State of the Society, Oscar S. Bray, 602

Bids; Claims (contracts); Construction; Contracts; Rock mechanics
Changed Soil and Rock Conditions in Construction, George F. Sowers, 83

Bids; Construction; Construction industry; Contractors; Probability theory; Statistical analysis
Competitive Bidding: The Probability of Winning, Neal B.H. Benjamin, 601

Bids; Construction; Contract administration; Contractors; Contract terms; USCOLD
Responsibilities of the Engineer and the Contractor Under Fixed-Price Construction Contracts, Wayne S. Byrne, 257

Bids; Contractors; Contracts; Costs; Turnkey projects; ASCE (Code of Ethics); ASCE (Professional Practice)
Draft Guide to Turnkey Construction Contracts444

Bioassay; Estuaries; Fishkill; Nuclear electric power generation; Powerplants; Sanitary engineering; Temperature; Thermal shock; Water pollution
Parameters Necessary for Analyzing Thermal Bioassays, Robert D. Smith, 569

Biochemical oxygen demand; Biological treatment; Mathematical models; Oxygen transport mechanisms; Plastics; Sanitary engineering; Trickling filters
Oxygen Theory in Biological Treatment Plant Design, Dilip S. Mehta, Harry H. Davis and Robert P. Kingsburg, 360

Biochemical oxygen demand; Concrete (reinforced); Hydrology; Pollution control; Sanitary engineering; Sewage; Water quality
In-Line Structure Stores and Treats Combined Overflows, Theodore G. Biehl and David M. Waring, 398

Biochemical oxygen demand; Dispersion; Dissolved oxygen; Sanitary engineering; Stream pollution
Effects of Dispersion on DO-sag in Uniform Flow, Wen-Hsiung Li, 251

Biochemical oxygen demand; Estuaries; Mathematical models; Oxygen demand; Sanitary engineering; Stochastic processes; Water pollution
Stochastic Model of BOD and OD in Segmented Estuary, William R. Schofield and Richard G. Krutchkoff, 488

Biochemical oxygen demand; Filter materials; Filters; Laboratory tests; Sanitary engineering
Hydraulically Ventilated Underground Filter, David K. Hills and Ray B. Krone, 128

Biochemical oxygen demand; Government; Nitrogen oxides; Sanitary engineering; Water pollution; Water treatment plants
Implications of Nitrogenous BOD in Treatment Plant Design, Russell C. Mt. Pleasant and Warren Schlickenrieder, 82

Biodegradation; Environmental engineering; Herbicides; Sanitary engineering; Water treatment; Aquatic plants
Herbicidal Control of Aquatic Plants, Edward O. Ganstad, 341

Bioengineering; Buildings (hospitals); Civil engineering; Engineering education; Health; Systems engineering
Civil Engineering and National Goals in Bioengineering, George Bugliarello, 591

Bioengineering; Hydraulics; Viscosity
Streamlines in Two-Dimensional Laminar Branch Flows, David Charles Blest, 127

Biographies; Civil engineering; Civil engineers; History; ASCE (History)
A Biographical Dictionary of American Civil Engineers, by the Committee on History and Heritage of American Civil Engineering, Neal FitzSimons, Chmn., 137

Biological treatment; Capital costs; Industrial wastes; Sanitary engineering; Sewage treatment
Design and Economics of Joint Wastewater Treatment, W. Wesley Eckenfelder, Jr., 261

Biological treatment; Mathematical models; Oxygen transport mechanisms; Plastics; Sanitary engineering; Trickling filters; Biochemical oxygen demand
Oxygen Theory in Biological Treatment Plant Design, Dilip S. Mehta, Harry H. Davis and Robert P. Kingsburg, 360

Biota; Dissolved oxygen; Environmental engineering; Hydroelectric power generation; Mathematical models; Thermal stratification; Water quality
Predicting Quality Effects of Pumped Storage, Carl W. Chen and Gerald T. Orlob, 255

Bituminous coatings; Concrete (reinforced); Costs; Critical path method; Highways; Pavements; Transportation
Rehabilitating Chicago's Expressways, Thomas T. Morimoto, 541

Bituminous concretes; Concrete; Dams; Dikes; Embankments; Pumped storage; Reservoirs; Sealers; Tests; Asphalts
Bituminous Blanket for Dike, F. P. Robertson and Johannes Lehnert, 537

Blasting; Construction; Environments; Excavation; Explosives; Predictions; Quarrying
Rapid Excavation With Explosives, Richard H. Groves and Robert L. LaFrenz, 380

Blasting; Costs; Excavation; Foundations; Installation; Power; Power lines; Railroads; Transmission lines
Powerline Foundations Installed along Railroad Tracks, Roger S. Chapman, 462

Blasting; Dams; Embankments; Excavation; Foundations; Grouting; Soil mechanics
Foundation Treatment for Embankment Dams on Rock, Elmer W. Stroppini, Donald H. Babbitt and Henry E. Struckmeyer, 493

Blast loads; Deformation; Dynamic structural analysis; Engineering mechanics
Displacement Bounds for Blast Loaded Structures, Walter J. Morales, 410

Blast loads; Dynamic loads; Dynamics; Engineering mechanics; Plasticity
Dynamic Response of Nonlinear Media at Large Strains, Joseph H. Heifitz and Carl J. Costantino, 603

Blocks; Energy; Hydraulic jump; Hydraulics; Loads (forces); Baffles
Drag Forces on Baffle Blocks in Hydraulic Jump, David R. Basco and John R. Adams, 72

Bolted joints; Bolts; Structural design; Structural engineering; Tests
Behavior and Design of Shingle Joints, Edward H. Power and John W. Fisher, 454

Bolted joints; Joints (connections); Lap joints; Moment distribution; Structural analysis; Structural engineering; Beams (supports)
Double Overlap Beam, Oliver A. Baer, 542

Bolts; Structural design; Structural engineering; Tests; Bolted joints
Behavior and Design of Shingle Joints, Edward H. Power and John W. Fisher, 454

Bonding strength; Concrete (reinforced); Cracking; Slipping; Structural engineering; Beams (supports)
Cracking and Bond Slip in Concrete Beams, Bandaru Venkateswarlu and Hans Gesund, 578

Bond stress; Composite materials; Cracking (fracturing); Discontinuities; Engineering mechanics; Stress-strain curves
Deformation and Fracture of Particulate Composite, Oral Buyukozturk and Arthur H. Nelson, 292

Books; Human engineering; Philosophy; Reviews; Technology; Animal behavior
Anti-Technology--The New Myth, Samuel C. Florman, 53

Booms (equipment); Containment; Oily water; Pollution; Rivers; Sea water; Water pollution
Dynamics of Contained Oil Slicks, David L. Wilkinson, 324

Bored piles; Clay (material); Field tests; Slurries
Behavior of Bored Piles in Beaumont Clay, Michael W. O'Neill and Lymon C. Reese, 197

Boring machines; Construction; Faults (geology); Rocks; Shields (tunneling); Tunneling (excavation); Vehicular tunnels
Vehicular Tunnels in Rock - Direction for Development, Richard J. Robbins, 379

Boundaries; Boundary layer flow; Gates; Hydraulics; Jets; Turbulence
Theoretical Analysis of Flow Past Leaf Gate, Rangaswami Narayanan, 320

Boundaries (property); Land surveys; Public land; Right of way acquisition; Surveying
Recommended Right-of-Way Practices, Harmer A. Weeden, 211

Boundary conditions; Buckling; Composite materials; Deformation; Eigenvalues; Energy methods; Engineering mechanics; Equilibrium methods; Lagrangian functions; Stability
Stability of Orthotropic Stiffened Composite Plates, Kao Ding Chiu, 508

Boundary conditions; Engineering mechanics; Finite elements; Plates (structural members); Sandwich panels
Finite Element Method for Elastic Plastic Plates, Ted Belytschko and Milan Velebit, 103

Boundary conditions; Finite difference method; Harmonic functions; Hyperbolic parabolic shells; Structural engineering; Airy function
Finite Difference Approach to Hyperbolic Paraboloids, M. I. Beg, 146

Boundary layer; Buildings; Engineering mechanics; Pressure gradients; Turbulence; Wind pressure
Turbulence Effect on Wall Pressure Fluctuations, Willy Z. Sadeh and Jack E. Cermak, 579

Boundary layer; Coefficients; Correlation; Cylindrical bodies; Hydraulics
Shear Flow Past Circular Cylinder, Thomas L. Shaw and Michael R. Starr, 201

Boundary layer; Engineering mechanics; Flow resistance; Fluid flow; Shear stress; Turbulence; Axial flow
Helical Flow Through Concentric Annulus, M. H. Abdul Khader and H. Suresh Rao, 231

Boundary layer flow; Gates; Hydraulics; Jets; Turbulence; Boundaries
Theoretical Analysis of Flow Past Leaf Gate, Rangaswami Narayanan, 320

Boundary shear; Energy dissipators; Hydraulic jump; Hydraulics; Stilling basins; Turbulence
Boundary Layer Effects on Hydraulic Jump Location, Edward H. Wilson and Andrew A. Turner, 341

Boundary shear; Engineering mechanics; Measuring instruments; Porous materials; Turbulence; Turbulent flow
Turbulent Shear Flow in Porous Boundary, James F. Ruff and Lynn W. Gelhar, 404

Boundary shear; Flow rate; Hydraulic jump; Hydraulics; Inflow; Turbulence; Water flow
Effects of Inflow Condition on Hydraulic Jump, Hans J. Leutheusser and Viswanathan C. Kartha, 401

Boundary value problems; Buckling; Composite structures; Rotation; Structural engineering; Beams (supports)
Moment-Rotation Curves for Locally Buckling Beams, J. Jay Climenhaga and R. Paul Johnson, 290

Boundary value problems; Buckling; Engineering mechanics; Shells (structural forms)
Buckling of Arbitrary Open Cylindrical Shells, Jack W. Vetter and Donald E. Boyd, 115

Boundary value problems; Comparison; Engineering mechanics; Orthotropic plate
Frequency Analysis of Tapered Orthotropic Plates, Jayaraman Ramachandran, 68

Boundary value problems; Eigenvalues; Elastic shells; Engineering mechanics; Airy function
End Effects in Truncated Semi-Infinite Wedge, Robert Wm. Little and Tommie R. Thompson, 484

Boundary value problems; Engineering mechanics; Impulses; Loading
Bounds for Impulsively Loaded Plastic Structures, John B. Martin and Alan R.S. Ronter, 156

Boundary value problems; Monte Carlo method; Ocean waves; Plates; Stochastic processes
Analysis of Floating Plate Under Ocean Waves, Yi-Kwei Wen and Masanobu Shinozuka, 317

Box beams; Box girders; Slenderness ratio; Structural engineering; Tests
Plastic Behavior of Hollow Structural Sections, Robert M. Korol and John Hudoba, 230

Box girders; Bridge failure; Bridges (box girder); Buckling; Australia
Poor Structural Design Brings West Gate Bridge Failure, John J. Kozak and Charles Seim, 272

Box girders; Bridges (box girder); Bridges (railroad); Bridges (structures); Structural engineering
Railway Box-Girder Bridge Erected by Launching, Jackson L. Durkee, 342

Box girders; Bridges (structures); Buckling; Composite structures; Design; Models; Structural engineering
Ultimate Design of Hollow Thin-Walled Box Girders, Dennis H. Parr, 329

Box girders; Slenderness ratio; Structural engineering; Tests; Box beams
Plastic Behavior of Hollow Structural Sections, Robert M. Korol and John Hudoba, 230

Breakwaters; Coastal engineering; Gravity waves; Harbors
Wave Defraction by Detached Breakwater, Michael Stiassnie and Gedeon Dagan, 265

Breakwaters; Coastal engineering; Harbors; Rubble mounds; Wave height
Effect of Irregular Wave Trains on Rubble-Mound Breakwaters, Yvon Ouellet, 119

Breakwaters; Coastal engineering; Ocean waves; Spectral energy distribution; Standing waves; Wave height
Spectral Resolution of Breakwater Reflected Waves, Edward B. Thornton and Ronald J. Calhoun, 512

Breakwaters; Concrete piles; Concrete (prestressed); Pile driving; Pile foundations
Breakwater Built With Concrete Piles, Thomas F. Plodowski, 219

Breakwaters; Harbors; Hydraulic models; Ocean waves; Overtopping
Wave Transmission by Overtopping, Ralph H. Cross and Charles K. Sollitt, 457

Bricks; Buildings; Computer programs; Computers; Masonry; Shear; Structural engineering; Walls; Wind (meteorology); Bearing capacity; Bending stress
Computer Design of Engineered Brick Masonry, Alan H. Yorkdale and Robert P. Anderson, 271

Bridge construction; Bridges (box girder); Bridges (structures); I beams; Oregon
Oregon Gets a Segmental Post-Tensioned Bridge, L. F. Pierce, 151

Bridge decks; Bridges (box girder); Bridges (cable-stayed); Bridges (piers); Bridges (structures); Bridges (suspension); Concrete (prestressed); Prefabrication; Structural engineering
Denmark's Lillebaelt Suspension Bridge, Christen Ostenfeld, 526

Bridge decks; Bridges (orthotropic); Bridges (structures); Floors; Fourier series; Plates (structural members); Structural engineering
Rapid Design of Orthotropic Floor Beams, Peter G. Perry and Conrad P. Heins, Jr., 526

Bridge design; Bridges (structures); Cracking (fracturing); Criteria; Failure; Fractures; Safety factors; Steels; Strength; Stress analysis
Fracture Mechanics, With High-Strength Steels A Must, Stanley T. Rolfe, 357

Bridge failure; Bridges (box girder); Buckling; Australia; Box girders
Poor Structural Design Brings West Gate Bridge Failure, John J. Kozak and Charles Seim, 272

Bridges (arch); Bridges (concrete); Concrete (prestressed); Washington
Longest Concrete-Arch Bridge in North America, Ernest C. Harris and John A. Talbott, 329

Bridges (box girder); Bridges (cable-stayed); Bridges (piers); Bridges (structures); Bridges (suspension); Concrete (prestressed); Prefabrication; Structural engineering; Bridge decks
Denmark's Lillebaelt Suspension Bridge, Christen Ostenfeld, 526

Bridges (box girder); Bridges (girder); Bridges (structures); Curved beams; Structural engineering
Multicell Curved Girder Model Studies, Conrad P. Heins, Jr., Bijan P. Bonakdarpour and Lansford C. Bell, 210

Bridges (box girder); Bridges (orthotropic); Plastics; Strains; Stresses; Structural engineering
Bending and Torsion in Orthotropic Deck Box Girder, Michael S. Troitsky and Abdul K. Azad, 427

Bridges (box girder); Bridges (railroad); Bridges (structures); Structural engineering; Box girders
Railway Box-Girder Bridge Erected by Launching, Jackson L. Durkee, 342

Bridges (box girder); Bridges (structures); Curved beams; Loads (forces); Models; Model tests; Structural engineering; Structural models
Model Analysis of Curved Box-Beam Highway Bridge, Ish K. Aneja and Frederic Roll, 48

Bridges (box girder); Bridges (structures); Curved beams; Structural engineering
Analysis of Horizontally Curved Box Girder Bridges, Kuang-Han Chu and Suresh G. Pinjarkar, 24

Bridges (box girder); Bridges (structures); I beams; Oregon; Bridge construction
Oregon Gets a Segmental Post-Tensioned Bridge, L. F. Pierce, 151

Bridges (box girder); Buckling; Australia; Box girders; Bridge failure
Poor Structural Design Brings West Gate Bridge Failure, John J. Kozak and Charles Seim, 272

Bridges (box girder); Computer programs; Finite elements; Folded plates; Interchanges; Orthotropic plate; Skew bridges; Stiffness methods; Structural analysis; Structural engineering
Cellular Structures of Arbitrary Plan Geometry, Kaspar J. William and Alexander C. Scordelis, 315

Bridges (cable-stayed); Bridges (girder); Bridges (orthotropic); Bridges (structures); Bridge towers; Cables (ropes); History
Historical Development of Cable-Stayed Bridges, Walter Podolny, Jr. and John F. Fleming, 458

Bridges (cable-stayed); Bridges (girder); Bridges (structures); Structural engineering
Design of Cable-Stayed Girder Bridges, Man-Chung Tang, 416

Bridges (cable-stayed); Bridges (piers); Bridges (structures); Bridges (suspension); Concrete (prestressed); Prefabrication; Structural engineering; Bridge decks; Bridges (box girder)
Denmark's Lillebaelt Suspension Bridge, Christen Ostenfeld, 526

Bridges (cable-stayed); Bridges (structures); Buildings; Cables (ropes); Roofs; Structural engineering
Mechanical Properties of Structural Cables, John B. Scalzi and William K. McGrath, 52

Bridges (cable-stayed); Computer applications; Loads (forces); Balancing
Load Balancing Analysis of Cable Stayed Bridges, Benjamin E. Lazar, Michael S. Troitsky and Matthew McC. Douglass, 379

Bridges (cable-stayed); Iteration; Stiffness matrix; Stiffness methods
Stiffness-Analysis of Cable-Stayed Bridges, Benjamin E. Lazar, 349

Bridges (concrete); Bridges (piers); Earthquakes; Engineering mechanics; Forecasting
Seismic Response Predictions of Bridge Pier, Robin Shepherd and Richard E. McConnel, 256

Bridges (concrete); Bridges (spans); Concrete (precast); Esthetic properties; Highway engineering
Long-Span Bridge: Utility, Grace at Low Cost, Harry M. Montgomery and Roger D. Troxell, 269

Bridges (concrete); Concrete (prestressed); Washington; Bridges (arch)
Longest Concrete-Arch Bridge in North America, Ernest C. Harris and John A. Talbott, 329

Bridges (concrete); Concrete (reinforced); Deformed bars; Israel; Project management; Quality control
An American Engineer in Israel, Irving Kett, 295

Bridges (decking); Bridges (orthotropic); Fatigue (materials); Ribs (supports); Steels; Structural engineering; Tests; Welding
Fatigue of Orthotropic Steel Decks, Hacik Erzurumlu and A. Anthony Toprac, 205

Bridges (decking); Bridges (structures); Glued joints; Laminated wood; Structural engineering; Wooden bridges
FPL Timber Bridge Deck Research, Billy Bohannan, 169

Bridges (girder); Bridges (orthotropic); Bridges (structures); Bridge towers; Cables (ropes); History; Bridges (cable-stayed)
Historical Development of Cable-Stayed Bridges, Walter Podolny, Jr. and John F. Fleming, 458

Bridges (girder); Bridges (spans); Collapse; Composite structures; Curved beams; Structural engineering
Plastic Collapse of Horizontally Curved Bridge Girders, Chai Hong Yoo and Conrad P. Heins, Jr., 221

Bridges (girder); Bridges (structures); Buckling; Deflection; Design; Plates; Structural engineering; Torsion
Some Design Problems of Large Box Girder Bridges, Bogdan O. Kuzmanovic, 439

Bridges (girder); Bridges (structures); Curved beams; Field tests; Impact; New York; Structural engineering
Dynamic Testing of Curved Bridge - Huyck Stream, William L. Armstrong, 429

Bridges (girder); Bridges (structures); Curved beams; Structural engineering; Bridges (box girder)
Multicell Curved Girder Model Studies, Conrad P. Heins, Jr., Bijan P. Bonakdarpour and Lansford C. Bell, 210

Bridges (girder); Bridges (structures); Structural engineering; Bridges (cable-stayed)
Design of Cable-Stayed Girder Bridges, Man-Chung Tang, 416

Bridges (girder); Concrete (precast); Concrete (prestressed); Models; Structural engineering; Tests
81-ft Model of Prestressed Bridge477

Bridges (movable); Docks; Harbor facilities; Harbors; Barges
Multipurpose Land-Water Transfer Facility, C. Adrian Arnold, 335

Bridges (orthotropic); Bridges (structures); Bridge towers; Cables (ropes); History; Bridges (cable-stayed); Bridges (girder)
Historical Development of Cable-Stayed Bridges, Walter Podolny, Jr. and John F. Fleming, 458

Bridges (orthotropic); Bridges (structures); Floors; Fourier series; Plates (structural members); Structural engineering; Bridge decks
Rapid Design of Orthotropic Floor Beams, Peter G. Perry and Conrad P. Heins, Jr., 526

Bridges (orthotropic); Fatigue (materials); Ribs (supports); Steels; Structural engineering; Tests; Welding; Bridges (decking)
Fatigue of Orthotropic Steel Decks, Hacik Erzurumlu and A. Anthony Toprac, 205

Bridges (orthotropic); Plastics; Strains; Stresses; Structural engineering; Bridges (box girder)
Bending and Torsion in Orthotropic Deck Box Girder, Michael S. Troitsky and Abdul K. Azad, 427

Bridges (piers); Bridges (structures); Bridges (suspension); Concrete (prestressed); Prefabrication; Structural engineering; Bridge decks; Bridges (box girder); Bridges (cable-stayed)
Denmark's Lillebaelt Suspension Bridge, Christen Ostenfeld, 526

Bridges (piers); Earthquakes; Engineering mechanics; Forecasting; Bridges (concrete)
Seismic Response Predictions of Bridge Pier, Robin Shepherd and Richard E. McConnel, 256

Bridges (piers); Elastomers; Reinforcement (structures); Rubber; Bearing pads
Elastomeric Bridge Bearings, Charles E. Rejcha, 233

Bridges (piers); Foundations; Piers; Piles (foundations); Settlement (structural); Soil mechanics; Bearing capacity
Load Settlement Prediction for Piles and Piers, Harry G. Poulos, 439

Bridges (railroad); Bridges (structures); Structural engineering; Box girders; Bridges (box girder)
Railway Box-Girder Bridge Erected by Launching, Jackson L. Durkee, 342

Bridges (spans); Collapse; Composite structures; Curved beams; Structural engineering; Bridges (girder)
Plastic Collapse of Horizontally Curved Bridge Girders, Chai Hong Yoo and Conrad P. Heins, Jr., 221

Bridges (spans); Concrete (precast); Esthetic properties; Highway engineering; Bridges (concrete)
Long-Span Bridge: Utility, Grace at Low Cost, Harry M. Montgomery and Roger D. Troxell, 269

Bridges (structures); Bridges (suspension); Concrete (prestressed); Prefabrication; Structural engineering; Bridge decks; Bridges (box girder); Bridges (cable-stayed); Bridges (piers)
Denmark's Lillebaelt Suspension Bridge, Christen Ostenfeld, 526

Bridges (structures); Bridge towers; Cables (ropes); History; Bridges (cable-stayed); Bridges (girder); Bridges (orthotropic)
Historical Development of Cable-Stayed Bridges, Walter Podolny, Jr. and John F. Fleming, 458

Bridges (structures); Buckling; Composite structures; Design; Models; Structural engineering; Box girders
Ultimate Design of Hollow Thin-Walled Box Girders, Dennis H. Parr, 329

Bridges (structures); Buckling; Deflection; Design; Plates; Structural engineering; Torsion; Bridges (girder)
Some Design Problems of Large Box Girder Bridges, Bogdan O. Kuzmanovic, 439

Bridges (structures); Buildings; Cables (ropes); Roofs; Structural engineering; Bridges (cable-stayed)
Mechanical Properties of Structural Cables, John B. Scalzi and William K. McGrath, 52

Bridges (structures); Buses (vehicles); Foundations; Geology; Pile driving; Piles (foundations); Pollution; Transportation
First U.S. Center-City People Mover, Debuts in Morgantown, W. Va., Frank E. Lo Presti, 499

Bridges (structures); City planning; Concrete (post-tensioned); Concrete (precast); Foundations; Highways; Prefabrication; Slabs; Tendons; Transportation
Prefabricated Highways, William Zuk, 204

Bridges (structures); Concrete (reinforced); Field tests; Folded plates; Strains; Structural engineering
Model and Prototype Studies of Box Girder Bridge, Raymond Eugene Davis, Charles F. Scheffey, Gary A. Castleton and Evan E. Evans, 70

Bridges (structures); Construction materials; Plastics; Structural engineering
Why Not Plastics Bridges?, Fred C. McCormick, 399

Bridges (structures); Cracking (fracturing); Criteria; Failure; Fractures; Safety factors; Steels; Strength; Stress analysis; Bridge design
Fracture Mechanics, With High-Strength Steels A Must, Stanley T. Rolfe, 357

Bridges (structures); Curved beams; Field tests; Impact; New York; Structural engineering; Bridges (girder)
Dynamic Testing of Curved Bridge - Huyck Stream, William L. Armstrong, 429

Bridges (structures); Curved beams; Loads (forces); Models; Model tests; Structural engineering; Structural models; Bridges (box girder)
Model Analysis of Curved Box-Beam Highway Bridge, Ish K. Aneja and Frederic Roll, 48

Bridges (structures); Curved beams; Structural engineering; Bridges (box girder)
Analysis of Horizontally Curved Box Girder Bridges, Kuang-Han Chu and Suresh G. Pinjarkar, 24

Bridges (structures); Curved beams; Structural engineering; Bridges (box girder); Bridges (girder)
Multicell Curved Girder Model Studies, Conrad P. Heins, Jr., Bijan P. Bonakdarpour and Lansford C. Bell, 210

Bridges (structures); Design criteria; Dynamic structural analysis; Earthquakes; Seismic design; Structural engineering
Seismic Design of Highway Structures, Keith D. Bull, 393

Bridges (structures); Dynamic structural analysis; Earthquake engineering; Earthquake resistant structures; Earthquakes; Liquefaction; Structural engineering
The San Fernando Earthquake - A Lesson in Highway and Bridge Design, Arthur L. Elliott, 424

Bridges (structures); Floors; Fourier series; Plates (structural members); Structural engineering; Bridge decks; Bridges (orthotropic)
Rapid Design of Orthotropic Floor Beams, Peter G. Perry and Conrad P. Heins, Jr., 526

Bridges (structures); Glued joints; Laminated wood; Structural engineering; Wooden bridges; Bridges (decking)
FPL Timber Bridge Deck Research, Billy Bohannan, 169

Bridges (structures); I beams; Oregon; Bridge construction; Bridges (box girder)
Oregon Gets a Segmental Post-Tensioned Bridge, L. F. Pierce, 151

Bridges (structures); Matrix methods; Stiffness matrix; Structural analysis; Structural engineering; Torsion
Stiffness Analysis of Grids Including Warping, Robert J. Reilly, 333

Bridges (structures); Structural engineering; Box girders; Bridges (box girder); Bridges (railroad)
Railway Box-Girder Bridge Erected by Launching, Jackson L. Durkee, 342

Bridges (structures); Structural engineering; Bridges (cable-stayed); Bridges (girder)
Design of Cable-Stayed Girder Bridges, Man-Chung Tang, 416

Bridges (suspension); Cables (ropes); Dynamic structural analysis; Hydrodynamics; Mechanics; Ocean engineering; Structural engineering
Dynamic Analysis of Cable Systems, Richard F. Dominguez and Charles E. Smith, 388

Bridges (suspension); Cables (ropes); Rhode island; Strands; Structural engineering
Main Cables of Newport Suspension Bridge, Blair Birdsall, 58

Bridges (suspension); Compatibility methods; Computer applications; Computers; Equilibrium methods; Newton-Raphson method; Structural engineering
Static Analysis of Suspension Bridges, Alan Jennings and John E. Mairs, 508

Bridges (suspension); Concrete (prestressed); Prefabrication; Structural engineering; Bridge decks; Bridges (box girder); Bridges (cable-stayed); Bridges (piers); Bridges (structures)
Denmark's Lillebaelt Suspension Bridge, Christen Ostenfeld, 526

Bridge towers; Cables (ropes); History; Bridges (cable-stayed); Bridges (girder); Bridges (orthotropic); Bridges (structures)
Historical Development of Cable-Stayed Bridges, Walter Podolny, Jr. and John F. Fleming, 458

Brittle fracturing; Pipe joints; Pipelines; Slip joints; Steel pipes; Weld defects; Welded pipes
Brittle Fracture of Steel Pipe Analyzed, Robert V. Phillips and Stephen M. Marynick, 345

Broad-crested weirs; Control structures; Flow measurement; Hydraulics; Weirs
Characteristics of Flow Weirs of Finite Crest Width, Singamsetti Surya Rao and Manoj Kumar Shukla, 42

Broad-crested weirs; Flow measurement; Hydraulic models; Hydraulics; Open channel flow
Brink Depth for Trapezoidal Broad-Crested Weir, Birendra N. Neogy, 582

Bromates; Bromine; Purification; Sanitary engineering; Water; Water purification
Bromine and Bromamine Disinfection Chemistry, J. Donald Johnson and Ragnar Overby, 49

Bromine; Purification; Sanitary engineering; Water; Water purification; Bromates
Bromine and Bromamine Disinfection Chemistry, J. Donald Johnson and Ragnar Overby, 49

Bubbles; Hydraulics; Laboratories; Pipe flow; Soil mechanics; Tests; Triaxial tests
Time to Dissolve Air Bubbles in Drain Line, Kenneth L. Lee and David K. Black, 179

Buckling; Australia; Box girders; Bridge failure; Bridges (box girder)
Poor Structural Design Brings West Gate Bridge Failure, John J. Kozak and Charles Seim, 272

Buckling; Cantilevers; Frames; Structural analysis; Structural engineering
Buckling of Lateral Restrained Thin-Walled Cantilevers of Open Cross Section, Jacob Gluck and Menachem Gelbert, 451

Buckling; Cantilevers; Stability; Structural engineering; Beams (supports)
Stability of Monosymmetric Beams and Cantilevers, John M. Anderson and Nicholas S. Trahair, 122

Buckling; Chimneys; Design; Liner plates; Loads (forces); Power; Research; Steels; Structural engineering
Design of Steel Chimney Liners, Max Zar, Shih-Lung Chu and James M. Doyle, 500

Buckling; Columns (supports); Computation; Dynamic stability; Engineering mechanics; Stability; Torsion; Vibration; Beam columns
Coupled, Nonconservative Stability-Finite Element, C. D. Mote, Jr. and Gerald Y. Matsumoto, 286

Buckling; Columns (supports); Deflection; Elastic properties; Engineering mechanics; Probability theory; Stability; Statistical analysis; Structural engineering
Nonstationary Random Column Buckling Problem, Raymond G. Jacquot, 501

Buckling; Columns (supports); Inelastic action; Slenderness ratio; Structural engineering; Struts; Tees; Thickness ratio; Width; Angle iron
Buckling of Steel Angle and Tee Struts, John B. Kennedy and Madugula K.S. Murty, 547

Buckling; Columns (supports); Rigid frames; Skyscrapers; Structural engineering; Tests
Inelastic Multistory Frame Buckling, Bernard M. McNamee and Le-Wu Lu, 368

Buckling; Columns (supports); Stability; Steels; Structural engineering; Beam columns; Beams (supports)
Finite Deformation of Biaxially Loaded Columns, Lawrence A. Soltis and Paul P. Christiano, 568

Buckling; Composite materials; Deformation; Eigenvalues; Energy methods; Engineering mechanics; Equilibrium methods; Lagrangian functions; Stability; Boundary conditions
Stability of Orthotropic Stiffened Composite Plates, Kao Ding Chiu, 508

Buckling; Composite structures; Design; Models; Structural engineering; Box girders; Bridges (structures)
Ultimate Design of Hollow Thin-Walled Box Girders, Dennis H. Parr, 329

Buckling; Composite structures; Engineering mechanics; Orthotropic plate; Stiffness
Shear-Flexible Orthotropic Plates Loaded in Plane, Charles W. Bert and Shyming Chang, 602

Buckling; Composite structures; Rotation; Structural engineering; Beams (supports); Boundary value problems
Moment-Rotation Curves for Locally Buckling Beams, J. Jay Climenhaga and R. Paul Johnson, 290

Buckling; Deflection; Design; Plates; Structural engineering; Torsion; Bridges (girder); Bridges (structures)
Some Design Problems of Large Box Girder Bridges, Bogdan O. Kuzmanovic, 439

Buckling; Deflection; Matrix methods; Space frames; Stability; Structural engineering
Large Deflection Buckling of Space Frames, Kuang-Han Chu and Robert H. Rampetsreiter, 589

Buckling; Deflection; Strength; Structural engineering; Beams (supports)
Alternative Approach to Light-Gage Beam Design, James Rhodes and James M. Harvey, 9

Buckling; Design; Engineering mechanics; Shells (structural forms)
Buckling of Shells: An Old Idea with a New Twist, John Roorda, 266

Buckling; Dynamics; Engineering mechanics; Mathematical models; Stability; Vibration; Beam columns
Beams Subjected to a Follower Force Within the Span, Jack C. Wiley and Richard E. Furkert, 569

Buckling; Eigenvalues; Energy methods; Engineering mechanics; Optimization; Stability
Simultaneous Buckling in Symmetric Structural Systems, Kenneth C. Johns, 369

Buckling; Elastic-plastic analysis; Imperfections; Structural engineering; Axial compression
Post-Buckling of Axially Compressed Plates, Archibald N. Sherbourne and Robert M. Korol, 477

Buckling; Elastic properties; Engineering mechanics; Plastic properties; Shells (structural forms); Spherical shells
Symmetric Buckling of Inelastic Spherical Shells, Robert K. Emerton and Nicholas F. Morris, 586

Buckling; Engineering mechanics; Finite differences; Shells (structural forms); Spherical shells; Stability
Asymmetrical Buckling of Imperfect Spherical Shells, George N. Freskakis and Nicholas F. Morris, 471

Buckling; Engineering mechanics; Sandwich structures; Arches
Nonlinear Buckling Analysis of Sandwich Arches, Parviz Sharifi and Egor P. Popov, 11

Buckling; Engineering mechanics; Shells (structural forms); Boundary value problems
Buckling of Arbitrary Open Cylindrical Shells, Jack W. Vetter and Donald E. Boyd, 115

Buckling; Finite elements; Loading; Structural engineering; Tests; Thin-wall structures; Ultimate strength; Web beams
Failure of Thin-Walled Members Under Patch Loading, Kenneth C. Rockey, Mohamed A. El-Gaaly and Debal K. Bagchi, 572

Buckling; Fixed structures; Hinged structures; Parabolic bodies; Torque; Arches
Lateral-Torsion Buckling of Parabolic Arches, Frank J. Tokarz and Raghbir S. Sandhu, 280

Buckling; Floors; Structural engineering; Timber construction; Wooden structures; Beams (supports)
Lateral Stability of Beam and Deck Structure, Paul M. Jenkinson and John J. Zahn, 181

Buckling; Forecasting; Loads (forces); Plates; Structural engineering; Ultimate strength; Axial compression
Strength Predictions of Plates in Uniaxial Compression, Robert M. Korol and Archibald N. Sherbourne, 444

Buckling; Framed structures; Sidesway; Stability; Structural engineering; Beam columns
Approximate Determination of Frame Critical Loads, F. David Edmonds and Ian C. Medland, 161

Buckling; Frames; Lateral stability; Stability; Structural engineering; Tall buildings
Long-Wave Extensional Buckling of Large Regular Frames, Zdenek P. Bazant and M. Christensen, 504

Buckling; Frames; Stability; Structural engineering; Beam columns
Unbraced Multistory Steel Frames with Wind Load, E. Whitman Wright, 78

Buckling; Hyperbolic parabolic shells; Membranes; Roofs; Shells (structural forms); Structural engineering
Analysis of Thin-Steel Hyperbolic Paraboloid Shells, Prabodh V. Banavalkar and Peter Gergely, 557

Buckling; I beams; Stability; Structural engineering; Beams (supports)
Elastic Stability of Tapered I-Beams, Sritawat Kitipornchai and Nicholas S. Trahair, 165

Buckling; Moments; Stability; Strain hardening; Structural engineering
Buckling of Inelastic I-Beams Under Uniform Moment, Nicholas S. Trahair and Sritawat Kitipornchai, 536

Buckling; Plates; Stability; Structural engineering
Post-Buckling of Geometrically Imperfect Plates, Ralph G. Dawson and Alastair C. Walker, 67

Buckling; Structural engineering; Torsion; Beams (supports)
Lateral Buckling of Constrained Beams, Thomas G. Morrison, 199

Budget estimates; Investment; Planning; Professional activities; Benefit cost analysis
Budget Constraints and Multiobjective Planning, Arthur Maass and David C. Major, 463

Budgeting; Consulting engineers; Financial management; Personnel management; Salary administration
Financial Tools for a Consulting Firm, Roy T. Sheehey, 48

Building codes; Buildings; Earthquake resistant structures; Earthquakes; Risk; Safety factors; Seismic design
The Balanced Risk Concept: New Approach to Earthquake Building Codes, John H. Wiggins, 377

Building codes; Concrete (reinforced); Criteria; Earthquakes; Standards
Implications of the New ACI Building Code, Edward Cohen, 365

Building codes; Flood control; Flood protection; Floods; Floods; Rivers
Pullman Tackles its Flooding Problems, Howard D. Copp, 360

Building materials; Cost analysis; Dimensions; Economics; Floors; Height; Tall buildings
The Economics of High-Rise Apartment Buildings of Alternate Design Configuration, Richard D. Steyert, 387

Buildings; Buildings (apartment); Finite elements; Panels; Structural engineering
Influence of Joints in Panelized Structural Systems, Eric F.P. Burnett and R. Clement S. Rajendra, 465

Buildings; Buildings (codes); Earthquakes; Soil mechanics; Soil-structure interaction; Structural engineering
Earthquake Design Formula Considering Local Soil Conditions, Semih S. Tezcan, 15

Buildings; Buildings (residential); Collapse; Explosions; Structural design
Design for Prevention of Progressive Collapse, Ramzi H. Ferahian, 102

Buildings; Cables (ropes); Roofs; Structural engineering; Bridges (cable-stayed); Bridges (structures)
Mechanical Properties of Structural Cables, John B. Scalzi and William K. McGrath, 52

Buildings; Columns (supports); Skyscrapers; Steel structures; Structural engineering; Beam columns
Aspects of Column Design in Tall Steel Buildings, John Springfield and Peter F. Adams, 258

Buildings; Computer programs; Computers; Masonry; Shear; Structural engineering; Walls; Wind (meteorology); Bearing capacity; Bending stress; Bricks
Computer Design of Engineered Brick Masonry, Alan H. Yorkdale and Robert P. Anderson, 271

Buildings; Computer programs; Frames; Plastic design; Skyscrapers; Structural engineering
Storywise Plastic Design for Multistory Steel Frames, Leroy Z. Emkin and William A. Litle, 139

Buildings; Curved beams; Folded plates; Stiffness methods; Structural engineering
Analysis of Curved Folded Plate Structures, Christian Meyer and Alexander C. Scordelis, 20

Buildings; Design; Foundation investigations; Foundations; Land use
Sample Approaches to Optimum Use of Marginal Lands, William W. Moore and Nicholas Chryssafopoulos, 207

Buildings; Dynamics; Earthquakes; Monte Carlo method; Probability theory; Shear; Structural engineering
Probabilistic Response of Nonlinear Buildings During Earthquakes, Alain H. Peyrot, 531

Buildings; Earthquake resistant structures; Earthquakes; Risk; Safety factors; Seismic design; Building codes
The Balanced Risk Concept: New Approach to Earthquake Building Codes, John H. Wiggins, 377

Buildings; Earthquakes; Engineering mechanics; Soil-structure interaction; Tall buildings; Vibration
Earthquake Interaction for Multistory Building, Lawrence W. Fagel and Shih-Chi Liu, 416

Buildings; Engineering mechanics; Pressure gradients; Turbulence; Wind pressure; Boundary layer
Turbulence Effect on Wall Pressure Fluctuations, Willy Z. Sadeh and Jack E. Cermak, 579

Buildings; Environmental engineering; Planning; Structural engineering; Systems engineering; Urban planning; Architecture
Tall Buildings--A Technological Assessment, Thomas C. Kavanagh, 54

Buildings; Fire protection; Fire resistance; Optimization; Probability theory; Structural engineering
Optimum Fire Resistance of Structures, T. T. Lie, 97

Buildings; Frames; Plasticity; Steels; Structural engineering; Subassemblies
Plastic Subassemblage Analysis for Unbraced Frames, J. Hartley Daniels and Le-Wu Lu, 409

Buildings; Frames; Stability; Structural engineering; Torsion; Walls
Analysis of Three-Dimensional Structures, Jacobus H. Wynhoven and Peter F. Adams, 109

Buildings; Frames; Stability; Structural engineering; Torsion; Walls
Behavior of Structures Under Loads Causing Torsion, Jacobus H. Wynhoven and Peter F. Adams, 306

Buildings; Gust loads; Structural engineering; Wind (meteorology); Wind pressure
Failures of Structures Due to Extreme Winds, Joseph E. Minor, Kishor C. Mehta and James R. McDonald, 517

Buildings; Live loads; Statistical analysis; Structural engineering
Statistical Analysis of Live Load in Column Design, Ross B. Corotis, 384

Buildings; Reinforcement; Stresses; Structural engineering; Tests; Beams (supports)
Tests on Beams with Reinforced Web Openings, Peter B. Cooper and Robert R. Snell, 189

Buildings (apartment); Finite elements; Panels; Structural engineering; Buildings
Influence of Joints in Panelized Structural Systems, Eric F.P. Burnett and R. Clement S. Rajendra, 465

Buildings (apartment); Shear; Skyscrapers; Structural engineering; Walls
Model Investigations of Shear Wall Structures, Alexander Coull and A. W. Irwin, 284

Buildings (codes); Cables; Design criteria; Loading; Power lines; Structural engineering; Towers; Transmission lines; Wind (meteorology)
Wind Recommendations for Transmission Towers, Gene M. Wilhoite, 142

Buildings (codes); Computers; Design; Dynamics; Earthquake resistant structures; Earthquakes; Loads (forces); Plasticity; Structural engineering
Earthquake Resistant Design of Unbraced Frames, James C. Anderson and Raj P. Gupta, 540

Buildings (codes); Earthquake damage; Professional engineering; Structural analysis
Badly Needed: Changes in Building Codes for Houses, Melvin W. Jackson, 190

Buildings (codes); Earthquakes; Soil mechanics; Soil-structure interaction; Structural engineering; Buildings
Earthquake Design Formula Considering Local Soil Conditions, Semih S. Tezcan, 15

Buildings (codes); Foreign engineering; Housing; Urban planning; ASCE (National Affairs); ASCE (Policy)
The Challenge to Civil Engineering, Dennis Warner, 339

Buildings (codes); Lateral forces; Seismic design; Standards; Structural engineering; ASCE (Committees)
Basic Design Criteria of the Recommended Lateral Force Requirements and Commentary, By the Ad Hoc Committee on Direction Study of the Joint SEAOC-ASCE Committee on Seismic Forces of the Committee on Dynamic Forces of the Structural Division, Henry J. Degenkolb, Chmn., 433

Buildings (commercial); Field tests; Forecasting; Municipal engineering; Planning; Sanitary engineering
Empirical Analysis of Commercial Solid Waste Generation, Truett V. DeGeare and Jerry E. Ongerth, 112

Buildings (hospitals); Civil engineering; Engineering education; Health; Systems engineering; Bioengineering
Civil Engineering and National Goals in Bioengineering, George Bugliarello, 591

Buildings (hospitals); Construction; Construction management; Health; Systems analysis; Systems engineering
A Systems Approach to Hospital Planning and Design, Tung Au, Ernest W. Parti and Andrew K.C. Wong, 592

Buildings (hospitals); Design; Professional activities; Public health; Tests; Automation
Multiphase Health Screening Facility Design, Paul R. DeCicco, 593

Buildings (hospitals); Environmental effects; Health; Matrices (mathematics); Microenvironment; Professional activities
The Hospital as a Microenvironment, E. Todd Wheeler, 593

Buildings (office); Comfort; Human factors engineering; Structural engineering; Tests
Human Perception Thresholds of Horizontal Motion, Peter W. Chen and Leslie E. Robertson, 397

Buildings (office); Communication; Forecasting; Social needs; Telecommunication; Transportation; Urban development; Urban planning
Communications Substitutes for Intra-Urban Travel, Richard C. Harkness, 307

Buildings (residential); Collapse; Explosions; Structural design; Buildings
Design for Prevention of Progressive Collapse, Ramzi H. Ferahian, 102

Buoyancy; Fluid flow; Hydraulics; Jet flow; Mathematics; Temperature; Turbulence
Buoyant Jets with Three-Dimensional Trajectories, Eric Hirst, 563

Buoys; Harbors; Model tests; Moorings
Two-Point Mooring System for Spar Buoy, John H. Nath and Steve Neshyba, 17

Buried structures; Culverts; Field tests; Pressure gages; Research; Structural engineering; Trenches
Concrete Arch Culvert Behavior-Phase 2, Raymond Eugene Davis and Alfred E. Bacher, 521

Buses (vehicles); Bus lines; Highway engineering; Passenger transportation; Traffic control; Traffic engineering
Federal Research in Urban Traffic Control, Juri Raus and Philip J. Tarnoff, 434

Buses (vehicles); Costs; Systems engineering; Air transportation
Airport Access Cost-Effectiveness Analysis, Richard de Neufville and Edward Mierzejewski, 428

Buses (vehicles); Foundations; Geology; Pile driving; Piles (foundations); Pollution; Transportation; Bridges (structures)
First U.S. Center-City People Mover, Debuts in Morgantown, W. Va., Frank E. Lo Presti, 499

Buses (vehicles); Mass transportation; Social needs; Urban planning; Urban transportation; Automobiles
Shopping and Work Trips in the Black Ghetto, Charles B. Notess, 325

Buses (vehicles); Passenger transportation; Routing; Social needs; Transportation; Urban transportation
Demand Activated Transportation for The Elderly, Charles B. Notess and Robert E. Paaswell, 456

Buses (vehicles); Passenger transportation; Terminal facilities; Traffic; Transportation; Urban transportation
Location of Bus Stops, Walter H. Kraft and Thomas J. Boardman, 79

Bus lines; Highway engineering; Passenger transportation; Traffic control; Traffic engineering; Buses (vehicles)
Federal Research in Urban Traffic Control, Juri Raus and Philip J. Tarnoff, 434

Cables; Design criteria; Loading; Power lines; Structural engineering; Towers; Transmission lines; Wind (meteorology); Buildings (codes)
Wind Recommendations for Transmission Towers, Gene M. Wilhoite, 142

Cables (ropes); Computation; Finite elements; Prestressing; Roofs; Stiffness methods; Structural engineering
Large Deflection Analysis of Prestressed Networks, John H. Argyris and Dieter W. Scharpf, 185

Cables (ropes); Computers; Engineering mechanics; Quadratic equations
Analysis of Structures by Quadratic Programming, Mehdi S. Zarghamee, 27

Cables (ropes); Dynamics; Engineering mechanics; Finite elements; Nonlinear systems
Nonlinear Dynamics of Cables with Low Initial Tension, John W. Leonard, 170

Cables (ropes); Dynamic structural analysis; Hydrodynamics; Mechanics; Ocean engineering; Structural engineering; Bridges (suspension)
Dynamic Analysis of Cable Systems, Richard F. Dominguez and Charles E. Smith, 388

Cables (ropes); Economic analysis; Steels; Beam columns
Economical Design of Prestressed Plate Girder, Miloslav Tochacek and Champa L. Mehta, 298

Cables (ropes); Germany; Roofs; Stadiums; Suspended structures
Cable Suspended Roof for Munich Olympics, Fritz Leonhardt and Jorg Schlaich, 319

Cables (ropes); History; Bridges (cable-stayed); Bridges (girder); Bridges (orthotropic); Bridges (structures); Bridge towers
Historical Development of Cable-Stayed Bridges, Walter Podolny, Jr. and John F. Fleming, 458

Cables (ropes); Rhode island; Strands; Structural engineering; Bridges (suspension)
Main Cables of Newport Suspension Bridge, Blair Birdsall, 58

Cables (ropes); Roofs; Structural engineering; Bridges (cable-stayed); Bridges (structures); Buildings
Mechanical Properties of Structural Cables, John B. Scalzi and William K. McGrath, 52

Calcium carbonates; Disinfection; Environmental engineering; Water quality; Water treatment; Bacteria
Effect of Calcium Bicarbonate on Disinfection by Halogens, Lawrence N. Kuzminski, Tsuan H. Feng and Chih C. Liu, 222

Calculations; Calculators; Civil engineering; Computer applications; Office equipment
The Programmable Calculator: A Place In Civil Engineering, Eugene E. Dallaire, 106

Calculations; Consolidation; Footings; Settlement (structural)
Simplified Method to Calculate Settlement Beneath Footings, Max L. Calhoon, 110

Calculators; Civil engineering; Computer applications; Office equipment; Calculations
The Programmable Calculator: A Place In Civil Engineering, Eugene E. Dallaire, 106

Calculators; Computer applications; Computer programming; Computers; Costs; Accessibility
Programmable Calculators: A Consultant Reports, D. A. Polychrone and Dieter Franz, 483

Calculators; Computer systems programs; Hydraulic models; Mathematical models; Structural analysis
Guidelines for Selecting a Programmable Calculator, Eugene E. Dallaire, 129

California; Civil engineers; Salaries; Working conditions; ASCE (local sections)
California ASCE Sections Prepare Employment Guidelines, George S. Korbay and Ronald P. Gallagher, 25

California; Computers; Forecasting; Models; Systems engineering; Water resources
Optimum Operations Model for Shasta-Trinity System, Dan M. Fults and Lawrence F. Hancock, 450

California; Desalting; Irrigation; Sea water intrusion; Wastewater treatment; Wastewater use; Water treatment
Orange County Water District's Water Factory 21, James R. Cofer, 549

California; Drainage; Ground water; Sea water intrusion; Seepage; Wells
Seawater Intrusion Extraction Barrier, Jack J. Coe, 425

California; Drainage; Irrigation
Ecological Impacts of Water Projects in California, Robert M. Hagan and Edwin B. Roberts, 198

California; Earthquake engineering; Recreational facilities; Subsidence; Water conduits; Water distribution; Water resources development
California Water Project, William R. Gianelli and Robert B. Jansen, 307

California; Estuaries; Recreational facilities; Water pollution control; Water pollution effects
Cleanup of San Diego Bay, Roy E. Dodson, 142

California; Estuaries; Sanitary engineering; Tidal waters; Waste assimilative capacity; Water pollution
Tidal Exchange at Golden Gate, Denny S. Parker, Dan P. Norris and Austin W. Nelson, 276

California; Irrigation; Wastewater disposal; Water quality; Water reuse; Water treatment
Wastewater Reclamation in Southern California, Jack J. Coe and Finley B. Laverty, 450

Canada; Capacity; Economic analysis; Economic factors; Highway engineering
Economic Criterion for Highway Capacity Determination, Bruce G. Hutchinson, 377

Canada; Control surveys; Engineering education; Land surveys
How Land Surveying Is Being Modernized, Robert T. Howe, 287

Canada; Dams (earth); Foundations; Grouting; Settlement (structural); Abutments
Foundations and Abutments -- Bennet and Mica Dams, Harold K. Pratt, Robert C. McMordie and Robert M. Dundas, 493

Canada; Diversion; Linear algebraic equations; Linear programming; Nonlinear algebraic equations; Optimization; Reservoirs; River flow
Optimization Model for Churchill River Diversion, Abu M.Z. Alam, 409

Canada; Economic analysis; Highway engineering; Highway planning; Highways; Investments; Land use; Regional planning; Transportation; Benefit cost analysis
Programming of Regional Highway Investments, Bruce G. Hutchinson, 269

Canals; Channels; Desilting; Hydraulic models; Hydraulics; Sedimentation; Streams; Suspended sediments; Bed load
Chapter V: Sediment Control Methods: C. Control of Sediment in Canals, By the Task Committee on Preparation of Sedimentation Manual, Committee on Sedimentation of the Hydraulics Division, Vito A. Vanoni, Chmn., 455

Canals; Channels; Ground water; Hydraulics; Irrigation; Seepage
Seepage from Shallow Open Channel, Bruce W. Hunt, 252

Canals; Cofferdams; Concrete (reinforced); Culverts; Erosion; Flood control; Pipelines
New Culvert Carries Creek Underneath Canal, Alfred R. Pagan, 440

Canals; Construction; Financing; Fluid flow; Hydraulic radius; Linings; Pipelines; Power; Pressure tunnels; Tunnels; Velocity; Water; Water flow
Aqueducts for the Least Cost Conveyance of Water, Nephi A. Christensen, 46

Canals; Design; Ecology; Environmental engineering; Fish; Florida; Locks (waterways); Navigation; Waterways
Design Versus Ecology in St. Johns and Indian Rivers, Harold A. Scott, 475

Canals; Locks (waterways); Navigable rivers; ASCE (History); ASCE (Outstanding Civil Engineering)
Great Falls Canal and Locks: Civil Engineering Landmark496

Cantilevers; Frames; Structural analysis; Structural engineering; Buckling
Buckling of Lateral Restrained Thin-Walled Cantilevers of Open Cross Section, Jacob Gluck and Menachem Gelbert, 451

Cantilevers; Stability; Structural engineering; Beams (supports); Buckling
Stability of Monosymmetric Beams and Cantilevers, John M. Anderson and Nicholas S. Trahair, 122

Capacity; Cargo transportation; Harbors; Queueing theory; Rates (costs); Thailand
Capacity-Feedback Relationship for Port of Bangkok, Donald R. Drew, Pakorn Adulbhan, Wai Ling Woo and Manu Juaseekoon, 441

Capacity; Economic analysis; Economic factors; Highway engineering; Canada
Economic Criterion for Highway Capacity Determination, Bruce G. Hutchinson, 377

Capillary flow; Hydraulics; Infiltration; Soil moisture; Soil moisture movement; Two phase flow
Perturbation Analysis of Two-Phase Infiltration, Alain Noblanc and Hubert J. Morel-Seytoux, 463

Capital costs; Industrial wastes; Sanitary engineering; Sewage treatment; Biological treatment
Design and Economics of Joint Wastewater Treatment, W. Wesley Eckenfelder, Jr., 261

Careers; Engineering education; Professional development; Universities; ASCE (education)
University of Wisconsin Offers Professional Development Degree, John P. Klus and C. Allen Wortley, 20

Cargo transportation; Containerizing; Containers; Containment vessels; Harbors; Shipping containers
Containerization - A System Still Evolving, Walter C. Boyer, 494

Cargo transportation; Containerizing; Harbor facilities; Land reclamation; Marine terminals; Surcharge
Containerization and Its Impact on Port Development, Anthony J. Tozzoli, 426

Cargo transportation; Freight terminals; Social values; Trucks; Urban development
Urban Commodity Flow - Suggested Research Projects, Warren B. Lovejoy, 554

Cargo transportation; Harbors; Queueing theory; Rates (costs); Thailand; Capacity
Capacity-Feedback Relationship for Port of Bangkok, Donald R. Drew, Pakorn Adulbhan, Wai Ling Woo and Manu Juaseekoon, 441

Catalysts; Inhibition; Oxygenation; Sanitary engineering; Sulfides
Oxidation of Sulfide by O_2: Catalysis and Inhibition, Kenneth Y. Chen and J. Carrell Morris, 181

Cationic asphalt emulsions; Cement grouts; Foundations; Grout curtains; Grouting; Asphalt emulsions
Experimental Cationic Asphalt Emulsion Grouting, Lloyd R. Gebhart, 446

Cavitation; Energy dissipators; Hydraulics; Jets; Orifices; Valves
Cavitation in High-Head Conduit Control Dissipators, John F. Ripken and Norio Hayakawa, 151

Cavitation; Hydraulics; Pipe flow; Pipelines; Valves
Choking and Supercavitating Valves, J. Paul Tullis, 69

Cavitation; Hydraulics; Pipelines; Water hammer
Cavitation in Horizontal Pipelines Due to Water Hammer, J. P. Th. Kalkwijk and C. Kranenburg, 32

Cavities; Creep; Frozen soils; Soil mechanics; Stability criteria; Subsurface structures
In Situ Creep Analysis of Room in Frozen Soil, Erik G. Thompson and Francis H. Sales, 464

Cavities; Elastic-plastic analysis; Expansion; Soil mechanics
Expansion of Cavities in Infinite Soil Mass, Aleksandar Sedmak Vesic, 217

Cement grouts; Foundations; Grout curtains; Grouting; Asphalt emulsions; Cationic asphalt emulsions
Experimental Cationic Asphalt Emulsion Grouting, Lloyd R. Gebhart, 446

Cements; Concrete; Concrete (reinforced); Dams; Distribution systems; Foundations; Heat of hydration; Reinforcement; Structural engineering
Temperature Rises in Low-Heat Cement Concrete, Barry P. Hughes, 43

Cements; Deformation; Highways; Soil cement; Transportation
Soil-Cement Bases Under Thin Bituminous Surfacing, Boniface C. Obi, 124

Channels; Desilting; Hydraulic models; Hydraulics; Sedimentation; Streams; Suspended sediments; Bed load; Canals
Chapter V: Sediment Control Methods: C. Control of Sediment in Canals, By the Task Committee on Preparation of Sedimentation Manual, Committee on Sedimentation of the Hydraulics Division, Vito A. Vanoni, Chmn., 455

Channels; Flumes; Hydraulics; Pipe flow; Rivers; Sediments; Bed load
Friction Factors in Solid Material Laden Systems, Ertan R. Acaroglu, 241

Channels; Ground water; Hydraulics; Irrigation; Seepage; Canals
Seepage from Shallow Open Channel, Bruce W. Hunt, 252

Channel stabilization; Channels (waterways); Reports; Rivers; Sedimentation; Bed movements
Sediment Control Methods: B. Stream Channels, by the Task Committee on Preparation of Sedimentation Manual, Committee on Sedimentation, Vito A. Vanoni, Chmn., 391

Channel stabilization; Curves; Hydraulics; Rivers; Water flow
Flow Processes in Open Channel Bends, Robert P. Apmann, 263

Channel stabilization; Hydraulic models; Missouri; Prototypes
Navigation Model Tests for Straight Reach of Missouri River, Duane J. Sveum and Warren J. Mellema, 227

Channels (waterways); Computation; Diffusion; Floods; Hydraulics; Rivers
Diffusion Solution To Flows with Upstream Control, Alex J. Sutherland and Alistair G. Barnett, 537

Channels (waterways); Design; Drag; Hydraulic jump; Hydraulics; Supercritical flow
Supercritical Flow Over Sills at Incipient Jump Conditions, Karam S. Karki and Subhash Chander, 503

Channels (waterways); Hydraulic models; Hydraulics; Supercritical flow; Supersonic flow; Water flow
Supercritical Flow in Rectangular Expansions, John B. Herbich and Peter Walsh, 497

Channels (waterways); Hydraulics; Ripple marks; Sand waves; Sedimentation; Bed movements
Initiation of Ripples by Artificial Disturbances, Philip B. Williams and Patrick H. Kemp, 328

Channels (waterways); Reports; Rivers; Sedimentation; Bed movements; Channel stabilization
Sediment Control Methods: B. Stream Channels, by the Task Committee on Preparation of Sedimentation Manual, Committee on Sedimentation, Vito A. Vanoni, Chmn., 391

Characteristics; Frequency; Hydraulics; Matrices (mathematics); Pipelines; Resonance
Resonance in Pipes Having Variable Characteristics, M. Hanif Chaudry, 159

Chemical cleaning; Cleaning; Drainage; Drains; Sewers
Restoring Subsurface Drain Performance, Luther B. Grass and Arnold J. MacKenzie, 90

Chemical composition; Compaction; Incineration; Incinerators; Leaching; Soil mechanics
Incinerator-Residue-Fill Site Investigation, Robert J. Schoenberger and A. Alexander Fungaroli, 65

Chemical grouts; Chemical reactions; Compacting; Research and development; Soil mechanics; Test procedures
Strength Properties of Chemically Solidified Soils, James Warner, 503

Chemical reactions; Compacting; Research and development; Soil mechanics; Test procedures; Chemical grouts
Strength Properties of Chemically Solidified Soils, James Warner, 503

Chemical removal (sewage treatment); Filtration; Sewage treatment; Wastewater treatment; Water quality; Adsorption
No Innovation in Wastewater Treatment, Russell L. Culp, 327

Chemical removal (sewage treatment); Sanitary engineering; Sewage treatment; Slime; Sludge; Statistical analysis; Trickling filters
Enhanced Phosphorus Removal in Trickling Filters, Harold J. Jebens and William C. Boyle, 399

Chemical stabilization; Chlorine; Public health; Recreation facilities; Research; Sanitary engineering; Bacteria
Bactericidal Properties of Chlorsulfamates, John E. Delaney and J. Carrell Morris, 209

Chemical stabilization; Clays; Lime soil mixtures; Soil mechanics; Soil stabilization; Admixtures
Acceleration of Lime-Clay Reactions with Salt, B. Dan Marks and T. Allan Haliburton, 235

Chicago; Columns (supports); Loads (forces); Steels; Structural engineering; Tall buildings; Wind (meteorology); Amplitude
Bundled-tube Structure for Sears Tower, Hal S. Iyengar, 509

Chicago; Employment opportunities; Passenger transportation; Social needs; Transportation; Urban transportation
Public Transit and Job Access in Chicago, Martin Wachs and Joseph L. Schofer, 170

Chimneys; Design; Liner plates; Loads (forces); Power; Research; Steels; Structural engineering; Buckling
Design of Steel Chimney Liners, Max Zar, Shih-Lung Chu and James M. Doyle, 500

Chimneys; Shear flow; Structural engineering; Vibration; Wind pressure
Lift or Across-Wind Response to Tapered Stacks, Barry J. Vickery and Arthur W. Clark, 85

Chlorination; Chlorine; Disinfection; Exchange reactions; Sanitary engineering
Fixed Resin Bed Chlorination of Water, Edgar J. Dewar and Morris Wayman, 172

Chlorination; Coliform bacteria; Disinfection; Kinetics; Pollution control; Sanitary engineering; Waste stabilization ponds; Waste treatment; Algae
Kinetics of Chlorine Disinfection in an Ecosystem, Leonard W. Hom, 231

Chlorination; Coliform bacteria; Sanitary engineering; Sewage treatment; Waste treatment; Bacteria
Problems in Obtaining Adequate Sewage Disinfection, Harvey F. Collins, Robert E. Selleck and George C. White, 66

Chlorination; Flocculating; Sanitary engineering; Stabilization; Algae
Disinfection of Algal Laden Waters, Wayne F. Echelberger, Jr., Joseph L. Pavoni, Philip C. Singer and Mark W. Tenney, 91

Chlorination; Sanitary engineering; Water pollution; Aeration; Bacteria; Beaches
Pneumatic Barrier and Beach Pollution, Martin S. Hertzendorf, Joseph V. Fiore, Herbert E. Klei and I. J. Kopelman, 304

Chlorine; Coagulation; Epidemiology; Filtration; Protamines; Sanitary engineering; Water treatment; Activated sludge
Integrated Approach to Problem of Viruses in Water, Gerald Berg, 122

Chlorine; Cysts; Disinfection; Dysentery; Iodine; Meningitis; Microorganism control (water); Water treatment; Amoeba
Amoebic Cysticidal Properties of Halogens in Water, Richard Stringer and Cornelius W. Kruse, 98

Chlorine; Detention reservoirs; Filtration; Hydraulics; Pollution; Sanitary engineering; Settling basins; Sewage disposal; Tanks (containers); Trickling filters; Bacteria
Chlorine Disinfection in Final Settling Basins, Darrell W. Monroe and Donald C. Phillips, 296

Chlorine; Disinfection; Exchange reactions; Sanitary engineering; Chlorination
Fixed Resin Bed Chlorination of Water, Edgar J. Dewar and Morris Wayman, 172

Chlorine; Public health; Recreation facilities; Research; Sanitary engineering; Bacteria; Chemical stabilization
Bactericidal Properties of Chlorsulfamates, John E. Delaney and J. Carrell Morris, 209

Chute spillways; Dams (earth); Eductors; Ejectors; Failure; Hydraulic jump; Hydraulics; Slabs; Uplift pressure
Damage to Karnafuli Dam Spillway, Mohammad A. Rahman, 596

City planning; Concrete (post-tensioned); Concrete (precast); Foundations; Highways; Prefabrication; Slabs; Tendons; Transportation; Bridges (structures)
Prefabricated Highways, William Zuk, 204

Civil engineering; Civil engineers; ASCE (presidents)
Annual Address, Samuel S. Baxter, 26

Civil engineering; Civil engineers; Economics; Education; Engineering education; Ethics; Planning
The Education of an Engineer (A Continuing Story), James E. Crews and Charles C. McCloskey, III, 544

Civil engineering; Civil engineers; Engineering education; Social needs
The Engineer's Role, Frederick J. Clarke, 264

Civil engineering; Civil engineers; Esthetics; Professional activities
The Engineer and Pollution Control - Some Objections to the Simplistic Approach, Samuel C. Florman, 418

Civil engineering; Civil engineers; Health; Insurance; Insurance costs
Overview of the Health Care Services Industry, Robert A. Tschetter, 591

Civil engineering; Civil engineers; Health; Professional activities; Social needs
The Role of the Civil Engineer in Statewide Health Planning, William H. Wisely, 592

Civil engineering; Civil engineers; History; ASCE (History); Biographies
A Biographical Dictionary of American Civil Engineers, by the Committee on History and Heritage of American Civil Engineering, Neal FitzSimons, Chmn., 137

Civil engineering; Civil engineers; Legislation; Professional activities; ASCE (National Affairs)
Legislative Involvement, Stephen M. Olko, 573

Civil engineering; Civil engineers; Political aspects; Social aspects; Social needs
Are Civil Engineers Socially Responsible?, David Crump, 35

Civil engineering; Civil engineers; Professional activities; Social needs; Systems analysis
The Civil Engineer in the Multidisciplinary Design Team, David A. Novick, 277

Civil engineering; Computer applications; Office equipment; Calculations; Calculators
The Programmable Calculator: A Place In Civil Engineering, Eugene E. Dallaire, 106

Civil engineering; Computer programming; Computers; Computer systems hardware; Professional activities
Computer Use in Civil Engineering, Robert L. Schiffman and E. Rex Krueger, 299

Civil engineering; Design; Engineering; Planning; Projects; Social needs
Ethical and Social Responsibility in the Planning and Design of Engineering Projects, David Mann, 107

Civil engineering; Ecology; Environmental engineering; Pollution control; Professional activities; Social aspects; Social needs
Ecology - Rage and Reason, Robert Moses, 474

Civil engineering; Engineering; Management; Planning; Projects; Surveying; Surveys
Project Planning, John M. Shields, 202

Civil engineering; Engineering; Professional activities; Professional engineering; Social needs
Considering Social Value in Engineering Projects, Charles G. Sudduth, 96

Civil engineering; Engineering education; Health; Systems engineering; Bioengineering; Buildings (hospitals)
Civil Engineering and National Goals in Bioengineering, George Bugliarello, 591

Civil engineering; Engineering education; Systems analysis; Systems engineering
Systems Approach and the Civil Engineer, Kenneth W. Heathington and R. Brian Bonton, 10

Civil engineering; Environmental engineering; Political aspects; Pollution; Professional activities; Social change
Pollution, Politics and Protest, Charles L. Gould, 39

Civil engineering; Finance; Professional practice; Professional societies; ASCE (Ethics); ASCE (Presidents); Bids
State of the Society, Oscar S. Bray, 602

Civil engineering; Forecasting; Professional activities; Water resources; Water reuse; Water use
Water Resources in the Future: Directions and Prospects, Joseph L. Fisher, 407

Civil engineering; Government policies; Professional activities; Research; ASCE (Activities); ASCE (Policy); ASCE (Research)
Goals of Civil Engineering Research -- Its Responsiveness to the Needs, Desires and Aspirations of Man, ASCE Committee on Research, Robert F. Baker, Chmn., 599

Civil engineers; ASCE (presidents); Civil engineering
Annual Address, Samuel S. Baxter, 26

Civil engineers; Collective bargaining; Education; Engineering education; Labor relations; Management; Salaries; Schools; Unionization
Collective Bargaining on the Campus, B. Austin Barry, 563

Civil engineers; Construction; Construction procedure; Liabilities; Professional advancement
Booby Traps for Young Engineers on Construction, Edward A. Merrill, 108

Civil engineers; Consulting engineers; Municipal engineering; Professional practice; Reports; Salaries
1971 ASCE Salary Survey, the Committee on Employment Conditions of the Department of Professional Activities, Charles J. Stevens, Chmn., 347

Civil engineers; Ecology; Environmental engineering; Government; Professional activities; Professional societies
Integrity and the Ecological Crisis, Myron Tribus, 227

Civil engineers; Economics; Education; Engineering education; Ethics; Planning; Civil engineering
The Education of an Engineer (A Continuing Story), James E. Crews and Charles C. McCloskey, III, 544

Civil engineers; Education; Engineering education; Engineers; Professional activities; Professional advancement; Professional engineering; Schools
Civil Engineering Education in the Future, Richard Tucker, 191

Civil engineers; Education; Engineering education; Missouri; U.S. Corps of Engineers
Corps of Engineers Promotes Continuing Education, Melford E. Monsees, 39

Civil engineers; Education; Professional activities; Professional advancement; ASCE (younger members)
Professional Development for Consulting Engineers, Gerald L. Baker, 166

Civil engineers; Employment; Professional activities; Professional practice; Registration; ASCE (members); ASCE (membership)
A Profile of ASCE Membership, George K. Wadlin, Jr., 312

Civil engineers; Engineering education; Geodetic surveys; Mapping; Reports; Surveys; Awards
Status Report of Surveying and Mapping Division, William A. White, 121

Civil engineers; Engineering education; Social needs; Civil engineering
The Engineer's Role, Frederick J. Clarke, 264

Civil engineers; Esthetics; Professional activities; Civil engineering
The Engineer and Pollution Control - Some Objections to the Simplistic Approach, Samuel C. Florman, 418

Civil engineers; Health; Insurance; Insurance costs; Civil engineering
Overview of the Health Care Services Industry, Robert A. Tschetter, 591

Civil engineers; Health; Professional activities; Social needs; Civil engineering
The Role of the Civil Engineer in Statewide Health Planning, William H. Wisely, 592

Civil engineers; History; ASCE (History); Biographies; Civil engineering
A Biographical Dictionary of American Civil Engineers, by the Committee on History and Heritage of American Civil Engineering, Neal FitzSimons, Chmn., 137

Civil engineers; Legislation; Professional activities; ASCE (National Affairs); Civil engineering
Legislative Involvement, Stephen M. Olko, 573

Civil engineers; Legislation; Professional activities; Public relations
Action in Public Affairs -- A Way of Life, James W. McPhillips, Brian R. Hogan, Eugene R. McMaster and David A. Novick, 239

Civil engineers; Political aspects; Social aspects; Social needs; Civil engineering
Are Civil Engineers Socially Responsible?, David Crump, 35

Civil engineers; Problem solving; Social needs; Technology
Engineering and Today's Social Problems, Donald C. Slichter, 147

Civil engineers; Professional activities; Social needs; Systems analysis; Civil engineering
The Civil Engineer in the Multidisciplinary Design Team, David A. Novick, 277

Civil engineers; Salaries; Working conditions; ASCE (local sections); California
California ASCE Sections Prepare Employment Guidelines, George S. Korbay and Ronald P. Gallagher, 25

Claims (contracts); Construction; Contracts; Rock mechanics; Bids
Changed Soil and Rock Conditions in Construction, George F. Sowers, 83

Clay (material); Dynamic response; Laboratory tests; Shear modulus; Soil mechanics
Time Effects on Dynamic Shear Modulus of Clays, William F. Marcuson, III and Harvey E. Wahls, 588

Clay (material); Field tests; Slurries; Bored piles
Behavior of Bored Piles in Beaumont Clay, Michael W. O'Neill and Lymon C. Reese, 197

Clays; Dams; Shale; Shear strength; Sliding; Soil mechanics; Stability
Analysis of Waco Dam Slide, Stephen G. Wright and James M. Duncan, 472

Clays; Earth pressure; Lateral pressure; Model tests; Retaining walls; Soil mechanics
Lateral Pressures from Soft Clay, Peter J. Moore and Graham K. Spencer, 538

Clays; Infiltration; Pavement bases; Soil mechanics; Soil moisture; Subgrade
Subgrade Moisture Under Oklahoma Highways, T. Allan Haliburton, Donald R. Snethen, Larry K. Shaw and B. Dan Marks, 114

Clays; Lime soil mixtures; Soil mechanics; Soil stabilization; Admixtures; Chemical stabilization
Acceleration of Lime-Clay Reactions with Salt, B. Dan Marks and T. Allan Haliburton, 235

Clays; Limit design method; Sands; Slipping; Soil mechanics; Vehicles
Stress Field Under Slipping Rigid Wheel, Mohammed K. Elsamny and Ahmed A. Ghobarah, 113

Clay soils; Drainage; Groundwater flow; Porous media
Drainage in Soils with Initial Gradient, Arun J. Valsangkar and Kanakatti Subramanya, 383

Cleaning; Drainage; Drains; Sewers; Chemical cleaning
Restoring Subsurface Drain Performance, Luther B. Grass and Arnold J. MacKenzie, 90

Climatology; Consumptive use (water); Evaporation; Evapotranspiration; Frequency distribution; Irrigation
Central California Evapotranspiration Frequencies, W. O. Pruitt, Sergius von Oettingen and D. L. Morgan, 251

Climatology; Consumptive use (water); Evaporation; Evapotranspiration; Irrigation; Solar radiation; Water consumption
Coastal California Evapotranspiration Frequencies, Paul R. Nixon, G. Paul Lawless and Gary V. Richardson, 279

Cloud seeding; Hydraulics; Hydrometeorology; Precipitation gages; Weather modification
Colorado Pilot Project: Design Hydrometeorology, Patrick A. Hurley, 291

Cloud seeding; Irrigation; Meteorology; Rainfall; Rivers; Water resources; Weather modification
Cloud Seeding Interpreted Through Atmospheric Water Balance, James L. Rasmussen, 562

Coagulation; Epidemiology; Filtration; Protamines; Sanitary engineering; Water treatment; Activated sludge; Chlorine
Integrated Approach to Problem of Viruses in Water, Gerald Berg, 122

Coastal engineering; Coastal structures; Wave height; Wave runup; Waves
Maximum Breaker Height, J. Richard Weggel, 586

Coastal engineering; Coefficients; Hydrodynamics; Models; Offshore structures; Waves
Mechanical Excitation of Offshore Tower Model, Charles P. Rains and Subrata K. Chakrabarti, 172

Coastal engineering; Construction; Design; Foundations; Hurricanes; Piers; Storms; Stresses; Wind bracing; Wooden structures
Wood Structures Can Resist Hurricanes, Gerald E. Sherwood, 417

Coastal engineering; Desalting; Dilution; Hydraulics; Jets
Model Study of Dense Jet in Flowing Fluid, Forrest M. Holly, Jr. and John L. Grace, Jr., 552

Coastal engineering; Dredging; Estuaries; Salt marshes; Sediments; Water quality
Environmental Aspects of Dredging in Estuaries, Herbert L. Windom, 529

Coastal engineering; Drilling; Offshore completion; Pile structures; Vortices; Wave energy; Waves
Laboratory Study of Lift Forces on Circular Piles, Devidas D. Bidde, 60

Coastal engineering; Equilibrium; Harbors; Hydraulic models; Movable bed models; Profiles; Scale effect; Beach ridges
Equilibrium Beach Profile Scale-Model Relationship, Edward K. Noda, 558

Coastal engineering; Gravity waves; Harbors; Breakwaters
Wave Defraction by Detached Breakwater, Michael Stiassnie and Gedeon Dagan, 265

Coastal engineering; Harbors; Rubble mounds; Wave height; Breakwaters
Effect of Irregular Wave Trains on Rubble-Mound Breakwaters, Yvon Ouellet, 119

Coastal engineering; Harbors; Wave propagation; Basins
Oscillations in Harbors with Connected Basins, Jiin-Jen Lee and Fredric Raichlen, 351

Coastal engineering; Hydraulic models; Tsunamis; Walls; Water waves
Waves Generated by Horizontal Motion of a Wall, Madan M. Das and Robert L. Wiegel, 137

Coastal engineering; Hydrodynamics; Ocean engineering; Ocean waves; Subsurface structures; Waves
Wave Forces on Submerged Bodies, C. J. Garrison and P. Y. Chow, 371

Coastal engineering; Industrial wastes; Tidal currents; Water pollution; Water pollution control
Oil Booms in Tidal Currents, Ralph H. Cross and David P. Hoult, 192

Coastal engineering; Marine transportation; Towing; Tugboats; Barges
Ocean Tug-Barge Systems, Lawrence R. Glosten, 243

Coastal engineering; Mass; Offshore structures; Periodic functions; Resonance; Wave energy
Resonant Response of Offshore Structures, Lawrence G. Selna and David Cho, 155

Coastal engineering; Ocean currents; Outfall sewers; Sewers; Waste disposal; Wind (meteorology)
Coastal Current of Pacific Northwest, Bard Glenne and Robert H. Bourke, 574

Coastal engineering; Ocean waves; Spectral energy distribution; Standing waves; Wave height; Breakwaters
Spectral Resolution of Breakwater Reflected Waves, Edward B. Thornton and Ronald J. Calhoun, 512

Coastal engineering; Wave action; Wave height; Wavelength; Wave period
Regular Wave Effects on Walls Made of Cylinders, G. D. Khaskhachikh and O. M. Vanchagov, 101

Coastal engineering; Wave energy; Wind pressure; Windward drift; Air water interactions
Physical Scales for Generation of Wind Waves, Jin Wu, 281

Coastal structures; Wave height; Wave runup; Waves; Coastal engineering
Maximum Breaker Height, J. Richard Weggel, 586

Coefficients; Correlation; Cylindrical bodies; Hydraulics; Boundary layer
Shear Flow Past Circular Cylinder, Thomas L. Shaw and Michael R. Starr, 201

Coefficients; Engineering mechanics; Gates; Sluice gates; Water flow
Solution of Flow Under Sluice Gate, Yong K. Chung, 152

Coefficients; Evaporation; Heat exchangers; Hydraulic models; Hydraulics; Temperature; Tests; Thermal pollution
Evaluating Water Surface Heat Exchange Coefficients, Peter D. Hindley and Russell M. Miner, 421

Coefficients; Evaporation; Mathematical models; Predictions; Statistical tests; Temperature; Water quality; Algorithms
Stream Temperature Prediction Under Reduced Flow, William L. Morse, 332

Coefficients; Flow resistance; Hydraulics; Laminar flow; Orifices; Pipe flow
Orifice Losses for Laminar Approach Flow, Nagar S. Lakshmana Rao and Kalambur Sridharan, 556

Coefficients; Fluid flow; Hydraulics; Hydrodynamics; Turbulence; Vibration
Turbulence Effects On Drag of Sharp-Edged Bodies, John A. Roberson, Chi Yu Lin, Scott G. Rutherford and Marvin D. Stine, 386

Coefficients; Graphs (charts); Hydraulics; Mannings equation; Pipe flow; Sanitary engineering; Smoothness
Manning's Coefficient for Smooth Pipes, Henry Liu, 312

Coefficients; Hydrodynamics; Models; Offshore structures; Waves; Coastal engineering
Mechanical Excitation of Offshore Tower Model, Charles P. Rains and Subrata K. Chakrabarti, 172

Coefficients; Oxidation; Oxygen; Sanitary engineering; Sewage; Sewers; Weirs; Adsorption
Oxygen Adsorption in Streams, John D. Parkhurst and Richard D. Pomeroy, 156

Cofferdams; Concrete (reinforced); Culverts; Erosion; Flood control; Pipelines; Canals
New Culvert Carries Creek Underneath Canal, Alfred R. Pagan, 440

Cofferdams; Construction; Dams (buttress); Dams (earth); Embankments; Hydroelectric power generation; Irrigation; Pakistan; Power
Tarbela Dam Project, Pakistan, Wilson V. Binger, 594

Cofferdams; Fabrication; Prefabrication; Reinforcement; Steels; Traffic control; Tunnels; Underwater construction; Vehicular tunnels
Submerged-Tube Tunnel in Mobile, Ray R. Slocum, 368

Cohesionless soils; Earthquakes; Sands; Shear strain; Soil mechanics; Vibration
Settlement of Dry Sands During Earthquakes, H. Bolton Seed and Marshall L. Silver, 264

Cohesionless soils; Footings; Foundations; Soil mechanics; Bearing capacity
Bearing Capacity Theory From Experimental Results, A. Verghese Chummar, 561

Cohesive soils; Field tests; Shear strength; Soil mechanics; Stress-strain curves
Expansion of Cylindrical Probes in Cohesive Soils, Francois Baguelin, Jean-Francois Jezequel, Eugene LeMee and Alain LeMehaute, 553

Cold weather construction; Concrete (precast); Concrete (prestressed); Construction; Costs; Shelters; Slabs
Meeting the Challenge of Winter Construction, Allen T. Johnson, 507

Coliform bacteria; Disinfection; Kinetics; Pollution control; Sanitary engineering; Waste stabilization ponds; Waste treatment; Algae; Chlorination
Kinetics of Chlorine Disinfection in an Ecosystem, Leonard W. Hom, 231

Coliform bacteria; Sanitary engineering; Sewage treatment; Waste treatment; Bacteria; Chlorination
Problems in Obtaining Adequate Sewage Disinfection, Harvey F. Collins, Robert E. Selleck and George C. White, 66

Collapse; Composite structures; Curved beams; Structural engineering; Bridges (girder); Bridges (spans)
Plastic Collapse of Horizontally Curved Bridge Girders, Chai Hong Yoo and Conrad P. Heins, Jr., 221

Collapse; Explosions; Structural design; Buildings; Buildings (residential)
Design for Prevention of Progressive Collapse, Ramzi H. Ferahian, 102

Collective bargaining; Education; Engineering education; Labor relations; Management; Salaries; Schools; Unionization; Civil engineers
Collective Bargaining on the Campus, B. Austin Barry, 563

Collective bargaining; Engineering societies; Salaries; Unionization; ASCE (Employment Conditions); ASCE (Salaries and Fees)
Civil Engineer's Compensation - ASCE's Future, Daniel J. Smyers, 500

Collisions; Highways; Safety; Safety devices; Tests; Transportation; Attenuators
Recent Developments in Roadside Crash Cushions, John G. Viner, 99

Colorado; Construction; Dams (earth); Planning; Surveying instruments; Surveys
Planning Concrete Dam Construction Control Surveys, Maynard J. Willis, 255

Columns (supports); Compaction; Concrete; Consolidation; Distribution; Mass concrete; Placement; Reinforcement; Slabs; Walls; Beams (supports)
Pertinent Techniques for Compacting Concrete, Shu-t'ien Li and Donald A. Stewart, 429

Columns (supports); Computation; Dynamic stability; Engineering mechanics; Stability; Torsion; Vibration; Beam columns; Buckling
Coupled, Nonconservative Stability-Finite Element, C. D. Mote, Jr. and Gerald Y. Matsumoto, 286

Columns (supports); Concrete (reinforced); Deflection; Structural engineering; Tests; Time dependence
Slender Concrete Columns Under Sustained Load, Brij B. Goyal and Neil Jackson, 35

Columns (supports); Concrete (reinforced); Flexural strength; Structural engineering; Bauschinger effect; Beams (supports)
Reinforced Concrete Members with Cyclic Loading, Robert Park, Dudley Charles Kent and Richard A. Sampson, 310

Columns (supports); Continuous beams; Plates (structural members); Shear strength; Structural engineering; Tests
Shear Strength of Continuous Plates, M. Daniel Vanderbilt, 237

Columns (supports); Curvature; Metals; Structural engineering
Tangent Stiffness Method for Biaxial Bending, Sakda Santathadaporn and Wai F. Chen, 93

Columns (supports); Deflection; Elastic properties; Engineering mechanics; Probability theory; Stability; Statistical analysis; Structural engineering; Buckling
Nonstationary Random Column Buckling Problem, Raymond G. Jacquot, 501

Columns (supports); Deformation; Engineering mechanics; Metals; Necking; Nonlinear differential equations
Nonlinear Analysis of Instability in Tension, Sam Tang, 21

Columns (supports); Dynamic characteristics; Dynamic structural analysis; Earthquake theory; Engineering mechanics; Plasticity
Finite Earthquake-Response of Inelastic Structure, Chi-Mou Ni and Lawrence H.N. Lee, 549

Columns (supports); Fire protection; Structural engineering
Steel Column Buckling Under Thermal Gradients, Charles G. Culver, 414

Columns (supports); Inelastic action; Slenderness ratio; Structural engineering; Struts; Tees; Thickness ratio; Width; Angle iron; Buckling
Buckling of Steel Angle and Tee Struts, John B. Kennedy and Madugula K.S. Murty, 547

Columns (supports); Limit design method; Structural engineering; Bending; Biaxial loads
Interaction Equations for Biaxially Loaded Sections, Wai F. Chen and Toshio Atsuta, 245

Columns (supports); Loads (forces); Steels; Structural engineering; Tall buildings; Wind (meteorology); Amplitude; Chicago
Bundled-tube Structure for Sears Tower, Hal S. Iyengar, 509

Columns (supports); Rigid frames; Skyscrapers; Structural engineering; Tests; Buckling
Inelastic Multistory Frame Buckling, Bernard M. McNamee and Le-Wu Lu, 368

Columns (supports); Skyscrapers; Steel structures; Structural engineering; Beam columns; Buildings
Aspects of Column Design in Tall Steel Buildings, John Springfield and Peter F. Adams, 258

Columns (supports); Stability; Steels; Structural engineering; Beam columns; Beams (supports); Buckling
Finite Deformation of Biaxially Loaded Columns, Lawrence A. Soltis and Paul P. Christiano, 568

Combined sewers; Computers; Hydrology; Runoff
A System for Regulation of Combined Sewage Flows, Charles V. Gibbs, Stuart M. Alexander and Curtis P. Leiser, 506

Comfort; Human factors engineering; Structural engineering; Tests; Buildings (office)
Human Perception Thresholds of Horizontal Motion, Peter W. Chen and Leslie E. Robertson, 397

Commercial transportation; Commodity management; Models; Transportation; Urban planning
Analysis of Need for Goods Movement Forecasts, Davit Fresko, Gordon Shunk and Franklin Spielberg, 87

Commodity management; Models; Transportation; Urban planning; Commercial transportation
Analysis of Need for Goods Movement Forecasts, Davit Fresko, Gordon Shunk and Franklin Spielberg, 87

Communication; Forecasting; Social needs; Telecommunication; Transportation; Urban development; Urban planning; Buildings (office)
Communications Substitutes for Intra-Urban Travel, Richard C. Harkness, 307

Communication; Professional activities; Professional development; Professional practice; Technical writing
Clear Communication--Key to Professional Development, M. D. Morris, 131

Community development; Noise reduction; Real property; Transportation; Air pollution; Benefit-cost ratios
Community Values in Transport Network Evaluation, Dan G. Haney and George E. Klein, 449

Community relations; Decision making; Decisions; Planning; Publicity; Public opinion; Water resources
Fishbowl Planning Immerses Pacific Northwest Citizens in Corps Projects, Howard L. Sargent, 389

Community relations; Decision making; Disadvantaged groups; Government; Research; Schools; Traffic surveys; Transportation
Transportation Research for Community Objectives, Arthur Saltzman, Sidney H. Evans, Alice E. Kidder and Florentine Sowell, 555

Community relations; Planning; Problem solving; Social needs; Urban development; Urban planning
Goals for Dallas Program, Erik Jonsson, 394

Compacting; Research and development; Soil mechanics; Test procedures; Chemical grouts; Chemical reactions
Strength Properties of Chemically Solidified Soils, James Warner, 503

Compaction; Concrete; Consolidation; Distribution; Mass concrete; Placement; Reinforcement; Slabs; Walls; Beams (supports); Columns (supports)
Pertinent Techniques for Compacting Concrete, Shu-t'ien Li and Donald A. Stewart, 429

Compaction; Density; Sands; Shear strain; Soil mechanics
Compaction of Sands By Repeated Shear Straining, T. Leslie Youd, 382

Compaction; Fills; Fly ash; Frost action; Soil mechanics; Soil stabilization
Engineering Properties of Compacted Fly Ash, Donald H. Gray and Yen-Kuang Lin, 253

Compaction; Incineration; Incinerators; Leaching; Soil mechanics; Chemical composition
Incinerator-Residue-Fill Site Investigation, Robert J. Schoenberger and A. Alexander Fungaroli, 65

Compaction tests; Consolidation; Embankments; Field density; Fly ash; Power; Shear strength; Bearing values
Fly Ash as Structural Fill, Anthony M. DiGioia and William L. Nuzzo, 175

Compaction tests; Laboratory tests; Saturation; Soil compacting
A Possible 1-Point System Method For Laboratory Compaction Testing, John J. Galvan, 165

Comparison; Engineering mechanics; Orthotropic plate; Boundary value problems
Frequency Analysis of Tapered Orthotropic Plates, Jayaraman Ramachandran, 68

Compatibility; Continuum mechanics; Engineering mechanics; Sandwich structures; Shells (structural forms)
Nonlinear Sandwich Shell and Cosserat Surface Theory, David J. Malcolm and Peter G. Glockner, 459

Compatibility methods; Computer applications; Computers; Equilibrium methods; Newton-Raphson method; Structural engineering; Bridges (suspension)
Static Analysis of Suspension Bridges, Alan Jennings and John E. Mairs, 508

Competitive bidding; ASCE (Code of Ethics); ASCE (Executive Director); ASCE (Policy); ASCE (Professional Practice)
ASCE Signs Consent Decree on Competitive Bidding, Eugene Zwoyer, 315

Composite materials; Cracking (fracturing); Discontinuities; Engineering mechanics; Stress-strain curves; Bond stress
Deformation and Fracture of Particulate Composite, Oral Buyukozturk and Arthur H. Nelson, 292

Composite materials; Deformation; Eigenvalues; Energy methods; Engineering mechanics; Equilibrium methods; Lagrangian functions; Stability; Boundary conditions; Buckling
Stability of Orthotropic Stiffened Composite Plates, Kao Ding Chiu, 508

Composite materials; Elastic properties; Engineering mechanics; Shear modulus; Shear stress
Torsion of Multilayered Rectangular Section, John R. Booker and Sritawat Kitipornchai, 3

Composite materials; Engineering mechanics; Failure; Fiber composites; Plasticity
Yielding of Fiber Reinforced Tresca Material, John D. Helfinstine and Richard H. Lance, 389

Composite structures; Concrete (reinforced); Structural engineering; Torsion; Beams (structural)
Composite Beams in Torsion, Conrad P. Heins, Jr. and John T.C. Kuo, 275

Composite structures; Curved beams; Structural engineering; Bridges (girder); Bridges (spans); Collapse
Plastic Collapse of Horizontally Curved Bridge Girders, Chai Hong Yoo and Conrad P. Heins, Jr., 221

Composite structures; Design; Models; Structural engineering; Box girders; Bridges (structures); Buckling
Ultimate Design of Hollow Thin-Walled Box Girders, Dennis H. Parr, 329

Composite structures; Elastic properties; Engineering mechanics; Matrices (mathematics); Sandwich laminates; Transfer functions
Transfer Matrix Approach to Layered Systems, Leon Y. Bahar, 479

Composite structures; Engineering mechanics; Failure; Fibers; Limit design method; Reinforcement; Structural engineering
Limit Analysis of Ductile Fiber-Reinforced Structures, Richard H. Lance and David N. Robinson, 130

Composite structures; Engineering mechanics; Orthotropic plate; Stiffness; Buckling
Shear-Flexible Orthotropic Plates Loaded in Plane, Charles W. Bert and Shyming Chang, 602

Composite structures; Rotation; Structural engineering; Beams (supports); Boundary value problems; Buckling
Moment-Rotation Curves for Locally Buckling Beams, J. Jay Climenhaga and R. Paul Johnson, 290

Compressed air; Excavation; Shields (tunneling); Slurries; Tunnel construction
Pressurized-Slurry Shields Bore Submarine Tunnels, Takuya Ohira and Shunta Shiraishi, 248

Compression; Earth pressure coefficient; Mica; Soil mechanics
Effect of Mica on K_o Compressibility of Two Soils, Charles A. Moore, 33

Computation; Computer programming; Computers; Engineering mechanics; Numerical analysis; Seepage
Summary Representation Applied to Seepage Problems, Antonio Santos-Moreno, Raymond J. Krizek and Gabor M. Karadi, 144

Computation; Computers; Dynamics; Engineering mechanics; Matrices (mathematics)
Large Eigenvalue Problems in Dynamic Analysis, Klaus-Jurgen Bathe and Edward L. Wilson, 560

Computation; Concrete structures; Elastic properties; Plates (structural members); Structural engineering
Column-Plate Interaction in Flat Slab Structures, Dieter D. Pfaffinger, 134

Computation; Construction procedure; Finite elements; Glass fibers; Roofs; Sandwich structures; Shells (structural forms); Structural engineering; Structural plastics
Plastic Sandwich Buckle-Shell Structures, V. James Meyers, Dhamo T. Ramani and Mark E. Greenwood, 515

Computation; Control surveys; Surveying; Accuracy; Adjustment
Adjusting Radial Surveys, James R. Baker, 501

Computation; Density; Estuaries; Fluid flow; Hydraulics; Salinity; Two phase flow
Numerical Computation of Stratified Nearly Horizontal Flows, John P. Grubert and Michael B. Abbott, 530

Computation; Diffusion; Floods; Hydraulics; Rivers; Channels (waterways)
Diffusion Solution To Flows with Upstream Control, Alex J. Sutherland and Alistair G. Barnett, 537

Computation; Dynamics; Dynamic structural analysis; Engineering mechanics; Finite differences; Mathematics; Numerical integration; Structural engineering
Temporal Operators for Nonlinear Structural Dynamics Problems, George Weeks, 495

Computation; Dynamics; Engineering; Frames; Matrices (mathematics); Mechanics; Structural engineering; Vibration
Convergence in Modal Synthesis, Stephen E. Johnson and Walter C. Hurty, 527

Computation; Dynamic stability; Engineering mechanics; Stability; Torsion; Vibration; Beam columns; Buckling; Columns (supports)
Coupled, Nonconservative Stability-Finite Element, C. D. Mote, Jr. and Gerald Y. Matsumoto, 286

Computation; Finite elements; Prestressing; Roofs; Stiffness methods; Structural engineering; Cables (ropes)
Large Deflection Analysis of Prestressed Networks, John H. Argyris and Dieter W. Scharpf, 185

Computation; Geodesy; Surveying; Vector analysis; Aerial surveys
Three-Dimensional Forward and Inverse Computations, William E. Ball, Jr., 595

Computation; Least squares method; Photogrammetry; Surveying; Accuracy; Algorithms
Nonlinear Least Squares Algorithm, Mohamed F. Madkour, 572

Computation; Navigation; Surveys; Astronomy
Solar Astronavigation in High Latitudes, Gerald W. Johnson and James L. Clapp, 29

Computer applications; Computer programming; Computers; Costs; Accessibility; Calculators
Programmable Calculators: A Consultant Reports, D. A. Polychrone and Dieter Franz, 483

Computer applications; Computers; Equilibrium methods; Newton-Raphson method; Structural engineering; Bridges (suspension); Compatibility methods
Static Analysis of Suspension Bridges, Alan Jennings and John E. Mairs, 508

Computer applications; Loads (forces); Balancing; Bridges (cable-stayed)
Load Balancing Analysis of Cable Stayed Bridges, Benjamin E. Lazar, Michael S. Troitsky and Matthew McC. Douglass, 379

Computer applications; Mathematical models; Optimum design; Sanitary engineering; Wastewater treatment; Activated sludge; Anaerobic digestion; Anaerobic processes
Optimal Design of Wastewater Treatment Systems by Enumeration, Gene F. Parkin and Richard R. Dague, 513

Computer applications; Office equipment; Calculations; Calculators; Civil engineering
The Programmable Calculator: A Place In Civil Engineering, Eugene E. Dallaire, 106

Computer applications; Optimum design; Structural engineering; Adaptive systems; Algorithms
On Adaptive Structural Design, William R. Spillers and Lewis Friedland, 480

Computerized simulation; Construction planning; Earthmoving; Estimates
Estimating Costs of Earthwork via Simulation, Jack H. Willenbrock, 208

Computerized simulation; Cost control; Financing; Flood control; Management control reports; Professional activities; Simulation
Flood Control Developed and Operated with Simulation, John M. Tellemer, 154

Computer models; Computer programming; Finite element method; Mathematical models; Structural analysis
Responsibilities of Computer-Aided Design, Charles F. Beck, 288

Computer models; Mathematical models; Sanitary engineering; Water quality
Water Quality Simulation Model, George R. Grantham, John C. Schaake, Jr. and Edwin E. Pyatt, 57

Computer programming; Computers; Computer systems hardware; Professional activities; Civil engineering
Computer Use in Civil Engineering, Robert L. Schiffman and E. Rex Krueger, 299

Computer programming; Computers; Conduits; Discharge; Hydraulics; Models; Pipe flow; Powerplants; Pumps; Water hammer
Computer Simulation of Waterhammer Effects, George Belonogoff, 323

Computer programming; Computers; Costs; Accessibility; Calculators; Computer applications
Programmable Calculators: A Consultant Reports, D. A. Polychrone and Dieter Franz, 483

Computer programming; Computers; Design; Dynamic response; Dynamics; Earthquakes; Engineering mechanics; Nonlinear programming; Optimization; Stresses; Tall buildings
Optimum Earthquake Design of Shear Buildings, Ben Kato, Yuji Nakamura and Hidetake Anraku, 343

Computer programming; Computers; Engineering mechanics; Numerical analysis; Seepage; Computation
Summary Representation Applied to Seepage Problems, Antonio Santos-Moreno, Raymond J. Krizek and Gabor M. Karadi, 144

Computer programming; Engineering mechanics; Equations; Frames; Plasticity; Quadratic equations; Stresses
Elastic-Plastic Analysis by Quadratic Programming, Antone F. Sayegh and Moshe F. Rubinstein, 564

Computer programming; Finite element method; Mathematical models; Structural analysis; Computer models
Responsibilities of Computer-Aided Design, Charles F. Beck, 288

Computer programs; Computers; Masonry; Shear; Structural engineering; Walls; Wind (meteorology); Bearing capacity; Bending stress; Bricks; Buildings
Computer Design of Engineered Brick Masonry, Alan H. Yorkdale and Robert P. Anderson, 271

Computer programs; Continuum mechanics; Elastic-plastic analysis; Finite element method; Structural engineering
Finite Element Thermoelastoplastic Analysis, Norman A. Cyr, Roger D. Teter and Brian B. Stocks, 372

Computer programs; Costs; Data systems; Estimates
Remote Terminal Cost Estimating, Robert C. Volkman and LeRoy T. Boyer, 133

Computer programs; Curves; Highway engineering; Offsets; Surveys
Offsets to Sight Obstructions Near the Ends of Horizontal Curves, William L. Raymond, Jr., 58

Computer programs; Economic analysis; Flood control; Hydraulics; Land use; Zoning
Role of Economics in Planning Flood Plain Land Use, L. Douglas James, 314

Computer programs; Electrical design; Heating; Ventilation; Air conditioning
Computers: Key to Integrated Building Design, Kenneth F. Reinschmidt, 158

Computer programs; Fatigue (materials); Stresses; Thickness; Transportation
Structural Design of Concrete Pavement by Computer, Cloyd E. Warnes, 25

Computer programs; Finite elements; Folded plates; Interchanges; Orthotropic plate; Skew bridges; Stiffness methods; Structural analysis; Structural engineering; Bridges (box girder)
Cellular Structures of Arbitrary Plan Geometry, Kaspar J. William and Alexander C. Scordelis, 315

Computer programs; Frames; Plastic design; Skyscrapers; Structural engineering; Buildings
Storywise Plastic Design for Multistory Steel Frames, Leroy Z. Emkin and William A. Litle, 139

Computer programs; Head losses; Hydraulics; Steady flow; Water distribution (applied); Algorithms
Computer Analysis of Water Distribution Systems: Part I - Formulation of Equations, Chan F. Lam and M. L. Wolla, 173

Computer programs; Hydraulics; Mathematical models; Newton-Raphson method; Water distribution (applied)
Computer Analysis of Water Distribution Systems: Part II--Numerical Solution, Chan F. Lam and M. L. Wolla, 207

Computer programs; Mathematical models; Simulation; Systems analysis
Delaware River Basin Modeling, Lewis G. Hulman and David K. Ericson, 132

Computer programs; Orientation; Surveying; Surveys; Aerial surveys
Comparison of Analytical Relative-Orientation Methods, Santosh K. Mahajan and Singh Vijay, 340

Computer programs; Photogrammetry; Surveying; Triangulation; Aerial photography
Computer Program System for Aerotriangulation, Kam W. Wong and G. Elphingstone, 470

Computers; Computer systems hardware; Professional activities; Civil engineering; Computer programming
Computer Use in Civil Engineering, Robert L. Schiffman and E. Rex Krueger, 299

Computers; Conduits; Discharge; Hydraulics; Models; Pipe flow; Powerplants; Pumps; Water hammer; Computer programming
Computer Simulation of Waterhammer Effects, George Belonogoff, 323

Computers; Construction; Construction management; Critical path method; Time sharing
Project Planning and Control by Time-Sharing Computer, Norman L. Scott and Edward L. Murphree, 184

Computers; Construction; Critical path method; Management; Networks; Planning; Resource allocation; Scheduling
Man-Computer Concepts for Planning and Scheduling, Boyd C. Paulson, Jr., 546

Computers; Costs; Accessibility; Calculators; Computer applications; Computer programming
Programmable Calculators: A Consultant Reports, D. A. Polychrone and Dieter Franz, 483

Computers; Costs; Data systems; Economics; Refuse disposal; Sanitary engineering; Solid wastes
Basic Data for Solid Waste: A Pilot Study, Robert M. Clark, John M. Sweeten and Daniel G. Greathouse, 540

Computers; Culverts; Digital computers; Flow profiles; Hydraulic jump; Pipe flow
Digital Computers in Circular Culvert Design, Bobby E. Price and Frank D. Masch, 369

Computers; Dams (earth); Drains; Seepage; Soil mechanics
Seepage Through Dams with Horizontal Toe Drain, Mohammad S. Moayeri, 282

Computers; Design; Dynamic response; Dynamics; Earthquakes; Engineering mechanics; Nonlinear programming; Optimization; Stresses; Tall buildings; Computer programming
Optimum Earthquake Design of Shear Buildings, Ben Kato, Yuji Nakamura and Hidetake Anraku, 343

Computers; Design; Dynamics; Earthquake resistant structures; Earthquakes; Loads (forces); Plasticity; Structural engineering; Buildings (codes)
Earthquake Resistant Design of Unbraced Frames, James C. Anderson and Raj P. Gupta, 540

Computers; Design; Geometry; Optimization; Structural engineering; Trusses; Automation
Automated Design of Trusses for Optimum Geometry, Garret N. Vanderplaats and Fred Moses, 202

Computers; Dimensional analysis; Field data; Forecasting; Functions (mathematics); Irrigation
Prediction of Irrigation Advance Function by Dimensional Analysis, G. Sastry and S. C. Agarwal, 223

Computers; Dynamics; Earthquakes; Engineering mechanics; Filters; Fourier transformation; Mathematics; Systems engineering; Vibration
Dynamic Analysis by Extra Fast Fourier Transform, Jethro W. Meek and Anestis S. Veletsos, 218

Computers; Dynamics; Engineering mechanics; Matrices (mathematics); Computation
Large Eigenvalue Problems in Dynamic Analysis, Klaus-Jurgen Bathe and Edward L. Wilson, 560

Computers; Dynamics; Highways; Safety; Traffic engineering; Transportation; Automobiles
Vehicle-Roadway Interaction Studies by Math Model, Hayes E. Ross, Jr. and Don L. Ivey, 249

Computers; Eddies; Engineering mechanics; Inviscid flow; Shear flow; Velocity; Axisymmetric flow
Inviscid Shear Flow with Corner Eddies, P.A. Aswatha Narayana and M.V. Krishna Murthy, 81

Computers; Engineering mechanics; Numerical analysis; Seepage; Computation; Computer programming
Summary Representation Applied to Seepage Problems, Antonio Santos-Moreno, Raymond J. Krizek and Gabor M. Karadi, 144

Computers; Engineering mechanics; Quadratic equations; Cables (ropes)
Analysis of Structures by Quadratic Programming, Mehdi S. Zarghamee, 27

Computers; Equilibrium methods; Newton-Raphson method; Structural engineering; Bridges (suspension); Compatibility methods; Computer applications
Static Analysis of Suspension Bridges, Alan Jennings and John E. Mairs, 508

Computers; Forecasting; Models; Systems engineering; Water resources; California
Optimum Operations Model for Shasta-Trinity System, Dan M. Fults and Lawrence F. Hancock, 450

Computers; Hydraulic models; Hydraulics; Pipe flow; Water distribution
Graph-Theoretic Models for Pipe Network Analysis, H. K. Kesavan and M. Chandrashekar, 167

Computers; Hydraulics; Open channel flow; Pressure pipes; Transient flow; Unsteady flow; Water tunnels (conveyance)
Transient Flow in Free-Surface, Pressurized Systems, David C. Wiggert, 87

Computers; Hydraulics; Pipe flow; Water distribution; Water supply; Algorithms
Efficient Algorithm For Distribution Networks, Pierre F. Lemieux, 545

Computers; Hydrology; Runoff; Combined sewers
A System for Regulation of Combined Sewage Flows, Charles V. Gibbs, Stuart M. Alexander and Curtis P. Leiser, 506

Computers; Iteration; Linear programming; Optimization; Structural engineering
Structural Optimization by Inscribed Hyperspheres, Roman Baldur, 242

Computers; Limit design method; Moment distribution; Plasticity; Structural engineering; Tall buildings
Optimum Plastic Design of Steel Frames, Bogdan O. Kuzmanovic and Nicholas Willems, 423

Computers; Masonry; Shear; Structural engineering; Walls; Wind (meteorology); Bearing capacity; Bending stress; Bricks; Buildings; Computer programs
Computer Design of Engineered Brick Masonry, Alan H. Yorkdale and Robert P. Anderson, 271

Computers; Matrices (mathematics); Structural engineering; Topology; Algorithms
Algorithm for Matrix Bandwidth Reduction, Henry R. Grooms, 88

Computer systems hardware; Professional activities; Civil engineering; Computer programming; Computers
Computer Use in Civil Engineering, Robert L. Schiffman and E. Rex Krueger, 299

Computer systems programs; Design; Networks; New york; Systems analysis; Water tunnels
Systems Analysis of Water Distribution Networks, Richard de Neufville, John C. Schaake, Jr. and Joseph H. Stafford, 105

Computer systems programs; Hydraulic models; Mathematical models; Structural analysis; Calculators
Guidelines for Selecting a Programmable Calculator, Eugene E. Dallaire, 129

Concentrated loads; Deflection; Dynamic properties; Finite differences; Loads (forces); Rectangular bodies; Relaxation (mechanics); Structural engineering; Thin plates
Large Deflection of Elastic Plates Under Patch Loading, Bijan Aalami, 559

Concentration; Hydraulics; Power; Rivers; Sediments; Sediment transport; Statistical analysis
Unit Stream Power and Sediment Transport, Chih Ted Yang, 519

Concrete; Concrete properties; Engineering mechanics; Finite element method; Mathematical models; Probability theory
Probabilistic Modeling of Concrete Structures, Masanobu Shinozuka, 598

Concrete; Concrete (reinforced); Cracks; Shear strength; Shear tests; Structural engineering
Experimental Studies of Membrane Shear Transfer, Richard N. White and Myle J. Holley, Jr., 406

Concrete; Concrete (reinforced); Dams; Distribution systems; Foundations; Heat of hydration; Reinforcement; Structural engineering; Cements
Temperature Rises in Low-Heat Cement Concrete, Barry P. Hughes, 43

Concrete; Consolidation; Distribution; Mass concrete; Placement; Reinforcement; Slabs; Walls; Beams (supports); Columns (supports); Compaction
Pertinent Techniques for Compacting Concrete, Shu-t'ien Li and Donald A. Stewart, 429

Concrete; Construction; Epoxy mortar; Epoxy resins; Surface preparation; Temperature control; Tunnel linings
Application of Epoxy Resins in Tunnel Lining Concrete Repair, Russell C. Borden and Carl E. Selander, 405

Concrete; Dams; Dikes; Embankments; Pumped storage; Reservoirs; Sealers; Tests; Asphalts; Bituminous concretes
Bituminous Blanket for Dike, F. P. Robertson and Johannes Lehnert, 537

Concrete; Deformation; Engineering mechanics; Fractures (materials)
Griffith Fracture Criterion and Concrete, Surendra P. Shah and Fred J. McGarry, 45

Concrete; Field tests; Hydrostatic tests; Structural engineering; Underwater structures
Cylindrical Concrete Hulls Under Hydrostatic Loading, Harvey H. Haynes, Robert J. Ross and Norman D. Albertsen, 294

Concrete; Structural engineering; Biaxial stresses
Biaxial Stress-Strain Relations for Concrete, Tony C.Y. Liu and Arthur H. Nilson, 247

Concrete (lightweight); Concrete (prestressed); Design criteria; Effectiveness; Energy; Harbors; Velocity; Vessels
Ultimate Energy Design of Prestressed Concrete Fender Piling, Shu-t'ien Li and Venkataswamy Ramakrishnan, 81

Concrete piles; Concrete (prestressed); Pile driving; Pile foundations; Breakwaters
Breakwater Built With Concrete Piles, Thomas F. Plodowski, 219

Concrete (post-tensioned); Concrete (precast); Foundations; Highways; Prefabrication; Slabs; Tendons; Transportation; Bridges (structures); City planning
Prefabricated Highways, William Zuk, 204

Concrete (post-tensioned); Concrete (prestressed); Fire safety; Hyperbolic parabolic shells; Shells (structural forms)
Record Concrete Shell Roof Featured in Coliseum, Y. C. Yang, 275

Concrete (post-tensioned); Concrete (reinforced); Construction; Consultants; Dams; Dams (concrete); Government; Maintenance; Montana
Montana Power Company's Dam Repair Program, Clifford L. Emmerling, 565

Concrete (precast); Concrete (prestressed); Construction; Costs; Shelters; Slabs; Cold weather construction
Meeting the Challenge of Winter Construction, Allen T. Johnson, 507

Concrete (precast); Concrete (prestressed); Cost analysis; Design; Poles (supports); Structural engineering
Optimal Design of Prestressed Concrete Poles, Manhar C. Thakkar and Bakul S. Bulsari, 77

Concrete (precast); Concrete (prestressed); Models; Structural engineering; Tests; Bridges (girder)
81-ft Model of Prestressed Bridge477

Concrete (precast); Concrete (reinforced); Construction; Nuclear power plants; Soil properties; Surveying
Civil Engineers Help Construct the World's Largest Proton Accelerator, William D. Alexander, Marvin E. Warner, E. Parke Rohrer and Richard E. Pages, 474

Concrete (precast); Concrete slabs; Housing; Structural engineering
High-Rise Panel Structures, Matthys P. Levy and Istvan S. Varga, 240

Concrete (precast); Esthetic properties; Highway engineering; Bridges (concrete); Bridges (spans)
Long-Span Bridge: Utility, Grace at Low Cost, Harry M. Montgomery and Roger D. Troxell, 269

Concrete (precast); Floors; Modular structures; Modules; Systems management
Floor-Ceiling System Features Precast Concrete Units, Jerome S.B. Iffland, 186

Concrete (precast); Foundations; Highways; Prefabrication; Slabs; Tendons; Transportation; Bridges (structures); City planning; Concrete (post-tensioned)
Prefabricated Highways, William Zuk, 204

Concrete (prestressed); Concrete (reinforced); Cracking; Spacing; Structural engineering; Beams (supports)
Theory of Cracking in Concrete Members, Arthur D. Edwards and Andre Picard, 584

Concrete (prestressed); Construction; Costs; Shelters; Slabs; Cold weather construction; Concrete (precast)
Meeting the Challenge of Winter Construction, Allen T. Johnson, 507

Concrete (prestressed); Cost analysis; Design; Poles (supports); Structural engineering; Concrete (precast)
Optimal Design of Prestressed Concrete Poles, Manhar C. Thakkar and Bakul S. Bulsari, 77

Concrete (prestressed); Design criteria; Effectiveness; Energy; Harbors; Velocity; Vessels; Concrete (lightweight)
Ultimate Energy Design of Prestressed Concrete Fender Piling, Shu-t'ien Li and Venkataswamy Ramakrishnan, 81

Concrete (prestressed); Fire safety; Hyperbolic parabolic shells; Shells (structural forms); Concrete (post-tensioned)
Record Concrete Shell Roof Featured in Coliseum, Y. C. Yang, 275

Concrete (prestressed); Models; Structural engineering; Tests; Bridges (girder); Concrete (precast)
81-ft Model of Prestressed Bridge477

Concrete (prestressed); Pile driving; Pile foundations; Breakwaters; Concrete piles
Breakwater Built With Concrete Piles, Thomas F. Plodowski, 219

Concrete (prestressed); Prefabrication; Structural engineering; Bridge decks; Bridges (box girder); Bridges (cable-stayed); Bridges (piers); Bridges (structures); Bridges (suspension)
Denmark's Lillebaelt Suspension Bridge, Christen Ostenfeld, 526

Concrete (prestressed); Washington; Bridges (arch); Bridges (concrete)
Longest Concrete-Arch Bridge in North America, Ernest C. Harris and John A. Talbott, 329

Concrete properties; Engineering mechanics; Finite element method; Mathematical models; Probability theory; Concrete
Probabilistic Modeling of Concrete Structures, Masanobu Shinozuka, 598

Concrete (reinforced); Concrete structures; Construction methods; Critical path method; Steel construction
Composite Steel-Concrete Building Frame, Don Belford, 334

Concrete (reinforced); Construction; Consultants; Dams; Dams (concrete); Government; Maintenance; Montana; Concrete (post-tensioned)
Montana Power Company's Dam Repair Program, Clifford L. Emmerling, 565

Concrete (reinforced); Construction; Nuclear power plants; Soil properties; Surveying; Concrete (precast)
Civil Engineers Help Construct the World's Largest Proton Accelerator, William D. Alexander, Marvin E. Warner, E. Parke Rohrer and Richard E. Pages, 474

Concrete (reinforced); Containment vessels; Shells (structural forms); Ship hulls; Structural engineering
Impact Resistance of Ferro-Cement, Surendra P. Shah and William H. Key, Jr., 101

Concrete (reinforced); Cooling towers; Cooling water; Heat exchangers; Powerplants
Dry-Type Hyberbolic Cooling Tower, Paul Rogers and Laszlo Heller, 452

Concrete (reinforced); Cooling towers; Design; Earthquakes; Loads (forces); Moments; Powerplants; Shells (structural forms); Structural engineering; Wind (meteorology); Analysis
Analysis and Design of Hyperbolic Cooling Towers, German Gurfinkel and Adolf Walser, 340

Concrete (reinforced); Costs; Critical path method; Highways; Pavements; Transportation; Bituminous coatings
Rehabilitating Chicago's Expressways, Thomas T. Morimoto, 541

Concrete (reinforced); Cracking; Slipping; Structural engineering; Beams (supports); Bonding strength
Cracking and Bond Slip in Concrete Beams, Bandaru Venkateswarlu and Hans Gesund, 578

Concrete (reinforced); Cracking; Spacing; Structural engineering; Beams (supports); Concrete (prestressed)
Theory of Cracking in Concrete Members, Arthur D. Edwards and Andre Picard, 584

Concrete (reinforced); Cracks; Shear strength; Shear tests; Structural engineering; Concrete
Experimental Studies of Membrane Shear Transfer, Richard N. White and Myle J. Holley, Jr., 406

Concrete (reinforced); Criteria; Earthquakes; Standards; Building codes
Implications of the New ACI Building Code, Edward Cohen, 365

Concrete (reinforced); Culverts; Erosion; Flood control; Pipelines; Canals; Cofferdams
New Culvert Carries Creek Underneath Canal, Alfred R. Pagan, 440

Concrete (reinforced); Cylindrical shells; Elastic properties; Engineering mechanics; Numerical analysis; Plasticity; Shells (structural forms)
Elastic-Plastic Analysis of Cylindrical Shells, Nabil A. Shoeb and William C. Schnobrich, 96

Concrete (reinforced); Cylindrical shells; Models; Shells (structural forms); Structural engineering
Inelastic Behavior Of R/C Cylindrical Shells, Harry G. Harris and Richard N. White, 376

Concrete (reinforced); Dams; Distribution systems; Foundations; Heat of hydration; Reinforcement; Structural engineering; Cements; Concrete
Temperature Rises in Low-Heat Cement Concrete, Barry P. Hughes, 43

Concrete (reinforced); Deflection; Structural engineering; Tests; Time dependence; Columns (supports)
Slender Concrete Columns Under Sustained Load, Brij B. Goyal and Neil Jackson, 35

Concrete (reinforced); Deformed bars; Israel; Project management; Quality control; Bridges (concrete)
An American Engineer in Israel, Irving Kett, 295

Concrete (reinforced); Elastic-plastic analysis; Finite element method; Initial stress; Structural engineering
Nonlinear Stress Analysis of Reinforced Concrete, Somasundaram Valliappan and T. F. Doolan, 218

Concrete (reinforced); Field tests; Folded plates; Strains; Structural engineering; Bridges (structures)
Model and Prototype Studies of Box Girder Bridge, Raymond Eugene Davis, Charles F. Scheffey, Gary A. Castleton and Evan E. Evans, 70

Concrete (reinforced); Flexural strength; Structural engineering; Bauschinger effect; Beams (supports); Columns (supports)
Reinforced Concrete Members with Cyclic Loading, Robert Park, Dudley Charles Kent and Richard A. Sampson, 310

Concrete (reinforced); Folded plates; Fragmented materials; Loads (forces); Structural engineering
Safe Limit Loading of Folded Plate Structures, Morris N. Fialkow, 483

Concrete (reinforced); Hydrology; Pollution control; Sanitary engineering; Sewage; Water quality; Biochemical oxygen demand
In-Line Structure Stores and Treats Combined Overflows, Theodore G. Biehl and David M. Waring, 398

Concrete (reinforced); Parking facilities; Rapid transit railways; Transportation; Automation
Novel Features on Lindenwold Line, Richard E. Pinkham, 187

Concrete (reinforced); Plates; Shells (structural forms); Slabs; Stiffness; Structural engineering
Stiffness of Reinforced Concrete Plates, Alex E. Cardenas, Rolf J. Lenschow and Mete A. Sozen, 566

Concrete (reinforced); Reinforcement; Research; Shear strength; Structural engineering; Tests; Torsion; Beams (supports)
Total Interaction Method for Torsion Design, K. S. Rajagopalan, Umakanta Behera and Phil M. Ferguson, 467

Concrete (reinforced); Reinforcement; Stresses; Structural engineering; Tensile strength; Tests
Strength of Fiber-Reinforced Concrete, Jitendra N. Kar and Anil K. Pal, 253

Concrete (reinforced); Shear strength; Structural engineering; Tests; Beams (supports)
Shear Strength of Large Beams, Howard P.J. Taylor, 533

Concrete (reinforced); Structural engineering; Torsion; Beams (structural); Composite structures
Composite Beams in Torsion, Conrad P. Heins, Jr. and John T.C. Kuo, 275

Concrete slabs; Housing; Structural engineering; Concrete (precast)
High-Rise Panel Structures, Matthys P. Levy and Istvan S. Varga, 240

Concrete structures; Construction methods; Critical path method; Steel construction; Concrete (reinforced)
Composite Steel-Concrete Building Frame, Don Belford, 334

Concrete structures; Elastic properties; Plates (structural members); Structural engineering; Computation
Column-Plate Interaction in Flat Slab Structures, Dieter D. Pfaffinger, 134

Conduits; Discharge; Hydraulics; Models; Pipe flow; Powerplants; Pumps; Water hammer; Computer programming; Computers
Computer Simulation of Waterhammer Effects, George Belonogoff, 323

Conduits; Mortars (material); Pipelines; Pipe linings; Protective coatings; Steel pipes; Tunnels; Aqueducts
Cement Mortar Lining of 20-Ft Diameter Steel Pipe, James E. Wolfe, 462

Confining pressure; Cyclic loads; Damping; Resonance; Sands; Shear modulus; Soil mechanics; Tests; Undrained shear tests
Undrained Cyclic Shear of Saturated Sand, Vincent P. Drnevich, 431

Conflict; Highways; Regional planning; Urban planning
Regional-Local Conflicts in Transportation Planning, Harvey R. Joyner, 394

Conformal mapping; Drag; Hydraulics; Supercritical flow; Weir crests; Baffles
Supercritical Flow Over Sills, John A. McCorquodale and M. K. Giratalla, 239

Conformal mapping; Drains; Engineering mechanics; Seepage; Tile drainage; Transient flow
Transient Seepage Flow Toward Two Parallel Drains, Imre Gyuk and Gabor M. Karadi, 138

Conformal mapping; Flow nets; Hydraulics; Seepage
Approximate Solution to Flow Problems Under Dams, Demetrious G. Christoulas, 84

Connecticut; Costs; Drainage; Precipitation (atmospheric); Water resources; Water users
Potential of Precipitation Modification, Eugene J. Aubert, Gurbachan P. Malhotra and D. B. Spiegler, 212

Conservation; Costs; Dams (concrete); Dams (gravity); Economics; Environmental engineering; Hydroelectric power generation; Models; Powerplants; Pumped storage; Turbines
Wallace Dam, Major H. Thompson, Jr., 550

Conservation; Ecology; Environmental engineering; Irrigation
Tunnel Vision or Ecological View, Virginia M. Hines, 28

Conservation; Environmental effects; Environmental engineering; Esthetics; Land use; Matrices (mathematics); National historic sites; Planning; Pollution; Sanitary engineering
Environmental Assessment of Resource Development, Kenneth D. Kerri, 282

Conservation; Oils; Pipelines; Pipeline terminals; Pipeline transportation; Planning; Alaska
Engineering the Trans-Alaska Pipeline415

Consolidation; Consolidation coefficient; Soil mechanics; Strain rate; Stress-strain curves
Consolidation at Constant Rate of Strain, Anwar E.Z. Wissa, John T. Christian, Edward H. Davis and Sigurd Heiberg, 51

Consolidation; Distribution; Mass concrete; Placement; Reinforcement; Slabs; Walls; Beams (supports); Columns (supports); Compaction; Concrete
Pertinent Techniques for Compacting Concrete, Shu-t'ien Li and Donald A. Stewart, 429

Consolidation; Drainage; Drains; Pore water pressure; Soil mechanics
Consolidation of Clay Layer in Two Dimensions, Sivajogi D. Koppula and Norbert R. Morgenstern, 168

Consolidation; Embankments; Field density; Fly ash; Power; Shear strength; Bearing values; Compaction tests
Fly Ash as Structural Fill, Anthony M. DiGioia and William L. Nuzzo, 175

Consolidation; Footings; Settlement (structural); Calculations
Simplified Method to Calculate Settlement Beneath Footings, Max L. Calhoon, 110

Consolidation; Settlement (structural); Soil mechanics; Time; Anisotropy
Consolidation of a Layer Under a Strip Load, John T. Christian, Jan Willem Boehmer and Philippe P. Martin, 374

Consolidation coefficient; Soil mechanics; Strain rate; Stress-strain curves; Consolidation
Consolidation at Constant Rate of Strain, Anwar E.Z. Wissa, John T. Christian, Edward H. Davis and Sigurd Heiberg, 51

Construction; Construction equipment; Construction industry; Safety belts; Safety devices; Safety engineering
Will OSHA Make The Construction Industry Safer, Darrell J. Turner, 89

Construction; Construction equipment; Construction materials; Construction methods; Construction planning; Contracting; Foreign engineering; Management; Manpower; Planning
Construction Planning in South East Asia, Omar E. Rood and John L. Richards, 585

Construction; Construction equipment; Mathematical models; Replacement theory
Sensitivity Analysis of Douglas Equipment Life Model, Neal B.H. Benjamin, 283

Construction; Construction industry; Construction management; Engineering education; Management
Formal Education in Construction Management, Abraham Warszawski, 332

Construction; Construction industry; Contractors; Probability theory; Statistical analysis; Bids
Competitive Bidding: The Probability of Winning, Neal B.H. Benjamin, 601

Construction; Construction industry; Costs; Critical path method; Management; Monitoring; Project control; Scheduling
Planning Monitoring Frequencies for CPM Projects, Douglas A. Elvers, 55

Construction; Construction industry; Craftsmen; Management; Motivation; Benefit-cost ratios
Motivation of Construction Craftsmen, Charles R. Schrader, 453

Construction; Construction management; Critical path method; Time sharing; Computers
Project Planning and Control by Time-Sharing Computer, Norman L. Scott and Edward L. Murphree, 184

Construction; Construction management; Health; Systems analysis; Systems engineering; Buildings (hospitals)
A Systems Approach to Hospital Planning and Design, Tung Au, Ernest W. Parti and Andrew K.C. Wong, 592

Construction; Construction materials; Costs; Economic analysis; Housing
Economic Analysis of Housing Construction Methods, Shlomo Peer and Abraham Warszawski, 355

Construction; Construction procedure; Flexible pavements; Highway engineering; Lime; Soil stabilization; Subgrades; Transportation
Deep-Plow Lime Stabilization for Pavement Construction, Marshall R. Thompson, 107

Construction; Construction procedure; Liabilities; Professional advancement; Civil engineers
Booby Traps for Young Engineers on Construction, Edward A. Merrill, 108

Construction; Consultants; Dams; Dams (concrete); Government; Maintenance; Montana; Concrete (post-tensioned); Concrete (reinforced)
Montana Power Company's Dam Repair Program, Clifford L. Emmerling, 565

Construction; Consulting engineers; Inspection; Personnel development; Quality control; Tests
Summary Report of Questionnaire on Construction Inspection, by the Task Committee on Inspection of the Construction Division, Joseph Goldbloom, Chmn., 524

Construction; Contract administration; Contractors; Contract terms; USCOLD; Bids
Responsibilities of the Engineer and the Contractor Under Fixed-Price Construction Contracts, Wayne S. Byrne, 257

Construction; Contracts; Rock mechanics; Bids; Claims (contracts)
Changed Soil and Rock Conditions in Construction, George F. Sowers, 83

Construction; Costs; Delay time; Economics; Experience; Apprenticeship
Learning and Experience Curves, Marvin Gates and Amerigo Scarpa, 232

Construction; Costs; Financing; Benefit-cost ratios
Project Selection Based on Benefits and Costs, Michael Raymond Toakley and John F. Brotchie, 308

Construction; Costs; Shelters; Slabs; Cold weather construction; Concrete (precast); Concrete (prestressed)
Meeting the Challenge of Winter Construction, Allen T. Johnson, 507

Construction; Critical path method; Management; Networks; Planning; Resource allocation; Scheduling; Computers
Man-Computer Concepts for Planning and Scheduling, Boyd C. Paulson, Jr., 546

Construction; Dams (buttress); Dams (earth); Embankments; Hydroelectric power generation; Irrigation; Pakistan; Power; Cofferdams
Tarbela Dam Project, Pakistan, Wilson V. Binger, 594

Construction; Dams (earth); Planning; Surveying instruments; Surveys; Colorado
Planning Concrete Dam Construction Control Surveys, Maynard J. Willis, 255

Construction; Dams (embankment); Dams (rockfill); Hydraulics; River closures; Rivers; Stability; Acceleration tolerance
Stability of Rockfill in End-Dump River Closures, Bishnu P. Das, 567

Construction; Delay time; Questionnaires; Surveys
Causes of Delay in the Construction Industry, John R. Baldwin, James M. Manthei, Harold Rothbart and Robert B. Harris, 27

Construction; Design; Foundations; Hurricanes; Piers; Storms; Stresses; Wind bracing; Wooden structures; Coastal engineering
Wood Structures Can Resist Hurricanes, Gerald E. Sherwood, 417

Construction; Earthquakes; Frames; Sidesway; Steel; Structural engineering; Tubes
Perimetral Tube for 37-Story Steel Building, L. Agustin Mazzeo and Armin De Fries, 288

Construction; Efficiency; Films; Photography; Productivity; Time and motion studies
Analysis of Time-Lapse Construction Films, Howard B. Sprinkle, 502

Construction; Environments; Excavation; Explosives; Predictions; Quarrying; Blasting
Rapid Excavation With Explosives, Richard H. Groves and Robert L. LaFrenz, 380

Construction; Epoxy mortar; Epoxy resins; Surface preparation; Temperature control; Tunnel linings; Concrete
Application of Epoxy Resins in Tunnel Lining Concrete Repair, Russell C. Borden and Carl E. Selander, 405

Construction; Faults (geology); Rocks; Shields (tunneling); Tunneling (excavation); Vehicular tunnels; Boring machines
Vehicular Tunnels in Rock - Direction for Development, Richard J. Robbins, 379

Construction; Financing; Fluid flow; Hydraulic radius; Linings; Pipelines; Power; Pressure tunnels; Tunnels; Velocity; Water; Water flow; Canals
Aqueducts for the Least Cost Conveyance of Water, Nephi A. Christensen, 46

Construction; Foundations; Geology; Grouting; Seepage; Soil mechanics; Topography; Abutments
Current Practice in Abutment and Foundation Treatment, Harris H. Burke, Charles S. Content and Richard L. Kulesza, 489

Construction; Foundations; Hammers; Models; Pile drivers; Pile driving
Performance of Pile Driving Hammers, Frank Rausche and George G. Goble, 475

Construction; Foundations; Settlement (structural); Soil mechanics
Heave and Lateral Movements Due to Pile Driving, Donald J. Hagerty and Ralph B. Peck, 73

Construction; Joints (junctions); Keys (splines); Pavements; Rigid pavements; Transportation; Aircraft; Air transportation
Keyed Joint Performance Under Heavy Loaded Aircraft, John L. Rice, 561

Construction; Nuclear power plants; Soil properties; Surveying; Concrete (precast); Concrete (reinforced)
Civil Engineers Help Construct the World's Largest Proton Accelerator, William D. Alexander, Marvin E. Warner, E. Parke Rohrer and Richard E. Pages, 474

Construction; Probability theory; Safety; Safety engineering; Structural engineering; Bibliographies
Structural Safety--A Literature Review, Task Committee on Structural Safety of the Administrative Committee on Analysis and Design for the Structural Division, Alfredo H.S. Ang, Chmn., 214

Construction costs; Costs; Inflation (economics); Mathematical models; Models; Sewage disposal; Water supply
Mathematical Model for Rate Studies, Kuan M. Yao, 442

Construction costs; Elevated railroads; Rapid transit railways; Regional planning; Right-of-way; Right of way acquisition; Street railroads; Subways; Transportation
Expressway Rapid Transit, George Krambles, 590

Construction costs; Poland; Sanitary engineering; Sewage; Water supply
Construction Costs of Water Supply and Sewage Networks in Poland 1961-1970, Miroslaw Gorczyca, 580

Construction equipment; Construction industry; Safety belts; Safety devices; Safety engineering; Construction
Will OSHA Make The Construction Industry Safer, Darrell J. Turner, 89

Construction equipment; Construction materials; Construction methods; Construction planning; Contracting; Foreign engineering; Management; Manpower; Planning; Construction
Construction Planning in South East Asia, Omar E. Rood and John L. Richards, 585

Construction equipment; Cranes (hoists); Safety; Safety devices
Crane Safety, Suzy Fisher, 93

Construction equipment; Mathematical models; Replacement theory; Construction
Sensitivity Analysis of Douglas Equipment Life Model, Neal B.H. Benjamin, 283

Construction industry; Construction management; Engineering education; Management; Construction
Formal Education in Construction Management, Abraham Warszawski, 332

Construction industry; Contractors; Probability theory; Statistical analysis; Bids; Construction
Competitive Bidding: The Probability of Winning, Neal B.H. Benjamin, 601

Construction industry; Costs; Critical path method; Management; Monitoring; Project control; Scheduling; Construction
Planning Monitoring Frequencies for CPM Projects, Douglas A. Elvers, 55

Construction industry; Craftsmen; Management; Motivation; Benefit-cost ratios; Construction
Motivation of Construction Craftsmen, Charles R. Schrader, 453

Construction industry; Engineering education; Engineers; Foreign engineering; Great Britain; Management; Metric system; Planning; Standards; Training
Metrication Progress in the United Kingdom, Gordon Bowen, 523

Construction industry; Safety belts; Safety devices; Safety engineering; Construction; Construction equipment
Will OSHA Make The Construction Industry Safer, Darrell J. Turner, 89

Construction management; Contract terms; Financing; New york; Project management; Regional planning
New York City Hacks Through Capital Construction Jungle, Thomas A. Graham, 199

Construction management; Critical path method; Time sharing; Computers; Construction
Project Planning and Control by Time-Sharing Computer, Norman L. Scott and Edward L. Murphree, 184

Construction management; Engineering education; Management; Construction; Construction industry
Formal Education in Construction Management, Abraham Warszawski, 332

Construction management; Health; Systems analysis; Systems engineering; Buildings (hospitals); Construction
A Systems Approach to Hospital Planning and Design, Tung Au, Ernest W. Parti and Andrew K.C. Wong, 592

Construction materials; Construction methods; Construction planning; Contracting; Foreign engineering; Management; Manpower; Planning; Construction; Construction equipment
Construction Planning in South East Asia, Omar E. Rood and John L. Richards, 585

Construction materials; Costs; Economic analysis; Housing; Construction
Economic Analysis of Housing Construction Methods, Shlomo Peer and Abraham Warszawski, 355

Construction materials; Ghana; Gravel; Laterites; Soil formation; Soil mechanics
Lateritic Gravel Evaluation For Road Construction, J. W.S. de Graft-Johnson, Harbhajan S. Bhatia and A. A. Hammond, 545

Construction materials; Plastics; Structural engineering; Bridges (structures)
Why Not Plastics Bridges?, Fred C. McCormick, 399

Construction methods; Construction planning; Contracting; Foreign engineering; Management; Manpower; Planning; Construction; Construction equipment; Construction materials
Construction Planning in South East Asia, Omar E. Rood and John L. Richards, 585

Construction methods; Critical path method; Steel construction; Concrete (reinforced); Concrete structures
Composite Steel-Concrete Building Frame, Don Belford, 334

Construction methods; Data acquisition; Hydraulics; Mathematical models; Probability distribution functions; River flow
Stochastic Five Daily Stream Flow Model, Nath T. Kottegoda, 438

Construction planning; Contracting; Foreign engineering; Management; Manpower; Planning; Construction; Construction equipment; Construction materials; Construction methods
Construction Planning in South East Asia, Omar E. Rood and John L. Richards, 585

Construction planning; Earthmoving; Estimates; Computerized simulation
Estimating Costs of Earthwork via Simulation, Jack H. Willenbrock, 208

Construction procedure; Finite elements; Glass fibers; Roofs; Sandwich structures; Shells (structural forms); Structural engineering; Structural plastics; Computation
Plastic Sandwich Buckle-Shell Structures, V. James Meyers, Dhamo T. Ramani and Mark E. Greenwood, 515

Construction procedure; Flexible pavements; Highway engineering; Lime; Soil stabilization; Subgrades; Transportation; Construction
Deep-Plow Lime Stabilization for Pavement Construction, Marshall R. Thompson, 107

Construction procedure; Liabilities; Professional advancement; Civil engineers; Construction
Booby Traps for Young Engineers on Construction, Edward A. Merrill, 108

Consultants; Dams; Dams (concrete); Government; Maintenance; Montana; Concrete (post-tensioned); Concrete (reinforced); Construction
Montana Power Company's Dam Repair Program, Clifford L. Emmerling, 565

Consulting engineers; Financial management; Personnel management; Salary administration; Budgeting
Financial Tools for a Consulting Firm, Roy T. Sheehey, 48

Consulting engineers; Inspection; Personnel development; Quality control; Tests; Construction
Summary Report of Questionnaire on Construction Inspection, by the Task Committee on Inspection of the Construction Division, Joseph Goldbloom, Chmn., 524

Consulting engineers; Municipal engineering; Professional practice; Reports; Salaries; Civil engineers
1971 ASCE Salary Survey, the Committee on Employment Conditions of the Department of Professional Activities, Charles J. Stevens, Chmn., 347

Consumers; Costs; Liabilities; Litigation; Product development; Safety engineering
Designing to Prevent Liability Lawsuits, Norman B. Chew, 44

Consumptive use (water); Evaporation; Evapotranspiration; Frequency distribution; Irrigation; Climatology
Central California Evapotranspiration Frequencies, W. O. Pruitt, Sergius von Oettingen and D. L. Morgan, 251

Consumptive use (water); Evaporation; Evapotranspiration; Irrigation; Solar radiation; Water consumption; Climatology
Coastal California Evapotranspiration Frequencies, Paul R. Nixon, G. Paul Lawless and Gary V. Richardson, 279

Contact pressure; Foundations; Isotropy; Soil mechanics; Structural engineering; Beams (supports)
Behavior of Crossed Beams on Elastic Foundations, Ami Glassman, 125

Containerizing; Containers; Containment vessels; Harbors; Shipping containers; Cargo transportation
Containerization - A System Still Evolving, Walter C. Boyer, 494

Containerizing; Design; Mathematical models; Terminal facilities; Transportation
Basis for Simulation Model of Container Terminal, Fraser Dunford, 299

Containerizing; Harbor facilities; Land reclamation; Marine terminals; Surcharge; Cargo transportation
Containerization and Its Impact on Port Development, Anthony J. Tozzoli, 426

Containerizing; Materials handling; Rapid transit railways; Transportation
Goods Movement on Urban Transit Systems, John J. Fruin, 411

Containers; Containment vessels; Harbors; Shipping containers; Cargo transportation; Containerizing
Containerization - A System Still Evolving, Walter C. Boyer, 494

Containment; Oily water; Pollution; Rivers; Sea water; Water pollution; Booms (equipment)
Dynamics of Contained Oil Slicks, David L. Wilkinson, 324

Containment vessels; Harbors; Shipping containers; Cargo transportation; Containerizing; Containers
Containerization - A System Still Evolving, Walter C. Boyer, 494

Containment vessels; Shells (structural forms); Ship hulls; Structural engineering; Concrete (reinforced)
Impact Resistance of Ferro-Cement, Surendra P. Shah and William H. Key, Jr., 101

Continuous beams; Plates (structural members); Shear strength; Structural engineering; Tests; Columns (supports)
Shear Strength of Continuous Plates, M. Daniel Vanderbilt, 237

Continuum mechanics; Elastic-plastic analysis; Finite element method; Structural engineering; Computer programs
Finite Element Thermoelastoplastic Analysis, Norman A. Cyr, Roger D. Teter and Brian B. Stocks, 372

Continuum mechanics; Engineering mechanics; Sandwich panels; Shells (structural forms); Structural analysis
Cosserat Surface and Sandwich Shell Equilibrium, David J. Malcolm and Peter G. Glockner, 453

Continuum mechanics; Engineering mechanics; Sandwich structures; Shells (structural forms); Compatibility
Nonlinear Sandwich Shell and Cosserat Surface Theory, David J. Malcolm and Peter G. Glockner, 459

Contours; Mapping; Reports; Scale (ratio); Surveying
Selection of Maps for Engineering and Planning, by the Task Committee for the Preparation of a Manual on Selection of Map Types, Scales, and Accuracies for Engineering and Planning of the Committee on Cartographic Surveying of the Surveying and Mapping Division, Antonio M. Aguilar, Chmn., 420

Contract administration; Contractors; Contract terms; USCOLD; Bids; Construction
Responsibilities of the Engineer and the Contractor Under Fixed-Price Construction Contracts, Wayne S. Byrne, 257

Contracting; Foreign engineering; Management; Manpower; Planning; Construction; Construction equipment; Construction materials; Construction methods; Construction planning
Construction Planning in South East Asia, Omar E. Rood and John L. Richards, 585

Contractors; Contracts; Costs; Turnkey projects; ASCE (Code of Ethics); ASCE (Professional Practice); Bids
Draft Guide to Turnkey Construction Contracts444

Contractors; Contract terms; USCOLD; Bids; Construction; Contract administration
Responsibilities of the Engineer and the Contractor Under Fixed-Price Construction Contracts, Wayne S. Byrne, 257

Contractors; Probability theory; Statistical analysis; Bids; Construction; Construction industry
Competitive Bidding: The Probability of Winning, Neal B.H. Benjamin, 601

Contracts; Costs; Turnkey projects; ASCE (Code of Ethics); ASCE (Professional Practice); Bids; Contractors
Draft Guide to Turnkey Construction Contracts444

Contracts; Noise reduction; Rapid transit railways; Social needs; Subways; Washington, D.C.
Washington D.C.'s Metro--A Progress Report, Robert S. O'Neil, 194

Contracts; Rock mechanics; Bids; Claims (contracts); Construction
Changed Soil and Rock Conditions in Construction, George F. Sowers, 83

Contract terms; Financing; New york; Project management; Regional planning; Construction management
New York City Hacks Through Capital Construction Jungle, Thomas A. Graham, 199

Contract terms; USCOLD; Bids; Construction; Contract administration; Contractors
Responsibilities of the Engineer and the Contractor Under Fixed-Price Construction Contracts, Wayne S. Byrne, 257

Control structures; Flow measurement; Hydraulics; Weirs; Broad-crested weirs
Characteristics of Flow Weirs of Finite Crest Width, Singamsetti Surya Rao and Manoj Kumar Shukla, 42

Control surveys; Engineering education; Land surveys; Canada
How Land Surveying Is Being Modernized, Robert T. Howe, 287

Control surveys; Surveying; Accuracy; Adjustment; Computation
Adjusting Radial Surveys, James R. Baker, 501

Convolution integrals; Hydrograph analysis; Irrigation; Subsurface irrigation
Subsurface Hydrograph Analysis by Convolution, Willard M. Snyder and Loris E. Asmussen, 514

Cooling systems; Cooling towers; Electric power generation; Power; Thermal pollution; Water conservation; Air cooling
Dry-Type Cooling Towers, Edward A. Cecil, Paul R. Cunningham, Clarence J. Steiert and Roger O. Young, 92

Cooling systems; Cooling towers; Nuclear electric power generation; Powerplants; Thermoelectric power generation; Utilities; Waste disposal
Power Plant Cooling Systems, George Kinsman, 364

Cooling systems; Cooling water; Heat budget; Stratification; Thermal pollution; Waste heat
Impact of Cooling Water on Lake Temperatures, Heinz Stefan, Chung-Sang Chu and Ho Wing, 392

Cooling systems; Cooling water; Powerplants; Pump intakes; Pumps; Thermoelectric power generation; Water hammer
Circulating Water Systems Without Valves, Rudolf J. Wahanik, 571

Cooling towers; Cooling water; Heat exchangers; Powerplants; Concrete (reinforced)
Dry-Type Hyberbolic Cooling Tower, Paul Rogers and Laszlo Heller, 452

Cooling towers; Design; Earthquakes; Loads (forces); Moments; Powerplants; Shells (structural forms); Structural engineering; Wind (meteorology); Analysis; Concrete (reinforced)
Analysis and Design of Hyperbolic Cooling Towers, German Gurfinkel and Adolf Walser, 340

Cooling towers; Dynamics; Finite element method; Nonlinear systems; Power; Thermal powerplants
Nonlinear Dynamic Analysis of Cooling Tower, Chang-hua Yeh, 228

Cooling towers; Electric power generation; Hyperbolic parabolic shells; Pollution abatement; Shell structures; Water vapor
Wet-Type Hyperbolic Cooling Towers, Paul Rogers, 262

Cooling towers; Electric power generation; Power; Thermal pollution; Water conservation; Air cooling; Cooling systems
Dry-Type Cooling Towers, Edward A. Cecil, Paul R. Cunningham, Clarence J. Steiert and Roger O. Young, 92

Cooling towers; Engineering mechanics; Finite elements; Hyperbolic parabolic shells; Pressure; Shells (structural forms); Vibration
Vibrations of Pressure Loaded Hyperboloidal Shells, Mehran Lashkari, Victor I. Weingarten and David S. Margolias, 431

Cooling towers; Hyperbolic parabolic shells; Mathematical logic; Shell structures; Structural engineering
Differential Settlement of Hyperbolic Cooling Towers, Phillip L. Gould, 487

Cooling towers; Nuclear electric power generation; Powerplants; Thermoelectric power generation; Utilities; Waste disposal; Cooling systems
Power Plant Cooling Systems, George Kinsman, 364

Cooling water; Diffusion; Hydraulics; Stratified flow; Water quality
Dilution of Buoyant Two-Dimensional Surface Discharges, Heinz Stefan, 124

Cooling water; Heat budget; Stratification; Thermal pollution; Waste heat; Cooling systems
Impact of Cooling Water on Lake Temperatures, Heinz Stefan, Chung-Sang Chu and Ho Wing, 392

Cooling water; Heat exchangers; Powerplants; Concrete (reinforced); Cooling towers
Dry-Type Hyberbolic Cooling Tower, Paul Rogers and Laszlo Heller, 452

Cooling water; Powerplants; Pump intakes; Pumps; Thermoelectric power generation; Water hammer; Cooling systems
Circulating Water Systems Without Valves, Rudolf J. Wahanik, 571

Coordinates; Linearity; Photogrammetry; Surveys; Aerial photography
Space Resection from Collinearity Conditions, Kunwar K. Rampal, 92

Correlation; Cylindrical bodies; Hydraulics; Boundary layer; Coefficients
Shear Flow Past Circular Cylinder, Thomas L. Shaw and Michael R. Starr, 201

Corrosion; Corrosion control; Pipe cover; Pipelines; Sealants; Waterproofing
Oil Based Fluid Corrosion-Proofs Gas Line, Buford Mizell, 280

Corrosion control; Pipe cover; Pipelines; Sealants; Waterproofing; Corrosion
Oil Based Fluid Corrosion-Proofs Gas Line, Buford Mizell, 280

Corrugated metal pipes; Deformation; Soil pressure; Backfills
New Design Method for Corrugated Steel Pipe, Alma P. Moser and Reynold K. Watkins, 291

Cost analysis; Design; Poles (supports); Structural engineering; Concrete (precast); Concrete (prestressed)
Optimal Design of Prestressed Concrete Poles, Manhar C. Thakkar and Bakul S. Bulsari, 77

Cost analysis; Dimensions; Economics; Floors; Height; Tall buildings; Building materials
The Economics of High-Rise Apartment Buildings of Alternate Design Configuration, Richard D. Steyert, 387

Cost control; Financing; Flood control; Management control reports; Professional activities; Simulation; Computerized simulation
Flood Control Developed and Operated with Simulation, John M. Tellemer, 154

Cost effectiveness; Economic analysis; Environmental engineering; Ground water; Impact; Sanitary engineering; Sewage disposal; Water resources
Cost-Effectiveness Analysis of Wastewater Reuses, Stephen C. Ko and Lucien Duckstein, 552

Cost estimates; Excavation; Highway engineering; Interstate highway system; Paving; Planning
Cost Estimating Model for Rural Interstate Highways, John Whitman and Frederick J. Wegmann, 402

Costs; Accessibility; Calculators; Computer applications; Computer programming; Computers
Programmable Calculators: A Consultant Reports, D. A. Polychrone and Dieter Franz, 483

Costs; Critical path method; Highways; Pavements; Transportation; Bituminous coatings; Concrete (reinforced)
Rehabilitating Chicago's Expressways, Thomas T. Morimoto, 541

Costs; Critical path method; Management; Monitoring; Project control; Scheduling; Construction; Construction industry
Planning Monitoring Frequencies for CPM Projects, Douglas A. Elvers, 55

Costs; Dams (concrete); Dams (gravity); Economics; Environmental engineering; Hydroelectric power generation; Models; Powerplants; Pumped storage; Turbines; Conservation
Wallace Dam, Major H. Thompson, Jr., 550

Costs; Data systems; Economics; Refuse disposal; Sanitary engineering; Solid wastes; Computers
Basic Data for Solid Waste: A Pilot Study, Robert M. Clark, John M. Sweeten and Daniel G. Greathouse, 540

Costs; Data systems; Estimates; Computer programs
Remote Terminal Cost Estimating, Robert C. Volkman and LeRoy T. Boyer, 133

Costs; Delay time; Economics; Experience; Apprenticeship; Construction
Learning and Experience Curves, Marvin Gates and Amerigo Scarpa, 232

Costs; Design; Girders; Loads (forces); Optimization
Cost Optimization of Welded Plate Girders, Natarajan Annamalai, Albert D.M. Lewis and John E. Goldberg, 495

Costs; Dikes; Estimates; Jet aircraft; New jersey; New york; Airports; Air traffic
Offshore Jetport for New York-New Jersey Megalopolis, Edward G. Nawy and Fred C. Koletty, 179

Costs; Drainage; Economic analysis; Hydraulics; Mathematical models; Sewers; Urbanization
Methods for Predicting Urban Drainage Costs, Walter J. Rawls and John W. Knapp, 486

Costs; Drainage; Precipitation (atmospheric); Water resources; Water users; Connecticut
Potential of Precipitation Modification, Eugene J. Aubert, Gurbachan P. Malhotra and D. B. Spiegler, 212

Costs; Economic analysis; Housing; Construction; Construction materials
Economic Analysis of Housing Construction Methods, Shlomo Peer and Abraham Warszawski, 355

Costs; Economics; Highways; Roads; Statistical analysis; Transportation
Local Rural Road Costs and Economies of Scale, William D. Berg, 478

Costs; Economics; Hydraulics; Sanitary engineering; Sewers; Systems engineering; Utilities
Optimal Design of Urban Wastewater Collection Networks, Jarir S. Dajani, Robert S. Gemmell and Edward K. Morlok, 534

Costs; Engineering societies; Failure; Gas pipelines; Legislation; Natural gas; Transmission lines; Transportation; Utilities; Zoning
Responsibility of Gas Utilities for Pipeline Safety, Carl T. Kallina, 148

Costs; Excavation; Foundations; Installation; Power; Power lines; Railroads; Transmission lines; Blasting
Powerline Foundations Installed along Railroad Tracks, Roger S. Chapman, 462

Costs; Federal agencies; Highways; Safety; Signals; Traffic; Benefit-cost ratios
Federal Experience in TOPICS, Hugh B. Henry, 292

Costs; Financing; Benefit-cost ratios; Construction
Project Selection Based on Benefits and Costs, Michael Raymond Toakley and John F. Brotchie, 308

Costs; Inflation (economics); Mathematical models; Models; Sewage disposal; Water supply; Construction costs
Mathematical Model for Rate Studies, Kuan M. Yao, 442

Costs; Liabilities; Litigation; Product development; Safety engineering; Consumers
Designing to Prevent Liability Lawsuits, Norman B. Chew, 44

Costs; Optimum design; Probability theory; Statically determinate structures; Structural engineering; Trusses
Minimum Expected Cost Optimization, Shengtaur Mau and Robert G. Sexsmith, 447

Costs; Planning; Regional planning; Regression analysis; Sanitary engineering; Solid wastes; Statistical analysis
Cost of Residential Solid Waste Collection, Robert M. Clark, Betty L. Grupenhoff, George A. Garland and Albert J. Klee, 34

Costs; Shelters; Slabs; Cold weather construction; Concrete (precast); Concrete (prestressed); Construction
Meeting the Challenge of Winter Construction, Allen T. Johnson, 507

Costs; Systems engineering; Air transportation; Buses (vehicles)
Airport Access Cost-Effectiveness Analysis, Richard de Neufville and Edward Mierzejewski, 428

Costs; Turnkey projects; ASCE (Code of Ethics); ASCE (Professional Practice); Bids; Contractors; Contracts
Draft Guide to Turnkey Construction Contracts444

Cost savings; Rock drilling; Room and pillar mining; Tunneling (excavation); Underground storage
How to Cut Underground Construction Costs, R. L. Loofbourow, 310

Covariance; Flow rate; Hot film anemometers; Hydraulics; Turbulence
Measurement of Velocity-Concentration Covariance, Raul S. McQuivey and Thomas N. Keefer, 459

Cracking; Failure; Safety factors; Slope stability; Soil mechanics; Stress distribution
Influence of Progressive Failure On Slope Stabilities, Fredy Romani, C. William Lovell, Jr. and Milton E. Harr, 530

Cracking; Flexible pavements; Highway engineering; Pavements; Shrinkage; Shrinkproofing; Transportation
Cracking Mechanism of Flexible Pavements, Jacob Uzan, Moshe Livneh and Elisha Shklarsky, 16

Cracking; Shrinkage; Soil cement; Soil mechanics; Stresses; Viscoelasticity; Base courses
Viscoelastic Shrinkage Stress in Soil-Cement Base, Bal K. Sanan and Kalankamary P. George, 598

Cracking; Slipping; Structural engineering; Beams (supports); Bonding strength; Concrete (reinforced)
Cracking and Bond Slip in Concrete Beams, Bandaru Venkateswarlu and Hans Gesund, 578

Cracking; Spacing; Structural engineering; Beams (supports); Concrete (prestressed); Concrete (reinforced)
Theory of Cracking in Concrete Members, Arthur D. Edwards and Andre Picard, 584

Cracking (fracturing); Criteria; Failure; Fractures; Safety factors; Steels; Strength; Stress analysis; Bridge design; Bridges (structures)
Fracture Mechanics, With High-Strength Steels A Must, Stanley T. Rolfe, 357

Cracking (fracturing); Dams; Dams (earth); Embankments; Finite element method; Instrumentation; Soil mechanics
Stresses and Movements in Oroville Dam, Fred H. Kulhawy and James M. Duncan, 363

Cracking (fracturing); Discontinuities; Engineering mechanics; Stress-strain curves; Bond stress; Composite materials
Deformation and Fracture of Particulate Composite, Oral Buyukozturk and Arthur H. Nelson, 292

Cracks; Shear strength; Shear tests; Structural engineering; Concrete; Concrete (reinforced)
Experimental Studies of Membrane Shear Transfer, Richard N. White and Myle J. Holley, Jr., 406

Craftsmen; Management; Motivation; Benefit-cost ratios; Construction; Construction industry
Motivation of Construction Craftsmen, Charles R. Schrader, 453

Cranes (hoists); Safety; Safety devices; Construction equipment
Crane Safety, Suzy Fisher, 93

Creep; Frozen soils; Soil mechanics; Stability criteria; Subsurface structures; Cavities
In Situ Creep Analysis of Room in Frozen Soil, Erik G. Thompson and Francis H. Sales, 464

Criteria; Earthquakes; Standards; Building codes; Concrete (reinforced)
Implications of the New ACI Building Code, Edward Cohen, 365

Criteria; Failure; Fractures; Safety factors; Steels; Strength; Stress analysis; Bridge design; Bridges (structures); Cracking (fracturing)
Fracture Mechanics, With High-Strength Steels A Must, Stanley T. Rolfe, 357

Critical path method; Highways; Pavements; Transportation; Bituminous coatings; Concrete (reinforced); Costs
Rehabilitating Chicago's Expressways, Thomas T. Morimoto, 541

Critical path method; Management; Monitoring; Project control; Scheduling; Construction; Construction industry; Costs
Planning Monitoring Frequencies for CPM Projects, Douglas A. Elvers, 55

Critical path method; Management; Networks; Planning; Resource allocation; Scheduling; Computers; Construction
Man-Computer Concepts for Planning and Scheduling, Boyd C. Paulson, Jr., 546

Critical path method; Steel construction; Concrete (reinforced); Concrete structures; Construction methods
Composite Steel-Concrete Building Frame, Don Belford, 334

Critical path method; Time sharing; Computers; Construction; Construction management
Project Planning and Control by Time-Sharing Computer, Norman L. Scott and Edward L. Murphree, 184

Crushing; Pipe design; Pipe flow; Polyvinyl chloride; Water distribution; Water hammer
Design of PVC Water-Distribution Pipe, Robert T. Hucks, Jr., 298

Culverts; Digital computers; Flow profiles; Hydraulic jump; Pipe flow; Computers
Digital Computers in Circular Culvert Design, Bobby E. Price and Frank D. Masch, 369

Culverts; Erosion; Flood control; Pipelines; Canals; Cofferdams; Concrete (reinforced)
New Culvert Carries Creek Underneath Canal, Alfred R. Pagan, 440

Culverts; Field tests; Pressure gages; Research; Structural engineering; Trenches; Buried structures
Concrete Arch Culvert Behavior-Phase 2, Raymond Eugene Davis and Alfred E. Bacher, 521

Curvature; Fluid flow; Hydraulics; Nappe; Parabolas; Spillways; Variations
Flow Over Rounded Spillways, Kamil H.M. Ali, 163

Curvature; Metals; Structural engineering; Columns (supports)
Tangent Stiffness Method for Biaxial Bending, Sakda Santathadaporn and Wai F. Chen, 93

Curved beams; Engineering mechanics; Stresses; Torsion; Tubes; Warpage; Beams (supports)
Torsion and Flexure of Curved, Thin-Walled Beams or Tubes, Ray N. Nitzsche and Robert E. Miller, 382

Curved beams; Field tests; Impact; New York; Structural engineering; Bridges (girder); Bridges (structures)
Dynamic Testing of Curved Bridge - Huyck Stream, William L. Armstrong, 429

Curved beams; Folded plates; Stiffness methods; Structural engineering; Buildings
Analysis of Curved Folded Plate Structures, Christian Meyer and Alexander C. Scordelis, 20

Curved beams; Loads (forces); Models; Model tests; Structural engineering; Structural models; Bridges (box girder); Bridges (structures)
Model Analysis of Curved Box-Beam Highway Bridge, Ish K. Aneja and Frederic Roll, 48

Curved beams; Stresses; Structural engineering; Webs (supports); Beams (supports); Bending
Bending Behavior of Cylindrical Web Panels, Charles G. Culver, Clive L. Dym and Darryl K. Brogan, 507

Curved beams; Structural engineering; Bridges (box girder); Bridges (girder); Bridges (structures)
Multicell Curved Girder Model Studies, Conrad P. Heins, Jr., Bijan P. Bonakdarpour and Lansford C. Bell, 210

Curved beams; Structural engineering; Bridges (box girder); Bridges (structures)
Analysis of Horizontally Curved Box Girder Bridges, Kuang-Han Chu and Suresh G. Pinjarkar, 24

Curved beams; Structural engineering; Bridges (girder); Bridges (spans); Collapse; Composite structures
Plastic Collapse of Horizontally Curved Bridge Girders, Chai Hong Yoo and Conrad P. Heins, Jr., 221

Curves; Highway engineering; Offsets; Surveys; Computer programs
Offsets to Sight Obstructions Near the Ends of Horizontal Curves, William L. Raymond, Jr., 58

Curves; Hydraulics; Rivers; Water flow; Channel stabilization
Flow Processes in Open Channel Bends, Robert P. Apmann, 263

Cutoffs; Dams (rockfill); Foundations; Geology; Grouting; Jets; Rock fills; Soil mechanics; Abutments
Foundation Practices for Talbingo Dam, Australia, B. J. Wallace and J. I. Hilton, 492

Cyclic loads; Damping; Resonance; Sands; Shear modulus; Soil mechanics; Tests; Undrained shear tests; Confining pressure
Undrained Cyclic Shear of Saturated Sand, Vincent P. Drnevich, 431

Cyclic loads; Earthquakes; Joints (junctions); Structural engineering; Welding; Beams (supports)
Beam-Column Subassemblages Under Repeated Loading, Vitelmo V. Bertero, Egor P. Popov and Helmut Krawinkler, 268

Cyclic loads; Engineering mechanics; Minimum weight design; Optimum design; Plastic analysis
Unified Approach to the Theory of Plastic Structures, M. A. Cohn, S. K. Ghosh and S. R. Parimi, 466

Cyclic loads; Plastic theory; Steel structures; Strain hardening; Structural engineering
Shakedown of Strain-Hardening Structures, John D. Meyer and Kurt H. Gerstle, 106

Cylinders; Differential equations; Elastic properties; Engineering mechanics; Vibration
Three-Dimensional Vibrations of Orthotropic Cylinders, Fang-Hui Chou and Jan D. Achenbach, 362

Cylinders; Diffraction; Hydraulics; Nonlinear systems; Wave energy; Waves
Nonlinear Wave Forces on a Vertical Cylinder, Subrata K. Chakrabarti, 542

Cylinders; Drag; Hydraulics; Turbulent flow
Drag Coefficient of Cylinders in Turbulent Flow, Stephen C. Ko and Walter H. Graf, 305

Cylinders; Engineering mechanics; Protuberances; Aerodynamics
Wind Load on Cylinder With Spanwise Protrusion, David F. James and Quan-Si Truong, 543

Cylindrical bodies; Hydraulics; Boundary layer; Coefficients; Correlation
Shear Flow Past Circular Cylinder, Thomas L. Shaw and Michael R. Starr, 201

Cylindrical shells; Deformation; Differential equations; Engineering mechanics; Shells (structural forms); Structural engineering
Accurate Fourth Order Equation for Circular Cylindrical Shells, Shun Cheng, 311

Cylindrical shells; Elastic properties; Engineering mechanics; Numerical analysis; Plasticity; Shells (structural forms); Concrete (reinforced)
Elastic-Plastic Analysis of Cylindrical Shells, Nabil A. Shoeb and William C. Schnobrich, 96

Cylindrical shells; Finite elements; Matrix methods; Structural engineering
Analysis of Eccentrically Stiffened Cylindrical Shells, Peter C. Kohnke and William C. Schnobrich, 344

Cylindrical shells; Models; Shells (structural forms); Structural engineering; Concrete (reinforced)
Inelastic Behavior Of R/C Cylindrical Shells, Harry G. Harris and Richard N. White, 376

Cysts; Disinfection; Dysentery; Iodine; Meningitis; Microorganism control (water); Water treatment; Amoeba; Chlorine
Amoebic Cysticidal Properties of Halogens in Water, Richard Stringer and Cornelius W. Kruse, 98

Damage; Earthquake resistant structures; Earthquakes; Soil mechanics; Venezuela
Soil Conditions and Building Damage in 1967 Caracas Earthquake, H. Bolton Seed, Ricardo V. Whitman, Houshang Dezfulian, Ricardo Dobry and Izzat M. Idriss, 423

Damage; Fatigue (materials); Structural engineering
Fatigue Damage Factor in Structural Design, Jhy-Pyng Tang and James T.P. Yao, 126

Dam construction; Dams (rockfill); Hydroelectric powerplants; Seepage control; Asphalts
Stone Asphalt Cores Waterproof French Dams, Victorien Lelu, 206

Damping; Design; Engineering mechanics; Filters; Frequency; Seismic design
Spectrum-Compatible Motions for Design Purposes, Nien-Chien Tsai, 184

Damping; Design data; Earthquakes; Repeated loading; Shear modulus; Soils; Stress-strain curves; Vibration; Analysis
Shear Modulus and Damping in Soils: Design Equations and Curves, Bobby O. Hardin and Vincent P. Drnevich, 354

Damping; Hydrodynamic pressure; Natural frequency; Structural engineering; Underwater structures; Vibration
Virtual Mass of Submerged Structures, Anjur R. Chandrasekaran, Sarjit S. Sani and M. M. Malhotra, 308

Damping; Laboratory tests; Shear stress; Shear tests; Soil mechanics; Torsion shear tests; Vibration
Shear Modulus and Damping in Soils: Measurement and Parameter Effects, Bobby O. Hardin and Vincent P. Drnevich, 328

Damping; Resonance; Sands; Shear modulus; Soil mechanics; Tests; Undrained shear tests; Confining pressure; Cyclic loads
Undrained Cyclic Shear of Saturated Sand, Vincent P. Drnevich, 431

Dams; Dams (arch); Dams (concrete); Foundations; Hydraulic models; Hydraulics; Materials tests; Rock mechanics; Tests
Auburn Dam -- World's Longest Arch Dam, Alfred T. Lewis, 445

Dams; Dams (concrete); Dams (gravity); Earthquakes; Finite elements; Structural engineering; Vibration
Behavior of Koyna Dam - Dec. 11, 1967 Earthquake, Sarjit S. Saini, Jai Krishna and Anjur R. Chandrasekaran, 319

Dams; Dams (concrete); Government; Maintenance; Montana; Concrete (post-tensioned); Concrete (reinforced); Construction; Consultants
Montana Power Company's Dam Repair Program, Clifford L. Emmerling, 565

Dams; Dams (earth); Drawdown; Finite element method; Hydraulic models; Seepage; Soil mechanics
Seepage Analysis of Earth Banks Under Drawdown, Chandrakant S. Desai, 511

Dams; Dams (earth); Embankments; Finite element method; Instrumentation; Soil mechanics; Cracking (fracturing)
Stresses and Movements in Oroville Dam, Fred H. Kulhawy and James M. Duncan, 363

Dams; Dams (earth); Embankments; Foundations; Geology
Treatment of High Embankment Dam Foundations, Fred C. Walker and R. W. Bock, 491

Dams; Dams (embankment); Foundations; Rock mechanics; Seepage; Soil mechanics; Abutments
Abutment and Foundation Treatment for High Embankment Dams on Rock, Reginald A. Barron, 491

Dams; Dikes; Embankments; Pumped storage; Reservoirs; Sealers; Tests; Asphalts; Bituminous concretes; Concrete
Bituminous Blanket for Dike, F. P. Robertson and Johannes Lehnert, 537

Dams; Disease vectors; Drainage; Ecology; Egypt; Erosion; Irrigation; ASCE (executive secretary)
People, Ecology and the Aswan High Dam, William H. Wisely, 67

Dams; Distribution systems; Foundations; Heat of hydration; Reinforcement; Structural engineering; Cements; Concrete; Concrete (reinforced)
Temperature Rises in Low-Heat Cement Concrete, Barry P. Hughes, 43

Dams; Electric networks; Estuaries; Hydroelectric power; Powerplants; Tidal power plants
Pumped Storage and Tidal Power in Energy Systems, Charles K. Haswell, Stephen W. Huntington, Thomas L. Shaw, Geoffrey R. Thorpe and Ian J. Westwood, 603

Dams; Embankments; Excavation; Foundations; Grouting; Soil mechanics; Blasting
Foundation Treatment for Embankment Dams on Rock, Elmer W. Stroppini, Donald H. Babbitt and Henry E. Struckmeyer, 493

Dams; Engineering mechanics; Fluid flow; Hydrodynamics; Seepage
Inverse Solution to Three-Dimensional Flows, Roland W. Jeppson, 374

Dams; Environmental effects; Highways; Power reactors (nuclear)
Environmental Litigation: Lessons From the Courts, William K. Johnson, 31

Dams; Environmental engineering; Hydroelectric power generation; Professional activities; Thermoelectric power generation
Positive Points on Electric Power, George R. Higgins, 204

Dams; Estuaries; Power; Powerplants; Pumped storage; Tidal energy; Tidal power generation
Integration Of Pumped-Storage With Tidal Power, Thomas L. Shaw and Geoffrey R. Thorpe, 29

Dams; Shale; Shear strength; Sliding; Soil mechanics; Stability; Clays
Analysis of Waco Dam Slide, Stephen G. Wright and James M. Duncan, 472

Dams (arch); Dams (concrete); Foundations; Hydraulic models; Hydraulics; Materials tests; Rock mechanics; Tests; Dams
Auburn Dam -- World's Longest Arch Dam, Alfred T. Lewis, 445

Dams (buttress); Dams (earth); Embankments; Hydroelectric power generation; Irrigation; Pakistan; Power; Cofferdams; Construction
Tarbela Dam Project, Pakistan, Wilson V. Binger, 594

Dams (concrete); Dams (gravity); Earthquakes; Finite elements; Structural engineering; Vibration; Dams
Behavior of Koyna Dam - Dec. 11, 1967 Earthquake, Sarjit S. Saini, Jai Krishna and Anjur R. Chandrasekaran, 319

Dams (concrete); Dams (gravity); Economics; Environmental engineering; Hydroelectric power generation; Models; Powerplants; Pumped storage; Turbines; Conservation; Costs
Wallace Dam, Major H. Thompson, Jr., 550

Dams (concrete); Foundations; Hydraulic models; Hydraulics; Materials tests; Rock mechanics; Tests; Dams; Dams (arch)
Auburn Dam -- World's Longest Arch Dam, Alfred T. Lewis, 445

Dams (concrete); Government; Maintenance; Montana; Concrete (post-tensioned); Concrete (reinforced); Construction; Consultants; Dams
Montana Power Company's Dam Repair Program, Clifford L. Emmerling, 565

Dams (earth); Dams (embankment); Dams (rockfill); Foundations; Reports; Abutments
Foundation and Abutment Treatment for High Embankment Dams on Rock by the Committee on Embankment Dams and Slopes of the Soil Mechanics and Foundations Division, H. Bolton Seed, Chmn., 490

Dams (earth); Drains; Seepage; Soil mechanics; Computers
Seepage Through Dams with Horizontal Toe Drain, Mohammad S. Moayeri, 282

Dams (earth); Drawdown; Finite element method; Hydraulic models; Seepage; Soil mechanics; Dams
Seepage Analysis of Earth Banks Under Drawdown, Chandrakant S. Desai, 511

Dams (earth); Eductors; Ejectors; Failure; Hydraulic jump; Hydraulics; Slabs; Uplift pressure; Chute spillways
Damage to Karnafuli Dam Spillway, Mohammad A. Rahman, 596

Dams (earth); Embankments; Finite element method; Instrumentation; Soil mechanics; Cracking (fracturing); Dams
Stresses and Movements in Oroville Dam, Fred H. Kulhawy and James M. Duncan, 363

Dams (earth); Embankments; Foundations; Geology; Dams
Treatment of High Embankment Dam Foundations, Fred C. Walker and R. W. Bock, 491

Dams (earth); Embankments; Hydroelectric power generation; Irrigation; Pakistan; Power; Cofferdams; Construction; Dams (buttress)
Tarbela Dam Project, Pakistan, Wilson V. Binger, 594

Dams (earth); Engineering education; Foundations; Pile driving; Pile foundations; Settlement (structural); Soil mechanics; Terzaghi lecture
The Integrated Civil Engineering Project, T. William Lambe, 337

Dams (earth); Foundations; Grouting; Settlement (structural); Abutments; Canada
Foundations and Abutments -- Bennet and Mica Dams, Harold K. Pratt, Robert C. McMordie and Robert M. Dundas, 493

Dams (earth); Lakes; Mapping; Photogrammetric surveys; Surveys; Aerial surveys; Analytical techniques
Survey Design and Procedures, William E. Kreisle, 77

Dams (earth); Planning; Surveying instruments; Surveys; Colorado; Construction
Planning Concrete Dam Construction Control Surveys, Maynard J. Willis, 255

Dams (embankment); Dams (rockfill); Foundations; Reports; Abutments; Dams (earth)
Foundation and Abutment Treatment for High Embankment Dams on Rock by the Committee on Embankment Dams and Slopes of the Soil Mechanics and Foundations Division, H. Bolton Seed, Chmn., 490

Dams (embankment); Dams (rockfill); Hydraulics; River closures; Rivers; Stability; Acceleration tolerance; Construction
Stability of Rockfill in End-Dump River Closures, Bishnu P. Das, 567

Dams (embankment); Foundations; Rock mechanics; Seepage; Soil mechanics; Abutments; Dams
Abutment and Foundation Treatment for High Embankment Dams on Rock, Reginald A. Barron, 491

Dams (gravity); Earthquakes; Finite elements; Structural engineering; Vibration; Dams; Dams (concrete)
Behavior of Koyna Dam - Dec. 11, 1967 Earthquake, Sarjit S. Saini, Jai Krishna and Anjur R. Chandrasekaran, 319

Dams (gravity); Economics; Environmental engineering; Hydroelectric power generation; Models; Powerplants; Pumped storage; Turbines; Conservation; Costs; Dams (concrete)
Wallace Dam, Major H. Thompson, Jr., 550

Dams (movable); Dikes; Gates; Ice; Ice control; Mississippi River; Waterways; Aeration; Backwater
Reducing Ice Formation at Navigation Dams, Henry W. Harich, 387

Dams (rockfill); Foundations; Geologic investigations; Grouting; Iraq; Philippines; Venezuela; Weathering; Abutments
Foundation and Abutment Treatment for Rockfill Dams, Richard C. Acker and Jack C. Jones, 494

Dams (rockfill); Foundations; Geology; Grouting; Jets; Rock fills; Soil mechanics; Abutments; Cutoffs
Foundation Practices for Talbingo Dam, Australia, B. J. Wallace and J. I. Hilton, 492

Dams (rockfill); Foundations; Reports; Abutments; Dams (earth); Dams (embankment)
Foundation and Abutment Treatment for High Embankment Dams on Rock by the Committee on Embankment Dams and Slopes of the Soil Mechanics and Foundations Division, H. Bolton Seed, Chmn., 490

Dams (rockfill); Hydraulics; River closures; Rivers; Stability; Acceleration tolerance; Construction; Dams (embankment)
Stability of Rockfill in End-Dump River Closures, Bishnu P. Das, 567

Dams (rockfill); Hydroelectric powerplants; Seepage control; Asphalts; Dam construction
Stone Asphalt Cores Waterproof French Dams, Victorien Lelu, 206

Darcys law; Irrigation; Root systems; Transpiration; Water loss
Simulation of Post-Irrigation Moisture Movement, Fred J. Molz, 580

Data acquisition; Hydraulics; Mathematical models; Probability distribution functions; River flow; Construction methods
Stochastic Five Daily Stream Flow Model, Nath T. Kottegoda, 438

Data systems; Dynamics; Engineering mechanics; Field tests; Materials tests; Statistical analysis; Tests; Time dependence; Vibration; Viscoelasticity
Statistical Theory for Viscoelastic Materials, Joseph Soussou and Fred Moavenzadeh, 532

Data systems; Economics; Refuse disposal; Sanitary engineering; Solid wastes; Computers; Costs
Basic Data for Solid Waste: A Pilot Study, Robert M. Clark, John M. Sweeten and Daniel G. Greathouse, 540

Data systems; Estimates; Computer programs; Costs
Remote Terminal Cost Estimating, Robert C. Volkman and LeRoy T. Boyer, 133

Data systems; Hydraulics; Hydrology; Measuring instruments
New Approach to Hydrologic Data Acquisition, Edward J. Langham, 56

Data systems; Hydraulics; Nevada; Regulation; Simulation; Statistical analysis; Systems engineering
Streamflow Synthesis - A Case Study, Vulli L. Gupta and John W. Fordham, 336

Data systems; Parking areas; Parking facilities; Personnel; Regulations; Safety; Schools; Traffic
Management System for Campus Traffic Planning, Michael J. Quillem and Jason C. Yu, 527

Decision making; Decisions; Planning; Publicity; Public opinion; Water resources; Community relations
Fishbowl Planning Immerses Pacific Northwest Citizens in Corps Projects, Howard L. Sargent, 389

Decision making; Disadvantaged groups; Government; Research; Schools; Traffic surveys; Transportation; Community relations
Transportation Research for Community Objectives, Arthur Saltzman, Sidney H. Evans, Alice E. Kidder and Florentine Sowell, 555

Decision making; Gaming models; Management engineering; Refuse disposal; Sanitary engineering; Solid wastes
Management Science and Gaming in Waste Management, Pran N. Wahi and Theodore I. Peterson, 476

Decisions; Planning; Publicity; Public opinion; Water resources; Community relations; Decision making
Fishbowl Planning Immerses Pacific Northwest Citizens in Corps Projects, Howard L. Sargent, 389

Definitions; Metric system; Surveying; Terminology
Definitions of Surveying and Associated Terms -- Manual and Report on Engineering Practice No. 34606

Deflection; Design; Engineering mechanics; Epoxy resins; Loads (forces); Orthotropic plate; Plates (structural members); Stresses
Large Deflection of Rectangular Orthotropic Plates, Chuen-Yuan Chia, 514

Deflection; Design; Plates; Structural engineering; Torsion; Bridges (girder); Bridges (structures); Buckling
Some Design Problems of Large Box Girder Bridges, Bogdan O. Kuzmanovic, 439

Deflection; Displacement; Engineering mechanics; Equilibrium; Fourier series; Rings; Static structural analysis
Linear Theory of Thin Rings, Harry E. Williams, 436

Deflection; Dynamic properties; Finite differences; Loads (forces); Rectangular bodies; Relaxation (mechanics); Structural engineering; Thin plates; Concentrated loads
Large Deflection of Elastic Plates Under Patch Loading, Bijan Aalami, 559

Deflection; Dynamics; Engineering mechanics; Forced vibration; Grid systems; Moments; Vibration
Dynamic Field Analysis of Torsionless Grids, Hota V.S. GangaRao and J. C. Smith, 330

Deflection; Elastic foundations; Engineering mechanics; Plates; Stresses
Stresses in Circular Plates on Elastic Foundations, Richard Bolton, 297

Deflection; Elastic properties; Engineering mechanics; Probability theory; Stability; Statistical analysis; Structural engineering; Buckling; Columns (supports)
Nonstationary Random Column Buckling Problem, Raymond G. Jacquot, 501

Deflection; Engineering mechanics; Mathematical models; Probability theory; Statics; Beams (supports)
Statics of Random Beams, Devendra K. Shukla and Robert M. Stark, 600

Deflection; Finite difference theory; Plates (structural members); Structural engineering
Large Deflections of Curved Plates, Henry W.L. Lee and Conrad P. Heins, Jr., 1

Deflection; Graphs (charts); Structural analysis; Beams (supports)
Design Aid for Deflection Calculation for a Uniformly Loaded Flexural Member, Thomas M. Chura, 114

Deflection; Matrix methods; Space frames; Stability; Structural engineering; Buckling
Large Deflection Buckling of Space Frames, Kuang-Han Chu and Robert H. Rampetsreiter, 589

Deflection; Plates; Structural engineering
Analysis of Space Truss as Equivalent Plate, William R. Flower and Lewis C. Schmidt, 38

Deflection; Strength; Structural engineering; Beams (supports); Buckling
Alternative Approach to Light-Gage Beam Design, James Rhodes and James M. Harvey, 9

Deflection; Structural engineering; Tests; Time dependence; Columns (supports); Concrete (reinforced)
Slender Concrete Columns Under Sustained Load, Brij B. Goyal and Neil Jackson, 35

Deformation; Differential equations; Engineering mechanics; Shells (structural forms); Structural engineering; Cylindrical shells
Accurate Fourth Order Equation for Circular Cylindrical Shells, Shun Cheng, 311

Deformation; Dynamic structural analysis; Engineering mechanics; Blast loads
Displacement Bounds for Blast Loaded Structures, Walter J. Morales, 410

Deformation; Earth pressure; Ocean engineering; Pore water pressure; Soil mechanics; Time dependence; Underwater construction; Bearing capacity
Breakout Resistance of Objects Embedded in Ocean Bottom, Aleksandar Sedmak Vesic, 19

Deformation; Eigenvalues; Energy methods; Engineering mechanics; Equilibrium methods; Lagrangian functions; Stability; Boundary conditions; Buckling; Composite materials
Stability of Orthotropic Stiffened Composite Plates, Kao Ding Chiu, 508

Deformation; Elastic properties; Finite elements; Stresses; Structural engineering
Finite Element Approach to Plane Microelasticity, Mohammed H. Baluch, John E. Goldberg and Severino L. Koh, 461

Deformation; Elasto-plastic; Frames; Plane structures; Plastic analysis; Strength; Structural engineering
Deformation Analysis of Elastic - Plastic Frames, Donald E. Grierson, 499

Deformation; Engineering mechanics; Finite elements; Plates; Shear; Bending
Some Elements for Analysis of Plate Bending, Robert D. Cook, 590

Deformation; Engineering mechanics; Fractures (materials); Concrete
Griffith Fracture Criterion and Concrete, Surendra P. Shah and Fred J. McGarry, 45

Deformation; Engineering mechanics; Metals; Necking; Nonlinear differential equations; Columns (supports)
Nonlinear Analysis of Instability in Tension, Sam Tang, 21

Deformation; Finite elements; Soil mechanics; Strains; Stresses; Bearing capacity
Finite Element Analysis of Strain-Softening Clay, Kaare Hoeg, 141

Deformation; Guyed towers; Guy wires; Stress analysis
Approximate Stress Analysis for Guyed Towers, Stan H. Lowy, 169

Deformation; Highways; Soil cement; Transportation; Cements
Soil-Cement Bases Under Thin Bituminous Surfacing, Boniface C. Obi, 124

Deformation; Loads (forces); Pipeline transportation; Pipes; Reactions (mechanics); Structural analysis; Bending
Systematic Stress Analysis of Circular Pipe, Junkichi Katoh, 584

Deformation; Soil pressure; Backfills; Corrugated metal pipes
New Design Method for Corrugated Steel Pipe, Alma P. Moser and Reynold K. Watkins, 291

Deformed bars; Israel; Project management; Quality control; Bridges (concrete); Concrete (reinforced)
An American Engineer in Israel, Irving Kett, 295

Degradation; Egypt; Hydraulics; River beds; Armoring (streambed); Bed roughness
River Bed Degradation After Closure of Dams, Hammad Y. Hammad, 220

Degradation; Open channel flow; Sedimentation; Sediments; Waterways
Laboratory Study of Degradation and Aggradation, Suryanarayana Bhamidipaty and Hsieh W. Shen, 40

Delay time; Economics; Experience; Apprenticeship; Construction; Costs
Learning and Experience Curves, Marvin Gates and Amerigo Scarpa, 232

Delay time; Questionnaires; Surveys; Construction
Causes of Delay in the Construction Industry, John R. Baldwin, James M. Manthei, Harold Rothbart and Robert B. Harris, 27

Denitrification; Eutrophication; Kinetics; Nitrates; Sanitary engineering; Sewage treatment; Activated sludge; Anaerobic conditions
Process Kinetics for Denitrification, Walter K. Johnson, 448

Density; Estuaries; Fluid flow; Hydraulics; Salinity; Two phase flow; Computation
Numerical Computation of Stratified Nearly Horizontal Flows, John P. Grubert and Michael B. Abbott, 530

Density; Estuaries; Hydraulics; Shear stress; Two phase flow; Water pollution
Gradually Varying Two-Layer Stratified Flow, Flemming Bo Pedersen, 155

Density; Forest land; Idaho; Organic matter; Reservoirs; Sediment deposits; Watersheds
Volume Weight of Reservoir Sediment in Forested Areas, Walter F. Megahan, 435

Density; Harbors; Locks (waterways); Salinity; Salt water intrusion; Stratification; Water pollution; Water quality; Waterways
Mardyck Lock Acts as Salt-Water Barrier, Ch. Blanchet and B. Quetin, 600

Density; Hydraulics; Underground storage; Wells; Aquifers
Gravitational and Dispersive Mixing in Aquifers, Lynn W. Gelhar, John L. Wilson, III and John S. Miller, 588

Density; Measuring instruments; Statistical analysis; Surveying; Surveying instruments; Temperature; Atmospheric pressure; Barometers
Barometric Leveling Analysis, James D. Gruendler, Frederick P. Thomack and James L. Clapp, 313

Density; Sands; Shear strain; Soil mechanics; Compaction
Compaction of Sands By Repeated Shear Straining, T. Leslie Youd, 382

Density stratification; Hydraulics; Powerplants; Stream flow; Temperature
Cooling Water Density Wedges in Streams, Edward M. Polk, Jr., Barry A. Benedict and Frank L. Parker, 37

Desalting; Dilution; Hydraulics; Jets; Coastal engineering
Model Study of Dense Jet in Flowing Fluid, Forrest M. Holly, Jr. and John L. Grace, Jr., 552

Desalting; Electric power generation; Nuclear electric power generation; Regional planning; Water; Water supply
Dual-Purpose Desalting in Pacific Southwest, Sam Shiozawa, 140

Desalting; Irrigation; Sea water intrusion; Wastewater treatment; Wastewater use; Water treatment; California
Orange County Water District's Water Factory 21, James R. Cofer, 549

Design; Drag; Hydraulic jump; Hydraulics; Supercritical flow; Channels (waterways)
Supercritical Flow Over Sills at Incipient Jump Conditions, Karam S. Karki and Subhash Chander, 503

Design; Dynamic response; Dynamics; Earthquakes; Engineering mechanics; Nonlinear programming; Optimization; Stresses; Tall buildings; Computer programming; Computers
Optimum Earthquake Design of Shear Buildings, Ben Kato, Yuji Nakamura and Hidetake Anraku, 343

Design; Dynamics; Earthquake resistant structures; Earthquakes; Loads (forces); Plasticity; Structural engineering; Buildings (codes); Computers
Earthquake Resistant Design of Unbraced Frames, James C. Anderson and Raj P. Gupta, 540

Design; Earthquake resistant structures; Earthquakes; Engineering mechanics; Failure; Structural analysis
Expected Fatigue Damage of Seismic Structures, Jhy-Pyng Tang and James T.P. Yao, 317

Design; Earthquakes; Engineering mechanics; Probability theory; Statistical analysis; Structural engineering
Reliability Optimization in Isostatic Structures, Emilio Rosenblueth and Enrique Mendoza, 38

Design; Earthquakes; Loads (forces); Moments; Powerplants; Shells (structural forms); Structural engineering; Wind (meteorology); Analysis; Concrete (reinforced); Cooling towers
Analysis and Design of Hyperbolic Cooling Towers, German Gurfinkel and Adolf Walser, 340

Design; Ecology; Environmental engineering; Fish; Florida; Locks (waterways); Navigation; Waterways; Canals
Design Versus Ecology in St. Johns and Indian Rivers, Harold A. Scott, 475

Design; Education; Moment distribution; Structural engineering; Arches
Hardy Cross and the Rise of Numerical Methods, James Michalos, 153

Design; Engineering; Planning; Projects; Social needs; Civil engineering
Ethical and Social Responsibility in the Planning and Design of Engineering Projects, David Mann, 107

Design; Engineering mechanics; Epoxy resins; Loads (forces); Orthotropic plate; Plates (structural members); Stresses; Deflection
Large Deflection of Rectangular Orthotropic Plates, Chuen-Yuan Chia, 514

Design; Engineering mechanics; Filters; Frequency; Seismic design; Damping
Spectrum-Compatible Motions for Design Purposes, Nien-Chien Tsai, 184

Design; Engineering mechanics; Shells (structural forms); Buckling
Buckling of Shells: An Old Idea with a New Twist, John Roorda, 266

Design; Environmental engineering; Forecasting; Mathematical models; Planning; Population growth
Stochastic Population Projection at Design Level, Peter M. Meier, 557

Design; Environmental engineering; Highway engineering; Highways; Noise; Noise masking; Transportation
Baltimore Plans Highways for Minimum Noise, Grant S. Anderson, Frederick Gottemoeller and Daniel G. Page, 410

Design; Field tests; Gates; Hydraulics; Spillways; Vibration
Spillway Gate Vibration on Arkansas River Dams, Tasso Schmidgall, 146

Design; Foundation investigations; Foundations; Land use; Buildings
Sample Approaches to Optimum Use of Marginal Lands, William W. Moore and Nicholas Chryssafopoulos, 207

Design; Foundations; Hurricanes; Piers; Storms; Stresses; Wind bracing; Wooden structures; Coastal engineering; Construction
Wood Structures Can Resist Hurricanes, Gerald E. Sherwood, 417

Design; Foundations; Lateral pressure; Pile lateral loads; Piles (foundations); Soil mechanics
Behavior of Laterally Loaded Piles: III -- Socketed Piles, Harry G. Poulos, 243

Design; Geometry; Optimization; Structural engineering; Trusses; Automation; Computers
Automated Design of Trusses for Optimum Geometry, Garret N. Vanderplaats and Fred Moses, 202

Design; Girders; Loads (forces); Optimization; Costs
Cost Optimization of Welded Plate Girders, Natarajan Annamalai, Albert D.M. Lewis and John E. Goldberg, 495

Design; Liner plates; Loads (forces); Power; Research; Steels; Structural engineering; Buckling; Chimneys
Design of Steel Chimney Liners, Max Zar, Shih-Lung Chu and James M. Doyle, 500

Design; Mathematical models; Terminal facilities; Transportation; Containerizing
Basis for Simulation Model of Container Terminal, Fraser Dunford, 299

Design; Models; Structural engineering; Box girders; Bridges (structures); Buckling; Composite structures
Ultimate Design of Hollow Thin-Walled Box Girders, Dennis H. Parr, 329

Design; Networks; New york; Systems analysis; Water tunnels; Computer systems programs
Systems Analysis of Water Distribution Networks, Richard de Neufville, John C. Schaake, Jr. and Joseph H. Stafford, 105

Design; Plates; Structural engineering; Torsion; Bridges (girder); Bridges (structures); Buckling; Deflection
Some Design Problems of Large Box Girder Bridges, Bogdan O. Kuzmanovic, 439

Design; Poles (supports); Structural engineering; Concrete (precast); Concrete (prestressed); Cost analysis
Optimal Design of Prestressed Concrete Poles, Manhar C. Thakkar and Bakul S. Bulsari, 77

Design; Professional activities; Public health; Tests; Automation; Buildings (hospitals)
Multiphase Health Screening Facility Design, Paul R. DeCicco, 593

Design criteria; Dynamic structural analysis; Earthquakes; Seismic design; Structural engineering; Bridges (structures)
Seismic Design of Highway Structures, Keith D. Bull, 393

Design criteria; Effectiveness; Energy; Harbors; Velocity; Vessels; Concrete (lightweight); Concrete (prestressed)
Ultimate Energy Design of Prestressed Concrete Fender Piling, Shu-t'ien Li and Venkataswamy Ramakrishnan, 81

Design criteria; Loading; Power lines; Structural engineering; Towers; Transmission lines; Wind (meteorology); Buildings (codes); Cables
Wind Recommendations for Transmission Towers, Gene M. Wilhoite, 142

Design data; Earthquakes; Repeated loading; Shear modulus; Soils; Stress-strain curves; Vibration; Analysis; Damping
Shear Modulus and Damping in Soils: Design Equations and Curves, Bobby O. Hardin and Vincent P. Drnevich, 354

Design practices; Environmental engineering; Land use; Natural resources; Site surveys
Environmental Aspects of Site Selection, Eugene F. Dudley, 120

Design standards; Manuals; Professional societies; Waste water treatment; Water pollution control
Design Standards for Wastewater Treatment Systems, Robert A. Canham and Louis L. Guy, Jr., 70

Desilting; Hydraulic models; Hydraulics; Sedimentation; Streams; Suspended sediments; Bed load; Canals; Channels
Chapter V: Sediment Control Methods: C. Control of Sediment in Canals, By the Task Committee on Preparation of Sedimentation Manual, Committee on Sedimentation of the Hydraulics Division, Vito A. Vanoni, Chmn., 455

Desorption; Filters; Filtration; Sanitary engineering; Suspended solids; Water treatment; Backwashing
Desorption and Retentivity of Filtering Materials, Andre Leclerc and Truong Tri Vu, 498

Detention reservoirs; Filtration; Hydraulics; Pollution; Sanitary engineering; Settling basins; Sewage disposal; Tanks (containers); Trickling filters; Bacteria; Chlorine
Chlorine Disinfection in Final Settling Basins, Darrell W. Monroe and Donald C. Phillips, 296

Differential equations; Elastic properties; Engineering mechanics; Vibration; Cylinders
Three-Dimensional Vibrations of Orthotropic Cylinders, Fang-Hui Chou and Jan D. Achenbach, 362

Differential equations; Engineering mechanics; Shells (structural forms); Structural engineering; Cylindrical shells; Deformation
Accurate Fourth Order Equation for Circular Cylindrical Shells, Shun Cheng, 311

Diffraction; Hydraulics; Nonlinear systems; Wave energy; Waves; Cylinders
Nonlinear Wave Forces on a Vertical Cylinder, Subrata K. Chakrabarti, 542

Diffusion; Dispersion; Estuaries; Flow; Sanitary engineering; Shear flow; Velocity distribution; Water pollution
Velocity Profiles and Dispersion in Estuarine Flow, Burton A. Segall and Erik R. Gidlund, 435

Diffusion; Effluents; Field tests; Hydraulics; Models; Simulation; Tidal currents; Tracers; Turbulence
Tracer Tests of Eddy Diffusion in Field and Model, Maurice J. Crickmore, 509

Diffusion; Floods; Hydraulics; Rivers; Channels (waterways); Computation
Diffusion Solution To Flows with Upstream Control, Alex J. Sutherland and Alistair G. Barnett, 537

Diffusion; Hydraulics; Stratified flow; Water quality; Cooling water
Dilution of Buoyant Two-Dimensional Surface Discharges, Heinz Stefan, 124

Digital computers; Flow profiles; Hydraulic jump; Pipe flow; Computers; Culverts
Digital Computers in Circular Culvert Design, Bobby E. Price and Frank D. Masch, 369

Digital simulation; Floods; Hydraulics; Hydrology; Small watersheds
Flood Frequency Estimating Techniques for Small Watersheds, George Fleming and Delbert D. Franz, 23

Dikes; Dunes; Flood control; Floods; Netherlands; New Jersey; Savannas; Shore protection; Waves
Best Shore Protection: Nature's Own Dunes, Ian McHarg, 400

Dikes; Embankments; Pumped storage; Reservoirs; Sealers; Tests; Asphalts; Bituminous concretes; Concrete; Dams
Bituminous Blanket for Dike, F. P. Robertson and Johannes Lehnert, 537

Dikes; Environmental engineering; Offshore structures; Urban planning; Airports; Air transportation
Trends in Offshore Airports, Richard D. Harza, 497

Dikes; Erosion; Hydraulics; Sands; Scour; Vortices; Beds under water
Erosion of Sand Beds Around Spur Dikes, Mohammad Akram Gill, 476

Dikes; Estimates; Jet aircraft; New jersey; New york; Airports; Air traffic; Costs
Offshore Jetport for New York-New Jersey Megalopolis, Edward G. Nawy and Fred C. Koletty, 179

Dikes; Gates; Ice; Ice control; Mississippi River; Waterways; Aeration; Backwater; Dams (movable)
Reducing Ice Formation at Navigation Dams, Henry W. Harich, 387

Dilatancy; Finite element method; Joints (geology); Rock bolts; Soil mechanics
Duplication of Dilatancy in Analysis of Jointed Rocks, Richard E. Goodman and Jacques Dubois, 274

Dilution; Hydraulics; Jets; Coastal engineering; Desalting
Model Study of Dense Jet in Flowing Fluid, Forrest M. Holly, Jr. and John L. Grace, Jr., 552

Dimensional analysis; Field data; Forecasting; Functions (mathematics); Irrigation; Computers
Prediction of Irrigation Advance Function by Dimensional Analysis, G. Sastry and S. C. Agarwal, 223

Dimensions; Economics; Floors; Height; Tall buildings; Building materials; Cost analysis
The Economics of High-Rise Apartment Buildings of Alternate Design Configuration, Richard D. Steyert, 387

Disadvantaged groups; Government; Research; Schools; Traffic surveys; Transportation; Community relations; Decision making
Transportation Research for Community Objectives, Arthur Saltzman, Sidney H. Evans, Alice E. Kidder and Florentine Sowell, 555

Discharge; Drainage; Evaporation; Hydraulics; Precipitation (meteorology); Runoff; Watersheds
A Model to Predict Mean Annual Watershed Discharge, Steven I. Majtenyi, 373

Discharge; Hydraulics; Models; Pipe flow; Powerplants; Pumps; Water hammer; Computer programming; Computers; Conduits
Computer Simulation of Waterhammer Effects, George Belonogoff, 323

Discharge coefficients; Fluid flow; Hydraulics; Spatial distribution; Weirs
Spatially Varied Flow Over Side-Weirs, Kanakatti Subramanya and Subhash Chandra Awasthy, 84

Discharge lines; Hydraulics; Pipe flow; Pipelines; Pumps; Water hammer; Water pressure
Start-up Pressures in Short Pump Discharge Lines, Irving Joseph and Frank A. Hamill, 359

Discontinuities; Engineering mechanics; Stress-strain curves; Bond stress; Composite materials; Cracking (fracturing)
Deformation and Fracture of Particulate Composite, Oral Buyukozturk and Arthur H. Nelson, 292

Discrete distribution functions; Dynamic stability; Elastic properties; Equations of motion; Excitation
Stability and Boundedness Via Liapunov's Direct Method, Siegfried M. Holzer, 520

Disease vectors; Drainage; Ecology; Egypt; Erosion; Irrigation; ASCE (executive secretary); Dams
People, Ecology and the Aswan High Dam, William H. Wisely, 67

Disinfection; Dysentery; Iodine; Meningitis; Microorganism control (water); Water treatment; Amoeba; Chlorine; Cysts
Amoebic Cysticidal Properties of Halogens in Water, Richard Stringer and Cornelius W. Kruse, 98

Disinfection; Environmental engineering; Water quality; Water treatment; Bacteria; Calcium carbonates
Effect of Calcium Bicarbonate on Disinfection by Halogens, Lawrence N. Kuzminski, Tsuan H. Feng and Chih C. Liu, 222

Disinfection; Exchange reactions; Sanitary engineering; Chlorination; Chlorine
Fixed Resin Bed Chlorination of Water, Edgar J. Dewar and Morris Wayman, 172

Disinfection; Kinetics; Pollution control; Sanitary engineering; Waste stabilization ponds; Waste treatment; Algae; Chlorination; Coliform bacteria
Kinetics of Chlorine Disinfection in an Ecosystem, Leonard W. Hom, 231

Dispersion; Dissolved oxygen; Sanitary engineering; Stream pollution; Biochemical oxygen demand
Effects of Dispersion on DO-sag in Uniform Flow, Wen-Hsiung Li, 251

Dispersion; Engineering mechanics; Injection wells; Mathematical studies; Recharge wells; Waste water
Dispersion from Recharge Well, Charles W. Lenau, 197

Dispersion; Estuaries; Flow; Sanitary engineering; Shear flow; Velocity distribution; Water pollution; Diffusion
Velocity Profiles and Dispersion in Estuarine Flow, Burton A. Segall and Erik R. Gidlund, 435

Dispersion; Hydraulics; Mathematical models; Mississippi; Time of concentration; Turbulence; Turbulent diffusion
Dispersion in Natural Streams, Mahendra K. Bansal, 50

Dispersions; Hydraulics; Time of concentration; Tracers
Hydraulic Treatment Efficiency of Waste Stabilization, Kenneth A. Mangelson and Gary Z. Watters, 333

Displacement; Elastic properties; Energy; Engineering mechanics; Equilibrium methods; Shells (structural forms)
Thick Shell and Oriented Surface Theories, Frank G. Bercha and Peter G. Glockner, 355

Displacement; Engineering mechanics; Equilibrium; Fourier series; Rings; Static structural analysis; Deflection
Linear Theory of Thin Rings, Harry E. Williams, 436

Display devices; Electronic equipment; Guidance; Highways; Traffic signals; Transportation
Benefit Measurements of Highway Electronic Route Guidance, Salvatore J. Bellomo and George K. Young, Jr., 90

Dissolved oxygen; Environmental engineering; Hydroelectric power generation; Mathematical models; Thermal stratification; Water quality; Biota
Predicting Quality Effects of Pumped Storage, Carl W. Chen and Gerald T. Orlob, 255

Dissolved oxygen; Rivers; Sanitary engineering; Sewage treatment; Aeration
Aeration System for Large Navigable Rivers, William Whipple, Jr. and Shaw L. Yu, 135

Dissolved oxygen; Sanitary engineering; Stream pollution; Biochemical oxygen demand; Dispersion
Effects of Dispersion on DO-sag in Uniform Flow, Wen-Hsiung Li, 251

Dissolved solids; Groundwater flow; Groundwater quality; Leaching; Waste disposal
Scientific and Administrative Criteria for Shallow Waste Disposal, George M. Hughes and Keros Cartwright, 153

Distribution; Focal length; Photogrammetry; Probability theory; Random error; Standard deviation; Surveying; Variance (statistics); Weighting functions
Theoretical Weighting of Photogrammetric Equations, Charles Kendall Paul, 550

Distribution; Mass concrete; Placement; Reinforcement; Slabs; Walls; Beams (supports); Columns (supports); Compaction; Concrete; Consolidation
Pertinent Techniques for Compacting Concrete, Shu-t'ien Li and Donald A. Stewart, 429

Distribution functions; Hydraulics; Hydrology; Reservoir storage; Runoff; Stochastic processes
Some Problems with Log-Normal Markov Runoff Models, Stephen J. Burges, 443

Distribution systems; Foundations; Heat of hydration; Reinforcement; Structural engineering; Cements; Concrete; Concrete (reinforced); Dams
Temperature Rises in Low-Heat Cement Concrete, Barry P. Hughes, 43

Diversion; Linear algebraic equations; Linear programming; Nonlinear algebraic equations; Optimization; Reservoirs; River flow; Canada
Optimization Model for Churchill River Diversion, Abu M.Z. Alam, 409

Docks; Drydocks; Graving docks; Pennsylvania; Sheet piling; Shipbuilding; Waterways
1,200-Ft Graving Dock, Frederick E. Krauss and George H. Plude, 605

Docks; Harbor facilities; Harbors; Barges; Bridges (movable)
Multipurpose Land-Water Transfer Facility, C. Adrian Arnold, 335

Docks; Ice; Marinas; Pile extraction; Piles (foundations); Reclamation; Wisconsin
Lake Superior Yachting Marinas Resist Ravages of Ice, C. Allen Wortley, 79

Draft-storage curves; Irrigation; Low-flow augmentation; Probability theory; Reservoir storage; Safe yield; Water resources development; Water supply
Potential United States Water-Supply Development, Clayton H. Hardison, 528

Drag; Fire fighting; Flow resistance; Pipe flow; Polymers; Sanitary engineering; Additives
Drag Reduction Application in Fire Fighting Systems, Hillel Rubin, 149

Drag; Hydraulic jump; Hydraulics; Supercritical flow; Channels (waterways); Design
Supercritical Flow Over Sills at Incipient Jump Conditions, Karam S. Karki and Subhash Chander, 503

Drag; Hydraulics; Supercritical flow; Weir crests; Baffles; Conformal mapping
Supercritical Flow Over Sills, John A. McCorquodale and M. K. Giratalla, 239

Drag; Hydraulics; Turbulent flow; Cylinders
Drag Coefficient of Cylinders in Turbulent Flow, Stephen C. Ko and Walter H. Graf, 305

Drag; Loads (forces); Structural engineering; Turbulence; Vibration; Wind (meteorology); Aerodynamics
Drag Spectra of Simple Structures in Turbulence, John Brian Roberts, 448

Drainage; Drains; Pore water pressure; Soil mechanics; Consolidation
Consolidation of Clay Layer in Two Dimensions, Sivajogi D. Koppula and Norbert R. Morgenstern, 168

Drainage; Drains; Sewers; Chemical cleaning; Cleaning
Restoring Subsurface Drain Performance, Luther B. Grass and Arnold J. MacKenzie, 90

Drainage; Droughts; Environments; Social needs; Water resources; Assessments
Assessing Social Consequences of Water Deficiencies, William K. Johnson, 60

Drainage; Droughts; Irrigation; Reservoir storage; Reservoir yield; Stream flow; Water supply
Drought Severity and Water Supply Dependability, Leo R. Beard and Harold E. Kubik, 539

Drainage; Ecology; Egypt; Erosion; Irrigation; ASCE (executive secretary); Dams; Disease vectors
People, Ecology and the Aswan High Dam, William H. Wisely, 67

Drainage; Economic analysis; Hydraulics; Mathematical models; Sewers; Urbanization; Costs
Methods for Predicting Urban Drainage Costs, Walter J. Rawls and John W. Knapp, 486

Drainage; Embankments; Fills; Settlement (structural); Airports; Air transportation
KCI Airport Planned for Jet Age, Edwin Joe Runyan, 480

Drainage; Environmental engineering; Highways; Land use; Legislation; Regional planning; Transportation
Impact of Environmental Controls on Highways, Wm. Campbell Graeub, Albert A. Grant and Robley Winfrey, 219

Drainage; Erosion; Friction; Impact; Overland flow; Rainfall; Turbulence; Water flow
Mechanics of Sheet Flow Under Simulated Rainfall, Yong Nam Yoon and Harry G. Wenzel, Jr., 13

Drainage; Evaporation; Hydraulics; Precipitation (meteorology); Runoff; Watersheds; Discharge
A Model to Predict Mean Annual Watershed Discharge, Steven I. Majtenyi, 373

Drainage; Evapotranspiration; Irrigation; Probability theory; Statistical analysis
Maximum Potential Evapotranspiration Frequency - East Central U.S., J. L. McGuinness and Leslie H. Parmele, 267

Drainage; Filtration; Seepage; Subsurface drainage; Subsurface drains; Underdrains
Prefabricated Filter-Fin for Subsurface Drains, Kent A. Healy and Richard P. Long, 594

Drainage; Floods; Hydraulics; Hydrology; Land use; Legislation; Municipal engineering; Professional practice; Runoff; Subdivisions; Urban planning; Waterways (watercourses)
An Engineer Looks at Drainage Law, Alfred R. Pagan, 511

Drainage; Flumes; Hydraulics; Irrigation; Measuring instruments; Open channel flow
Generalized Discharge Relations for Cutthroat Flumes, Gaylord V. Skogerboe, Ray S. Bennett and Wynn R. Walker, 601

Drainage; Fly ash; Paper mills; Permeability; Sanitary engineering; Sludge; Sludge disposal; Ashes
Permeability of High Ash Papermill Sludge, Orlando B. Andersland and Robert W. Laza, 576

Drainage; Freeways; Highway engineering; Highways; Maintenance; Pavements; Safety; Traffic engineering
Current Practices in Highway Maintenance: A Reference List, Committee on Construction, Maintenance and Operation of Highways of the Highway Division., Walter E. Capper, Chmn., 260

Drainage; Ground water; Groundwater recharge; Irrigation; Permeability; Aquifers
Basin Recharge of the Ogallala Aquifer, Vladimir S. Aronovici, Arland D. Schneider and Ordie R. Jones, 104

Drainage; Ground water; Irrigation; Safety; Water distribution (applied); Water law; Water rights
General Statement of Principles to be Included in State Water Rights Laws, Committee on Water Laws of the Irrigation and Drainage Division, Floyd A. Bishop, Chmn., 396

Drainage; Ground water; Sea water intrusion; Seepage; Wells; California
Seawater Intrusion Extraction Barrier, Jack J. Coe, 425

Drainage; Groundwater flow; Porous media; Clay soils
Drainage in Soils with Initial Gradient, Arun J. Valsangkar and Kanakatti Subramanya, 383

Drainage; Hele-Shaw model; Tile drains; Water table
Moving Water Tables in Tile-Drained Soils, Nazar M. Awan and Terence O'Donnell, 411

Drainage; Homogeneity; Seepage; Soils
Seepage from Trenches Through Nonhomogeneous Soils, Ahmed El Nimur and Robert L. Street, 185

Drainage; Irrigation; California
Ecological Impacts of Water Projects in California, Robert M. Hagan and Edwin B. Roberts, 198

Drainage; Irrigation; Maintenance; Operations; Organizations; Public opinion; Water management (applied)
Operation and Maintenance of Irrigation and Drainage Systems: Section II--Organization for Operation and Maintenance, Committee on Operation and Maintenance of Irrigation and Drainage Systems of the Irrigation and Drainage Division, Richard J. Willson, Chmn., 76

Drainage; Irrigation; Pumping; Salinity; Tests; Agriculture; Aquifers; Artesian wells
Pumping an Artesian Source for Water Table Control, Eugene J. Doering and Leo C. Benz, 344

Drainage; Irrigation; Subsurface drains; Subsurface irrigation; Tiles; Water
Irrigation Through Subsurface Drains, R. Wayne Skaggs, George J. Kriz and Reynaldo Bernal, 460

Drainage; Overland flow; Runoff; Seepage; Snow
Volume of Snowmelt Intercepted by Logging Roads, Edward R. Burroughs, Jr., Michael A. Marsden and Harold F. Haupt, 145

Drainage; Perlite; Reservoirs; Temperature; Wind (meteorology)
Reducing Pond Evaporation with Perlite Ore, Keith R. Cooley and C. Brent Cluff, 305

Drainage; Precipitation (atmospheric); Water resources; Water users; Connecticut; Costs
Potential of Precipitation Modification, Eugene J. Aubert, Gurbachan P. Malhotra and D. B. Spiegler, 212

Drains; Dust storms; Engineering mechanics; Fluid mechanics; Friction; Hydraulics; Inlets (waterways); Jets; Meteorology; Momentum; Tornadoes; Vortices; Air entrainment
Experiments on Unstable Vortices, Enzo Levi, 249

Drains; Engineering mechanics; Seepage; Tile drainage; Transient flow; Conformal mapping
Transient Seepage Flow Toward Two Parallel Drains, Imre Gyuk and Gabor M. Karadi, 138

Drains; Pore water pressure; Soil mechanics; Consolidation; Drainage
Consolidation of Clay Layer in Two Dimensions, Sivajogi D. Koppula and Norbert R. Morgenstern, 168

Drains; Seepage; Soil mechanics; Computers; Dams (earth)
Seepage Through Dams with Horizontal Toe Drain, Mohammad S. Moayeri, 282

Drains; Sewers; Chemical cleaning; Cleaning; Drainage
Restoring Subsurface Drain Performance, Luther B. Grass and Arnold J. MacKenzie, 90

Drawdown; Finite element method; Hydraulic models; Seepage; Soil mechanics; Dams; Dams (earth)
Seepage Analysis of Earth Banks Under Drawdown, Chandrakant S. Desai, 511

Dredging; Estuaries; Salt marshes; Sediments; Water quality; Coastal engineering
Environmental Aspects of Dredging in Estuaries, Herbert L. Windom, 529

Dredging; Harbors; Hydroelectric power generation; Power; River flow; Sedimentation
Sedimentation Effects of Hydroelectric Development, Jack F. Rasmussen, 469

Dredging; New York; Sewage treatment plants
New Pier in Jamaica Bay, Remig A. Papp, 372

Drilling; Offshore completion; Pile structures; Vortices; Wave energy; Waves; Coastal engineering
Laboratory Study of Lift Forces on Circular Piles, Devidas D. Bidde, 60

Droughts; Economic development; Irrigation; Water deprivation; Agriculture
Water Deficits -Irrigation Design and Programming, Robert M. Hagan and J. Ian Stewart, 318

Droughts; Environmental engineering; Estuaries; Hydrology; Irrigation; Meteorology; New Jersey; Water purification; Water quality; Water resources
Impact of Drought on New Jersey's Water Resources, Peter W. Anderson, Samuel D. Faust and John E. McCall, 472

Droughts; Environments; Social needs; Water resources; Assessments; Drainage
Assessing Social Consequences of Water Deficiencies, William K. Johnson, 60

Droughts; Irrigation; Reservoir storage; Reservoir yield; Stream flow; Water supply; Drainage
Drought Severity and Water Supply Dependability, Leo R. Beard and Harold E. Kubik, 539

Drydocks; Graving docks; Pennsylvania; Sheet piling; Shipbuilding; Waterways; Docks
1,200-Ft Graving Dock, Frederick E. Krauss and George H. Plude, 605

Dunes; Flood control; Floods; Netherlands; New Jersey; Savannas; Shore protection; Waves; Dikes
Best Shore Protection: Nature's Own Dunes, Ian McHarg, 400

Durability; Highways; Transportation; Aircraft landing areas
Effect of Load Placement on Rigid Pavement Behavior, Harvey J. Treybig, William Ronald Hudson and B. Frank McCullough, 6

Dust storms; Engineering mechanics; Fluid mechanics; Friction; Hydraulics; Inlets (waterways); Jets; Meteorology; Momentum; Tornadoes; Vortices; Air entrainment; Drains
Experiments on Unstable Vortices, Enzo Levi, 249

Dynamic characteristics; Dynamic structural analysis; Earthquake theory; Engineering mechanics; Plasticity; Columns (supports)
Finite Earthquake-Response of Inelastic Structure, Chi-Mou Ni and Lawrence H.N. Lee, 549

Dynamic characteristics; Hauling; Management; Optimization; Sanitary engineering; Solid wastes; Waste disposal
Facility Selection and Haul Optimization Model, Houshang Esmaili, 528

Dynamic loads; Dynamics; Engineering mechanics; Plasticity; Blast loads
Dynamic Response of Nonlinear Media at Large Strains, Joseph H. Heifitz and Carl J. Costantino, 603

Dynamic loads; Elastic properties; Materials; Pavements; Soil mechanics; Strains; Stresses; Subgrades; Transportation
Dynamic Response of Model Pavement Structure, Stephen F. Brown and David I. Bush, 541

Dynamic loads; Engineering mechanics; Probability theory; Safety factors
Filtered Poisson Process for Random Vibration Problems, Ronald L. Racicot and Fred Moses, 110

Dynamic properties; Finite differences; Loads (forces); Rectangular bodies; Relaxation (mechanics); Structural engineering; Thin plates; Concentrated loads; Deflection
Large Deflection of Elastic Plates Under Patch Loading, Bijan Aalami, 559

Dynamic response; Dynamics; Earthquakes; Engineering mechanics; Nonlinear programming; Optimization; Stresses; Tall buildings; Computer programming; Computers; Design
Optimum Earthquake Design of Shear Buildings, Ben Kato, Yuji Nakamura and Hidetake Anraku, 343

Dynamic response; Dynamic structural analysis; Engineering mechanics; Environmental tests; Excitation; Linear responses; Random processes; Vibration
Linear Response to Nonstationary Random Excitation, Timothy K. Hasselman, 278

Dynamic response; Laboratory tests; Shear modulus; Soil mechanics; Clay (material)
Time Effects on Dynamic Shear Modulus of Clays, William F. Marcuson, III and Harvey E. Wahls, 588

Dynamics; Dynamic stability; Engineering mechanics; Slenderness ratio; Stability
Dynamic Stability of Thin-Walled Column, Carl H. Popelar, 304

Dynamics; Dynamic structural analysis; Engineering mechanics; Finite differences; Mathematics; Numerical integration; Structural engineering; Computation
Temporal Operators for Nonlinear Structural Dynamics Problems, George Weeks, 495

Dynamics; Earthquake loads; Safety factor; Structural engineering
Concept of Structural Control, James T. P. Yao, 357

Dynamics; Earthquake resistant structures; Earthquakes; Loads (forces); Plasticity; Structural engineering; Buildings (codes); Computers; Design
Earthquake Resistant Design of Unbraced Frames, James C. Anderson and Raj P. Gupta, 540

Dynamics; Earthquakes; Engineering mechanics; Filters; Fourier transformation; Mathematics; Systems engineering; Vibration; Computers
Dynamic Analysis by Extra Fast Fourier Transform, Jethro W. Meek and Anestis S. Veletsos, 218

Dynamics; Earthquakes; Engineering mechanics; Nonlinear programming; Optimization; Stresses; Tall buildings; Computer programming; Computers; Design; Dynamic response
Optimum Earthquake Design of Shear Buildings, Ben Kato, Yuji Nakamura and Hidetake Anraku, 343

Dynamics; Earthquakes; Failure
Fatigue Failure of Nonlinear Multistory Seismic Structure, Iyadurai Kasiraj, 194

Dynamics; Earthquakes; Monte Carlo method; Probability theory; Shear; Structural engineering; Buildings
Probabilistic Response of Nonlinear Buildings During Earthquakes, Alain H. Peyrot, 531

Dynamics; Elastic foundations; Engineering mechanics; Frequencies; Mathematical models; Vibration
Vibrations of Elastically Connected Ring Systems, Vincent X. Kunukkasseril and K. Rami Reddy, 350

Dynamics; Engineering; Frames; Matrices (mathematics); Mechanics; Structural engineering; Vibration; Computation
Convergence in Modal Synthesis, Stephen E. Johnson and Walter C. Hurty, 527

Dynamics; Engineering mechanics; Field tests; Materials tests; Statistical analysis; Tests; Time dependence; Vibration; Viscoelasticity; Data systems
Statistical Theory for Viscoelastic Materials, Joseph Soussou and Fred Moavenzadeh, 532

Dynamics; Engineering mechanics; Finite elements; Nonlinear systems; Cables (ropes)
Nonlinear Dynamics of Cables with Low Initial Tension, John W. Leonard, 170

Dynamics; Engineering mechanics; Finite elements; Porous media flow; Wave propagation
Variational Formulation of Dynamics of Fluid-Saturated Porous Elastic Solids, Jamshid Ghaboussi and Edward L. Wilson, 425

Dynamics; Engineering mechanics; Footings; Foundations; Shielding; Vibration
Shear Waves in Plane Infinite Structures, John Lysmer and Gunter Waas, 89

Dynamics; Engineering mechanics; Forced vibration; Grid systems; Moments; Vibration; Deflection
Dynamic Field Analysis of Torsionless Grids, Hota V.S. GangaRao and J. C. Smith, 330

Dynamics; Engineering mechanics; Mathematical models; Stability; Vibration; Beam columns; Buckling
Beams Subjected to a Follower Force Within the Span, Jack C. Wiley and Richard E. Furkert, 569

Dynamics; Engineering mechanics; Matrices (mathematics); Computation; Computers
Large Eigenvalue Problems in Dynamic Analysis, Klaus-Jurgen Bathe and Edward L. Wilson, 560

Dynamics; Engineering mechanics; Numerical analysis; Rings; Structural engineering; Vibration; Arches
Free In-Plane Vibration of Circular Arches, Anestis S. Veletsos, Walter J. Austin, Carlos A. Lopes Pereia and Shyr-Jen Wung, 176

Dynamics; Engineering mechanics; Plasticity; Blast loads; Dynamic loads
Dynamic Response of Nonlinear Media at Large Strains, Joseph H. Heifitz and Carl J. Costantino, 603

Dynamics; Engineering mechanics; Probability theory; Spectral energy distribution; Vibration
Properties of Spectral Moments with Applications to Random, Erik H. Vanmarcke, 211

Dynamics; Finite element method; Nonlinear systems; Power; Thermal powerplants; Cooling towers
Nonlinear Dynamic Analysis of Cooling Tower, Chang-hua Yeh, 228

Dynamics; Foundations; Soil mechanics; Vibration
Vertical Vibration of Embedded Footings, Milos Novak and Youpele O. Beredugo, 568

Dynamics; Guyed towers; Guy wires; Structural engineering; Temperature; Towers; Vibration
Dynamics of Guyed Towers, Richard J. McCaffrey and Alois J. Hartmann, 303

Dynamics; Highways; Safety; Traffic engineering; Transportation; Automobiles; Computers
Vehicle-Roadway Interaction Studies by Math Model, Hayes E. Ross, Jr. and Don L. Ivey, 249

Dynamic stability; Elastic properties; Equations of motion; Excitation; Discrete distribution functions
Stability and Boundedness Via Liapunov's Direct Method, Siegfried M. Holzer, 520

Dynamic stability; Engineering mechanics; Slenderness ratio; Stability; Dynamics
Dynamic Stability of Thin-Walled Column, Carl H. Popelar, 304

Dynamic stability; Engineering mechanics; Stability; Torsion; Vibration; Beam columns; Buckling; Columns (supports); Computation
Coupled, Nonconservative Stability-Finite Element, C. D. Mote, Jr. and Gerald Y. Matsumoto, 286

Dynamic structural analysis; Earthquake engineering; Earthquake resistant structures; Earthquakes; Liquefaction; Structural engineering; Bridges (structures)
The San Fernando Earthquake - A Lesson in Highway and Bridge Design, Arthur L. Elliott, 424

Dynamic structural analysis; Earthquakes; Frames; Structural engineering
Dynamic Analysis of Staggered Truss Framing System, Raj P. Gupta and Subhash C. Goel, 352

Dynamic structural analysis; Earthquakes; Seismic design; Structural engineering; Bridges (structures); Design criteria
Seismic Design of Highway Structures, Keith D. Bull, 393

Dynamic structural analysis; Earthquake theory; Engineering mechanics; Plasticity; Columns (supports); Dynamic characteristics
Finite Earthquake-Response of Inelastic Structure, Chi-Mou Ni and Lawrence H.N. Lee, 549

Dynamic structural analysis; Engineering mechanics; Blast loads; Deformation
Displacement Bounds for Blast Loaded Structures, Walter J. Morales, 410

Dynamic structural analysis; Engineering mechanics; Environmental tests; Excitation; Linear responses; Random processes; Vibration; Dynamic response
Linear Response to Nonstationary Random Excitation, Timothy K. Hasselman, 278

Dynamic structural analysis; Engineering mechanics; Finite differences; Mathematics; Numerical integration; Structural engineering; Computation; Dynamics
Temporal Operators for Nonlinear Structural Dynamics Problems, George Weeks, 495

Dynamic structural analysis; Engineering mechanics; Shells (structural forms); Spherical shells; Underwater structures
Acoustic Approximations in Fluid-Shell Interactions, Bedros Bedrosian and Frank L. DiMaggio, 337

Dynamic structural analysis; Hydrodynamics; Mechanics; Ocean engineering; Structural engineering; Bridges (suspension); Cables (ropes)
Dynamic Analysis of Cable Systems, Richard F. Dominguez and Charles E. Smith, 388

Dysentery; Iodine; Meningitis; Microorganism control (water); Water treatment; Amoeba; Chlorine; Cysts; Disinfection
Amoebic Cysticidal Properties of Halogens in Water, Richard Stringer and Cornelius W. Kruse, 98

Earth materials; Elastic theory; Reinforcement; Soil mechanics; Stratification; Anisotropy
Elastic Theory Applied to Reinforced Earth, W. Jill Harrison and Charles M. Gerrard, 575

Earth movements; Highways; Inclinometers; Instrumentation; Soil stability; Stability; Transportation
Instrumentation Applied to Slope Stability Problems, Stanley D. Wilson and David E. Hilts, 316

Earthmoving; Estimates; Computerized simulation; Construction planning
Estimating Costs of Earthwork via Simulation, Jack H. Willenbrock, 208

Earth pressure; Lateral pressure; Model tests; Retaining walls; Soil mechanics; Clays
Lateral Pressures from Soft Clay, Peter J. Moore and Graham K. Spencer, 538

Earth pressure; Mobility; Retaining walls; Soil mechanics; Soil-structure interaction; Stress distribution; Velocity distribution; Walls
Effect of Wall Movement on Active and Passive Pressures, Ian K. Lee and John R. Herington, 347

Earth pressure; Ocean engineering; Pore water pressure; Soil mechanics; Time dependence; Underwater construction; Bearing capacity; Deformation
Breakout Resistance of Objects Embedded in Ocean Bottom, Aleksandar Sedmak Vesic, 19

Earth pressure; Retaining walls; Soil mechanics; Soil-structure interaction
Finite Element Analyses of Retaining Wall Behavior, Gerald W. Clough and James M. Duncan, 95

Earth pressure coefficient; Mica; Soil mechanics; Compression
Effect of Mica on K_o Compressibility of Two Soils, Charles A. Moore, 33

Earthquake damage; Professional engineering; Structural analysis; Buildings (codes)
Badly Needed: Changes in Building Codes for Houses, Melvin W. Jackson, 190

Earthquake engineering; Earthquake resistant structures; Earthquakes; Liquefaction; Structural engineering; Bridges (structures); Dynamic structural analysis
The San Fernando Earthquake - A Lesson in Highway and Bridge Design, Arthur L. Elliott, 424

Earthquake engineering; Earthquake resistant structures; Lateral forces; Seismic design
Report on Conference on 1971 San Fernando, Ca., Earthquake, David J. Leeds, 254

Earthquake engineering; Recreational facilities; Subsidence; Water conduits; Water distribution; Water resources development; California
California Water Project, William R. Gianelli and Robert B. Jansen, 307

Earthquake loads; Safety factor; Structural engineering; Dynamics
Concept of Structural Control, James T. P. Yao, 357

Earthquake resistant structures; Earthquakes; Engineering mechanics; Failure; Structural analysis; Design
Expected Fatigue Damage of Seismic Structures, Jhy-Pyng Tang and James T.P. Yao, 317

Earthquake resistant structures; Earthquakes; Liquefaction; Structural engineering; Bridges (structures); Dynamic structural analysis; Earthquake engineering
The San Fernando Earthquake - A Lesson in Highway and Bridge Design, Arthur L. Elliott, 424

Earthquake resistant structures; Earthquakes; Loads (forces); Plasticity; Structural engineering; Buildings (codes); Computers; Design; Dynamics
Earthquake Resistant Design of Unbraced Frames, James C. Anderson and Raj P. Gupta, 540

Earthquake resistant structures; Earthquakes; Risk; Safety factors; Seismic design; Building codes; Buildings
The Balanced Risk Concept: New Approach to Earthquake Building Codes, John H. Wiggins, 377

Earthquake resistant structures; Earthquakes; Soil mechanics; Venezuela; Damage
Soil Conditions and Building Damage in 1967 Caracas Earthquake, H. Bolton Seed, Ricardo V. Whitman, Houshang Dezfulian, Ricardo Dobry and Izzat M. Idriss, 423

Earthquake resistant structures; Economics; Legislation; Philippine Islands; Sanitary engineering; Sewage treatment
Master Sewerage System for Metropolitan Manila, John O. Schmidt, 187

Earthquake resistant structures; Lateral forces; Seismic design; Earthquake engineering
Report on Conference on 1971 San Fernando, Ca., Earthquake, David J. Leeds, 254

Earthquakes; Engineering mechanics; Failure; Structural analysis; Design; Earthquake resistant structures
Expected Fatigue Damage of Seismic Structures, Jhy-Pyng Tang and James T.P. Yao, 317

Earthquakes; Engineering mechanics; Filters; Fourier transformation; Mathematics; Systems engineering; Vibration; Computers; Dynamics
Dynamic Analysis by Extra Fast Fourier Transform, Jethro W. Meek and Anestis S. Veletsos, 218

Earthquakes; Engineering mechanics; Forecasting; Bridges (concrete); Bridges (piers)
Seismic Response Predictions of Bridge Pier, Robin Shepherd and Richard E. McConnel, 256

Earthquakes; Engineering mechanics; Nonlinear programming; Optimization; Stresses; Tall buildings; Computer programming; Computers; Design; Dynamic response; Dynamics
Optimum Earthquake Design of Shear Buildings, Ben Kato, Yuji Nakamura and Hidetake Anraku, 343

Earthquakes; Engineering mechanics; Power spectra; Shock; Vibration
An Approach to Time-Varying Spectral Analysis, Shih-Chi Liu, 126

Earthquakes; Engineering mechanics; Probability theory; Statistical analysis; Structural engineering; Design
Reliability Optimization in Isostatic Structures, Emilio Rosenblueth and Enrique Mendoza, 38

Earthquakes; Engineering mechanics; Soil-structure interaction; Tall buildings; Vibration; Buildings
Earthquake Interaction for Multistory Building, Lawrence W. Fagel and Shih-Chi Liu, 416

Earthquakes; Failure; Dynamics
Fatigue Failure of Nonlinear Multistory Seismic Structure, Iyadurai Kasiraj, 194

Earthquakes; Finite elements; Structural engineering; Vibration; Dams; Dams (concrete); Dams (gravity)
Behavior of Koyna Dam - Dec. 11, 1967 Earthquake, Sarjit S. Saini, Jai Krishna and Anjur R. Chandrasekaran, 319

Earthquakes; Foundations; Soil-structure interaction; Structural engineering; White noise
Dynamic Soil-Structure Interaction, Mauricio A. Sarrazin, 338

Earthquakes; Frames; Sidesway; Steel; Structural engineering; Tubes; Construction
Perimetral Tube for 37-Story Steel Building, L. Agustin Mazzeo and Armin De Fries, 288

Earthquakes; Frames; Structural engineering; Dynamic structural analysis
Dynamic Analysis of Staggered Truss Framing System, Raj P. Gupta and Subhash C. Goel, 352

Earthquakes; Joints (junctions); Structural engineering; Welding; Beams (supports); Cyclic loads
Beam-Column Subassemblages Under Repeated Loading, Vitelmo V. Bertero, Egor P. Popov and Helmut Krawinkler, 268

Earthquakes; Liquefaction; Sands; Seismic design; Soil mechanics
Simplified Procedure for Evaluating Soil Liquefaction Potential, H. Bolton Seed and Izzat M. Idriss, 8

Earthquakes; Liquefaction; Structural engineering; Bridges (structures); Dynamic structural analysis; Earthquake engineering; Earthquake resistant structures
The San Fernando Earthquake - A Lesson in Highway and Bridge Design, Arthur L. Elliott, 424

Earthquakes; Loads (forces); Moments; Powerplants; Shells (structural forms); Structural engineering; Wind (meteorology); Analysis; Concrete (reinforced); Cooling towers; Design
Analysis and Design of Hyperbolic Cooling Towers, German Gurfinkel and Adolf Walser, 340

Earthquakes; Loads (forces); Plasticity; Structural engineering; Buildings (codes); Computers; Design; Dynamics; Earthquake resistant structures
Earthquake Resistant Design of Unbraced Frames, James C. Anderson and Raj P. Gupta, 540

Earthquakes; Manifolds; Pumps; Valves; Water; Water tunnels; Aqueducts
Edmonston Pumping Plant: Nation's Mightiest, Robert B. Jansen, 465

Earthquakes; Monte Carlo method; Probability theory; Shear; Structural engineering; Buildings; Dynamics
Probabilistic Response of Nonlinear Buildings During Earthquakes, Alain H. Peyrot, 531

Earthquakes; Repeated loading; Shear modulus; Soils; Stress-strain curves; Vibration; Analysis; Damping; Design data
Shear Modulus and Damping in Soils: Design Equations and Curves, Bobby O. Hardin and Vincent P. Drnevich, 354

Earthquakes; Risk; Safety factors; Seismic design; Building codes; Buildings; Earthquake resistant structures
The Balanced Risk Concept: New Approach to Earthquake Building Codes, John H. Wiggins, 377

Earthquakes; Sands; Shear strain; Soil mechanics; Vibration; Cohesionless soils
Settlement of Dry Sands During Earthquakes, H. Bolton Seed and Marshall L. Silver, 264

Earthquakes; Seismic design; Structural engineering; Bridges (structures); Design criteria; Dynamic structural analysis
Seismic Design of Highway Structures, Keith D. Bull, 393

Earthquakes; Soil mechanics; Soil-structure interaction; Structural engineering; Buildings; Buildings (codes)
Earthquake Design Formula Considering Local Soil Conditions, Semih S. Tezcan, 15

Earthquakes; Soil mechanics; Venezuela; Damage; Earthquake resistant structures
Soil Conditions and Building Damage in 1967 Caracas Earthquake, H. Bolton Seed, Ricardo V. Whitman, Houshang Dezfulian, Ricardo Dobry and Izzat M. Idriss, 423

Earthquakes; Standards; Building codes; Concrete (reinforced); Criteria
Implications of the New ACI Building Code, Edward Cohen, 365

Earthquake theory; Engineering mechanics; Plasticity; Columns (supports); Dynamic characteristics; Dynamic structural analysis
Finite Earthquake-Response of Inelastic Structure, Chi-Mou Ni and Lawrence H.N. Lee, 549

Ecology; Egypt; Erosion; Irrigation; ASCE (executive secretary); Dams; Disease vectors; Drainage
People, Ecology and the Aswan High Dam, William H. Wisely, 67

Ecology; Environmental effects; Management planning; Natural resources; Planning; Sanitary engineering
Environmental Planning and Ecological Possibilities, David A. Bella and W. Scott Overton, 422

Ecology; Environmental effects; Parks; Recreational facilities; Reservoir design; Skiing
Civil Engineering for Recreation, Ernst W. Kiesling and George A. Whetstone, 182

Ecology; Environmental effects; Pollution; Population growth; Social needs
The Engineer and the Environment, C. Maxwell Stanley, 352

Ecology; Environmental engineering; Fish; Florida; Locks (waterways); Navigation; Waterways; Canals; Design
Design Versus Ecology in St. Johns and Indian Rivers, Harold A. Scott, 475

Ecology; Environmental engineering; Government; Professional activities; Professional societies; Civil engineers
Integrity and the Ecological Crisis, Myron Tribus, 227

Ecology; Environmental engineering; Institutional constraints; Planning; Sanitary engineering; Water quality
Clean Water -- An Environmental Challenge, Percy H. McGauhey, 290

Ecology; Environmental engineering; Irrigation; Conservation
Tunnel Vision or Ecological View, Virginia M. Hines, 28

Ecology; Environmental engineering; Pollution control; Professional activities; Social aspects; Social needs; Civil engineering
Ecology - Rage and Reason, Robert Moses, 474

Economic analysis; Economic factors; Highway engineering; Canada; Capacity
Economic Criterion for Highway Capacity Determination, Bruce G. Hutchinson, 377

Economic analysis; Economics; Market value; Sanitary engineering; Water; Water supply
Economics of Water Quality and Wastewater Control, Fred E. Case, 353

Economic analysis; Environmental engineering; Ground water; Impact; Sanitary engineering; Sewage disposal; Water resources; Cost effectiveness
Cost-Effectiveness Analysis of Wastewater Reuses, Stephen C. Ko and Lucien Duckstein, 552

Economic analysis; Evapotranspiration; Irrigation; Agricultural products
Water-Yield Relations for Nonforage Crops, Lloyd A. Downey, 157

Economic analysis; Flood control; Hydraulics; Hydrology; Statistical analysis; Benefit-cost ratios
Bias in Computed Flood Risk, Clayton H. Hardison and Marshall E. Jennings, 188

Economic analysis; Flood control; Hydraulics; Land use; Zoning; Computer programs
Role of Economics in Planning Flood Plain Land Use, L. Douglas James, 314

Economic analysis; Highway engineering; Highway planning; Highways; Investments; Land use; Regional planning; Transportation; Benefit cost analysis; Canada
Programming of Regional Highway Investments, Bruce G. Hutchinson, 269

Economic analysis; Housing; Construction; Construction materials; Costs
Economic Analysis of Housing Construction Methods, Shlomo Peer and Abraham Warszawski, 355

Economic analysis; Hydraulics; Mathematical models; Sewers; Urbanization; Costs; Drainage
Methods for Predicting Urban Drainage Costs, Walter J. Rawls and John W. Knapp, 486

Economic analysis; Steels; Beam columns; Cables (ropes)
Economical Design of Prestressed Plate Girder, Miloslav Tochacek and Champa L. Mehta, 298

Economic development; Irrigation; Water deprivation; Agriculture; Droughts
Water Deficits -Irrigation Design and Programming, Robert M. Hagan and J. Ian Stewart, 318

Economic factors; Highway engineering; Canada; Capacity; Economic analysis
Economic Criterion for Highway Capacity Determination, Bruce G. Hutchinson, 377

Economic factors; Salaries; Unionization; ASCE (committees); ASCE (professional activities)
National ASCE Drafts Proposed Salary Guidelines9

Economic feasibility; Environmental engineering; Resources; Sanitary landfill; Solid wastes; Waste disposal
How Urgent the Need to Recycle Solid Waste, Robert D. Bargman, 434

Economics; Education; Engineering education; Ethics; Planning; Civil engineering; Civil engineers
The Education of an Engineer (A Continuing Story), James E. Crews and Charles C. McCloskey, III, 544

Economics; Employment; Engineering education; ASCE (Civil Engineering); ASCE (Education)
A Professor Talks About Civil Engineering Education385

Economics; Environmental engineering; Hydroelectric power generation; Models; Powerplants; Pumped storage; Turbines; Conservation; Costs; Dams (concrete); Dams (gravity)
Wallace Dam, Major H. Thompson, Jr., 550

Economics; Erosion; Hydraulics; Land use; Research; Sedimentation; Sediment control; Urban development; Urban planning
Urban Sedimentation in Perspective, Harold P. Guy and D. Earl Jones, Jr., 574

Economics; Experience; Apprenticeship; Construction; Costs; Delay time
Learning and Experience Curves, Marvin Gates and Amerigo Scarpa, 232

Economics; Floors; Height; Tall buildings; Building materials; Cost analysis; Dimensions
The Economics of High-Rise Apartment Buildings of Alternate Design Configuration, Richard D. Steyert, 387

Economics; Highway engineering; Parking facilities; Toll roads; Traffic; Transportation; Urban planning
Urban Road Pricing Through Selective Parking Taxes, Robert E. Burns, 440

Economics; Highways; Roads; Statistical analysis; Transportation; Costs
Local Rural Road Costs and Economies of Scale, William D. Berg, 478

Economics; Hydraulics; Sanitary engineering; Sewers; Systems engineering; Utilities; Costs
Optimal Design of Urban Wastewater Collection Networks, Jarir S. Dajani, Robert S. Gemmell and Edward K. Morlok, 534

Economics; Legislation; Philippine Islands; Sanitary engineering; Sewage treatment; Earthquake resistant structures
Master Sewerage System for Metropolitan Manila, John O. Schmidt, 187

Economics; Market value; Sanitary engineering; Water; Water supply; Economic analysis
Economics of Water Quality and Wastewater Control, Fred E. Case, 353

Economics; Refuse disposal; Sanitary engineering; Solid wastes; Computers; Costs; Data systems
Basic Data for Solid Waste: A Pilot Study, Robert M. Clark, John M. Sweeten and Daniel G. Greathouse, 540

Economics; Refuse disposal; Sanitary engineering; Solid wastes; Systems engineering
Fleet Selection for Solid Waste Collection Systems, Robert M. Clark and Billy P. Helms, 216

Eddies; Engineering mechanics; Inviscid flow; Shear flow; Velocity; Axisymmetric flow; Computers
Inviscid Shear Flow with Corner Eddies, P.A. Aswatha Narayana and M.V. Krishna Murthy, 81

Education; Engineering education; Engineers; Highway engineering
Practitioners Teach Students Art of Highway Engineering, David A. Novick, Howard S. Newman and Eben Vey, 16

Education; Engineering education; Engineers; Professional activities; Professional advancement; Professional engineering; Schools; Civil engineers
Civil Engineering Education in the Future, Richard Tucker, 191

Education; Engineering education; Ethics; Planning; Civil engineering; Civil engineers; Economics
The Education of an Engineer (A Continuing Story), James E. Crews and Charles C. McCloskey, III, 544

Education; Engineering education; Labor relations; Management; Salaries; Schools; Unionization; Civil engineers; Collective bargaining
Collective Bargaining on the Campus, B. Austin Barry, 563

Education; Engineering education; Missouri; U.S. Corps of Engineers; Civil engineers
Corps of Engineers Promotes Continuing Education, Melford E. Monsees, 39

Education; Engineering education; Professional activities; Public relations; Universities
The Continuing Challenge of Engineering Education, Arthur G. Hansen, 395

Education; Moment distribution; Structural engineering; Arches; Design
Hardy Cross and the Rise of Numerical Methods, James Michalos, 153

Education; Professional activities; Professional advancement; ASCE (younger members); Civil engineers
Professional Development for Consulting Engineers, Gerald L. Baker, 166

Eductors; Ejectors; Failure; Hydraulic jump; Hydraulics; Slabs; Uplift pressure; Chute spillways; Dams (earth)
Damage to Karnafuli Dam Spillway, Mohammad A. Rahman, 596

Effectiveness; Energy; Harbors; Velocity; Vessels; Concrete (lightweight); Concrete (prestressed); Design criteria
Ultimate Energy Design of Prestressed Concrete Fender Piling, Shu-t'ien Li and Venkataswamy Ramakrishnan, 81

Efficiency; Films; Photography; Productivity; Time and motion studies; Construction
Analysis of Time-Lapse Construction Films, Howard B. Sprinkle, 502

Effluents; Field tests; Hydraulics; Models; Simulation; Tidal currents; Tracers; Turbulence; Diffusion
Tracer Tests of Eddy Diffusion in Field and Model, Maurice J. Crickmore, 509

Egypt; Erosion; Irrigation; ASCE (executive secretary); Dams; Disease vectors; Drainage; Ecology
People, Ecology and the Aswan High Dam, William H. Wisely, 67

Egypt; Hydraulics; River beds; Armoring (streambed); Bed roughness; Degradation
River Bed Degradation After Closure of Dams, Hammad Y. Hammad, 220

Eigenvalues; Eigenvectors; Engineering mechanics; Mode (statistics); Statistical analysis; Statistical dispersion; Structural engineering
Modal Analysis of Random Structural Systems, Timothy K. Hasselman and Gary C. Hart, 273

Eigenvalues; Elastic shells; Engineering mechanics; Airy function; Boundary value problems
End Effects in Truncated Semi-Infinite Wedge, Robert Wm. Little and Tommie R. Thompson, 484

Eigenvalues; Energy methods; Engineering mechanics; Equilibrium methods; Lagrangian functions; Stability; Boundary conditions; Buckling; Composite materials; Deformation
Stability of Orthotropic Stiffened Composite Plates, Kao Ding Chiu, 508

Eigenvalues; Energy methods; Engineering mechanics; Optimization; Stability; Buckling
Simultaneous Buckling in Symmetric Structural Systems, Kenneth C. Johns, 369

Eigenvectors; Engineering mechanics; Mode (statistics); Statistical analysis; Statistical dispersion; Structural engineering; Eigenvalues
Modal Analysis of Random Structural Systems, Timothy K. Hasselman and Gary C. Hart, 273

Ejectors; Failure; Hydraulic jump; Hydraulics; Slabs; Uplift pressure; Chute spillways; Dams (earth); Eductors
Damage to Karnafuli Dam Spillway, Mohammad A. Rahman, 596

Elastic analysis; Engineering mechanics; Grillage footings; Minimum weight design; Optimum design; Plastic design
Rectangular Grillages of Least Weight, George I.N. Rozvany and Sai R. Adidam, 538

Elastic foundations; Engineering mechanics; Frequencies; Mathematical models; Vibration; Dynamics
Vibrations of Elastically Connected Ring Systems, Vincent X. Kunukkasseril and K. Rami Reddy, 350

Elastic foundations; Engineering mechanics; Plates; Stresses; Deflection
Stresses in Circular Plates on Elastic Foundations, Richard Bolton, 297

Elastic foundations; Foundations; Highway engineering; Pavements; Rigid pavements; Transportation
Advanced Analysis of Rigid Pavements, Sue K. Wang, Michel Sargious and Yau Kai Cheung, 36

Elasticity (mechanical); Engineering mechanics; Foundations; Plates
Viscoelastic Plate on Poroelastic Foundation, Eugene L. Marvin, 395

Elastic-plastic analysis; Expansion; Soil mechanics; Cavities
Expansion of Cavities in Infinite Soil Mass, Aleksandar Sedmak Vesic, 217

Elastic-plastic analysis; Finite element method; Initial stress; Structural engineering; Concrete (reinforced)
Nonlinear Stress Analysis of Reinforced Concrete, Somasundaram Valliappan and T. F. Doolan, 218

Elastic-plastic analysis; Finite element method; Structural engineering; Computer programs; Continuum mechanics
Finite Element Thermoelastoplastic Analysis, Norman A. Cyr, Roger D. Teter and Brian B. Stocks, 372

Elastic-plastic analysis; Imperfections; Structural engineering; Axial compression; Buckling
Post-Buckling of Axially Compressed Plates, Archibald N. Sherbourne and Robert M. Korol, 477

Elastic properties; Energy; Engineering mechanics; Equilibrium methods; Shells (structural forms); Displacement
Thick Shell and Oriented Surface Theories, Frank G. Bercha and Peter G. Glockner, 355

Elastic properties; Engineering mechanics; Finite elements; Matrices (mathematics); Plates (structural members); Shells (structural forms)
Generalization of Plate Finite Elements to Shells, Robert G. Vos, 223

Elastic properties; Engineering mechanics; Matrices (mathematics); Sandwich laminates; Transfer functions; Composite structures
Transfer Matrix Approach to Layered Systems, Leon Y. Bahar, 479

Elastic properties; Engineering mechanics; Numerical analysis; Plasticity; Shells (structural forms); Concrete (reinforced); Cylindrical shells
Elastic-Plastic Analysis of Cylindrical Shells, Nabil A. Shoeb and William C. Schnobrich, 96

Elastic properties; Engineering mechanics; Plastic properties; Shells (structural forms); Spherical shells; Buckling
Symmetric Buckling of Inelastic Spherical Shells, Robert K. Emerton and Nicholas F. Morris, 586

Elastic properties; Engineering mechanics; Probability theory; Stability; Statistical analysis; Structural engineering; Buckling; Columns (supports); Deflection
Nonstationary Random Column Buckling Problem, Raymond G. Jacquot, 501

Elastic properties; Engineering mechanics; Shear modulus; Shear stress; Composite materials
Torsion of Multilayered Rectangular Section, John R. Booker and Sritawat Kitipornchai, 3

Elastic properties; Engineering mechanics; Vibration; Cylinders; Differential equations
Three-Dimensional Vibrations of Orthotropic Cylinders, Fang-Hui Chou and Jan D. Achenbach, 362

Elastic properties; Equations of motion; Excitation; Discrete distribution functions; Dynamic stability
Stability and Boundedness Via Liapunov's Direct Method, Siegfried M. Holzer, 520

Elastic properties; Fasteners; Joints (junctions); Nails; Slip joints; Structural engineering; Wood; Wooden structures
Analysis of Nailed Joints with Dissimilar Members, Thomas Lee Wilkinson, 437

Elastic properties; Finite element method; Mechanics; Structural engineering; Anisotropy
Finite Element Method for Wood Mechanics, Adam Al-Dabbagh, James R. Goodman and Jozsef Bodig, 174

Elastic properties; Finite elements; Stresses; Structural engineering; Deformation
Finite Element Approach to Plane Microelasticity, Mohammed H. Baluch, John E. Goldberg and Severino L. Koh, 461

Elastic properties; Foundations; Frames; Soil mechanics; Soil-structure interaction; Structural engineering
Structure-Foundation Interaction Analyses, Ian K. Lee and Peter T. Brown, 554

Elastic properties; Materials; Pavements; Soil mechanics; Strains; Stresses; Subgrades; Transportation; Dynamic loads
Dynamic Response of Model Pavement Structure, Stephen F. Brown and David I. Bush, 541

Elastic properties; Plates (structural members); Structural engineering; Computation; Concrete structures
Column-Plate Interaction in Flat Slab Structures, Dieter D. Pfaffinger, 134

Elastic shells; Engineering mechanics; Airy function; Boundary value problems; Eigenvalues
End Effects in Truncated Semi-Infinite Wedge, Robert Wm. Little and Tommie R. Thompson, 484

Elastic shells; Engineering mechanics; Shells (structural forms); Stress distribution; Stress strain diagrams
Invariant Multicouple Theory of Shells, Gerald A. Wempner, 577

Elastic theory; Reinforcement; Soil mechanics; Stratification; Anisotropy; Earth materials
Elastic Theory Applied to Reinforced Earth, W. Jill Harrison and Charles M. Gerrard, 575

Elastomers; Reinforcement (structures); Rubber; Bearing pads; Bridges (piers)
Elastomeric Bridge Bearings, Charles E. Rejcha, 233

Elasto-plastic; Frames; Plane structures; Plastic analysis; Strength; Structural engineering; Deformation
Deformation Analysis of Elastic - Plastic Frames, Donald E. Grierson, 499

Electrical design; Heating; Ventilation; Air conditioning; Computer programs
Computers: Key to Integrated Building Design, Kenneth F. Reinschmidt, 158

Electric drives; Pallets; Suspension; Transportation; Vehicles; Automation
Pallet Systems for Integrating Urban Transportation, David Gordon Wilson, 212

Electric networks; Estuaries; Hydroelectric power; Powerplants; Tidal power plants; Dams
Pumped Storage and Tidal Power in Energy Systems, Charles K. Haswell, Stephen W. Huntington, Thomas L. Shaw, Geoffrey R. Thorpe and Ian J. Westwood, 603

Electric power generation; Environmental engineering; Environments; Power supplies; Site selection
Logical Approaches to Power Supply and Environment, Riley D. Woodson, 525

Electric power generation; Hyperbolic parabolic shells; Pollution abatement; Shell structures; Water vapor; Cooling towers
Wet-Type Hyperbolic Cooling Towers, Paul Rogers, 262

Electric power generation; Nuclear electric power generation; Regional planning; Water; Water supply; Desalting
Dual-Purpose Desalting in Pacific Southwest, Sam Shiozawa, 140

Electric power generation; Power; Thermal pollution; Water conservation; Air cooling; Cooling systems; Cooling towers
Dry-Type Cooling Towers, Edward A. Cecil, Paul R. Cunningham, Clarence J. Steiert and Roger O. Young, 92

Electronic equipment; Guidance; Highways; Traffic signals; Transportation; Display devices
Benefit Measurements of Highway Electronic Route Guidance, Salvatore J. Bellomo and George K. Young, Jr., 90

Electronics; Passenger transportation; Systems engineering; Transportation; Airports; Air transportation
Satellite Transit at Seattle-Tacoma Airport, Ralph Mason, 566

Elevated railroads; Mass transportation; Tires; Tramways; Urban transportation; Automatic control
Transit System Employs Three Modes, Robert F. Seedlock, 226

Elevated railroads; Rapid transit railways; Regional planning; Right-of-way; Right of way acquisition; Street railroads; Subways; Transportation; Construction costs
Expressway Rapid Transit, George Krambles, 590

Elevation; Granular materials; Mapping; Pressure; Surveying; Tidal effects; Tides
Elevation Changes Due to Tides, Long Beach, Calif., Dale S. Kunitomi, 445

Embankments; Excavation; Foundations; Grouting; Soil mechanics; Blasting; Dams
Foundation Treatment for Embankment Dams on Rock, Elmer W. Stroppini, Donald H. Babbitt and Henry E. Struckmeyer, 493

Embankments; Field density; Fly ash; Power; Shear strength; Bearing values; Compaction tests; Consolidation
Fly Ash as Structural Fill, Anthony M. DiGioia and William L. Nuzzo, 175

Embankments; Fills; Settlement (structural); Airports; Air transportation; Drainage
KCI Airport Planned for Jet Age, Edwin Joe Runyan, 480

Embankments; Finite element method; Instrumentation; Soil mechanics; Cracking (fracturing); Dams; Dams (earth)
Stresses and Movements in Oroville Dam, Fred H. Kulhawy and James M. Duncan, 363

Embankments; Foundations; Geology; Dams; Dams (earth)
Treatment of High Embankment Dam Foundations, Fred C. Walker and R. W. Bock, 491

Embankments; Foundations; Offshore structures; Soil mechanics
Embankment Construction On Yielding Sea Bottom, Aris C. Stamatopoulos and Panaghiotis C. Kotzias, 391

Embankments; Highways; Permafrost; Alaska
Alaska Builds Highway Over Muskeg and Permafrost, John C. Becker, 349

Embankments; Hydroelectric power generation; Irrigation; Pakistan; Power; Cofferdams; Construction; Dams (buttress); Dams (earth)
Tarbela Dam Project, Pakistan, Wilson V. Binger, 594

Embankments; Pumped storage; Reservoirs; Sealers; Tests; Asphalts; Bituminous concretes; Concrete; Dams; Dikes
Bituminous Blanket for Dike, F. P. Robertson and Johannes Lehnert, 537

Embedding; Foundations; Half Space; Sliding; Values; Vibration
Coupled Sliding and Rocking of Embedded Foundations, Raymond J. Krizek, Dinesh C. Gupta and Richard A. Parmelee, 582

Employee relations; Employment; Professional activities; ASCE (Employment Conditions); ASCE (Professional Activities)
Guideline: Employer--Engineer Relationship, Committee on Employment Conditions of the Professional Practice Division, Charles J. Stevens, Chmn., 583

Employee relations; Management planning; Management systems; Production capacity; Productivity; Professional practice
Boosting Construction-Worker Productivity, Charles R. Schrader, 458

Employee relations; Productivity; Professional practice; Safety; Safety devices; Safety engineering
What a Good Safety Program Means, C. H. Shaw, Jr., 447

Employment; Engineering education; ASCE (Civil Engineering); ASCE (Education); Economics
A Professor Talks About Civil Engineering Education385

Employment; Engineering education; Minority groups; Professional activities; Professional advancement; Urban planning
Minority Programs for ASCE, Sol E. Cooper, Austin B. Milhollin and Benito A. Sinclair, 485

Employment; Professional activities; ASCE (Employment Conditions); ASCE (Professional Activities); Employee relations
Guideline: Employer--Engineer Relationship, Committee on Employment Conditions of the Professional Practice Division, Charles J. Stevens, Chmn., 583

Employment; Professional activities; Professional practice; Registration; ASCE (members); ASCE (membership); Civil engineers
A Profile of ASCE Membership, George K. Wadlin, Jr., 312

Employment; Professional societies; Registration; ASCE (membership)
Profile of ASCE Membership, George K. Wadlin, Jr., 5

Employment opportunities; Passenger transportation; Social needs; Transportation; Urban transportation; Chicago
Public Transit and Job Access in Chicago, Martin Wachs and Joseph L. Schofer, 170

Energy; Engineering mechanics; Equilibrium methods; Shells (structural forms); Displacement; Elastic properties
Thick Shell and Oriented Surface Theories, Frank G. Bercha and Peter G. Glockner, 355

Energy; Harbors; Velocity; Vessels; Concrete (lightweight); Concrete (prestressed); Design criteria; Effectiveness
Ultimate Energy Design of Prestressed Concrete Fender Piling, Shu-t'ien Li and Venkataswamy Ramakrishnan, 81

Energy; Hydraulic jump; Hydraulics; Loads (forces); Baffles; Blocks
Drag Forces on Baffle Blocks in Hydraulic Jump, David R. Basco and John R. Adams, 72

Energy dissipation; Hydraulic jets; Hydraulic jump
Hydraulic Jump Assisted by Cross-Jet, Teh-Yuh Kao, 78

Energy dissipators; Hydraulic jump; Hydraulics; Stilling basins; Turbulence; Boundary shear
Boundary Layer Effects on Hydraulic Jump Location, Edward H. Wilson and Andrew A. Turner, 341

Energy dissipators; Hydraulics; Jets; Orifices; Valves; Cavitation
Cavitation in High-Head Conduit Control Dissipators, John F. Ripken and Norio Hayakawa, 151

Energy methods; Engineering mechanics; Equilibrium methods; Lagrangian functions; Stability; Boundary conditions; Buckling; Composite materials; Deformation; Eigenvalues
Stability of Orthotropic Stiffened Composite Plates, Kao Ding Chiu, 508

Energy methods; Engineering mechanics; Optimization; Stability; Buckling; Eigenvalues
Simultaneous Buckling in Symmetric Structural Systems, Kenneth C. Johns, 369

Engineering; Frames; Matrices (mathematics); Mechanics; Structural engineering; Vibration; Computation; Dynamics
Convergence in Modal Synthesis, Stephen E. Johnson and Walter C. Hurty, 527

Engineering; Management; Planning; Projects; Surveying; Surveys; Civil engineering
Project Planning, John M. Shields, 202

Engineering; Planning; Projects; Social needs; Civil engineering; Design
Ethical and Social Responsibility in the Planning and Design of Engineering Projects, David Mann, 107

Engineering; Professional activities; Professional engineering; Social needs; Civil engineering
Considering Social Value in Engineering Projects, Charles G. Sudduth, 96

Engineering education; ASCE (Civil Engineering); ASCE (Education); Economics; Employment
A Professor Talks About Civil Engineering Education385

Engineering education; Engineering schools; Professional activities
The Nature of Continuing Education, Alfred C. Ingersoll, 144

Engineering education; Engineers; Foreign engineering; Great Britain; Management; Metric system; Planning; Standards; Training; Construction industry
Metrication Progress in the United Kingdom, Gordon Bowen, 523

Engineering education; Engineers; Highway engineering; Education
Practitioners Teach Students Art of Highway Engineering, David A. Novick, Howard S. Newman and Eben Vey, 16

Engineering education; Engineers; Personnel; Technicians
The Engineering Technician: An Underutilized Resource, Ronald P. Shumate, 98

Engineering education; Engineers; Professional activities; Professional advancement; Professional engineering; Schools; Civil engineers; Education
Civil Engineering Education in the Future, Richard Tucker, 191

Engineering education; Engineers; Professional activities; Professional engineering; Professional practice
Professional Education: The Need for Creativity, Charles R. Schrader, 80

Engineering education; Environmental engineering; Ethics; Nuclear electric power generation; Professional activities; Professional engineering
Engineering For People, Richard R. Harbert, 441

Engineering education; Esthetics; Massachusetts; Professional activities; Professional practice
Aesthetics -- Part of Civil Engineering, Frederick M. Law, 324

Engineering education; Ethics; Planning; Civil engineering; Civil engineers; Economics; Education
The Education of an Engineer (A Continuing Story), James E. Crews and Charles C. McCloskey, III, 544

Engineering education; Fluid mechanics; Hydraulics
Fluid Mechanics Teaching and Research: A View from a Dean's Office, Hunter Rouse, 287

Engineering education; Foundations; Pile driving; Pile foundations; Settlement (structural); Soil mechanics; Terzaghi lecture; Dams (earth)
The Integrated Civil Engineering Project, T. William Lambe, 337

Engineering education; Geodetic surveys; Mapping; Reports; Surveys; Awards; Civil engineers
Status Report of Surveying and Mapping Division, William A. White, 121

Engineering education; Health; Systems engineering; Bioengineering; Buildings (hospitals); Civil engineering
Civil Engineering and National Goals in Bioengineering, George Bugliarello, 591

Engineering education; History; Planning; Urban planning; Bibliographies
City Planning Bibliography, George C. Bestor and Holway R. Jones, 266

Engineering education; Labor relations; Management; Salaries; Schools; Unionization; Civil engineers; Collective bargaining; Education
Collective Bargaining on the Campus, B. Austin Barry, 563

Engineering education; Land surveys; Canada; Control surveys
How Land Surveying Is Being Modernized, Robert T. Howe, 287

Engineering education; Management; Construction; Construction industry; Construction management
Formal Education in Construction Management, Abraham Warszawski, 332

Engineering education; Minority groups; Professional activities; Professional advancement; Urban planning; Employment
Minority Programs for ASCE, Sol E. Cooper, Austin B. Milhollin and Benito A. Sinclair, 485

Engineering education; Missouri; U.S. Corps of Engineers; Civil engineers; Education
Corps of Engineers Promotes Continuing Education, Melford E. Monsees, 39

Engineering education; Professional activities; Public relations; Universities; Education
The Continuing Challenge of Engineering Education, Arthur G. Hansen, 395

Engineering education; Professional development; Universities; ASCE (education); Careers
University of Wisconsin Offers Professional Development Degree, John P. Klus and C. Allen Wortley, 20

Engineering education; Social needs; Civil engineering; Civil engineers
The Engineer's Role, Frederick J. Clarke, 264

Engineering education; Systems analysis; Systems engineering; Civil engineering
Systems Approach and the Civil Engineer, Kenneth W. Heathington and R. Brian Bonton, 10

Engineering geology; Landslides; Pennsylvania; Rock mechanics; Shear strength; Slope stability; Soil mechanics
Failure of Colluvial Slope, James V. Hamel and Norman K. Flint, 189

Engineering mechanics; Airy function; Boundary value problems; Eigenvalues; Elastic shells
End Effects in Truncated Semi-Infinite Wedge, Robert Wm. Little and Tommie R. Thompson, 484

Engineering mechanics; Blast loads; Deformation; Dynamic structural analysis
Displacement Bounds for Blast Loaded Structures, Walter J. Morales, 410

Engineering mechanics; Environmental tests; Excitation; Linear responses; Random processes; Vibration; Dynamic response; Dynamic structural analysis
Linear Response to Nonstationary Random Excitation, Timothy K. Hasselman, 278

Engineering mechanics; Epoxy resins; Loads (forces); Orthotropic plate; Plates (structural members); Stresses; Deflection; Design
Large Deflection of Rectangular Orthotropic Plates, Chuen-Yuan Chia, 514

Engineering mechanics; Equations; Frames; Plasticity; Quadratic equations; Stresses; Computer programming
Elastic-Plastic Analysis by Quadratic Programming, Antone F. Sayegh and Moshe F. Rubinstein, 564

Engineering mechanics; Equilibrium; Fourier series; Rings; Static structural analysis; Deflection; Displacement
Linear Theory of Thin Rings, Harry E. Williams, 436

Engineering mechanics; Equilibrium methods; Lagrangian functions; Stability; Boundary conditions; Buckling; Composite materials; Deformation; Eigenvalues; Energy methods
Stability of Orthotropic Stiffened Composite Plates, Kao Ding Chiu, 508

Engineering mechanics; Equilibrium methods; Shells (structural forms); Displacement; Elastic properties; Energy
Thick Shell and Oriented Surface Theories, Frank G. Bercha and Peter G. Glockner, 355

Engineering mechanics; Failure; Fiber composites; Plasticity; Composite materials
Yielding of Fiber Reinforced Tresca Material, John D. Helfinstine and Richard H. Lance, 389

Engineering mechanics; Failure; Fibers; Limit design method; Reinforcement; Structural engineering; Composite structures
Limit Analysis of Ductile Fiber-Reinforced Structures, Richard H. Lance and David N. Robinson, 130

Engineering mechanics; Failure; Structural analysis; Design; Earthquake resistant structures; Earthquakes
Expected Fatigue Damage of Seismic Structures, Jhy-Pyng Tang and James T.P. Yao, 317

Engineering mechanics; Field tests; Materials tests; Statistical analysis; Tests; Time dependence; Vibration; Viscoelasticity; Data systems; Dynamics
Statistical Theory for Viscoelastic Materials, Joseph Soussou and Fred Moavenzadeh, 532

Engineering mechanics; Filters; Fourier transformation; Mathematics; Systems engineering; Vibration; Computers; Dynamics; Earthquakes
Dynamic Analysis by Extra Fast Fourier Transform, Jethro W. Meek and Anestis S. Veletsos, 218

Engineering mechanics; Filters; Frequency; Seismic design; Damping; Design
Spectrum-Compatible Motions for Design Purposes, Nien-Chien Tsai, 184

Engineering mechanics; Finite differences; Mathematics; Numerical integration; Structural engineering; Computation; Dynamics; Dynamic structural analysis
Temporal Operators for Nonlinear Structural Dynamics Problems, George Weeks, 495

Engineering mechanics; Finite differences; Shells (structural forms); Spherical shells; Stability; Buckling
Asymmetrical Buckling of Imperfect Spherical Shells, George N. Freskakis and Nicholas F. Morris, 471

Engineering mechanics; Finite element method; Mathematical models; Probability theory; Concrete; Concrete properties
Probabilistic Modeling of Concrete Structures, Masanobu Shinozuka, 598

Engineering mechanics; Finite elements; Hyperbolic parabolic shells; Pressure; Shells (structural forms); Vibration; Cooling towers
Vibrations of Pressure Loaded Hyperboloidal Shells, Mehran Lashkari, Victor I. Weingarten and David S. Margolias, 431

Engineering mechanics; Finite elements; Matrices (mathematics); Plates (structural members); Shells (structural forms); Elastic properties
Generalization of Plate Finite Elements to Shells, Robert G. Vos, 223

Engineering mechanics; Finite elements; Natural frequency; Plates; Sandwich laminates; Vibration
Triangular Element for Multilayer Sandwich Plates, Tara P. Khatua and Yau Kai Cheung, 443

Engineering mechanics; Finite elements; Nonlinear systems; Cables (ropes); Dynamics
Nonlinear Dynamics of Cables with Low Initial Tension, John W. Leonard, 170

Engineering mechanics; Finite elements; Plates; Shear; Bending; Deformation
Some Elements for Analysis of Plate Bending, Robert D. Cook, 590

Engineering mechanics; Finite elements; Plates (structural members); Sandwich panels; Boundary conditions
Finite Element Method for Elastic Plastic Plates, Ted Belytschko and Milan Velebit, 103

Engineering mechanics; Finite elements; Porous media flow; Wave propagation; Dynamics
Variational Formulation of Dynamics of Fluid-Saturated Porous Elastic Solids, Jamshid Ghaboussi and Edward L. Wilson, 425

Engineering mechanics; Flow resistance; Fluid flow; Shear stress; Turbulence; Axial flow; Boundary layer
Helical Flow Through Concentric Annulus, M. H. Abdul Khader and H. Suresh Rao, 231

Engineering mechanics; Fluid flow; Hydrodynamics; Seepage; Dams
Inverse Solution to Three-Dimensional Flows, Roland W. Jeppson, 374

Engineering mechanics; Fluid flow; Transmission lines; Turbulence; Vibration; Wind (meteorology); Aerodynamics
Galloping Oscillations of Prismatic Structures, Milos Novak, 50

Engineering mechanics; Fluid mechanics; Friction; Hydraulics; Inlets (waterways); Jets; Meteorology; Momentum; Tornadoes; Vortices; Air entrainment; Drains; Dust storms
Experiments on Unstable Vortices, Enzo Levi, 249

Engineering mechanics; Folded plates; Models; Shells (structural forms)
Experiments with Elastic Folded Plate Models, Stuart E. Swartz and Vernon H. Rosenbraugh, 325

Engineering mechanics; Footings; Foundations; Shielding; Vibration; Dynamics
Shear Waves in Plane Infinite Structures, John Lysmer and Gunter Waas, 89

Engineering mechanics; Forced vibration; Grid systems; Moments; Vibration; Deflection; Dynamics
Dynamic Field Analysis of Torsionless Grids, Hota V.S. GangaRao and J. C. Smith, 330

Engineering mechanics; Forced vibration; Harmonics; Nonlinear systems; Vibration
Transverse Beam Vibration Nonlinear Constraint, Mohammed Ali Dokainish and Rajnish Kumar, 556

Engineering mechanics; Forecasting; Bridges (concrete); Bridges (piers); Earthquakes
Seismic Response Predictions of Bridge Pier, Robin Shepherd and Richard E. McConnel, 256

Engineering mechanics; Foundations; Plates; Elasticity (mechanical)
Viscoelastic Plate on Poroelastic Foundation, Eugene L. Marvin, 395

Engineering mechanics; Fractures (materials); Concrete; Deformation
Griffith Fracture Criterion and Concrete, Surendra P. Shah and Fred J. McGarry, 45

Engineering mechanics; Frequencies; Mathematical models; Vibration; Dynamics; Elastic foundations
Vibrations of Elastically Connected Ring Systems, Vincent X. Kunukkasseril and K. Rami Reddy, 350

Engineering mechanics; Gates; Sluice gates; Water flow; Coefficients
Solution of Flow Under Sluice Gate, Yong K. Chung, 152

Engineering mechanics; Grillage footings; Minimum weight design; Optimum design; Plastic design; Elastic analysis
Rectangular Grillages of Least Weight, George I.N. Rozvany and Sai R. Adidam, 538

Engineering mechanics; Hydrodynamics; Railroads; Railroad trains; Simulation
High-Speed Train Simulation Using Hydrodynamics, Robert A. Helfinstine and Charles Dalton, 162

Engineering mechanics; Impulses; Loading; Boundary value problems
Bounds for Impulsively Loaded Plastic Structures, John B. Martin and Alan R.S. Ronter, 156

Engineering mechanics; Injection wells; Mathematical studies; Recharge wells; Waste water; Dispersion
Dispersion from Recharge Well, Charles W. Lenau, 197

Engineering mechanics; Integral transformations; Punches; Stresses
Boussinesq Problems for Nonhomogeneous Solid, Mumtaz K. Kassir, 236

Engineering mechanics; Inviscid flow; Shear flow; Velocity; Axisymmetric flow; Computers; Eddies
Inviscid Shear Flow with Corner Eddies, P.A. Aswatha Narayana and M.V. Krishna Murthy, 81

Engineering mechanics; Limit design method; Plastic analysis; Plasticity; Plates (structural members); Yield
Plastic Analysis of Anisotropic Disks and Plates, Archibald N. Sherbourne and Sridhara D.N. Murthy, 59

Engineering mechanics; Mathematical models; Probability theory; Statics; Beams (supports); Deflection
Statics of Random Beams, Devendra K. Shukla and Robert M. Stark, 600

Engineering mechanics; Mathematical models; Stability; Vibration; Beam columns; Buckling; Dynamics
Beams Subjected to a Follower Force Within the Span, Jack C. Wiley and Richard E. Furkert, 569

Engineering mechanics; Matrices (mathematics); Computation; Computers; Dynamics
Large Eigenvalue Problems in Dynamic Analysis, Klaus-Jurgen Bathe and Edward L. Wilson, 560

Engineering mechanics; Matrices (mathematics); Revisions; Stiffness matrix; Structural design; Structural members; Algorithms
Reanalysis for Limited Structural Design Modifications, Uri Kirsch and Moshe F. Rubinstein, 75

Engineering mechanics; Matrices (mathematics); Sandwich laminates; Transfer functions; Composite structures; Elastic properties
Transfer Matrix Approach to Layered Systems, Leon Y. Bahar, 479

Engineering mechanics; Measuring instruments; Porous materials; Turbulence; Turbulent flow; Boundary shear
Turbulent Shear Flow in Porous Boundary, James F. Ruff and Lynn W. Gelhar, 404

Engineering mechanics; Metals; Necking; Nonlinear differential equations; Columns (supports); Deformation
Nonlinear Analysis of Instability in Tension, Sam Tang, 21

Engineering mechanics; Minimum weight design; Optimum design; Plastic analysis; Cyclic loads
Unified Approach to the Theory of Plastic Structures, M. A. Cohn, S. K. Ghosh and S. R. Parimi, 466

Engineering mechanics; Mode (statistics); Statistical analysis; Statistical dispersion; Structural engineering; Eigenvalues; Eigenvectors
Modal Analysis of Random Structural Systems, Timothy K. Hasselman and Gary C. Hart, 273

Engineering mechanics; Nonlinear programming; Optimization; Stresses; Tall buildings; Computer programming; Computers; Design; Dynamic response; Dynamics; Earthquakes
Optimum Earthquake Design of Shear Buildings, Ben Kato, Yuji Nakamura and Hidetake Anraku, 343

Engineering mechanics; Numerical analysis; Plasticity; Shells (structural forms); Concrete (reinforced); Cylindrical shells; Elastic properties
Elastic-Plastic Analysis of Cylindrical Shells, Nabil A. Shoeb and William C. Schnobrich, 96

Engineering mechanics; Numerical analysis; Rings; Structural engineering; Vibration; Arches; Dynamics
Free In-Plane Vibration of Circular Arches, Anestis S. Veletsos, Walter J. Austin, Carlos A. Lopes Pereia and Shyr-Jen Wung, 176

Engineering mechanics; Numerical analysis; Seepage; Computation; Computer programming; Computers
Summary Representation Applied to Seepage Problems, Antonio Santos-Moreno, Raymond J. Krizek and Gabor M. Karadi, 144

Engineering mechanics; Optimization; Stability; Buckling; Eigenvalues; Energy methods
Simultaneous Buckling in Symmetric Structural Systems, Kenneth C. Johns, 369

Engineering mechanics; Orthotropic plate; Boundary value problems; Comparison
Frequency Analysis of Tapered Orthotropic Plates, Jayaraman Ramachandran, 68

Engineering mechanics; Orthotropic plate; Stiffness; Buckling; Composite structures
Shear-Flexible Orthotropic Plates Loaded in Plane, Charles W. Bert and Shyming Chang, 602

Engineering mechanics; Plasticity; Blast loads; Dynamic loads; Dynamics
Dynamic Response of Nonlinear Media at Large Strains, Joseph H. Heifitz and Carl J. Costantino, 603

Engineering mechanics; Plasticity; Columns (supports); Dynamic characteristics; Dynamic structural analysis; Earthquake theory
Finite Earthquake-Response of Inelastic Structure, Chi-Mou Ni and Lawrence H.N. Lee, 549

Engineering mechanics; Plastic properties; Shells (structural forms); Spherical shells; Buckling; Elastic properties
Symmetric Buckling of Inelastic Spherical Shells, Robert K. Emerton and Nicholas F. Morris, 586

Engineering mechanics; Plates; Stresses; Deflection; Elastic foundations
Stresses in Circular Plates on Elastic Foundations, Richard Bolton, 297

Engineering mechanics; Point set topology; Polygons; Bars
Torsion of Bars of Regular Polygonal Cross Section, Enrique Romanelli, Mario J. Maurizi and Patricio A. Laura, 191

Engineering mechanics; Power spectra; Shock; Vibration; Earthquakes
An Approach to Time-Varying Spectral Analysis, Shih-Chi Liu, 126

Engineering mechanics; Pressure gradients; Turbulence; Wind pressure; Boundary layer; Buildings
Turbulence Effect on Wall Pressure Fluctuations, Willy Z. Sadeh and Jack E. Cermak, 579

Engineering mechanics; Probability theory; Safety factors; Dynamic loads
Filtered Poisson Process for Random Vibration Problems, Ronald L. Racicot and Fred Moses, 110

Engineering mechanics; Probability theory; Spectral energy distribution; Vibration; Dynamics
Properties of Spectral Moments with Applications to Random, Erik H. Vanmarcke, 211

Engineering mechanics; Probability theory; Stability; Statistical analysis; Structural engineering; Buckling; Columns (supports); Deflection; Elastic properties
Nonstationary Random Column Buckling Problem, Raymond G. Jacquot, 501

Engineering mechanics; Probability theory; Statistical analysis; Structural engineering; Design; Earthquakes
Reliability Optimization in Isostatic Structures, Emilio Rosenblueth and Enrique Mendoza, 38

Engineering mechanics; Protuberances; Aerodynamics; Cylinders
Wind Load on Cylinder With Spanwise Protrusion, David F. James and Quan-Si Truong, 543

Engineering mechanics; Quadratic equations; Cables (ropes); Computers
Analysis of Structures by Quadratic Programming, Mehdi S. Zarghamee, 27

Engineering mechanics; Sandwich panels; Shells (structural forms); Structural analysis; Continuum mechanics
Cosserat Surface and Sandwich Shell Equilibrium, David J. Malcolm and Peter G. Glockner, 453

Engineering mechanics; Sandwich structures; Arches; Buckling
Nonlinear Buckling Analysis of Sandwich Arches, Parviz Sharifi and Egor P. Popov, 11

Engineering mechanics; Sandwich structures; Shells (structural forms); Compatibility; Continuum mechanics
Nonlinear Sandwich Shell and Cosserat Surface Theory, David J. Malcolm and Peter G. Glockner, 459

Engineering mechanics; Seepage; Tile drainage; Transient flow; Conformal mapping; Drains
Transient Seepage Flow Toward Two Parallel Drains, Imre Gyuk and Gabor M. Karadi, 138

Engineering mechanics; Shear modulus; Shear stress; Composite materials; Elastic properties
Torsion of Multilayered Rectangular Section, John R. Booker and Sritawat Kitipornchai, 3

Engineering mechanics; Shells (structural forms); Boundary value problems; Buckling
Buckling of Arbitrary Open Cylindrical Shells, Jack W. Vetter and Donald E. Boyd, 115

Engineering mechanics; Shells (structural forms); Buckling; Design
Buckling of Shells: An Old Idea with a New Twist, John Roorda, 266

Engineering mechanics; Shells (structural forms); Spherical shells; Underwater structures; Dynamic structural analysis
Acoustic Approximations in Fluid-Shell Interactions, Bedros Bedrosian and Frank L. DiMaggio, 337

Engineering mechanics; Shells (structural forms); Stress distribution; Stress strain diagrams; Elastic shells
Invariant Multicouple Theory of Shells, Gerald A. Wempner, 577

Engineering mechanics; Shells (structural forms); Structural engineering; Cylindrical shells; Deformation; Differential equations
Accurate Fourth Order Equation for Circular Cylindrical Shells, Shun Cheng, 311

Engineering mechanics; Slenderness ratio; Stability; Dynamics; Dynamic stability
Dynamic Stability of Thin-Walled Column, Carl H. Popelar, 304

Engineering mechanics; Soil-structure interaction; Tall buildings; Vibration; Buildings; Earthquakes
Earthquake Interaction for Multistory Building, Lawrence W. Fagel and Shih-Chi Liu, 416

Engineering mechanics; Stability; Torsion; Vibration; Beam columns; Buckling; Columns (supports); Computation; Dynamic stability
Coupled, Nonconservative Stability-Finite Element, C. D. Mote, Jr. and Gerald Y. Matsumoto, 286

Engineering mechanics; Statistical analysis; Stochastic processes; Vibration
First Passage of Nonstationary Random Processes, Ross B. Corotis, Erik H. Vanmarcke and C. Allin Cornell, 205

Engineering mechanics; Stresses; Torsion; Tubes; Warpage; Beams (supports); Curved beams
Torsion and Flexure of Curved, Thin-Walled Beams or Tubes, Ray N. Nitzsche and Robert E. Miller, 382

Engineering mechanics; Stress-strain curves; Bond stress; Composite materials; Cracking (fracturing); Discontinuities
Deformation and Fracture of Particulate Composite, Oral Buyukozturk and Arthur H. Nelson, 292

Engineering mechanics; Vibration; Cylinders; Differential equations; Elastic properties
Three-Dimensional Vibrations of Orthotropic Cylinders, Fang-Hui Chou and Jan D. Achenbach, 362

Engineering schools; Professional activities; Engineering education
The Nature of Continuing Education, Alfred C. Ingersoll, 144

Engineering societies; Failure; Gas pipelines; Legislation; Natural gas; Transmission lines; Transportation; Utilities; Zoning; Costs
Responsibility of Gas Utilities for Pipeline Safety, Carl T. Kallina, 148

Engineering societies; Salaries; Unionization; ASCE (Employment Conditions); ASCE (Salaries and Fees); Collective bargaining
Civil Engineer's Compensation - ASCE's Future, Daniel J. Smyers, 500

Engineers; Foreign engineering; Great Britain; Management; Metric system; Planning; Standards; Training; Construction industry; Engineering education
Metrication Progress in the United Kingdom, Gordon Bowen, 523

Engineers; Highway engineering; Education; Engineering education
Practitioners Teach Students Art of Highway Engineering, David A. Novick, Howard S. Newman and Eben Vey, 16

Engineers; Personnel; Technicians; Engineering education
The Engineering Technician: An Underutilized Resource, Ronald P. Shumate, 98

Engineers; Professional activities; Professional advancement; Professional engineering; Schools; Civil engineers; Education; Engineering education
Civil Engineering Education in the Future, Richard Tucker, 191

Engineers; Professional activities; Professional engineering; Professional practice; Engineering education
Professional Education: The Need for Creativity, Charles R. Schrader, 80

Enteric bacteria; Sanitary engineering; Waste stabilization ponds; Algae; Bacteriology
Bacterial Dieoff in Ponds, Ernst M. Davis and Earnest F. Gloyna, 193

Environmental effects; Environmental engineering; Esthetics; Land use; Matrices (mathematics); National historic sites; Planning; Pollution; Sanitary engineering; Conservation
Environmental Assessment of Resource Development, Kenneth D. Kerri, 282

Environmental effects; Health; Matrices (mathematics); Microenvironment; Professional activities; Buildings (hospitals)
The Hospital as a Microenvironment, E. Todd Wheeler, 593

Environmental effects; Highways; Power reactors (nuclear); Dams
Environmental Litigation: Lessons From the Courts, William K. Johnson, 31

Environmental effects; Management planning; Natural resources; Planning; Sanitary engineering; Ecology
Environmental Planning and Ecological Possibilities, David A. Bella and W. Scott Overton, 422

Environmental effects; Parks; Recreational facilities; Reservoir design; Skiing; Ecology
Civil Engineering for Recreation, Ernst W. Kiesling and George A. Whetstone, 182

Environmental effects; Pollution; Population growth; Social needs; Ecology
The Engineer and the Environment, C. Maxwell Stanley, 352

Environmental engineering; Environments; Federal agencies; Organizations; Pollution control; Professional activities; Water pollution control
Federal Reorganization to Protect the Environment, John F. Wall and Leonard B. Dworsky, 289

Environmental engineering; Environments; Power supplies; Site selection; Electric power generation
Logical Approaches to Power Supply and Environment, Riley D. Woodson, 525

Environmental engineering; Esthetics; Impact; Land use; Towers; Transmission lines
Transthetics, Harold P. Hulett, 313

Environmental engineering; Esthetics; Land use; Matrices (mathematics); National historic sites; Planning; Pollution; Sanitary engineering; Conservation; Environmental effects
Environmental Assessment of Resource Development, Kenneth D. Kerri, 282

Environmental engineering; Esthetics; Land use; Parks; Recreational facilities; Streams; Urban planning
Evaluating Recreational Potential of Small Streams, John A. Dearinger, 478

Environmental engineering; Estuaries; Hydrology; Irrigation; Meteorology; New Jersey; Water purification; Water quality; Water resources; Droughts
Impact of Drought on New Jersey's Water Resources, Peter W. Anderson, Samuel D. Faust and John E. McCall, 472

Environmental engineering; Ethics; Nuclear electric power generation; Professional activities; Professional engineering; Engineering education
Engineering For People, Richard R. Harbert, 441

Environmental engineering; Eutrophication; Florida; Lakes; Multivariate analysis; Sanitary engineering; Water quality
Eutrophication Analysis: A Multivariate Approach, Earl E. Shannon and Patrick L. Brezonik, 237

Environmental engineering; Federal agencies; Legislation; Professional activities; Sewage treatment; Social needs; Solid wastes
The Engineer and the New Environment, Eugene T. Jensen, 381

Environmental engineering; Finite element method; Fluid flow; Heated water; Hydraulics; Jets; Lakes; Rivers; Thermoelectric power generation
Hydrothermal Analysis by Finite Element Method, Larry A. Loziuk, James C. Anderson and Ted Belytschko, 559

Environmental engineering; Fish; Florida; Locks (waterways); Navigation; Waterways; Canals; Design; Ecology
Design Versus Ecology in St. Johns and Indian Rivers, Harold A. Scott, 475

Environmental engineering; Flood control; Hydroelectric power generation; Multiple purpose reservoirs; Tennessee Valley Authority; Water supply
Impact of Multiple-Purpose Reservoir System on Regional Environment, Edward H. Lesesne, 370

Environmental engineering; Flood control; Open channel flow; Professional activities; Social needs
Public Participation in Environmental Design of Flood Control Channels, Phillip F. Dunn, Jr., 432

Environmental engineering; Forecasting; Mathematical models; Planning; Population growth; Design
Stochastic Population Projection at Design Level, Peter M. Meier, 557

Environmental engineering; Government; Institutions; Professional activities; Regional planning; Water quality control
Water Pollution Control Institutions, William Whipple, Jr., 215

Environmental engineering; Government; Professional activities; Professional societies; Civil engineers; Ecology
Integrity and the Ecological Crisis, Myron Tribus, 227

Environmental engineering; Ground water; Impact; Sanitary engineering; Sewage disposal; Water resources; Cost effectiveness; Economic analysis
Cost-Effectiveness Analysis of Wastewater Reuses, Stephen C. Ko and Lucien Duckstein, 552

Environmental engineering; Herbicides; Sanitary engineering; Water treatment; Aquatic plants; Biodegradation
Herbicidal Control of Aquatic Plants, Edward O. Ganstad, 341

Environmental engineering; Highway engineering; Highways; Noise; Noise masking; Transportation; Design
Baltimore Plans Highways for Minimum Noise, Grant S. Anderson, Frederick Gottemoeller and Daniel G. Page, 410

Environmental engineering; Highways; Land use; Legislation; Regional planning; Transportation; Drainage
Impact of Environmental Controls on Highways, Wm. Campbell Graeub, Albert A. Grant and Robley Winfrey, 219

Environmental engineering; Hydroelectric power generation; Mathematical models; Thermal stratification; Water quality; Biota; Dissolved oxygen
Predicting Quality Effects of Pumped Storage, Carl W. Chen and Gerald T. Orlob, 255

Environmental engineering; Hydroelectric power generation; Models; Powerplants; Pumped storage; Turbines; Conservation; Costs; Dams (concrete); Dams (gravity); Economics
Wallace Dam, Major H. Thompson, Jr., 550

Environmental engineering; Hydroelectric power generation; Professional activities; Thermoelectric power generation; Dams
Positive Points on Electric Power, George R. Higgins, 204

Environmental engineering; Institutional constraints; Planning; Sanitary engineering; Water quality; Ecology
Clean Water -- An Environmental Challenge, Percy H. McGauhey, 290

Environmental engineering; Irrigation; Conservation; Ecology
Tunnel Vision or Ecological View, Virginia M. Hines, 28

Environmental engineering; Land use; Natural resources; Site surveys; Design practices
Environmental Aspects of Site Selection, Eugene F. Dudley, 120

Environmental engineering; Mapping; Photogrammetry; Remote sensing; Aerial photography
Photogrammetry Aids Solution of Environment Problems, Alfred O. Quinn, 228

Environmental engineering; Maryland; Pollution control; Sanitary engineering; State governments; Water management (applied); Water pollution
Statewide Management-What Does the Future Hold?, Frank A. Butrico and James B. Coulter, 244

Environmental engineering; Offshore structures; Urban planning; Airports; Air transportation; Dikes
Trends in Offshore Airports, Richard D. Harza, 497

Environmental engineering; Planning; Structural engineering; Systems engineering; Urban planning; Architecture; Buildings
Tall Buildings--A Technological Assessment, Thomas C. Kavanagh, 54

Environmental engineering; Political aspects; Pollution; Professional activities; Social change; Civil engineering
Pollution, Politics and Protest, Charles L. Gould, 39

Environmental engineering; Pollution control; Professional activities; Social aspects; Social needs; Civil engineering; Ecology
Ecology - Rage and Reason, Robert Moses, 474

Environmental engineering; Powerplants; Sanitary engineering; Solid wastes; Waste disposal
St. Louis Powerplant Burns City Refuse, F. E. Wisely, G. Wayne Sutterfield and David L. Klumb, 518

Environmental engineering; Professional activities; Social needs; ASCE (presidents)
Antidote for Environmental Hysteria, Samuel S. Baxter, 180

Environmental engineering; Professional practice; Social needs; Technology
In Defense of Dubos and Ellul, Kim de Rubertis, 534

Environmental engineering; Resources; Sanitary landfill; Solid wastes; Waste disposal; Economic feasibility
How Urgent the Need to Recycle Solid Waste, Robert D. Bargman, 434

Environmental engineering; Sweden; Traffic; Traffic control; Transportation; Urban planning; Air pollution
Gothenburg (Sweden) Uses Barriers to Cut Traffic, Curt M. Elmberg, 406

Environmental engineering; Water quality; Water treatment; Bacteria; Calcium carbonates; Disinfection
Effect of Calcium Bicarbonate on Disinfection by Halogens, Lawrence N. Kuzminski, Tsuan H. Feng and Chih C. Liu, 222

Environmental surveys; Interest groups; Land classification; Land management; Land use
Needed: A National Land Use Policy, Daniel A. Dreyfus, 245

Environmental tests; Excitation; Linear responses; Random processes; Vibration; Dynamic response; Dynamic structural analysis; Engineering mechanics
Linear Response to Nonstationary Random Excitation, Timothy K. Hasselman, 278

Environments; Excavation; Explosives; Predictions; Quarrying; Blasting; Construction
Rapid Excavation With Explosives, Richard H. Groves and Robert L. LaFrenz, 380

Environments; Federal agencies; Organizations; Pollution control; Professional activities; Water pollution control; Environmental engineering
Federal Reorganization to Protect the Environment, John F. Wall and Leonard B. Dworsky, 289

Environments; Freeways; Highways; Multiple use; Right of way acquisition; Transportation; Urban transportation
Multiple Use of City Transportation Corridor, Harry R. Powell and F. G. Alden, 285

Environments; Land ownership; Maps; Maps; Photogrammetry; Surveying
The Environment and a Two-Billion Dollar Property, Carl Hammerstrom, 393

Environments; Power supplies; Site selection; Electric power generation; Environmental engineering
Logical Approaches to Power Supply and Environment, Riley D. Woodson, 525

Environments; Social needs; Water resources; Assessments; Drainage; Droughts
Assessing Social Consequences of Water Deficiencies, William K. Johnson, 60

Epidemiology; Filtration; Protamines; Sanitary engineering; Water treatment; Activated sludge; Chlorine; Coagulation
Integrated Approach to Problem of Viruses in Water, Gerald Berg, 122

Epoxy mortar; Epoxy resins; Surface preparation; Temperature control; Tunnel linings; Concrete; Construction
Application of Epoxy Resins in Tunnel Lining Concrete Repair, Russell C. Borden and Carl E. Selander, 405

Epoxy resins; Loads (forces); Orthotropic plate; Plates (structural members); Stresses; Deflection; Design; Engineering mechanics
Large Deflection of Rectangular Orthotropic Plates, Chuen-Yuan Chia, 514

Epoxy resins; Surface preparation; Temperature control; Tunnel linings; Concrete; Construction; Epoxy mortar
Application of Epoxy Resins in Tunnel Lining Concrete Repair, Russell C. Borden and Carl E. Selander, 405

Equations; Frames; Plasticity; Quadratic equations; Stresses; Computer programming; Engineering mechanics
Elastic-Plastic Analysis by Quadratic Programming, Antone F. Sayegh and Moshe F. Rubinstein, 564

Equations of motion; Excitation; Discrete distribution functions; Dynamic stability; Elastic properties
Stability and Boundedness Via Liapunov's Direct Method, Siegfried M. Holzer, 520

Equilibrium; Fourier series; Rings; Static structural analysis; Deflection; Displacement; Engineering mechanics
Linear Theory of Thin Rings, Harry E. Williams, 436

Equilibrium; Harbors; Hydraulic models; Movable bed models; Profiles; Scale effect; Beach ridges; Coastal engineering
Equilibrium Beach Profile Scale-Model Relationship, Edward K. Noda, 558

Equilibrium methods; Lagrangian functions; Stability; Boundary conditions; Buckling; Composite materials; Deformation; Eigenvalues; Energy methods; Engineering mechanics
Stability of Orthotropic Stiffened Composite Plates, Kao Ding Chiu, 508

Equilibrium methods; Newton-Raphson method; Structural engineering; Bridges (suspension); Compatibility methods; Computer applications; Computers
Static Analysis of Suspension Bridges, Alan Jennings and John E. Mairs, 508

Equilibrium methods; Shells (structural forms); Displacement; Elastic properties; Energy; Engineering mechanics
Thick Shell and Oriented Surface Theories, Frank G. Bercha and Peter G. Glockner, 355

Erosion; Flood control; Pipelines; Canals; Cofferdams; Concrete (reinforced); Culverts
New Culvert Carries Creek Underneath Canal, Alfred R. Pagan, 440

Erosion; Friction; Impact; Overland flow; Rainfall; Turbulence; Water flow; Drainage
Mechanics of Sheet Flow Under Simulated Rainfall, Yong Nam Yoon and Harry G. Wenzel, Jr., 13

Erosion; Hydraulics; Hydrology; Mathematical models; Reservoirs; Sedimentation; Water quality; Watersheds
Sediment Yield Computed With Universal Equation, Jimmy R. Williams and Harold D. Berndt, 578

Erosion; Hydraulics; Land use; Research; Sedimentation; Sediment control; Urban development; Urban planning; Economics
Urban Sedimentation in Perspective, Harold P. Guy and D. Earl Jones, Jr., 574

Erosion; Hydraulics; Sands; Scour; Vortices; Beds under water; Dikes
Erosion of Sand Beds Around Spur Dikes, Mohammad Akram Gill, 476

Erosion; Hydraulics; Sedimentation; Sediment yield; Statistical analysis
Predicting Sediment Yield in Western United States, Elliott M. Flaxman, 585

Erosion; Irrigation; ASCE (executive secretary); Dams; Disease vectors; Drainage; Ecology; Egypt
People, Ecology and the Aswan High Dam, William H. Wisely, 67

Erosion; Nutrients; Pollution; Runoff; Rural areas; Sanitary engineering; Agricultural wastes
Agricultural Runoff-Characteristics and Control, Raymond C. Loehr, 520

Esthetic properties; Highway engineering; Bridges (concrete); Bridges (spans); Concrete (precast)
Long-Span Bridge: Utility, Grace at Low Cost, Harry M. Montgomery and Roger D. Troxell, 269

Esthetics; Grading (earthwork); Highway beautification; Highway engineering; Right of way acquisition
Esthetics in Highway Design, Donald Van Riper, 177

Esthetics; Housing; Land use; Noise reduction; Parks; Urban planning; Water pollution; Air pollution
Esthetic Considerations in Urban General Planning, Wm. H. Claire, 404

Esthetics; Impact; Land use; Towers; Transmission lines; Environmental engineering
Transthetics, Harold P. Hulett, 313

Esthetics; Land use; Matrices (mathematics); National historic sites; Planning; Pollution; Sanitary engineering; Conservation; Environmental effects; Environmental engineering
Environmental Assessment of Resource Development, Kenneth D. Kerri, 282

Esthetics; Land use; Parks; Recreational facilities; Streams; Urban planning; Environmental engineering
Evaluating Recreational Potential of Small Streams, John A. Dearinger, 478

Esthetics; Massachusetts; Professional activities; Professional practice; Engineering education
Aesthetics -- Part of Civil Engineering, Frederick M. Law, 324

Esthetics; Planning; Site selection; Systems engineering; Benefit-cost ratios
Inclusion of Social Values in Facility Location Planning, David Morris, 167

Esthetics; Professional activities; Civil engineering; Civil engineers
The Engineer and Pollution Control - Some Objections to the Simplistic Approach, Samuel C. Florman, 418

Estimates; Computerized simulation; Construction planning; Earthmoving
Estimating Costs of Earthwork via Simulation, Jack H. Willenbrock, 208

Estimates; Computer programs; Costs; Data systems
Remote Terminal Cost Estimating, Robert C. Volkman and LeRoy T. Boyer, 133

Estimates; Jet aircraft; New jersey; New york; Airports; Air traffic; Costs; Dikes
Offshore Jetport for New York-New Jersey Megalopolis, Edward G. Nawy and Fred C. Koletty, 179

Estuaries; Fishkill; Nuclear electric power generation; Powerplants; Sanitary engineering; Temperature; Thermal shock; Water pollution; Bioassay
Parameters Necessary for Analyzing Thermal Bioassays, Robert D. Smith, 569

Estuaries; Flow; Sanitary engineering; Shear flow; Velocity distribution; Water pollution; Diffusion; Dispersion
Velocity Profiles and Dispersion in Estuarine Flow, Burton A. Segall and Erik R. Gidlund, 435

Estuaries; Fluid flow; Hydraulics; Salinity; Two phase flow; Computation; Density
Numerical Computation of Stratified Nearly Horizontal Flows, John P. Grubert and Michael B. Abbott, 530

Estuaries; Hydraulic models; Hydraulics; Models; Salinity; Statistical analysis; Virginia
Repeatability in Estuarine Hydraulic Model, Paul V. Hyer, 229

Estuaries; Hydraulics; Shear stress; Two phase flow; Water pollution; Density
Gradually Varying Two-Layer Stratified Flow, Flemming Bo Pedersen, 155

Estuaries; Hydroelectric power; Powerplants; Tidal power plants; Dams; Electric networks
Pumped Storage and Tidal Power in Energy Systems, Charles K. Haswell, Stephen W. Huntington, Thomas L. Shaw, Geoffrey R. Thorpe and Ian J. Westwood, 603

Estuaries; Hydrology; Irrigation; Meteorology; New Jersey; Water purification; Water quality; Water resources; Droughts; Environmental engineering
Impact of Drought on New Jersey's Water Resources, Peter W. Anderson, Samuel D. Faust and John E. McCall, 472

Estuaries; India; Mathematical models; Models; Rivers; Tides; Tidewater; Waterways (transportation)
Mathematical Model of River Hooghly, Donald M. McDowell and David Prandle, 209

Estuaries; Mathematical models; Oxygen demand; Sanitary engineering; Stochastic processes; Water pollution; Biochemical oxygen demand
Stochastic Model of BOD and OD in Segmented Estuary, William R. Schofield and Richard G. Krutchkoff, 488

Estuaries; Mathematical models; Sanitary engineering; Systems analysis; Texas
Optimal Water Quality Management for Houston Ship Channel, Almond J. Hays, Jr. and Earnest F. Gloyna, 200

Estuaries; Nutrition; Plants; Productivity; Sanitary engineering; Sea grasses; Benthic flora
Role Of Benthic Plants in Fertilized Estuary, Thomas D. Waite and Ralph Mitchell, 482

Estuaries; Power; Powerplants; Pumped storage; Tidal energy; Tidal power generation; Dams
Integration Of Pumped-Storage With Tidal Power, Thomas L. Shaw and Geoffrey R. Thorpe, 29

Estuaries; Recreational facilities; Water pollution control; Water pollution effects; California
Cleanup of San Diego Bay, Roy E. Dodson, 142

Estuaries; Salt marshes; Sediments; Water quality; Coastal engineering; Dredging
Environmental Aspects of Dredging in Estuaries, Herbert L. Windom, 529

Estuaries; Sanitary engineering; Tidal waters; Waste assimilative capacity; Water pollution; California
Tidal Exchange at Golden Gate, Denny S. Parker, Dan P. Norris and Austin W. Nelson, 276

Ethics; Nuclear electric power generation; Professional activities; Professional engineering; Engineering education; Environmental engineering
Engineering For People, Richard R. Harbert, 441

Ethics; Planning; Civil engineering; Civil engineers; Economics; Education; Engineering education
The Education of an Engineer (A Continuing Story), James E. Crews and Charles C. McCloskey, III, 544

Ethnic groups; Mobility; Passenger transportation; Retirement; Transportation; Urban transportation; Automobiles
Transportation and Retirement, Frances M. Carp, 484

Eutrophication; Florida; Lakes; Multivariate analysis; Sanitary engineering; Water quality; Environmental engineering
Eutrophication Analysis: A Multivariate Approach, Earl E. Shannon and Patrick L. Brezonik, 237

Eutrophication; Iron compounds; Phosphorus compounds; Activated sludge process; Anaerobic digestion
Anaerobic Digestion of Sludge Containing Iron Phosphate, Sudershan Malhotra, Thomas P. Parrillo and Alan Gene Hartenstein, 74

Eutrophication; Kinetics; Nitrates; Sanitary engineering; Sewage treatment; Activated sludge; Anaerobic conditions; Denitrification
Process Kinetics for Denitrification, Walter K. Johnson, 448

Eutrophication; Oxygen content; Plants; Sanitary engineering; Streams
Variable Respiration in Aquatic Plant Communities, Archie J. McDonnell and Dennis W. Weeter, 348

Eutrophication; Sewage disposal; Washington; Water pollution control
Swimming Again in Lake Washington, Walter E. Jessup, 139

Evaporation; Evapotranspiration; Frequency distribution; Idaho; Irrigation; Water consumption
Peak Water Requirements of Crops in Southern Idaho, James L. Wright and Marvin E. Jensen, 236

Evaporation; Evapotranspiration; Frequency distribution; Irrigation; Climatology; Consumptive use (water)
Central California Evapotranspiration Frequencies, W. O. Pruitt, Sergius von Oettingen and D. L. Morgan, 251

Evaporation; Evapotranspiration; Irrigation; Phreatophytes; Transpiration; Water consumption
Simulation of Salt Cedar Evapotranspiration, William C. Hughes, 570

Evaporation; Evapotranspiration; Irrigation; Solar radiation; Water consumption; Climatology; Consumptive use (water)
Coastal California Evapotranspiration Frequencies, Paul R. Nixon, G. Paul Lawless and Gary V. Richardson, 279

Evaporation; Heat exchangers; Hydraulic models; Hydraulics; Temperature; Tests; Thermal pollution; Coefficients
Evaluating Water Surface Heat Exchange Coefficients, Peter D. Hindley and Russell M. Miner, 421

Evaporation; Hydraulics; Precipitation (meteorology); Runoff; Watersheds; Discharge; Drainage
A Model to Predict Mean Annual Watershed Discharge, Steven I. Majtenyi, 373

Evaporation; Mathematical models; Predictions; Statistical tests; Temperature; Water quality; Algorithms; Coefficients
Stream Temperature Prediction Under Reduced Flow, William L. Morse, 332

Evapotranspiration; Frequency distribution; Idaho; Irrigation; Water consumption; Evaporation
Peak Water Requirements of Crops in Southern Idaho, James L. Wright and Marvin E. Jensen, 236

Evapotranspiration; Frequency distribution; Irrigation; Climatology; Consumptive use (water); Evaporation
Central California Evapotranspiration Frequencies, W. O. Pruitt, Sergius von Oettingen and D. L. Morgan, 251

Evapotranspiration; Frequency distribution; Irrigation; Radiation; Advection
Frequency of Potential Evapotranspiration Rates in Great Central Plains, Norman J. Rosenberg, 294

Evapotranspiration; Irrigation; Agricultural products; Economic analysis
Water-Yield Relations for Nonforage Crops, Lloyd A. Downey, 157

Evapotranspiration; Irrigation; Phreatophytes; Transpiration; Water consumption; Evaporation
Simulation of Salt Cedar Evapotranspiration, William C. Hughes, 570

Evapotranspiration; Irrigation; Probability theory; Statistical analysis; Drainage
Maximum Potential Evapotranspiration Frequency - East Central U.S., J. L. McGuinness and Leslie H. Parmele, 267

Evapotranspiration; Irrigation; Solar radiation; Water consumption; Climatology; Consumptive use (water); Evaporation
Coastal California Evapotranspiration Frequencies, Paul R. Nixon, G. Paul Lawless and Gary V. Richardson, 279

Excavation; Explosives; Predictions; Quarrying; Blasting; Construction; Environments
Rapid Excavation With Explosives, Richard H. Groves and Robert L. LaFrenz, 380

Excavation; Foundations; Grouting; Soil mechanics; Blasting; Dams; Embankments
Foundation Treatment for Embankment Dams on Rock, Elmer W. Stroppini, Donald H. Babbitt and Henry E. Struckmeyer, 493

Excavation; Foundations; Installation; Power; Power lines; Railroads; Transmission lines; Blasting; Costs
Powerline Foundations Installed along Railroad Tracks, Roger S. Chapman, 462

Excavation; Highway engineering; Interstate highway system; Paving; Planning; Cost estimates
Cost Estimating Model for Rural Interstate Highways, John Whitman and Frederick J. Wegmann, 402

Excavation; Shields (tunneling); Slurries; Tunnel construction; Compressed air
Pressurized-Slurry Shields Bore Submarine Tunnels, Takuya Ohira and Shunta Shiraishi, 248

Exchange reactions; Sanitary engineering; Chlorination; Chlorine; Disinfection
Fixed Resin Bed Chlorination of Water, Edgar J. Dewar and Morris Wayman, 172

Excitation; Discrete distribution functions; Dynamic stability; Elastic properties; Equations of motion
Stability and Boundedness Via Liapunov's Direct Method, Siegfried M. Holzer, 520

Excitation; Linear responses; Random processes; Vibration; Dynamic response; Dynamic structural analysis; Engineering mechanics; Environmental tests
Linear Response to Nonstationary Random Excitation, Timothy K. Hasselman, 278

Expansion; Soil mechanics; Cavities; Elastic-plastic analysis
Expansion of Cavities in Infinite Soil Mass, Aleksandar Sedmak Vesic, 217

Expansive clays; Failure; Harbor structures; Inclinometers; Meteorology; Overconsolidation; Soil mechanics
Behavior of Wharf Affected by River Fluctuations, Richard A. Sullivan, 457

Experience; Apprenticeship; Construction; Costs; Delay time; Economics
Learning and Experience Curves, Marvin Gates and Amerigo Scarpa, 232

Explosions; Structural design; Buildings; Buildings (residential); Collapse
Design for Prevention of Progressive Collapse, Ramzi H. Ferahian, 102

Explosives; Predictions; Quarrying; Blasting; Construction; Environments; Excavation
Rapid Excavation With Explosives, Richard H. Groves and Robert L. LaFrenz, 380

Fabrication; Prefabrication; Reinforcement; Steels; Traffic control; Tunnels; Underwater construction; Vehicular tunnels; Cofferdams
Submerged-Tube Tunnel in Mobile, Ray R. Slocum, 368

Failure; Dynamics; Earthquakes
Fatigue Failure of Nonlinear Multistory Seismic Structure, Iyadurai Kasiraj, 194

Failure; Fiber composites; Plasticity; Composite materials; Engineering mechanics
Yielding of Fiber Reinforced Tresca Material, John D. Helfinstine and Richard H. Lance, 389

Failure; Fibers; Limit design method; Reinforcement; Structural engineering; Composite structures; Engineering mechanics
Limit Analysis of Ductile Fiber-Reinforced Structures, Richard H. Lance and David N. Robinson, 130

Failure; Fractures; Safety factors; Steels; Strength; Stress analysis; Bridge design; Bridges (structures); Cracking (fracturing); Criteria
Fracture Mechanics, With High-Strength Steels A Must, Stanley T. Rolfe, 357

Failure; Gas pipelines; Legislation; Natural gas; Transmission lines; Transportation; Utilities; Zoning; Costs; Engineering societies
Responsibility of Gas Utilities for Pipeline Safety, Carl T. Kallina, 148

Failure; Harbor structures; Inclinometers; Meteorology; Overconsolidation; Soil mechanics; Expansive clays
Behavior of Wharf Affected by River Fluctuations, Richard A. Sullivan, 457

Failure; Hydraulic jump; Hydraulics; Slabs; Uplift pressure; Chute spillways; Dams (earth); Eductors; Ejectors
Damage to Karnafuli Dam Spillway, Mohammad A. Rahman, 596

Failure; Joints (connections); Pipelines; Pipeline transportation; Tension; Ties; Water flow
Considerations of Pipeline Tension Tie Problems, Lloyd C. Fowler, Richard P. Lundahl and Robert W. Purdie, 573

Failure; Safety factors; Slope stability; Soil mechanics; Stress distribution; Cracking
Influence of Progressive Failure On Slope Stabilities, Fredy Romani, C. William Lovell, Jr. and Milton E. Harr, 530

Failure; Structural analysis; Design; Earthquake resistant structures; Earthquakes; Engineering mechanics
Expected Fatigue Damage of Seismic Structures, Jhy-Pyng Tang and James T.P. Yao, 317

Fasteners; Joints (connections); Safety factors; Tests; Welded joints; Welding
Eccentrically Loaded Welded Connections, Lorne J. Butler, Shubendu Pal and Geoffrey L. Kulak, 233

Fasteners; Joints (junctions); Nails; Slip joints; Structural engineering; Wood; Wooden structures; Elastic properties
Analysis of Nailed Joints with Dissimilar Members, Thomas Lee Wilkinson, 437

Fatigue limit; Fatigue (materials); Structural engineering; Tests; Vibration
Fatigue of Cover Plated Beams Under Varying Loads, Francis A. Murad and Conrad P. Heins, Jr., 225

Fatigue (materials); Fractures (materials); Offshore structures; Steels; Structural engineering; Tube joints; Welded joints; Welding
Fatigue Failure of Welded Tubular Joints, James M. Becker, William W. Gerberich and Jack G. Bouwkamp, 62

Fatigue (materials); Galvanizing; High strength bolts; Joints (junctions); Steels; Structural engineering
High Strength Bolted Galvanized Joints, D. J. Laurie Kennedy, 576

Fatigue (materials); Ocean engineering; Offshore structures; Structural engineering; Tides; Underwater construction
Offshore Structures - Statistical Strain Recording, Michael A. Garnett, Bhan Mabin and Terrence E.H. Lemmon, 177

Fatigue (materials); Ribs (supports); Steels; Structural engineering; Tests; Welding; Bridges (decking); Bridges (orthotropic)
Fatigue of Orthotropic Steel Decks, Hacik Erzurumlu and A. Anthony Toprac, 205

Fatigue (materials); Stresses; Thickness; Transportation; Computer programs
Structural Design of Concrete Pavement by Computer, Cloyd E. Warnes, 25

Fatigue (materials); Structural engineering; Damage
Fatigue Damage Factor in Structural Design, Jhy-Pyng Tang and James T.P. Yao, 126

Fatigue (materials); Structural engineering; Tests; Vibration; Fatigue limit
Fatigue of Cover Plated Beams Under Varying Loads, Francis A. Murad and Conrad P. Heins, Jr., 225

Faults (geology); Rocks; Shields (tunneling); Tunneling (excavation); Vehicular tunnels; Boring machines; Construction
Vehicular Tunnels in Rock - Direction for Development, Richard J. Robbins, 379

Federal agencies; Highways; Safety; Signals; Traffic; Benefit-cost ratios; Costs
Federal Experience in TOPICS, Hugh B. Henry, 292

Federal agencies; Legislation; Professional activities; Sewage treatment; Social needs; Solid wastes; Environmental engineering
The Engineer and the New Environment, Eugene T. Jensen, 381

Federal agencies; Organizations; Pollution control; Professional activities; Water pollution control; Environmental engineering; Environments
Federal Reorganization to Protect the Environment, John F. Wall and Leonard B. Dworsky, 289

Federal government; ASCE (code of ethics)
The Aftermath of Article Three, William H. Wisely, 1

Federal government; Storm runoff; Water pollution control; Water quality control; Water treatment
Corps of Engineers Plans Regional Water Quality Program, William Whipple, Jr., 118

Federal-state cooperation; Land use; Legislation; Water management (applied); Waterways
Management Problems in Flood Plain Areas, Thomas M. Lee, 408

Fiber composites; Plasticity; Composite materials; Engineering mechanics; Failure
Yielding of Fiber Reinforced Tresca Material, John D. Helfinstine and Richard H. Lance, 389

Fibers; Limit design method; Reinforcement; Structural engineering; Composite structures; Engineering mechanics; Failure
Limit Analysis of Ductile Fiber-Reinforced Structures, Richard H. Lance and David N. Robinson, 130

Field data; Forecasting; Functions (mathematics); Irrigation; Computers; Dimensional analysis
Prediction of Irrigation Advance Function by Dimensional Analysis, G. Sastry and S. C. Agarwal, 223

Field density; Fly ash; Power; Shear strength; Bearing values; Compaction tests; Consolidation; Embankments
Fly Ash as Structural Fill, Anthony M. DiGioia and William L. Nuzzo, 175

Field tests; Folded plates; Strains; Structural engineering; Bridges (structures); Concrete (reinforced)
Model and Prototype Studies of Box Girder Bridge, Raymond Eugene Davis, Charles F. Scheffey, Gary A. Castleton and Evan E. Evans, 70

Field tests; Forecasting; Municipal engineering; Planning; Sanitary engineering; Buildings (commercial)
Empirical Analysis of Commercial Solid Waste Generation, Truett V. DeGeare and Jerry E. Ongerth, 112

Field tests; Foundation investigations; Foundations; Soil properties
Subsurface Investigation for Design and Construction of Foundations of Buildings: Part I, Task Committee for Foundation Design Manual of the Committee on Shallow Foundations of the Soil Mechanics and Foundations Division, William F. Swiger, Chmn., 302

Field tests; Foundation investigations; Foundations; Soil properties
"Subsurface Investigation for Design and Construction of Foundations of Buildings: Part III and IV," by the Task Committee for Foundation Design Manual of the Committee on Shallow Foundations of the Soil Mechanics and Foundations Division, William F. Swiger, Chmn., 403

Field tests; Foundation investigations; Foundations; Soil properties; Terminology; Tests
Subsurface Investigation for Design and Construction of Foundations of Buildings: Part II, Task Committee for Foundation Design Manual of the Committee on Shallow Foundations of the Soil Mechanics and Foundations Division, William F. Swiger, Chmn., 309

Field tests; Foundation investigations; Foundations; Soil properties; Terminology
Subsurface Investigations for Design and Construction of Foundations of Buildings: Appendices A and B, Task Committee for Foundation Design Manual of the Committee on Shallow Foundations of the Soil Mechanics and Foundations Division, William F. Swiger, Chmn., 413

Field tests; Gates; Hydraulics; Spillways; Vibration; Design
Spillway Gate Vibration on Arkansas River Dams, Tasso Schmidgall, 146

Field tests; Geophysical prospecting; Seismic investigations; Shear modulus; Soil mechanics
In Situ Shear Wave Velocity by Cross-Hole Method, Kenneth H. Stokoe, II and Richard D. Woods, 293

Field tests; Hydraulics; Models; Simulation; Tidal currents; Tracers; Turbulence; Diffusion; Effluents
Tracer Tests of Eddy Diffusion in Field and Model, Maurice J. Crickmore, 509

Field tests; Hydrostatic tests; Structural engineering; Underwater structures; Concrete
Cylindrical Concrete Hulls Under Hydrostatic Loading, Harvey H. Haynes, Robert J. Ross and Norman D. Albertsen, 294

Field tests; Impact; New York; Structural engineering; Bridges (girder); Bridges (structures); Curved beams
Dynamic Testing of Curved Bridge - Huyck Stream, William L. Armstrong, 429

Field tests; Loads (forces); Structural engineering; Transmission towers; Aluminum; Aluminum alloys
Guide for the Design of Aluminum Transmission Towers, by the Task Committee on Lightweight Alloys of the Committee on Metals of the Structural Division, Robert J. Brungraber, Chmn., 596

Field tests; Materials tests; Statistical analysis; Tests; Time dependence; Vibration; Viscoelasticity; Data systems; Dynamics; Engineering mechanics
Statistical Theory for Viscoelastic Materials, Joseph Soussou and Fred Moavenzadeh, 532

Field tests; Penstocks; Physics; Pipelines; Power; Tracers; Turbines
Radioisotopes and Turbine Flow Measurement, Jack C. Schuster and Robert L. Hansen, 61

Field tests; Pressure gages; Research; Structural engineering; Trenches; Buried structures; Culverts
Concrete Arch Culvert Behavior-Phase 2, Raymond Eugene Davis and Alfred E. Bacher, 521

Field tests; Shear strength; Soil mechanics; Stress-strain curves; Cohesive soils
Expansion of Cylindrical Probes in Cohesive Soils, Francois Baguelin, Jean-Francois Jezequel, Eugene LeMee and Alain LeMehaute, 553

Field tests; Slurries; Bored piles; Clay (material)
Behavior of Bored Piles in Beaumont Clay, Michael W. O'Neill and Lymon C. Reese, 197

Fills; Fire protection; Foundations; Pile driving; Reclamation; Soil mechanics; Subsidence
Industry Builds on a Refuse Dump, Hans J. Pfister, 487

Fills; Fly ash; Frost action; Soil mechanics; Soil stabilization; Compaction
Engineering Properties of Compacted Fly Ash, Donald H. Gray and Yen-Kuang Lin, 253

Fills; Settlement (structural); Airports; Air transportation; Drainage; Embankments
KCI Airport Planned for Jet Age, Edwin Joe Runyan, 480

Films; Photography; Productivity; Time and motion studies; Construction; Efficiency
Analysis of Time-Lapse Construction Films, Howard B. Sprinkle, 502

Filter materials; Filters; Laboratory tests; Sanitary engineering; Biochemical oxygen demand
Hydraulically Ventilated Underground Filter, David K. Hills and Ray B. Krone, 128

Filters; Filtration; Fluidized bed processing; Sanitary engineering; Sewage treatment; Water filters; Water treatment
Backwashing of Granular Water Filters, Thomas R. Camp, S. David Graber and Gerard T. Conklin, 143

Filters; Filtration; Membrane processes; Sanitary engineering; Sewage treatment; Suspended solids
Filtrability Study on Secondary Effluent Filtration, Kou-Ying Hsiung, 384

Filters; Filtration; Sanitary engineering; Suspended solids; Water treatment; Backwashing; Desorption
Desorption and Retentivity of Filtering Materials, Andre Leclerc and Truong Tri Vu, 498

Filters; Fourier transformation; Mathematics; Systems engineering; Vibration; Computers; Dynamics; Earthquakes; Engineering mechanics
Dynamic Analysis by Extra Fast Fourier Transform, Jethro W. Meek and Anestis S. Veletsos, 218

Filters; Frequency; Seismic design; Damping; Design; Engineering mechanics
Spectrum-Compatible Motions for Design Purposes, Nien-Chien Tsai, 184

Filters; Laboratory tests; Sanitary engineering; Biochemical oxygen demand; Filter materials
Hydraulically Ventilated Underground Filter, David K. Hills and Ray B. Krone, 128

Filtration; Fluidized bed processing; Sanitary engineering; Sewage treatment; Water filters; Water treatment; Filters
Backwashing of Granular Water Filters, Thomas R. Camp, S. David Graber and Gerard T. Conklin, 143

Filtration; Hydraulics; Pollution; Sanitary engineering; Settling basins; Sewage disposal; Tanks (containers); Trickling filters; Bacteria; Chlorine; Detention reservoirs
Chlorine Disinfection in Final Settling Basins, Darrell W. Monroe and Donald C. Phillips, 296

Filtration; Membrane processes; Sanitary engineering; Sewage treatment; Suspended solids; Filters
Filtrability Study on Secondary Effluent Filtration, Kou-Ying Hsiung, 384

Filtration; Protamines; Sanitary engineering; Water treatment; Activated sludge; Chlorine; Coagulation; Epidemiology
Integrated Approach to Problem of Viruses in Water, Gerald Berg, 122

Filtration; Sanitary engineering; Suspended solids; Water treatment; Backwashing; Desorption; Filters
Desorption and Retentivity of Filtering Materials, Andre Leclerc and Truong Tri Vu, 498

Filtration; Seepage; Subsurface drainage; Subsurface drains; Underdrains; Drainage
Prefabricated Filter-Fin for Subsurface Drains, Kent A. Healy and Richard P. Long, 594

Filtration; Sewage treatment; Wastewater treatment; Water quality; Adsorption; Chemical removal (sewage treatment)
No Innovation in Wastewater Treatment, Russell L. Culp, 327

Finance; Professional practice; Professional societies; ASCE (Ethics); ASCE (Presidents); Bids; Civil engineering
State of the Society, Oscar S. Bray, 602

Financial management; Personnel management; Salary administration; Budgeting; Consulting engineers
Financial Tools for a Consulting Firm, Roy T. Sheehey, 48

Financing; Benefit-cost ratios; Construction; Costs
Project Selection Based on Benefits and Costs, Michael Raymond Toakley and John F. Brotchie, 308

Financing; Flood control; Management control reports; Professional activities; Simulation; Computerized simulation; Cost control
Flood Control Developed and Operated with Simulation, John M. Tellemer, 154

Financing; Fluid flow; Hydraulic radius; Linings; Pipelines; Power; Pressure tunnels; Tunnels; Velocity; Water; Water flow; Canals; Construction
Aqueducts for the Least Cost Conveyance of Water, Nephi A. Christensen, 46

Financing; New york; Project management; Regional planning; Construction management; Contract terms
New York City Hacks Through Capital Construction Jungle, Thomas A. Graham, 199

Finite difference method; Harmonic functions; Hyperbolic parabolic shells; Structural engineering; Airy function; Boundary conditions
Finite Difference Approach to Hyperbolic Paraboloids, M. I. Beg, 146

Finite differences; Loads (forces); Rectangular bodies; Relaxation (mechanics); Structural engineering; Thin plates; Concentrated loads; Deflection; Dynamic properties
Large Deflection of Elastic Plates Under Patch Loading, Bijan Aalami, 559

Finite differences; Mathematics; Numerical integration; Structural engineering; Computation; Dynamics; Dynamic structural analysis; Engineering mechanics
Temporal Operators for Nonlinear Structural Dynamics Problems, George Weeks, 495

Finite differences; Shells (structural forms); Spherical shells; Stability; Buckling; Engineering mechanics
Asymmetrical Buckling of Imperfect Spherical Shells, George N. Freskakis and Nicholas F. Morris, 471

Finite difference theory; Plates (structural members); Structural engineering; Deflection
Large Deflections of Curved Plates, Henry W.L. Lee and Conrad P. Heins, Jr., 1

Finite element method; Fluid flow; Heated water; Hydraulics; Jets; Lakes; Rivers; Thermoelectric power generation; Environmental engineering
Hydrothermal Analysis by Finite Element Method, Larry A. Loziuk, James C. Anderson and Ted Belytschko, 559

Finite element method; Hydraulic models; Seepage; Soil mechanics; Dams; Dams (earth); Drawdown
Seepage Analysis of Earth Banks Under Drawdown, Chandrakant S. Desai, 511

Finite element method; Initial stress; Structural engineering; Concrete (reinforced); Elastic-plastic analysis
Nonlinear Stress Analysis of Reinforced Concrete, Somasundaram Valliappan and T. F. Doolan, 218

Finite element method; Instrumentation; Soil mechanics; Cracking (fracturing); Dams; Dams (earth); Embankments
Stresses and Movements in Oroville Dam, Fred H. Kulhawy and James M. Duncan, 363

Finite element method; Joints (geology); Rock bolts; Soil mechanics; Dilatancy
Duplication of Dilatancy in Analysis of Jointed Rocks, Richard E. Goodman and Jacques Dubois, 274

Finite element method; Mathematical models; Probability theory; Concrete; Concrete properties; Engineering mechanics
Probabilistic Modeling of Concrete Structures, Masanobu Shinozuka, 598

Finite element method; Mathematical models; Structural analysis; Computer models; Computer programming
Responsibilities of Computer-Aided Design, Charles F. Beck, 288

Finite element method; Mechanics; Structural engineering; Anisotropy; Elastic properties
Finite Element Method for Wood Mechanics, Adam Al-Dabbagh, James R. Goodman and Jozsef Bodig, 174

Finite element method; Nonlinear systems; Power; Thermal powerplants; Cooling towers; Dynamics
Nonlinear Dynamic-Analysis of Cooling Tower, Chang-hua Yeh, 228

Finite element method; Structural engineering; Computer programs; Continuum mechanics; Elastic-plastic analysis
Finite Element Thermoelastoplastic Analysis, Norman A. Cyr, Roger D. Teter and Brian B. Stocks, 372

Finite elements; Folded plates; Interchanges; Orthotropic plate; Skew bridges; Stiffness methods; Structural analysis; Structural engineering; Bridges (box girder); Computer programs
Cellular Structures of Arbitrary Plan Geometry, Kaspar J. William and Alexander C. Scordelis, 315

Finite elements; Glass fibers; Roofs; Sandwich structures; Shells (structural forms); Structural engineering; Structural plastics; Computation; Construction procedure
Plastic Sandwich Buckle-Shell Structures, V. James Meyers, Dhamo T. Ramani and Mark E. Greenwood, 515

Finite elements; Hyperbolic parabolic shells; Pressure; Shells (structural forms); Vibration; Cooling towers; Engineering mechanics
Vibrations of Pressure Loaded Hyperboloidal Shells, Mehran Lashkari, Victor I. Weingarten and David S. Margolias, 431

Finite elements; Loading; Structural engineering; Tests; Thin-wall structures; Ultimate strength; Web beams; Buckling
Failure of Thin-Walled Members Under Patch Loading, Kenneth C. Rockey, Mohamed A. El-Gaaly and Debal K. Bagchi, 572

Finite elements; Matrices (mathematics); Plates (structural members); Shells (structural forms); Elastic properties; Engineering mechanics
Generalization of Plate Finite Elements to Shells, Robert G. Vos, 223

Finite elements; Matrix methods; Structural engineering; Cylindrical shells
Analysis of Eccentrically Stiffened Cylindrical Shells, Peter C. Kohnke and William C. Schnobrich, 344

Finite elements; Natural frequency; Plates; Sandwich laminates; Vibration; Engineering mechanics
Triangular Element for Multilayer Sandwich Plates, Tara P. Khatua and Yau Kai Cheung, 443

Finite elements; Nonlinear systems; Cables (ropes); Dynamics; Engineering mechanics
Nonlinear Dynamics of Cables with Low Initial Tension, John W. Leonard, 170

Finite elements; Panels; Structural engineering; Buildings; Buildings (apartment)
Influence of Joints in Panelized Structural Systems, Eric F.P. Burnett and R. Clement S. Rajendra, 465

Finite elements; Plates; Shear; Bending; Deformation; Engineering mechanics
Some Elements for Analysis of Plate Bending, Robert D. Cook, 590

Finite elements; Plates (structural members); Sandwich panels; Boundary conditions; Engineering mechanics
Finite Element Method for Elastic Plastic Plates, Ted Belytschko and Milan Velebit, 103

Finite elements; Porous media flow; Wave propagation; Dynamics; Engineering mechanics
Variational Formulation of Dynamics of Fluid-Saturated Porous Elastic Solids, Jamshid Ghaboussi and Edward L. Wilson, 425

Finite elements; Prestressing; Roofs; Stiffness methods; Structural engineering; Cables (ropes); Computation
Large Deflection Analysis of Prestressed Networks, John H. Argyris and Dieter W. Scharpf, 185

Finite elements; Soil mechanics; Strains; Stresses; Bearing capacity; Deformation
Finite Element Analysis of Strain-Softening Clay, Kaare Hoeg, 141

Finite elements; Stresses; Structural engineering; Deformation; Elastic properties
Finite Element Approach to Plane Microelasticity, Mohammed H. Baluch, John E. Goldberg and Severino L. Koh, 461

Finite elements; Structural engineering; Vibration; Dams; Dams (concrete); Dams (gravity); Earthquakes
Behavior of Koyna Dam - Dec. 11, 1967 Earthquake, Sarjit S. Saini, Jai Krishna and Anjur R. Chandrasekaran, 319

Fire fighting; Flow resistance; Pipe flow; Polymers; Sanitary engineering; Additives; Drag
Drag Reduction Application in Fire Fighting Systems, Hillel Rubin, 149

Fire protection; Fire resistance; Optimization; Probability theory; Structural engineering; Buildings
Optimum Fire Resistance of Structures, T. T. Lie, 97

Fire protection; Foundations; Pile driving; Reclamation; Soil mechanics; Subsidence; Fills
Industry Builds on a Refuse Dump, Hans J. Pfister, 487

Fire protection; Structural engineering; Columns (supports)
Steel Column Buckling Under Thermal Gradients, Charles G. Culver, 414

Fire resistance; Optimization; Probability theory; Structural engineering; Buildings; Fire protection
Optimum Fire Resistance of Structures, T. T. Lie, 97

Fire safety; Hyperbolic parabolic shells; Shells (structural forms); Concrete (post-tensioned); Concrete (prestressed)
Record Concrete Shell Roof Featured in Coliseum, Y. C. Yang, 275

Fish; Florida; Locks (waterways); Navigation; Waterways; Canals; Design; Ecology; Environmental engineering
Design Versus Ecology in St. Johns and Indian Rivers, Harold A. Scott, 475

Fishkill; Nuclear electric power generation; Powerplants; Sanitary engineering; Temperature; Thermal shock; Water pollution; Bioassay; Estuaries
Parameters Necessary for Analyzing Thermal Bioassays, Robert D. Smith, 569

Fixed structures; Hinged structures; Parabolic bodies; Torque; Arches; Buckling
Lateral-Torsion Buckling of Parabolic Arches, Frank J. Tokarz and Raghbir S. Sandhu, 280

Flexible pavements; Highway engineering; Lime; Soil stabilization; Subgrades; Transportation; Construction; Construction procedure
Deep-Plow Lime Stabilization for Pavement Construction, Marshall R. Thompson, 107

Flexible pavements; Highway engineering; Pavements; Shrinkage; Shrinkproofing; Transportation; Cracking
Cracking Mechanism of Flexible Pavements, Jacob Uzan, Moshe Livneh and Elisha Shklarsky, 16

Flexural strength; Structural engineering; Bauschinger effect; Beams (supports); Columns (supports); Concrete (reinforced)
Reinforced Concrete Members with Cyclic Loading, Robert Park, Dudley Charles Kent and Richard A. Sampson, 310

Flocculants; Flocculating; Flocculation; Sanitary engineering
Floc Breakup in Turbulent Flocculation Processes, Denny S. Parker, Warren J. Kaufman and David Jenkins, 164

Flocculating; Flocculation; Sanitary engineering; Flocculants
Floc Breakup in Turbulent Flocculation Processes, Denny S. Parker, Warren J. Kaufman and David Jenkins, 164

Flocculating; Sanitary engineering; Stabilization; Algae; Chlorination
Disinfection of Algal Laden Waters, Wayne F. Echelberger, Jr., Joseph L. Pavoni, Philip C. Singer and Mark W. Tenney, 91

Flocculation; Sanitary engineering; Flocculants; Flocculating
Floc Breakup in Turbulent Flocculation Processes, Denny S. Parker, Warren J. Kaufman and David Jenkins, 164

Flood control; Flood protection; Floods; Floods; Rivers; Building codes
Pullman Tackles its Flooding Problems, Howard D. Copp, 360

Flood control; Floods; Netherlands; New Jersey; Savannas; Shore protection; Waves; Dikes; Dunes
Best Shore Protection: Nature's Own Dunes, Ian McHarg, 400

Flood control; Golf courses; Storm runoff
Flood Channel Doubles as Golf Course, Clifford C. Hood, 238

Flood control; Hydraulics; Hydroelectric power; Irrigation; Low-flow augmentation; Multiple purpose projects; Optimization; Recreation; Water resources
Multireservoir Optimization Model, James S. Windsor and Ven Te Chow, 532

Flood control; Hydraulics; Hydrology; Statistical analysis; Benefit-cost ratios; Economic analysis
Bias in Computed Flood Risk, Clayton H. Hardison and Marshall E. Jennings, 188

Flood control; Hydraulics; Land use; Zoning; Computer programs; Economic analysis
Role of Economics in Planning Flood Plain Land Use, L. Douglas James, 314

Flood control; Hydraulics; Transportation; Urban planning; Water management (applied)
Effect of Transportation Planning on Flood Plain Management, Thomas M. Lee, 178

Flood control; Hydroelectric power generation; Multiple purpose reservoirs; Tennessee Valley Authority; Water supply; Environmental engineering
Impact of Multiple-Purpose Reservoir System on Regional Environment, Edward H. Lesesne, 370

Flood control; Management control reports; Professional activities; Simulation; Computerized simulation; Cost control; Financing
Flood Control Developed and Operated with Simulation, John M. Tellemer, 154

Flood control; Open channel flow; Professional activities; Social needs; Environmental engineering
Public Participation in Environmental Design of Flood Control Channels, Phillip F. Dunn, Jr., 432

Flood control; Pipelines; Canals; Cofferdams; Concrete (reinforced); Culverts; Erosion
New Culvert Carries Creek Underneath Canal, Alfred R. Pagan, 440

Flood forecasting; Flood frequency; Floods; Hydraulics; Rainfall; Statistical analysis
Floods Predicted From Rainfall Frequencies, Lee Robinson and Theodore T. Williams, 517

Flood frequency; Flood hydrographs; Floods; Flow distribution; Hydraulics
Two-Distribution Method for Flood Frequency Analysis, Krishan P. Singh and Robert A. Sinclair, 100

Flood frequency; Floods; Hydraulics; Rainfall; Statistical analysis; Flood forecasting
Floods Predicted From Rainfall Frequencies, Lee Robinson and Theodore T. Williams, 517

Flood hydrographs; Floods; Flow distribution; Hydraulics; Flood frequency
Two-Distribution Method for Flood Frequency Analysis, Krishan P. Singh and Robert A. Sinclair, 100

Flood hydrographs; Hydraulics; Hydrology; Kinematics; Models; Overland flow; Rational formula
Kinematic Wave Nomograph for Times of Concentration, Robert M. Ragan and J. Obiukwu Duru, 506

Flooding; Lakes; Remote sensing; Streams; Surveying; Water pollution; Water resources; Aerial photography
Aerial Photography for Water Resource Studies, Ralph W. Kiefer and James P. Scherz, 149

Flood protection; Floods; Floods; Rivers; Building codes; Flood control
Pullman Tackles its Flooding Problems, Howard D. Copp, 360

Floods; Floods; Rivers; Building codes; Flood control; Flood protection
Pullman Tackles its Flooding Problems, Howard D. Copp, 360

Floods; Flow distribution; Hydraulics; Flood frequency; Flood hydrographs
Two-Distribution Method for Flood Frequency Analysis, Krishan P. Singh and Robert A. Sinclair, 100

Floods; Hydraulics; Hydrology; Land use; Legislation; Municipal engineering; Professional practice; Runoff; Subdivisions; Urban planning; Waterways (watercourses); Drainage
An Engineer Looks at Drainage Law, Alfred R. Pagan, 511

Floods; Hydraulics; Hydrology; Small watersheds; Digital simulation
Flood Frequency Estimating Techniques for Small Watersheds, George Fleming and Delbert D. Franz, 23

Floods; Hydraulics; Rainfall; Statistical analysis; Flood forecasting; Flood frequency
Floods Predicted From Rainfall Frequencies, Lee Robinson and Theodore T. Williams, 517

Floods; Hydraulics; Rivers; Channels (waterways); Computation; Diffusion
Diffusion Solution To Flows with Upstream Control, Alex J. Sutherland and Alistair G. Barnett, 537

Floods; Hydrology; Irrigation; Mathematical models
Border Irrigation Advance and Ephemeral Flood Waves, Roger E. Smith, 370

Floods; Netherlands; New Jersey; Savannas; Shore protection; Waves; Dikes; Dunes; Flood control
Best Shore Protection: Nature's Own Dunes, Ian McHarg, 400

Floods; Rivers; Building codes; Flood control; Flood protection; Floods
Pullman Tackles its Flooding Problems, Howard D. Copp, 360

Floors; Fourier series; Plates (structural members); Structural engineering; Bridge decks; Bridges (orthotropic); Bridges (structures)
Rapid Design of Orthotropic Floor Beams, Peter G. Perry and Conrad P. Heins, Jr., 526

Floors; Height; Tall buildings; Building materials; Cost analysis; Dimensions; Economics
The Economics of High-Rise Apartment Buildings of Alternate Design Configuration, Richard D. Steyert, 387

Floors; Modular structures; Modules; Systems management; Concrete (precast)
Floor-Ceiling System Features Precast Concrete Units, Jerome S.B. Iffland, 186

Floors; Structural engineering; Timber construction; Wooden structures; Beams (supports); Buckling
Lateral Stability of Beam and Deck Structure, Paul M. Jenkinson and John J. Zahn, 181

Florida; Lakes; Multivariate analysis; Sanitary engineering; Water quality; Environmental engineering; Eutrophication
Eutrophication Analysis: A Multivariate Approach, Earl E. Shannon and Patrick L. Brezonik, 237

Florida; Locks (waterways); Navigation; Waterways; Canals; Design; Ecology; Environmental engineering; Fish
Design Versus Ecology in St. Johns and Indian Rivers, Harold A. Scott, 475

Flow; Laboratory tests; Recession curves
Recession Flow in Surface Irrigation, I-pai Wu, 116

Flow; Sanitary engineering; Shear flow; Velocity distribution; Water pollution; Diffusion; Dispersion; Estuaries
Velocity Profiles and Dispersion in Estuarine Flow, Burton A. Segall and Erik R. Gidlund, 435

Flow characteristics; Fluid flow; Hydraulics; Jets; Shear flow; Two phase flow
Turbulent Compound Annular Shear Layers, Nallamuthu Rajaratnam and B. S. Pani, 350

Flow control; Fluid flow; Gates; Hydraulics; Pressure head; Water pressure
Reattaching Flow Downstream of Leaf Gate, Rangaswami Narayanan and Alan J. Reynolds, 301

Flow distribution; Hydraulic control; Open channel flow; Sanitary engineering; Water flow
Hydraulic Control for Flow Distribution, Kuan M. Yao, 271

Flow distribution; Hydraulics; Flood frequency; Flood hydrographs; Floods
Two-Distribution Method for Flood Frequency Analysis, Krishan P. Singh and Robert A. Sinclair, 100

Flow distribution; Hydraulics; Irrigation; Irrigation canals; Surface irrigation; Water distribution (applied)
Distribution Channels with Multiple Outlets, William E. Hart and John Borelli, 356

Flow measurement; Flowmeters; Irrigation; Open channel flow; Overfalls
Free Overfall As Flow Measuring Device, Sebastian W. Bauer and Walter H. Graf, 12

Flow measurement; Hydraulic models; Hydraulics; Open channel flow; Broad-crested weirs
Brink Depth for Trapezoidal Broad-Crested Weir, Birendra N. Neogy, 582

Flow measurement; Hydraulics; Weirs; Broad-crested weirs; Control structures
Characteristics of Flow Weirs of Finite Crest Width, Singamsetti Surya Rao and Manoj Kumar Shukla, 42

Flowmeters; Irrigation; Open channel flow; Overfalls; Flow measurement
Free Overfall As Flow Measuring Device, Sebastian W. Bauer and Walter H. Graf, 12

Flow nets; Hydraulics; Seepage; Conformal mapping
Approximate Solution to Flow Problems Under Dams, Demetrious G. Christoulas, 84

Flow patterns; Freeze-thaw cycle; Hydraulics; Ice; Rivers; Stability; Thermal conductivity
Ripples on Underside of River Ice Covers, George D. Ashton and John F. Kennedy, 470

Flow profiles; Hydraulic jump; Pipe flow; Computers; Culverts; Digital computers
Digital Computers in Circular Culvert Design, Bobby E. Price and Frank D. Masch, 369

Flow rate; Hot film anemometers; Hydraulics; Turbulence; Covariance
Measurement of Velocity-Concentration Covariance, Raul S. McQuivey and Thomas N. Keefer, 459

Flow rate; Hydraulic jump; Hydraulics; Inflow; Turbulence; Water flow; Boundary shear
Effects of Inflow Condition on Hydraulic Jump, Hans J. Leutheusser and Viswanathan C. Kartha, 401

Flow resistance; Fluid flow; Shear stress; Turbulence; Axial flow; Boundary layer; Engineering mechanics
Helical Flow Through Concentric Annulus, M. H. Abdul Khader and H. Suresh Rao, 231

Flow resistance; Friction; Head losses; Hydraulics; Nonuniform flow; Open channel flow; Overland flow; Rainfall; Water flow
Resistance Coefficients for Steady Spatially Varied Flow, Ben Chie Yen, Harry G. Wenzel, Jr. and Yong Nam Yoon, 415

Flow resistance; Hydraulics; Laminar flow; Orifices; Pipe flow; Coefficients
Orifice Losses for Laminar Approach Flow, Nagar S. Lakshmana Rao and Kalambur Sridharan, 556

Flow resistance; Overland flow; Runoff; Water flow
Obtaining Overland Flow Resistance by Optimization, David L. Schreiber and Donald L. Bender, 196

Flow resistance; Pipe flow; Polymers; Sanitary engineering; Additives; Drag; Fire fighting
Drag Reduction Application in Fire Fighting Systems, Hillel Rubin, 149

Fluid flow; Gates; Hydraulics; Pressure head; Water pressure; Flow control
Reattaching Flow Downstream of Leaf Gate, Rangaswami Narayanan and Alan J. Reynolds, 301

Fluid flow; Heated water; Hydraulics; Jets; Lakes; Rivers; Thermoelectric power generation; Environmental engineering; Finite element method
Hydrothermal Analysis by Finite Element Method, Larry A. Loziuk, James C. Anderson and Ted Belytschko, 559

Fluid flow; Hydraulic radius; Linings; Pipelines; Power; Pressure tunnels; Tunnels; Velocity; Water; Water flow; Canals; Construction; Financing
Aqueducts for the Least Cost Conveyance of Water, Nephi A. Christensen, 46

Fluid flow; Hydraulics; Hydrodynamics; Turbulence; Vibration; Coefficients
Turbulence Effects On Drag of Sharp-Edged Bodies, John A. Roberson, Chi Yu Lin, Scott G. Rutherford and Marvin D. Stine, 386

Fluid flow; Hydraulics; Jet flow; Mathematics; Temperature; Turbulence; Buoyancy
Buoyant Jets with Three-Dimensional Trajectories, Eric Hirst, 563

Fluid flow; Hydraulics; Jets; Laminar flow; Turbulent boundary layer
Appearance of Unstable Buoyant Jet, Habib O. Anwar, 354

Fluid flow; Hydraulics; Jets; Shear flow; Two phase flow; Flow characteristics
Turbulent Compound Annular Shear Layers, Nallamuthu Rajaratnam and B. S. Pani, 350

Fluid flow; Hydraulics; Linear differential equations; Network analysis; Pipe flow
Hydraulic Network Analysis Using Linear Theory, Don J. Wood and Carl O.A. Charles, 366

Fluid flow; Hydraulics; Nappe; Parabolas; Spillways; Variations; Curvature
Flow Over Rounded Spillways, Kamil H.M. Ali, 163

Fluid flow; Hydraulics; Overflow; Stratified flow
Flow of Layered Fluid Over Broad Crested Weir, Ian R. Wood and K. K. Lai, 108

Fluid flow; Hydraulics; Reaeration; Turbulence
Wind Shear-Turbulence and Reaeration Coefficient, Aziz F. Eloubaidy and Erich J. Plate, 111

Fluid flow; Hydraulics; Research; Skin friction; Transition flow; Turbulence
Experiments on Plane Couette Flow, Hans J. Leutheusser and Vincent H. Chu, 7

Fluid flow; Hydraulics; Salinity; Two phase flow; Computation; Density; Estuaries
Numerical Computation of Stratified Nearly Horizontal Flows, John P. Grubert and Michael B. Abbott, 530

Fluid flow; Hydraulics; Spatial distribution; Weirs; Discharge coefficients
Spatially Varied Flow Over Side-Weirs, Kanakatti Subramanya and Subhash Chandra Awasthy, 84

Fluid flow; Hydrodynamics; Seepage; Dams; Engineering mechanics
Inverse Solution to Three-Dimensional Flows, Roland W. Jeppson, 374

Fluid flow; Shear stress; Turbulence; Axial flow; Boundary layer; Engineering mechanics; Flow resistance
Helical Flow Through Concentric Annulus, M. H. Abdul Khader and H. Suresh Rao, 231

Fluid flow; Transmission lines; Turbulence; Vibration; Wind (meteorology); Aerodynamics; Engineering mechanics
Galloping Oscillations of Prismatic Structures, Milos Novak, 50

Fluidized bed processing; Sanitary engineering; Sewage treatment; Water filters; Water treatment; Filters; Filtration
Backwashing of Granular Water Filters, Thomas R. Camp, S. David Graber and Gerard T. Conklin, 143

Fluid mechanics; Friction; Hydraulics; Inlets (waterways); Jets; Meteorology; Momentum; Tornadoes; Vortices; Air entrainment; Drains; Dust storms; Engineering mechanics
Experiments on Unstable Vortices, Enzo Levi, 249

Fluid mechanics; Hydraulics; Engineering education
Fluid Mechanics Teaching and Research: A View from a Dean's Office, Hunter Rouse, 287

Fluid mechanics; Hydraulics; Planning; Research
Research and Planning in Fluid Mechanics, Stephen J. Kline, 281

Flumes; Hydraulics; Irrigation; Measuring instruments; Open channel flow; Drainage
Generalized Discharge Relations for Cutthroat Flumes, Gaylord V. Skogerboe, Ray S. Bennett and Wynn R. Walker, 601

Flumes; Hydraulics; Pipe flow; Rivers; Sediments; Bed load; Channels
Friction Factors in Solid Material Laden Systems, Ertan R. Acaroglu, 241

Fly ash; Frost action; Soil mechanics; Soil stabilization; Compaction; Fills
Engineering Properties of Compacted Fly Ash, Donald H. Gray and Yen-Kuang Lin, 253

Fly ash; Paper mills; Permeability; Sanitary engineering; Sludge; Sludge disposal; Ashes; Drainage
Permeability of High Ash Papermill Sludge, Orlando B. Andersland and Robert W. Laza, 576

Fly ash; Power; Shear strength; Bearing values; Compaction tests; Consolidation; Embankments; Field density
Fly Ash as Structural Fill, Anthony M. DiGioia and William L. Nuzzo, 175

Focal length; Photogrammetry; Probability theory; Random error; Standard deviation; Surveying; Variance (statistics); Weighting functions; Distribution
Theoretical Weighting of Photogrammetric Equations, Charles Kendall Paul, 550

Folded plates; Fragmented materials; Loads (forces); Structural engineering; Concrete (reinforced)
Safe Limit Loading of Folded Plate Structures, Morris N. Fialkow, 483

Folded plates; Honeycomb cores; Sandwich panels; Structural engineering; Aluminum
Failure Modes of Folded Sandwich Panel Roofs, Paul P. Fazio, 261

Folded plates; Interchanges; Orthotropic plate; Skew bridges; Stiffness methods; Structural analysis; Structural engineering; Bridges (box girder); Computer programs; Finite elements
Cellular Structures of Arbitrary Plan Geometry, Kaspar J. William and Alexander C. Scordelis, 315

Folded plates; Models; Shells (structural forms); Engineering mechanics
Experiments with Elastic Folded Plate Models, Stuart E. Swartz and Vernon H. Rosenbraugh, 325

Folded plates; Stiffness methods; Structural engineering; Buildings; Curved beams
Analysis of Curved Folded Plate Structures, Christian Meyer and Alexander C. Scordelis, 20

Folded plates; Strains; Structural engineering; Bridges (structures); Concrete (reinforced); Field tests
Model and Prototype Studies of Box Girder Bridge, Raymond Eugene Davis, Charles F. Scheffey, Gary A. Castleton and Evan E. Evans, 70

Footings; Foundations; Shielding; Vibration; Dynamics; Engineering mechanics
Shear Waves in Plane Infinite Structures, John Lysmer and Gunter Waas, 89

Footings; Foundations; Soil mechanics; Bearing capacity; Cohesionless soils
Bearing Capacity Theory From Experimental Results, A. Verghese Chummar, 561

Footings; Settlement (structural); Calculations; Consolidation
Simplified Method to Calculate Settlement Beneath Footings, Max L. Calhoon, 110

Forced vibration; Grid systems; Moments; Vibration; Deflection; Dynamics; Engineering mechanics
Dynamic Field Analysis of Torsionless Grids, Hota V.S. GangaRao and J. C. Smith, 330

Forced vibration; Harmonics; Nonlinear systems; Vibration; Engineering mechanics
Transverse Beam Vibration Nonlinear Constraint, Mohammed Ali Dokainish and Rajnish Kumar, 556

Forecasting; Bridges (concrete); Bridges (piers); Earthquakes; Engineering mechanics
Seismic Response Predictions of Bridge Pier, Robin Shepherd and Richard E. McConnel, 256

Forecasting; Functions (mathematics); Irrigation; Computers; Dimensional analysis; Field data
Prediction of Irrigation Advance Function by Dimensional Analysis, G. Sastry and S. C. Agarwal, 223

Forecasting; Highways; Mathematical models; North carolina; Regional analysis; Regional planning; Travel
Forecasting Regional Travel on Regional Highway Network, Arun Chatterjee and Paul D. Cribbins, 162

Forecasting; Land use; Population; Statistical analysis; Statistical distributions; Transportation management
Statistical Decision in Forecasting Planning Data, Kumares C. Sinha, 547

Forecasting; Legislation; Sanitary engineering; Water law; Water resources
Can Engineering Forecasters Effect Water Law?, George W. Reid, E. Edd Pritchett and Susan Pritchett, 22

Forecasting; Loads (forces); Plates; Structural engineering; Ultimate strength; Axial compression; Buckling
Strength Predictions of Plates in Uniaxial Compression, Robert M. Korol and Archibald N. Sherbourne, 444

Forecasting; Mathematical models; Planning; Population growth; Design; Environmental engineering
Stochastic Population Projection at Design Level, Peter M. Meier, 557

Forecasting; Mathematical models; Regression analysis; Traffic surveys; Transportation; Urban planning
Time Stability of Zonal Trip Production Models, Norman Ashford and Frank M. Holloway, 535

Forecasting; Modal split; Traffic surveys; Transportation models; Urban planning; Behavior
Behavioral Models in Transportation Planning, Frank E. Horton, 234

Forecasting; Models; Systems engineering; Water resources; California; Computers
Optimum Operations Model for Shasta-Trinity System, Dan M. Fults and Lawrence F. Hancock, 450

Forecasting; Municipal engineering; Planning; Sanitary engineering; Buildings (commercial); Field tests
Empirical Analysis of Commercial Solid Waste Generation, Truett V. DeGeare and Jerry E. Ongerth, 112

Forecasting; Professional activities; Water resources; Water reuse; Water use; Civil engineering
Water Resources in the Future: Directions and Prospects, Joseph L. Fisher, 407

Forecasting; Social needs; Telecommunication; Transportation; Urban development; Urban planning; Buildings (office); Communication
Communications Substitutes for Intra-Urban Travel, Richard C. Harkness, 307

Foreign engineering; Great Britain; Management; Metric system; Planning; Standards; Training; Construction industry; Engineering education; Engineers
Metrication Progress in the United Kingdom, Gordon Bowen, 523

Foreign engineering; Housing; Urban planning; ASCE (National Affairs); ASCE (Policy); Buildings (codes)
The Challenge to Civil Engineering, Dennis Warner, 339

Foreign engineering; Management; Manpower; Planning; Construction; Construction equipment; Construction materials; Construction methods; Construction planning; Contracting
Construction Planning in South East Asia, Omar E. Rood and John L. Richards, 585

Foreign projects; History; Legislation; Measurement; Metric system; United States government
Metrication in the United States, a Status Report, L. E. Barbrow, 555

Forest land; Idaho; Organic matter; Reservoirs; Sediment deposits; Watersheds; Density
Volume Weight of Reservoir Sediment in Forested Areas, Walter F. Megahan, 435

Foundation investigations; Foundations; Land use; Buildings; Design
Sample Approaches to Optimum Use of Marginal Lands, William W. Moore and Nicholas Chryssafopoulos, 207

Foundation investigations; Foundations; Soil properties; Field tests
Subsurface Investigation for Design and Construction of Foundations of Buildings: Part I, Task Committee for Foundation Design Manual of the Committee on Shallow Foundations of the Soil Mechanics and Foundations Division, William F. Swiger, Chmn., 302

Foundation investigations; Foundations; Soil properties; Field tests
"Subsurface Investigation for Design and Construction of Foundations of Buildings: Part III and IV," by the Task Committee for Foundation Design Manual of the Committee on Shallow Foundations of the Soil Mechanics and Foundations Division, William F. Swiger, Chmn., 403

Foundation investigations; Foundations; Soil properties; Terminology; Field tests
Subsurface Investigations for Design and Construction of Foundations of Buildings: Appendices A and B, Task Committee for Foundation Design Manual of the Committee on Shallow Foundations of the Soil Mechanics and Foundations Division, William F. Swiger, Chmn., 413

Foundation investigations; Foundations; Soil properties; Terminology; Tests; Field tests
Subsurface Investigation for Design and Construction of Foundations of Buildings: Part II, Task Committee for Foundation Design Manual of the Committee on Shallow Foundations of the Soil Mechanics and Foundations Division, William F. Swiger, Chmn., 309

Foundations; Frames; Soil mechanics; Soil-structure interaction; Structural engineering; Elastic properties
Structure-Foundation Interaction Analyses, Ian K. Lee and Peter T. Brown, 554

Foundations; Geologic investigations; Grouting; Iraq; Philippines; Venezuela; Weathering; Abutments; Dams (rockfill)
Foundation and Abutment Treatment for Rockfill Dams, Richard C. Acker and Jack C. Jones, 494

Foundations; Geology; Dams; Dams (earth); Embankments
Treatment of High Embankment Dam Foundations, Fred C. Walker and R. W. Bock, 491

Foundations; Geology; Grouting; Jets; Rock fills; Soil mechanics; Abutments; Cutoffs; Dams (rockfill)
Foundation Practices for Talbingo Dam, Australia, B. J. Wallace and J. I. Hilton, 492

Foundations; Geology; Grouting; Seepage; Soil mechanics; Topography; Abutments; Construction
Current Practice in Abutment and Foundation Treatment, Harris H. Burke, Charles S. Content and Richard L. Kulesza, 489

Foundations; Geology; Pile driving; Piles (foundations); Pollution; Transportation; Bridges (structures); Buses (vehicles)
First U.S. Center-City People Mover, Debuts in Morgantown, W. Va., Frank E. Lo Presti, 499

Foundations; Grillage footings; Pile foundations; Underpinning
Underpinning Massive Structures, Charles E. Mergentime, 123

Foundations; Grout curtains; Grouting; Asphalt emulsions; Cationic asphalt emulsions; Cement grouts
Experimental Cationic Asphalt Emulsion Grouting, Lloyd R. Gebhart, 446

Foundations; Grouting; Permeability; Plastics; Polyurethane resins; Soil mechanics
Polyurethane Foamed Plastics in Soil Grouting, Ted S. Vinson and James K. Mitchell, 321

Foundations; Grouting; Settlement (structural); Abutments; Canada; Dams (earth)
Foundations and Abutments -- Bennet and Mica Dams, Harold K. Pratt, Robert C. McMordie and Robert M. Dundas, 493

Foundations; Grouting; Soil mechanics; Blasting; Dams; Embankments; Excavation
Foundation Treatment for Embankment Dams on Rock, Elmer W. Stroppini, Donald H. Babbitt and Henry E. Struckmeyer, 493

Foundations; Half Space; Sliding; Values; Vibration; Embedding
Coupled Sliding and Rocking of Embedded Foundations, Raymond J. Krizek, Dinesh C. Gupta and Richard A. Parmelee, 582

Foundations; Half Space; Soil mechanics
Tilting Foundations, Gerd F. Weissmann, 152

Foundations; Hammers; Models; Pile drivers; Pile driving; Construction
Performance of Pile Driving Hammers, Frank Rausche and George G. Goble, 475

Foundations; Heat of hydration; Reinforcement; Structural engineering; Cements; Concrete; Concrete (reinforced); Dams; Distribution systems
Temperature Rises in Low-Heat Cement Concrete, Barry P. Hughes, 43

Foundations; Highway engineering; Pavements; Rigid pavements; Transportation; Elastic foundations
Advanced Analysis of Rigid Pavements, Sue K. Wang, Michel Sargious and Yau Kai Cheung, 36

Foundations; Highways; Prefabrication; Slabs; Tendons; Transportation; Bridges (structures); City planning; Concrete (post-tensioned); Concrete (precast)
Prefabricated Highways, William Zuk, 204

Foundations; Hurricanes; Piers; Storms; Stresses; Wind bracing; Wooden structures; Coastal engineering; Construction; Design
Wood Structures Can Resist Hurricanes, Gerald E. Sherwood, 417

Foundations; Hydraulic models; Hydraulics; Materials tests; Rock mechanics; Tests; Dams; Dams (arch); Dams (concrete)
Auburn Dam -- World's Longest Arch Dam, Alfred T. Lewis, 445

Foundations; Hydraulics; Permeability; Stability; Structural stability; Uplift pressure
Boundary Effects on Stability of Structures, A. S. Chawla, 481

Foundations; Installation; Power; Power lines; Railroads; Transmission lines; Blasting; Costs; Excavation
Powerline Foundations Installed along Railroad Tracks, Roger S. Chapman, 462

Foundations; Isotropy; Soil mechanics; Structural engineering; Beams (supports); Contact pressure
Behavior of Crossed Beams on Elastic Foundations, Ami Glassman, 125

Foundations; Land use; Buildings; Design; Foundation investigations
Sample Approaches to Optimum Use of Marginal Lands, William W. Moore and Nicholas Chryssafopoulos, 207

Foundations; Lateral forces; Loading; Pile foundations; Pile groups; Batter piles
Practical Formulas for Loads and Movements in Battered Pile Foundations (without a computer), Murray I. Brill, 284

Foundations; Lateral pressure; Pile lateral loads; Piles (foundations); Soil mechanics; Design
Behavior of Laterally Loaded Piles: III -- Socketed Piles, Harry G. Poulos, 243

Foundations; Mathematical models; Nuclear power plants; Nuclear reactors; Power; Seismic properties; Soil-structure interaction
Interaction of Soil and Power Plants in Earthquakes, Jeremy Isenberg and Samy A. Adham, 419

Foundations; Offshore structures; Soil mechanics; Embankments
Embankment Construction On Yielding Sea Bottom, Aris C. Stamatopoulos and Panaghiotis C. Kotzias, 391

Foundations; Permeability; Seepage; Weirs
End Effects in Models for Seepage Below Weirs, S. Muthukumaran and V. C. Kulandaiswamy, 216

Foundations; Piers; Piles (foundations); Settlement (structural); Soil mechanics; Bearing capacity; Bridges (piers)
Load Settlement Prediction for Piles and Piers, Harry G. Poulos, 439

Foundations; Pile driving; Pile foundations; Pile structures; Soil mechanics; Soil resistivity; Bearing capacity
Soil Resistance Predictions from Pile Dynamics, Frank Rausche, Fred Moses and George G. Goble, 481

Foundations; Pile driving; Pile foundations; Settlement (structural); Soil mechanics; Terzaghi lecture; Dams (earth); Engineering education
The Integrated Civil Engineering Project, T. William Lambe, 337

Foundations; Pile driving; Reclamation; Soil mechanics; Subsidence; Fills; Fire protection
Industry Builds on a Refuse Dump, Hans J. Pfister, 487

Foundations; Plates; Elasticity (mechanical); Engineering mechanics
Viscoelastic Plate on Poroelastic Foundation, Eugene L. Marvin, 395

Foundations; Reports; Abutments; Dams (earth); Dams (embankment); Dams (rockfill)
Foundation and Abutment Treatment for High Embankment Dams on Rock by the Committee on Embankment Dams and Slopes of the Soil Mechanics and Foundations Division, H. Bolton Seed, Chmn., 490

Foundations; Rock mechanics; Seepage; Soil mechanics; Abutments; Dams; Dams (embankment)
Abutment and Foundation Treatment for High Embankment Dams on Rock, Reginald A. Barron, 491

Foundations; Settlement (structural); Shear modulus; Soil mechanics; Bearing capacity
Initial Settlement of Structures on Clay, David J. D'Appolonia, Harry G. Poulos and Charles C. Ladd, 43

Foundations; Settlement (structural); Soil mechanics; Construction
Heave and Lateral Movements Due to Pile Driving, Donald J. Hagerty and Ralph B. Peck, 73

Foundations; Shielding; Vibration; Dynamics; Engineering mechanics; Footings
Shear Waves in Plane Infinite Structures, John Lysmer and Gunter Waas, 89

Foundations; Soil mechanics; Bearing capacity; Cohesionless soils; Footings
Bearing Capacity Theory From Experimental Results, A. Verghese Chummar, 561

Foundations; Soil mechanics; Vibration; Dynamics
Vertical Vibration of Embedded Footings, Milos Novak and Youpele O. Beredugo, 568

Foundations; Soil properties; Field tests; Foundation investigations
Subsurface Investigation for Design and Construction of Foundations of Buildings: Part I, Task Committee for Foundation Design Manual of the Committee on Shallow Foundations of the Soil Mechanics and Foundations Division, William F. Swiger, Chmn., 302

Foundations; Soil properties; Field tests; Foundation investigations
"Subsurface Investigation for Design and Construction of Foundations of Buildings: Part III and IV," by the Task Committee for Foundation Design Manual of the Committee on Shallow Foundations of the Soil Mechanics and Foundations Division, William F. Swiger, Chmn., 403

Foundations; Soil properties; Terminology; Field tests; Foundation investigations
Subsurface Investigations for Design and Construction of Foundations of Buildings: Appendices A and B, Task Committee for Foundation Design Manual of the Committee on Shallow Foundations of the Soil Mechanics and Foundations Division, William F. Swiger, Chmn., 413

Foundations; Soil properties; Terminology; Tests; Field tests; Foundation investigations
Subsurface Investigation for Design and Construction of Foundations of Buildings: Part II, Task Committee for Foundation Design Manual of the Committee on Shallow Foundations of the Soil Mechanics and Foundations Division, William F. Swiger, Chmn., 309

Foundations; Soil-structure interaction; Structural engineering; White noise; Earthquakes
Dynamic Soil-Structure Interaction, Mauricio A. Sarrazin, 338

Fourier analysis; Moment distribution; Plates (structural members); Structural engineering
Iterative Method for Solving Rectangular Plates, B. Sen, S. Sengupta and T. K. Nath, 113

Fourier series; Plates (structural members); Structural engineering; Bridge decks; Bridges (orthotropic); Bridges (structures); Floors
Rapid Design of Orthotropic Floor Beams, Peter G. Perry and Conrad P. Heins, Jr., 526

Fourier series; Rings; Static structural analysis; Deflection; Displacement; Engineering mechanics; Equilibrium
Linear Theory of Thin Rings, Harry E. Williams, 436

Fourier transformation; Mathematics; Systems engineering; Vibration; Computers; Dynamics; Earthquakes; Engineering mechanics; Filters
Dynamic Analysis by Extra Fast Fourier Transform, Jethro W. Meek and Anestis S. Veletsos, 218

Fractures; Safety factors; Steels; Strength; Stress analysis; Bridge design; Bridges (structures); Cracking (fracturing); Criteria; Failure
Fracture Mechanics, With High-Strength Steels A Must, Stanley T. Rolfe, 357

Fractures (materials); Concrete; Deformation; Engineering mechanics
Griffith Fracture Criterion and Concrete, Surendra P. Shah and Fred J. McGarry, 45

Fractures (materials); Offshore structures; Steels; Structural engineering; Tube joints; Welded joints; Welding; Fatigue (materials)
Fatigue Failure of Welded Tubular Joints, James M. Becker, William W. Gerberich and Jack G. Bouwkamp, 62

Fragmented materials; Loads (forces); Structural engineering; Concrete (reinforced); Folded plates
Safe Limit Loading of Folded Plate Structures, Morris N. Fialkow, 483

Framed structures; Sidesway; Stability; Structural engineering; Beam columns; Buckling
Approximate Determination of Frame Critical Loads, F. David Edmonds and Ian C. Medland, 161

Frames; Lateral stability; Stability; Structural engineering; Tall buildings; Buckling
Long-Wave Extensional Buckling of Large Regular Frames, Zdenek P. Bazant and M. Christensen, 504

Frames; Matrices (mathematics); Mechanics; Structural engineering; Vibration; Computation; Dynamics; Engineering
Convergence in Modal Synthesis, Stephen E. Johnson and Walter C. Hurty, 527

Frames; Plane structures; Plastic analysis; Strength; Structural engineering; Deformation; Elasto-plastic
Deformation Analysis of Elastic - Plastic Frames, Donald E. Grierson, 499

Frames; Plastic design; Skyscrapers; Structural engineering; Buildings; Computer programs
Storywise Plastic Design for Multistory Steel Frames, Leroy Z. Emkin and William A. Litle, 139

Frames; Plasticity; Quadratic equations; Stresses; Computer programming; Engineering mechanics; Equations
Elastic-Plastic Analysis by Quadratic Programming, Antone F. Sayegh and Moshe F. Rubinstein, 564

Frames; Plasticity; Steels; Structural engineering; Subassemblies; Buildings
Plastic Subassemblage Analysis for Unbraced Frames, J. Hartley Daniels and Le-Wu Lu, 409

Frames; Sidesway; Steel; Structural engineering; Tubes; Construction; Earthquakes
Perimetral Tube for 37-Story Steel Building, L. Agustin Mazzeo and Armin De Fries, 288

Frames; Soil mechanics; Soil-structure interaction; Structural engineering; Elastic properties; Foundations
Structure-Foundation Interaction Analyses, Ian K. Lee and Peter T. Brown, 554

Frames; Stability; Structural engineering; Beam columns; Buckling
Unbraced Multistory Steel Frames with Wind Load, E. Whitman Wright, 78

Frames; Stability; Structural engineering; Torsion; Walls; Buildings
Analysis of Three-Dimensional Structures, Jacobus H. Wynhoven and Peter F. Adams, 109

Frames; Stability; Structural engineering; Torsion; Walls; Buildings
Behavior of Structures Under Loads Causing Torsion, Jacobus H. Wynhoven and Peter F. Adams, 306

Frames; Structural analysis; Structural engineering; Buckling; Cantilevers
Buckling of Lateral Restrained Thin-Walled Cantilevers of Open Cross Section, Jacob Gluck and Menachem Gelbert, 451

Frames; Structural engineering; Dynamic structural analysis; Earthquakes
Dynamic Analysis of Staggered Truss Framing System, Raj P. Gupta and Subhash C. Goel, 352

France; Inland waterways; River regulation; River training; Thailand; Alluvial streams; Bank protection (waterways)
Development of Bottom Panels in River Training, Maurice Remillieux, 300

Freeways; Highway engineering; Highways; Maintenance; Pavements; Safety; Traffic engineering; Drainage
Current Practices in Highway Maintenance: A Reference List, Committee on Construction, Maintenance and Operation of Highways of the Highway Division., Walter E. Capper, Chmn., 260

Freeways; Highways; Multiple use; Right of way acquisition; Transportation; Urban transportation; Environments
Multiple Use of City Transportation Corridor, Harry R. Powell and F. G. Alden, 285

Freeze-thaw cycle; Hydraulics; Ice; Rivers; Stability; Thermal conductivity; Flow patterns
Ripples on Underside of River Ice Covers, George D. Ashton and John F. Kennedy, 470

Freezing; Noise reduction; Sewage disposal; Sewers; Subsurface investigations; Tunneling (excavation)
Subsurface Freezing Used In Tunneling, Charles P. Gail, 221

Freight terminals; Investments; Land use; Pipelines; Planning; Railroads; Regional planning; Terminal facilities; Transmission lines; Urban planning; Urban transportation; Waterways (transportation)
Restructuring Freight Transportation in Chicago, James Robert Blaze, 353

Freight terminals; Social values; Trucks; Urban development; Cargo transportation
Urban Commodity Flow - Suggested Research Projects, Warren B. Lovejoy, 554

Frequencies; Mathematical models; Vibration; Dynamics; Elastic foundations; Engineering mechanics
Vibrations of Elastically Connected Ring Systems, Vincent X. Kunukkasseril and K. Rami Reddy, 350

Frequency; Hydraulics; Matrices (mathematics); Pipelines; Resonance; Characteristics
Resonance in Pipes Having Variable Characteristics, M. Hanif Chaudry, 159

Frequency; Seismic design; Damping; Design; Engineering mechanics; Filters
Spectrum-Compatible Motions for Design Purposes, Nien-Chien Tsai, 184

Frequency distribution; Idaho; Irrigation; Water consumption; Evaporation; Evapotranspiration
Peak Water Requirements of Crops in Southern Idaho, James L. Wright and Marvin E. Jensen, 236

Frequency distribution; Irrigation; Climatology; Consumptive use (water); Evaporation; Evapotranspiration
Central California Evapotranspiration Frequencies, W. O. Pruitt, Sergius von Oettingen and D. L. Morgan, 251

Frequency distribution; Irrigation; Radiation; Advection; Evapotranspiration
Frequency of Potential Evapotranspiration Rates in Great Central Plains, Norman J. Rosenberg, 294

Friction; Head losses; Hydraulics; Nonuniform flow; Open channel flow; Overland flow; Rainfall; Water flow; Flow resistance
Resistance Coefficients for Steady Spatially Varied Flow, Ben Chie Yen, Harry G. Wenzel, Jr. and Yong Nam Yoon, 415

Friction; Hydraulics; Inlets (waterways); Jets; Meteorology; Momentum; Tornadoes; Vortices; Air entrainment; Drains; Dust storms; Engineering mechanics; Fluid mechanics
Experiments on Unstable Vortices, Enzo Levi, 249

Friction; Impact; Overland flow; Rainfall; Turbulence; Water flow; Drainage; Erosion
Mechanics of Sheet Flow Under Simulated Rainfall, Yong Nam Yoon and Harry G. Wenzel, Jr., 13

Friction; Sedimentation; Sediment transport; Amplitude; Bedding materials
Bed-Material Transport and Bed Forms, Marion R. Carstens and Hilmi D. Altinbilek, 273

Friction factor; Hydraulics; Open channel flow; Ripple marks; Alluvial deposits
Ripple and Dune Phases in a Narrowly Graded Sand, Christopher John Pratt and Kenneth V.H. Smith, 296

Friction piles; Loading tests; Pile bearing capacities; Pile foundations; Pile loading tests
Torque Shear Test For Cylindrical Friction Piles, Ulrich W. Stoll, 203

Frost action; Frost heave; Ice lenses; Permafrost; Pile foundations
Frost Heaving of Piles in Permafrost, James Allen and Robert W. Huck, 215

Frost action; Soil mechanics; Soil stabilization; Compaction; Fills; Fly ash
Engineering Properties of Compacted Fly Ash, Donald H. Gray and Yen-Kuang Lin, 253

Frost heave; Ice lenses; Permafrost; Pile foundations; Frost action
Frost Heaving of Piles in Permafrost, James Allen and Robert W. Huck, 215

Frozen soils; Soil mechanics; Stability criteria; Subsurface structures; Cavities; Creep
In Situ Creep Analysis of Room in Frozen Soil, Erik G. Thompson and Francis H. Sales, 464

Functions (mathematics); Irrigation; Computers; Dimensional analysis; Field data; Forecasting
Prediction of Irrigation Advance Function by Dimensional Analysis, G. Sastry and S. C. Agarwal, 223

Galvanizing; High strength bolts; Joints (junctions); Steels; Structural engineering; Fatigue (materials)
High Strength Bolted Galvanized Joints, D. J. Laurie Kennedy, 576

Gaming models; Management engineering; Refuse disposal; Sanitary engineering; Solid wastes; Decision making
Management Science and Gaming in Waste Management, Pran N. Wahi and Theodore I. Peterson, 476

Gas pipelines; Legislation; Natural gas; Transmission lines; Transportation; Utilities; Zoning; Costs; Engineering societies; Failure
Responsibility of Gas Utilities for Pipeline Safety, Carl T. Kallina, 148

Gates; Hydraulics; Jets; Turbulence; Boundaries; Boundary layer flow
Theoretical Analysis of Flow Past Leaf Gate, Rangaswami Narayanan, 320

Gates; Hydraulics; Pressure head; Water pressure; Flow control; Fluid flow
Reattaching Flow Downstream of Leaf Gate, Rangaswami Narayanan and Alan J. Reynolds, 301

Gates; Hydraulics; Spillways; Vibration; Design; Field tests
Spillway Gate Vibration on Arkansas River Dams, Tasso Schmidgall, 146

Gates; Ice; Ice control; Mississippi River; Waterways; Aeration; Backwater; Dams (movable); Dikes
Reducing Ice Formation at Navigation Dams, Henry W. Harich, 387

Gates; Sluice gates; Water flow; Coefficients; Engineering mechanics
Solution of Flow Under Sluice Gate, Yong K. Chung, 152

Geodesy; Surveying; Vector analysis; Aerial surveys; Computation
Three-Dimensional Forward and Inverse Computations, William E. Ball, Jr., 595

Geodetic surveys; Mapping; Natural resources; Photogrammetry; Space reconnaissance; Surveying; Television systems
Applications of Extraterrestrial Surveying and Mapping, Robert B. McEwen and David A. Tyler, 604

Geodetic surveys; Mapping; Reports; Surveys; Awards; Civil engineers; Engineering education
Status Report of Surveying and Mapping Division, William A. White, 121

Geologic investigations; Grouting; Iraq; Philippines; Venezuela; Weathering; Abutments; Dams (rockfill); Foundations
Foundation and Abutment Treatment for Rockfill Dams, Richard C. Acker and Jack C. Jones, 494

Geology; Dams; Dams (earth); Embankments; Foundations
Treatment of High Embankment Dam Foundations, Fred C. Walker and R. W. Bock, 491

Geology; Grouting; Jets; Rock fills; Soil mechanics; Abutments; Cutoffs; Dams (rockfill); Foundations
Foundation Practices for Talbingo Dam, Australia, B. J. Wallace and J. I. Hilton, 492

Geology; Grouting; Seepage; Soil mechanics; Topography; Abutments; Construction; Foundations
Current Practice in Abutment and Foundation Treatment, Harris H. Burke, Charles S. Content and Richard L. Kulesza, 489

Geology; Pile driving; Piles (foundations); Pollution; Transportation; Bridges (structures); Buses (vehicles); Foundations
First U.S. Center-City People Mover, Debuts in Morgantown, W. Va., Frank E. Lo Presti, 499

Geometry; Optimization; Structural engineering; Trusses; Automation; Computers; Design
Automated Design of Trusses for Optimum Geometry, Garret N. Vanderplaats and Fred Moses, 202

Geophysical prospecting; Seismic investigations; Shear modulus; Soil mechanics; Field tests
In Situ Shear Wave Velocity by Cross-Hole Method, Kenneth H. Stokoe, II and Richard D. Woods, 293

Germany; Roofs; Stadiums; Suspended structures; Cables (ropes)
Cable Suspended Roof for Munich Olympics, Fritz Leonhardt and Jorg Schlaich, 319

Ghana; Gravel; Laterites; Soil formation; Soil mechanics; Construction materials
Lateritic Gravel Evaluation For Road Construction, J. W.S. de Graft-Johnson, Harbhajan S. Bhatia and A. A. Hammond, 545

Girders; Loads (forces); Optimization; Costs; Design
Cost Optimization of Welded Plate Girders, Natarajan Annamalai, Albert D.M. Lewis and John E. Goldberg, 495

Girders; Shear strength; Structural engineering; Aluminum
Thin Aluminum Shear Webs, Maurice L. Sharp and John W. Clark, 5

Glass fibers; Roofs; Sandwich structures; Shells (structural forms); Structural engineering; Structural plastics; Computation; Construction procedure; Finite elements
Plastic Sandwich Buckle-Shell Structures, V. James Meyers, Dhamo T. Ramani and Mark E. Greenwood, 515

Glued joints; Laminated wood; Structural engineering; Wooden bridges; Bridges (decking); Bridges (structures)
FPL Timber Bridge Deck Research, Billy Bohannan, 169

Golf courses; Storm runoff; Flood control
Flood Channel Doubles as Golf Course, Clifford C. Hood, 238

Government; Institutions; Professional activities; Regional planning; Water quality control; Environmental engineering
Water Pollution Control Institutions, William Whipple, Jr., 215

Government; Maintenance; Montana; Concrete (post-tensioned); Concrete (reinforced); Construction; Consultants; Dams; Dams (concrete)
Montana Power Company's Dam Repair Program, Clifford L. Emmerling, 565

Government; Nitrogen oxides; Sanitary engineering; Water pollution; Water treatment plants; Biochemical oxygen demand
Implications of Nitrogenous BOD in Treatment Plant Design, Russell C. Mt. Pleasant and Warren Schlickenrieder, 82

Government; Pipelines; Safety; Standards; Transportation; Utilities
The State's Role in Gas Safety, Harold E. Shutt, 46

Government; Professional activities; Professional societies; Civil engineers; Ecology; Environmental engineering
Integrity and the Ecological Crisis, Myron Tribus, 227

Government; Research; Schools; Traffic surveys; Transportation; Community relations; Decision making; Disadvantaged groups
Transportation Research for Community Objectives, Arthur Saltzman, Sidney H. Evans, Alice E. Kidder and Florentine Sowell, 555

Government; Revenue; Urban planning; Urban renewal
HUD Sewer Policy in Urban Renewal Areas, Francis J. Blesso, 246

Government policies; Highway planning; Michigan; Revenues; Taxes; Transportation
Michigan Transportation in the Seventies, William C. Taylor, 510

Government policies; Professional activities; Research; ASCE (Activities); ASCE (Policy); ASCE (Research); Civil engineering
Goals of Civil Engineering Research -- Its Responsiveness to the Needs, Desires and Aspirations of Man, ASCE Committee on Research, Robert F. Baker, Chmn., 599

Grading (earthwork); Highway beautification; Highway engineering; Right of way acquisition; Esthetics
Esthetics in Highway Design, Donald Van Riper, 177

Grain sizes; Model studies; Rock fills; Shear strength; Soil mechanics; Triaxial tests
Evaluation of Properties of Rockfill Materials, N. Dean Marschi, Clarence K. Chan and H. Bolton Seed, 160

Granular materials; Mapping; Pressure; Surveying; Tidal effects; Tides; Elevation
Elevation Changes Due to Tides, Long Beach, Calif., Dale S. Kunitomi, 445

Graphs (charts); Hydraulics; Mannings equation; Pipe flow; Sanitary engineering; Smoothness; Coefficients
Manning's Coefficient for Smooth Pipes, Henry Liu, 312

Graphs (charts); Structural analysis; Beams (supports); Deflection
Design Aid for Deflection Calculation for a Uniformly Loaded Flexural Member, Thomas M. Chura, 114

Gravel; Hydraulic pressure; Leakage; Sanitary engineering; Sewage disposal; Sewage filtration; Sewers; Bedding materials
Sanitary Sewer Bedding Scored as Underdrain Conduit, Robert L. McFall, 240

Gravel; Laterites; Soil formation; Soil mechanics; Construction materials; Ghana
Lateritic Gravel Evaluation For Road Construction, J. W.S. de Graft-Johnson, Harbhajan S. Bhatia and A. A. Hammond, 545

Graving docks; Pennsylvania; Sheet piling; Shipbuilding; Waterways; Docks; Drydocks
1,200-Ft Graving Dock, Frederick E. Krauss and George H. Plude, 605

Gravity waves; Harbors; Breakwaters; Coastal engineering
Wave Defraction by Detached Breakwater, Michael Stiassnie and Gedeon Dagan, 265

Great Britain; Management; Metric system; Planning; Standards; Training; Construction industry; Engineering education; Engineers; Foreign engineering
Metrication Progress in the United Kingdom, Gordon Bowen, 523

Grid systems; Moments; Vibration; Deflection; Dynamics; Engineering mechanics; Forced vibration
Dynamic Field Analysis of Torsionless Grids, Hota V.S. GangaRao and J. C. Smith, 330

Grillage footings; Minimum weight design; Optimum design; Plastic design; Elastic analysis; Engineering mechanics
Rectangular Grillages of Least Weight, George I.N. Rozvany and Sai R. Adidam, 538

Grillage footings; Pile foundations; Underpinning; Foundations
Underpinning Massive Structures, Charles E. Mergentime, 123

Ground vehicles; Passenger transportation; Rapid transit railways; Traffic; Transportation; Vehicles; Vehicular traffic
Curbside Service Subways, Charles J. Swet, 469

Ground water; Groundwater management; Ground water recharge; Hydraulics; Hydrology; Legislation; Water demand
Ground Water Management, by the Committee on Ground Water, Manual and Report on Engineering Practice No. 40, Jack J. Coe, Chmn., 512

Ground water; Groundwater recharge; Irrigation; Permeability; Aquifers; Drainage
Basin Recharge of the Ogallala Aquifer, Vladimir S. Aronovici, Arland D. Schneider and Ordie R. Jones, 104

Ground water; Hydraulics; Hydrology; Salt water intrusion; Water pollution; Water resources; Analogs; Aquifers
Hele-Shaw Model of Long Island Aquifer System, Michael A. Collins, Lynn W. Gelhar and John L. Wilson, III, 489

Ground water; Hydraulics; Irrigation; Seepage; Canals; Channels
Seepage from Shallow Open Channel, Bruce W. Hunt, 252

Ground water; Impact; Sanitary engineering; Sewage disposal; Water resources; Cost effectiveness; Economic analysis; Environmental engineering
Cost-Effectiveness Analysis of Wastewater Reuses, Stephen C. Ko and Lucien Duckstein, 552

Ground water; Irrigation; Safety; Water distribution (applied); Water law; Water rights; Drainage
General Statement of Principles to be Included in State Water Rights Laws, Committee on Water Laws of the Irrigation and Drainage Division, Floyd A. Bishop, Chmn., 396

Ground water; Sea water intrusion; Seepage; Wells; California; Drainage
Seawater Intrusion Extraction Barrier, Jack J. Coe, 425

Groundwater flow; Groundwater quality; Leaching; Waste disposal; Dissolved solids
Scientific and Administrative Criteria for Shallow Waste Disposal, George M. Hughes and Keros Cartwright, 153

Groundwater flow; Porous media; Clay soils; Drainage
Drainage in Soils with Initial Gradient, Arun J. Valsangkar and Kanakatti Subramanya, 383

Groundwater management; Ground water recharge; Hydraulics; Hydrology; Legislation; Water demand; Ground water
Ground Water Management, by the Committee on Ground Water, Manual and Report on Engineering Practice No. 40, Jack J. Coe, Chmn., 512

Groundwater quality; Leaching; Waste disposal; Dissolved solids; Groundwater flow
Scientific and Administrative Criteria for Shallow Waste Disposal, George M. Hughes and Keros Cartwright, 153

Ground water recharge; Hydraulics; Hydrology; Legislation; Water demand; Ground water; Groundwater management
Ground Water Management, by the Committee on Ground Water, Manual and Report on Engineering Practice No. 40, Jack J. Coe, Chmn., 512

Groundwater recharge; Irrigation; Permeability; Aquifers; Drainage; Ground water
Basin Recharge of the Ogallala Aquifer, Vladimir S. Aronovici, Arland D. Schneider and Ordie R. Jones, 104

Grout curtains; Grouting; Asphalt emulsions; Cationic asphalt emulsions; Cement grouts; Foundations
Experimental Cationic Asphalt Emulsion Grouting, Lloyd R. Gebhart, 446

Grouting; Asphalt emulsions; Cationic asphalt emulsions; Cement grouts; Foundations; Grout curtains
Experimental Cationic Asphalt Emulsion Grouting, Lloyd R. Gebhart, 446

Grouting; Iraq; Philippines; Venezuela; Weathering; Abutments; Dams (rockfill); Foundations; Geologic investigations
Foundation and Abutment Treatment for Rockfill Dams, Richard C. Acker and Jack C. Jones, 494

Grouting; Jets; Rock fills; Soil mechanics; Abutments; Cutoffs; Dams (rockfill); Foundations; Geology
Foundation Practices for Talbingo Dam, Australia, B. J. Wallace and J. I. Hilton, 492

Grouting; Permeability; Plastics; Polyurethane resins; Soil mechanics; Foundations
Polyurethane Foamed Plastics in Soil Grouting, Ted S. Vinson and James K. Mitchell, 321

Grouting; Seepage; Soil mechanics; Topography; Abutments; Construction; Foundations; Geology
Current Practice in Abutment and Foundation Treatment, Harris H. Burke, Charles S. Content and Richard L. Kulesza, 489

Grouting; Settlement (structural); Abutments; Canada; Dams (earth); Foundations
Foundations and Abutments -- Bennet and Mica Dams, Harold K. Pratt, Robert C. McMordie and Robert M. Dundas, 493

Grouting; Soil mechanics; Blasting; Dams; Embankments; Excavation; Foundations
Foundation Treatment for Embankment Dams on Rock, Elmer W. Stroppini, Donald H. Babbitt and Henry E. Struckmeyer, 493

Guidance; Highways; Traffic signals; Transportation; Display devices; Electronic equipment
Benefit Measurements of Highway Electronic Route Guidance, Salvatore J. Bellomo and George K. Young, Jr., 90

Gust loads; Structural engineering; Wind (meteorology); Wind pressure; Buildings
Failures of Structures Due to Extreme Winds, Joseph E. Minor, Kishor C. Mehta and James R. McDonald, 517

Guyed towers; Guy wires; Stress analysis; Deformation
Approximate Stress Analysis for Guyed Towers, Stan H. Lowy, 169

Guyed towers; Guy wires; Structural engineering; Temperature; Towers; Vibration; Dynamics
Dynamics of Guyed Towers, Richard J. McCaffrey and Alois J. Hartmann, 303

Guy wires; Stress analysis; Deformation; Guyed towers
Approximate Stress Analysis for Guyed Towers, Stan H. Lowy, 169

Guy wires; Structural engineering; Temperature; Towers; Vibration; Dynamics; Guyed towers
Dynamics of Guyed Towers, Richard J. McCaffrey and Alois J. Hartmann, 303

Half Space; Sliding; Values; Vibration; Embedding; Foundations
Coupled Sliding and Rocking of Embedded Foundations, Raymond J. Krizek, Dinesh C. Gupta and Richard A. Parmelee, 582

Half Space; Soil mechanics; Foundations
Tilting Foundations, Gerd F. Weissmann, 152

Hammers; Models; Pile drivers; Pile driving; Construction; Foundations
Performance of Pile Driving Hammers, Frank Rausche and George G. Goble, 475

Harbor facilities; Harbors; Barges; Bridges (movable); Docks
Multipurpose Land-Water Transfer Facility, C. Adrian Arnold, 335

Harbor facilities; Land reclamation; Marine terminals; Surcharge; Cargo transportation; Containerizing
Containerization and Its Impact on Port Development, Anthony J. Tozzoli, 426

Harbors; Barges; Bridges (movable); Docks; Harbor facilities
Multipurpose Land-Water Transfer Facility, C. Adrian Arnold, 335

Harbors; Breakwaters; Coastal engineering; Gravity waves
Wave Defraction by Detached Breakwater, Michael Stiassnie and Gedeon Dagan, 265

Harbors; Hydraulic models; Movable bed models; Profiles; Scale effect; Beach ridges; Coastal engineering; Equilibrium
Equilibrium Beach Profile Scale-Model Relationship, Edward K. Noda, 558

Harbors; Hydraulic models; Ocean waves; Overtopping; Breakwaters
Wave Transmission by Overtopping, Ralph H. Cross and Charles K. Sollitt, 457

Harbors; Hydroelectric power generation; Power; River flow; Sedimentation; Dredging
Sedimentation Effects of Hydroelectric Development, Jack F. Rasmussen, 469

Harbors; Locks (waterways); Salinity; Salt water intrusion; Stratification; Water pollution; Water quality; Waterways; Density
Mardyck Lock Acts as Salt-Water Barrier, Ch. Blanchet and B. Quetin, 600

Harbors; Model tests; Moorings; Buoys
Two-Point Mooring System for Spar Buoy, John H. Nath and Steve Neshyba, 17

Harbors; Queueing theory; Rates (costs); Thailand; Capacity; Cargo transportation
Capacity-Feedback Relationship for Port of Bangkok, Donald R. Drew, Pakorn Adulbhan, Wai Ling Woo and Manu Juaseekoon, 441

Harbors; Rubble mounds; Wave height; Breakwaters; Coastal engineering
Effect of Irregular Wave Trains on Rubble-Mound Breakwaters, Yvon Ouellet, 119

Harbors; Shipping containers; Cargo transportation; Containerizing; Containers; Containment vessels
Containerization - A System Still Evolving, Walter C. Boyer, 494

Harbors; Velocity; Vessels; Concrete (lightweight); Concrete (prestressed); Design criteria; Effectiveness; Energy
Ultimate Energy Design of Prestressed Concrete Fender Piling, Shu-t'ien Li and Venkataswamy Ramakrishnan, 81

Harbors; Wave propagation; Basins; Coastal engineering
Oscillations in Harbors with Connected Basins, Jiin-Jen Lee and Fredric Raichlen, 351

Harbor structures; Inclinometers; Meteorology; Overconsolidation; Soil mechanics; Expansive clays; Failure
Behavior of Wharf Affected by River Fluctuations, Richard A. Sullivan, 457

Harmonic functions; Hyperbolic parabolic shells; Structural engineering; Airy function; Boundary conditions; Finite difference method
Finite Difference Approach to Hyperbolic Paraboloids, M. I. Beg, 146

Harmonics; Nonlinear systems; Vibration; Engineering mechanics; Forced vibration
Transverse Beam Vibration Nonlinear Constraint, Mohammed Ali Dokainish and Rajnish Kumar, 556

Hauling; Management; Optimization; Sanitary engineering; Solid wastes; Waste disposal; Dynamic characteristics
Facility Selection and Haul Optimization Model, Houshang Esmaili, 528

Head losses; Hydraulics; Nonuniform flow; Open channel flow; Overland flow; Rainfall; Water flow; Flow resistance; Friction
Resistance Coefficients for Steady Spatially Varied Flow, Ben Chie Yen, Harry G. Wenzel, Jr. and Yong Nam Yoon, 415

Head losses; Hydraulics; Steady flow; Water distribution (applied); Algorithms; Computer programs
Computer Analysis of Water Distribution Systems: Part I - Formulation of Equations, Chan F. Lam and M. L. Wolla, 173

Health; Insurance; Insurance costs; Civil engineering; Civil engineers
Overview of the Health Care Services Industry, Robert A. Tschetter, 591

Health; Matrices (mathematics); Microenvironment; Professional activities; Buildings (hospitals); Environmental effects
The Hospital as a Microenvironment, E. Todd Wheeler, 593

Health; Professional activities; Social needs; Civil engineering; Civil engineers
The Role of the Civil Engineer in Statewide Health Planning, William H. Wisely, 592

Health; Systems analysis; Systems engineering; Buildings (hospitals); Construction; Construction management
A Systems Approach to Hospital Planning and Design, Tung Au, Ernest W. Parti and Andrew K.C. Wong, 592

Health; Systems engineering; Bioengineering; Buildings (hospitals); Civil engineering; Engineering education
Civil Engineering and National Goals in Bioengineering, George Bugliarello, 591

Heat budget; Stratification; Thermal pollution; Waste heat; Cooling systems; Cooling water
Impact of Cooling Water on Lake Temperatures, Heinz Stefan, Chung-Sang Chu and Ho Wing, 392

Heated water; Hydraulic models; Hydraulics; Jets; Pollution; Rivers; Streams; Thermoelectric power generation
Surface Jet Model for Heated Discharges, Louis H. Motz and Barry A. Benedict, 136

Heated water; Hydraulics; Jets; Lakes; Rivers; Thermoelectric power generation; Environmental engineering; Finite element method; Fluid flow
Hydrothermal Analysis by Finite Element Method, Larry A. Loziuk, James C. Anderson and Ted Belytschko, 559

Heat exchangers; Hydraulic models; Hydraulics; Temperature; Tests; Thermal pollution; Coefficients; Evaporation
Evaluating Water Surface Heat Exchange Coefficients, Peter D. Hindley and Russell M. Miner, 421

Heat exchangers; Powerplants; Concrete (reinforced); Cooling towers; Cooling water
Dry-Type Hyberbolic Cooling Tower, Paul Rogers and Laszlo Heller, 452

Heating; Ventilation; Air conditioning; Computer programs; Electrical design
Computers: Key to Integrated Building Design, Kenneth F. Reinschmidt, 158

Heat of hydration; Reinforcement; Structural engineering; Cements; Concrete; Concrete (reinforced); Dams; Distribution systems; Foundations
Temperature Rises in Low-Heat Cement Concrete, Barry P. Hughes, 43

Height; Tall buildings; Building materials; Cost analysis; Dimensions; Economics; Floors
The Economics of High-Rise Apartment Buildings of Alternate Design Configuration, Richard D. Steyert, 387

Hele-Shaw model; Tile drains; Water table; Drainage
Moving Water Tables in Tile-Drained Soils, Nazar M. Awan and Terence O'Donnell, 411

Herbicides; Sanitary engineering; Water treatment; Aquatic plants; Biodegradation; Environmental engineering
Herbicidal Control of Aquatic Plants, Edward O. Ganstad, 341

High strength bolts; Joints (junctions); Steels; Structural engineering; Fatigue (materials); Galvanizing
High Strength Bolted Galvanized Joints, D. J. Laurie Kennedy, 576

High strength concretes; High strength steels; Monorail railways; Tolerances (mechanics)
Walt Disney World Monorail Designed for Smooth Riding, Robert F. Mast and Charles W. Dolan, 135

High strength steels; Monorail railways; Tolerances (mechanics); High strength concretes
Walt Disney World Monorail Designed for Smooth Riding, Robert F. Mast and Charles W. Dolan, 135

Highway beautification; Highway engineering; Right of way acquisition; Esthetics; Grading (earthwork)
Esthetics in Highway Design, Donald Van Riper, 177

Highway engineering; Bridges (concrete); Bridges (spans); Concrete (precast); Esthetic properties
Long-Span Bridge: Utility, Grace at Low Cost, Harry M. Montgomery and Roger D. Troxell, 269

Highway engineering; Canada; Capacity; Economic analysis; Economic factors
Economic Criterion for Highway Capacity Determination, Bruce G. Hutchinson, 377

Highway engineering; Education; Engineering education; Engineers
Practitioners Teach Students Art of Highway Engineering, David A. Novick, Howard S. Newman and Eben Vey, 16

Highway engineering; Highway planning; Highways; Investments; Land use; Regional planning; Transportation; Benefit cost analysis; Canada; Economic analysis
Programming of Regional Highway Investments, Bruce G. Hutchinson, 269

Highway engineering; Highways; Maintenance; Pavements; Safety; Traffic engineering; Drainage; Freeways
Current Practices in Highway Maintenance: A Reference List, Committee on Construction, Maintenance and Operation of Highways of the Highway Division., Walter E. Capper, Chmn., 260

Highway engineering; Highways; Noise; Noise masking; Transportation; Design; Environmental engineering
Baltimore Plans Highways for Minimum Noise, Grant S. Anderson, Frederick Gottemoeller and Daniel G. Page, 410

Highway engineering; Interstate highway system; Paving; Planning; Cost estimates; Excavation
Cost Estimating Model for Rural Interstate Highways, John Whitman and Frederick J. Wegmann, 402

Highway engineering; Lime; Soil stabilization; Subgrades; Transportation; Construction; Construction procedure; Flexible pavements
Deep-Plow Lime Stabilization for Pavement Construction, Marshall R. Thompson, 107

Highway engineering; Offsets; Surveys; Computer programs; Curves
Offsets to Sight Obstructions Near the Ends of Horizontal Curves, William L. Raymond, Jr., 58

Highway engineering; Parking facilities; Toll roads; Traffic; Transportation; Urban planning; Economics
Urban Road Pricing Through Selective Parking Taxes, Robert E. Burns, 440

Highway engineering; Passenger transportation; Traffic control; Traffic engineering; Buses (vehicles); Bus lines
Federal Research in Urban Traffic Control, Juri Raus and Philip J. Tarnoff, 434

Highway engineering; Pavements; Rigid pavements; Transportation; Elastic foundations; Foundations
Advanced Analysis of Rigid Pavements, Sue K. Wang, Michel Sargious and Yau Kai Cheung, 36

Highway engineering; Pavements; Shrinkage; Shrinkproofing; Transportation; Cracking; Flexible pavements
Cracking Mechanism of Flexible Pavements, Jacob Uzan, Moshe Livneh and Elisha Shklarsky, 16

Highway engineering; Right of way acquisition; Esthetics; Grading (earthwork); Highway beautification
Esthetics in Highway Design, Donald Van Riper, 177

Highway planning; Highways; Investments; Land use; Regional planning; Transportation; Benefit cost analysis; Canada; Economic analysis; Highway engineering
Programming of Regional Highway Investments, Bruce G. Hutchinson, 269

Highway planning; Michigan; Revenues; Taxes; Transportation; Government policies
Michigan Transportation in the Seventies, William C. Taylor, 510

Highways; Highway transportation; Systems engineering; Traffic; Traffic control; Traffic regulations
Strategies for Practical Expressway Control, Allan G.R. Bullen, 417

Highways; Inclinometers; Instrumentation; Soil stability; Stability; Transportation; Earth movements
Instrumentation Applied to Slope Stability Problems, Stanley D. Wilson and David E. Hilts, 316

Highways; Investments; Land use; Regional planning; Transportation; Benefit cost analysis; Canada; Economic analysis; Highway engineering; Highway planning
Programming of Regional Highway Investments, Bruce G. Hutchinson, 269

Highways; Land use; Legislation; Regional planning; Transportation; Drainage; Environmental engineering
Impact of Environmental Controls on Highways, Wm. Campbell Graeub, Albert A. Grant and Robley Winfrey, 219

Highways; Land use; Pipelines; Regional planning; Right-of-way; Right of way acquisition; Transmission towers; Alignment
Joint Utilization of Rights-of-Way, Francis J. Stastny, 130

Highways; Limestone; Pavements; Skid resistance; Aggregates
Sprinkle Treatment Increases Highway Skid Resistance, George W. Maupin, Jr., 86

Highways; Maintenance; Pavements; Safety; Traffic engineering; Drainage; Freeways; Highway engineering
Current Practices in Highway Maintenance: A Reference List, Committee on Construction, Maintenance and Operation of Highways of the Highway Division., Walter E. Capper, Chmn., 260

Highways; Mathematical models; North carolina; Regional analysis; Regional planning; Travel; Forecasting
Forecasting Regional Travel on Regional Highway Network, Arun Chatterjee and Paul D. Cribbins, 162

Highways; Multiple use; Right of way acquisition; Transportation; Urban transportation; Environments; Freeways
Multiple Use of City Transportation Corridor, Harry R. Powell and F. G. Alden, 285

Highways; Noise; Noise masking; Transportation; Design; Environmental engineering; Highway engineering
Baltimore Plans Highways for Minimum Noise, Grant S. Anderson, Frederick Gottemoeller and Daniel G. Page, 410

Highways; Pavements; Transportation; Bituminous coatings; Concrete (reinforced); Costs; Critical path method
Rehabilitating Chicago's Expressways, Thomas T. Morimoto, 541

Highways; Permafrost; Alaska; Embankments
Alaska Builds Highway Over Muskeg and Permafrost, John C. Becker, 349

Highways; Power reactors (nuclear); Dams; Environmental effects
Environmental Litigation: Lessons From the Courts, William K. Johnson, 31

Highways; Prefabrication; Slabs; Tendons; Transportation; Bridges (structures); City planning; Concrete (post-tensioned); Concrete (precast); Foundations
Prefabricated Highways, William Zuk, 204

Highways; Regional planning; Urban planning; Conflict
Regional-Local Conflicts in Transportation Planning, Harvey R. Joyner, 394

Highways; Roads; Statistical analysis; Transportation; Costs; Economics
Local Rural Road Costs and Economies of Scale, William D. Berg, 478

Highways; Safety; Safety devices; Tests; Transportation; Attenuators; Collisions
Recent Developments in Roadside Crash Cushions, John G. Viner, 99

Highways; Safety; Signals; Traffic; Benefit-cost ratios; Costs; Federal agencies
Federal Experience in TOPICS, Hugh B. Henry, 292

Highways; Safety; Traffic engineering; Transportation; Automobiles; Computers; Dynamics
Vehicle-Roadway Interaction Studies by Math Model, Hayes E. Ross, Jr. and Don L. Ivey, 249

Highways; Soil cement; Transportation; Cements; Deformation
Soil-Cement Bases Under Thin Bituminous Surfacing, Boniface C. Obi, 124

Highways; South Carolina; Traffic; Traffic surveys; Transportation; Urban planning
Annual Surveillance of Urban Traffic Growth, Peter S. Parsonson, 346

Highways; Traffic signals; Transportation; Display devices; Electronic equipment; Guidance
Benefit Measurements of Highway Electronic Route Guidance, Salvatore J. Bellomo and George K. Young, Jr., 90

Highways; Transportation; Aircraft landing areas; Durability
Effect of Load Placement on Rigid Pavement Behavior, Harvey J. Treybig, William Ronald Hudson and B. Frank McCullough, 6

Highway transportation; Systems engineering; Traffic; Traffic control; Traffic regulations; Highways
Strategies for Practical Expressway Control, Allan G.R. Bullen, 417

Hinged structures; Parabolic bodies; Torque; Arches; Buckling; Fixed structures
Lateral-Torsion Buckling of Parabolic Arches, Frank J. Tokarz and Raghbir S. Sandhu, 280

History; ASCE (History); Biographies; Civil engineering; Civil engineers
A Biographical Dictionary of American Civil Engineers, by the Committee on History and Heritage of American Civil Engineering, Neal FitzSimons, Chmn., 137

History; Bridges (cable-stayed); Bridges (girder); Bridges (orthotropic); Bridges (structures); Bridge towers; Cables (ropes)
Historical Development of Cable-Stayed Bridges, Walter Podolny, Jr. and John F. Fleming, 458

History; Hydraulic laboratories; Hydraulic laboratories; Hydraulics; Waterways experiment station; ASCE (awards & prizes)
Hydraulicians are Human Too, Hunter Rouse, 257

History; Lattice design; Stability; Structural engineering; Architecture; Bibliographies
"Bibliography on Latticed Structures," by the Subcommittee on Latticed Structures of the Task Committee on Special Structures of the Committee on Metals of the Structural Division, Donald R. Sherman, Chmn., 365

History; Legislation; Measurement; Metric system; United States government; Foreign projects
Metrication in the United States, a Status Report, L. E. Barbrow, 555

History; Planning; Urban planning; Bibliographies; Engineering education
City Planning Bibliography, George C. Bestor and Holway R. Jones, 266

Homogeneity; Seepage; Soils; Drainage
Seepage from Trenches Through Nonhomogeneous Soils, Ahmed El Nimur and Robert L. Street, 185

Honeycomb cores; Sandwich panels; Structural engineering; Aluminum; Folded plates
Failure Modes of Folded Sandwich Panel Roofs, Paul P. Fazio, 261

Hot film anemometers; Hydraulics; Turbulence; Covariance; Flow rate
Measurement of Velocity-Concentration Covariance, Raul S. McQuivey and Thomas N. Keefer, 459

Hot film anemometers; Laboratory tests; Mixing; Power; Salt; Temperature; Turbulence; Velocity
Velocity and Temperature in Buoyant Jet, Richard Dornhelm, Manuel Nouel and Robert L. Wiegel, 148

Housing; Construction; Construction materials; Costs; Economic analysis
Economic Analysis of Housing Construction Methods, Shlomo Peer and Abraham Warszawski, 355

Housing; Land use; Noise reduction; Parks; Urban planning; Water pollution; Air pollution; Esthetics
Esthetic Considerations in Urban General Planning, Wm. H. Claire, 404

Housing; Structural engineering; Concrete (precast); Concrete slabs
High-Rise Panel Structures, Matthys P. Levy and Istvan S. Varga, 240

Housing; Urban planning; ASCE (National Affairs); ASCE (Policy); Buildings (codes); Foreign engineering
The Challenge to Civil Engineering, Dennis Warner, 339

Human behavior; Pavements; Rolling friction; Safety; Tires; Traffic safety
Current Methods For Improved Tire-Pavement Interaction, Bob M. Galloway and Jon A. Epps, 505

Human engineering; Philosophy; Reviews; Technology; Animal behavior; Books
Anti-Technology--The New Myth, Samuel C. Florman, 53

Human factors engineering; Management; Traffic engineering; Transportation; Transportation management
Four-Day Week and Transportation, Vincent R. Desimone, 361

Human factors engineering; Structural engineering; Tests; Buildings (office); Comfort
Human Perception Thresholds of Horizontal Motion, Peter W. Chen and Leslie E. Robertson, 397

Hurricanes; Piers; Storms; Stresses; Wind bracing; Wooden structures; Coastal engineering; Construction; Design; Foundations
Wood Structures Can Resist Hurricanes, Gerald E. Sherwood, 417

Hydraulic control; Open channel flow; Sanitary engineering; Water flow; Flow distribution
Hydraulic Control for Flow Distribution, Kuan M. Yao, 271

Hydraulic engineering; Hydraulics; Innovation; Professional societies; Sciences; Sociology; Training
Technological Innovation and Hydraulic Engineering, George Bugliarello, 278

Hydraulic jets; Hydraulic jump; Energy dissipation
Hydraulic Jump Assisted by Cross-Jet, Teh-Yuh Kao, 78

Hydraulic jump; Energy dissipation; Hydraulic jets
Hydraulic Jump Assisted by Cross-Jet, Teh-Yuh Kao, 78

Hydraulic jump; Hydraulics; Inflow; Turbulence; Water flow; Boundary shear; Flow rate
Effects of Inflow Condition on Hydraulic Jump, Hans J. Leutheusser and Viswanathan C. Kartha, 401

Hydraulic jump; Hydraulics; Loads (forces); Baffles; Blocks; Energy
Drag Forces on Baffle Blocks in Hydraulic Jump, David R. Basco and John R. Adams, 72

Hydraulic jump; Hydraulics; Slabs; Uplift pressure; Chute spillways; Dams (earth); Eductors; Ejectors; Failure
Damage to Karnafuli Dam Spillway, Mohammad A. Rahman, 596

Hydraulic jump; Hydraulics; Stilling basins; Turbulence; Boundary shear; Energy dissipators
Boundary Layer Effects on Hydraulic Jump Location, Edward H. Wilson and Andrew A. Turner, 341

Hydraulic jump; Hydraulics; Supercritical flow; Channels (waterways); Design; Drag
Supercritical Flow Over Sills at Incipient Jump Conditions, Karam S. Karki and Subhash Chander, 503

Hydraulic jump; Pipe flow; Computers; Culverts; Digital computers; Flow profiles
Digital Computers in Circular Culvert Design, Bobby E. Price and Frank D. Masch, 369

Hydraulic laboratories; Hydraulic laboratories; Hydraulics; Waterways experiment station; ASCE (awards & prizes); History
Hydraulicians are Human Too, Hunter Rouse, 257

Hydraulic laboratories; Hydraulics; Waterways experiment station; ASCE (awards & prizes); History; Hydraulic laboratories
Hydraulicians are Human Too, Hunter Rouse, 257

Hydraulic models; Hydraulics; Inlets (waterways); Rivers; Simulation; Tides; Water waves; Waterways
Simulation of Long Waves in Branching Waterways, Robert F. Henry, 224

Hydraulic models; Hydraulics; Instantaneous unit hydrograph; Mathematical models; Storm drains; Urbanization
Conceptual Hydrologic Models for Urbanizing Basins, Ramachandra A. Rao, Jacques W. Delleur and B. S.P. Sarma, 362

Hydraulic models; Hydraulics; Jets; Pollution; Rivers; Streams; Thermoelectric power generation; Heated water
Surface Jet Model for Heated Discharges, Louis H. Motz and Barry A. Benedict, 136

Hydraulic models; Hydraulics; Materials tests; Rock mechanics; Tests; Dams; Dams (arch); Dams (concrete); Foundations
Auburn Dam -- World's Longest Arch Dam, Alfred T. Lewis, 445

Hydraulic models; Hydraulics; Models; Salinity; Statistical analysis; Virginia; Estuaries
Repeatability in Estuarine Hydraulic Model, Paul V. Hyer, 229

Hydraulic models; Hydraulics; Open channel flow; Broad-crested weirs; Flow measurement
Brink Depth for Trapezoidal Broad-Crested Weir, Birendra N. Neogy, 582

Hydraulic models; Hydraulics; Pipe flow; Water distribution; Computers
Graph-Theoretic Models for Pipe Network Analysis, H. K. Kesavan and M. Chandrashekar, 167

Hydraulic models; Hydraulics; Sedimentation; Streams; Suspended sediments; Bed load; Canals; Channels; Desilting
Chapter V: Sediment Control Methods: C. Control of Sediment in Canals, By the Task Committee on Preparation of Sedimentation Manual, Committee on Sedimentation of the Hydraulics Division, Vito A. Vanoni, Chmn., 455

Hydraulic models; Hydraulics; Supercritical flow; Supersonic flow; Water flow; Channels (waterways)
Supercritical Flow in Rectangular Expansions, John B. Herbich and Peter Walsh, 497

Hydraulic models; Hydraulics; Temperature; Tests; Thermal pollution; Coefficients; Evaporation; Heat exchangers
Evaluating Water Surface Heat Exchange Coefficients, Peter D. Hindley and Russell M. Miner, 421

Hydraulic models; Mathematical models; Structural analysis; Calculators; Computer systems programs
Guidelines for Selecting a Programmable Calculator, Eugene E. Dallaire, 129

Hydraulic models; Missouri; Prototypes; Channel stabilization
Navigation Model Tests for Straight Reach of Missouri River, Duane J. Sveum and Warren J. Mellema, 227

Hydraulic models; Movable bed models; Profiles; Scale effect; Beach ridges; Coastal engineering; Equilibrium; Harbors
Equilibrium Beach Profile Scale-Model Relationship, Edward K. Noda, 558

Hydraulic models; Ocean waves; Overtopping; Breakwaters; Harbors
Wave Transmission by Overtopping, Ralph H. Cross and Charles K. Sollitt, 457

Hydraulic models; Seepage; Soil mechanics; Dams; Dams (earth); Drawdown; Finite element method
Seepage Analysis of Earth Banks Under Drawdown, Chandrakant S. Desai, 511

Hydraulic models; Tsunamis; Walls; Water waves; Coastal engineering
Waves Generated by Horizontal Motion of a Wall, Madan M. Das and Robert L. Wiegel, 137

Hydraulic pressure; Leakage; Sanitary engineering; Sewage disposal; Sewage filtration; Sewers; Bedding materials; Gravel
Sanitary Sewer Bedding Scored as Underdrain Conduit, Robert L. McFall, 240

Hydraulic radius; Linings; Pipelines; Power; Pressure tunnels; Tunnels; Velocity; Water; Water flow; Canals; Construction; Financing; Fluid flow
Aqueducts for the Least Cost Conveyance of Water, Nephi A. Christensen, 46

Hydraulics; Boundary layer; Coefficients; Correlation; Cylindrical bodies
Shear Flow Past Circular Cylinder, Thomas L. Shaw and Michael R. Starr, 201

Hydraulics; Engineering education; Fluid mechanics
Fluid Mechanics Teaching and Research: A View from a Dean's Office, Hunter Rouse, 287

Hydraulics; Flood frequency; Flood hydrographs; Floods; Flow distribution
Two-Distribution Method for Flood Frequency Analysis, Krishan P. Singh and Robert A. Sinclair, 100

Hydraulics; Hydrodynamics; Turbulence; Vibration; Coefficients; Fluid flow
Turbulence Effects On Drag of Sharp-Edged Bodies, John A. Roberson, Chi Yu Lin, Scott G. Rutherford and Marvin D. Stine, 386

Hydraulics; Hydroelectric power; Irrigation; Low-flow augmentation; Multiple purpose projects; Optimization; Recreation; Water resources; Flood control
Multireservoir Optimization Model, James S. Windsor and Ven Te Chow, 532

Hydraulics; Hydrographs; Hydrology; Mathematical models; Runoff; Urban areas; Watersheds
University of Cincinnati Urban Runoff Model, Constantine Papadakis and Herbert C. Preul, 523

Hydraulics; Hydrographs; Storm drains; Storm water; Unsteady flow
Routing Storm Water Through a Drainage System, Subin Pinkayan, 102

Hydraulics; Hydrology; Kinematics; Models; Overland flow; Rational formula; Flood hydrographs
Kinematic Wave Nomograph for Times of Concentration, Robert M. Ragan and J. Obiukwu Duru, 506

Hydraulics; Hydrology; Land use; Legislation; Municipal engineering; Professional practice; Runoff; Subdivisions; Urban planning; Waterways (watercourses); Drainage; Floods
An Engineer Looks at Drainage Law, Alfred R. Pagan, 511

Hydraulics; Hydrology; Legislation; Water demand; Ground water; Groundwater management; Ground water recharge
Ground Water Management, by the Committee on Ground Water, Manual and Report on Engineering Practice No. 40, Jack J. Coe, Chmn., 512

Hydraulics; Hydrology; Markov processes; Mathematical models; Rainfall; Synthesis; Time series analysis
Stochastic Generation of Rainfall, Kazimierz Adamowski and Anthony F. Smith, 548

Hydraulics; Hydrology; Mathematical models; Reservoirs; Sedimentation; Water quality; Watersheds; Erosion
Sediment Yield Computed With Universal Equation, Jimmy R. Williams and Harold D. Berndt, 578

Hydraulics; Hydrology; Measuring instruments; Data systems
New Approach to Hydrologic Data Acquisition, Edward J. Langham, 56

Hydraulics; Hydrology; Reservoir storage; Runoff; Stochastic processes; Distribution functions
Some Problems with Log-Normal Markov Runoff Models, Stephen J. Burges, 443

Hydraulics; Hydrology; Salt water intrusion; Water pollution; Water resources; Analogs; Aquifers; Ground water
Hele-Shaw Model of Long Island Aquifer System, Michael A. Collins, Lynn W. Gelhar and John L. Wilson, III, 489

Hydraulics; Hydrology; Small watersheds; Digital simulation; Floods
Flood Frequency Estimating Techniques for Small Watersheds, George Fleming and Delbert D. Franz, 23

Hydraulics; Hydrology; Statistical analysis; Benefit-cost ratios; Economic analysis; Flood control
Bias in Computed Flood Risk, Clayton H. Hardison and Marshall E. Jennings, 188

Hydraulics; Hydrometeorology; Precipitation gages; Weather modification; Cloud seeding
Colorado Pilot Project: Design Hydrometeorology, Patrick A. Hurley, 291

Hydraulics; Ice; Ice jams; Mathematical models; Rivers
Stability of Floating Ice Blocks, Mehmet S. Uzuner and John F. Kennedy, 571

Hydraulics; Ice; Rivers; Stability; Thermal conductivity; Flow patterns; Freeze-thaw cycle
Ripples on Underside of River Ice Covers, George D. Ashton and John F. Kennedy, 470

Hydraulics; India; Rainfall-runoff relationships; Runoff; Storms; Antecedent precipitation
Synthetic Storm Pattern and Run-off for Gauhati, India, M. Bandyopadnyay, 270

Hydraulics; Infiltration; Soil moisture; Soil moisture movement; Two phase flow; Capillary flow
Perturbation Analysis of Two-Phase Infiltration, Alain Noblanc and Hubert J. Morel-Seytoux, 463

Hydraulics; Inflow; Turbulence; Water flow; Boundary shear; Flow rate; Hydraulic jump
Effects of Inflow Condition on Hydraulic Jump, Hans J. Leutheusser and Viswanathan C. Kartha, 401

Hydraulics; Inlets (waterways); Jets; Meteorology; Momentum; Tornadoes; Vortices; Air entrainment; Drains; Dust storms; Engineering mechanics; Fluid mechanics; Friction
Experiments on Unstable Vortices, Enzo Levi, 249

Hydraulics; Inlets (waterways); Rivers; Simulation; Tides; Water waves; Waterways; Hydraulic models
Simulation of Long Waves in Branching Waterways, Robert F. Henry, 224

Hydraulics; Innovation; Professional societies; Sciences; Sociology; Training; Hydraulic engineering
Technological Innovation and Hydraulic Engineering, George Bugliarello, 278

Hydraulics; Instantaneous unit hydrograph; Mathematical models; Storm drains; Urbanization; Hydraulic models
Conceptual Hydrologic Models for Urbanizing Basins, Ramachandra A. Rao, Jacques W. Delleur and B. S.P. Sarma, 362

Hydraulics; Irrigation; Irrigation canals; Surface irrigation; Water distribution (applied); Flow distribution
Distribution Channels with Multiple Outlets, William E. Hart and John Borelli, 356

Hydraulics; Irrigation; Measuring instruments; Open channel flow; Drainage; Flumes
Generalized Discharge Relations for Cutthroat Flumes, Gaylord V. Skogerboe, Ray S. Bennett and Wynn R. Walker, 601

Hydraulics; Irrigation; Seepage; Canals; Channels; Ground water
Seepage from Shallow Open Channel, Bruce W. Hunt, 252

Hydraulics; Jet flow; Mathematics; Temperature; Turbulence; Buoyancy; Fluid flow
Buoyant Jets with Three-Dimensional Trajectories, Eric Hirst, 563

Hydraulics; Jets; Coastal engineering; Desalting; Dilution
Model Study of Dense Jet in Flowing Fluid, Forrest M. Holly, Jr. and John L. Grace, Jr., 552

Hydraulics; Jets; Lakes; Rivers; Thermoelectric power generation; Environmental engineering; Finite element method; Fluid flow; Heated water
Hydrothermal Analysis by Finite Element Method, Larry A. Loziuk, James C. Anderson and Ted Belytschko, 559

Hydraulics; Jets; Laminar flow; Turbulent boundary layer; Fluid flow
Appearance of Unstable Buoyant Jet, Habib O. Anwar, 354

Hydraulics; Jets; Orifices; Valves; Cavitation; Energy dissipators
Cavitation in High-Head Conduit Control Dissipators, John F. Ripken and Norio Hayakawa, 151

Hydraulics; Jets; Pollution; Rivers; Streams; Thermoelectric power generation; Heated water; Hydraulic models
Surface Jet Model for Heated Discharges, Louis H. Motz and Barry A. Benedict, 136

Hydraulics; Jets; Shear flow; Two phase flow; Flow characteristics; Fluid flow
Turbulent Compound Annular Shear Layers, Nallamuthu Rajaratnam and B. S. Pani, 350

Hydraulics; Jets; Turbulence; Boundaries; Boundary layer flow; Gates
Theoretical Analysis of Flow Past Leaf Gate, Rangaswami Narayanan, 320

Hydraulics; Laboratories; Pipe flow; Soil mechanics; Tests; Triaxial tests; Bubbles
Time to Dissolve Air Bubbles in Drain Line, Kenneth L. Lee and David K. Black, 179

Hydraulics; Laboratory tests; Sands; Sediment transport; Streams; Bed load
Laboratory Study of Transport of Fine Sand, Joe C. Willis, Neil L. Coleman and Wilbert M. Ellis, 183

Hydraulics; Laminar flow; Orifices; Pipe flow; Coefficients; Flow resistance
Orifice Losses for Laminar Approach Flow, Nagar S. Lakshmana Rao and Kalambur Sridharan, 556

Hydraulics; Land use; Research; Sedimentation; Sediment control; Urban development; Urban planning; Economics; Erosion
Urban Sedimentation in Perspective, Harold P. Guy and D. Earl Jones, Jr., 574

Hydraulics; Land use; Zoning; Computer programs; Economic analysis; Flood control
Role of Economics in Planning Flood Plain Land Use, L. Douglas James, 314

Hydraulics; Libraries; Problem oriented languages; Programming languages; Reports
Computer Languages and Program Libraries, by the Task Committee on Problem Orientation Languages in Hydrology of the Committee on Surface-Water Hydrology of the Hydraulics Division., George Bugliarello, Chmn., 397

Hydraulics; Linear differential equations; Network analysis; Pipe flow; Fluid flow
Hydraulic Network Analysis Using Linear Theory, Don J. Wood and Carl O.A. Charles, 366

Hydraulics; Loads (forces); Baffles; Blocks; Energy; Hydraulic jump
Drag Forces on Baffle Blocks in Hydraulic Jump, David R. Basco and John R. Adams, 72

Hydraulics; Mannings equation; Pipe flow; Sanitary engineering; Smoothness; Coefficients; Graphs (charts)
Manning's Coefficient for Smooth Pipes, Henry Liu, 312

Hydraulics; Materials; Ocean engineering; Bedding materials
Fluid-Dynamic Consideration of Bottom Materials, Hormoz Pazwash and James M. Robertson, 18

Hydraulics; Materials tests; Rock mechanics; Tests; Dams; Dams (arch); Dams (concrete); Foundations; Hydraulic models
Auburn Dam -- World's Longest Arch Dam, Alfred T. Lewis, 445

Hydraulics; Mathematical models; Mississippi; Time of concentration; Turbulence; Turbulent diffusion; Dispersion
Dispersion in Natural Streams, Mahendra K. Bansal, 50

Hydraulics; Mathematical models; Newton-Raphson method; Water distribution (applied); Computer programs
Computer Analysis of Water Distribution Systems: Part II--Numerical Solution, Chan F. Lam and M. L. Wolla, 207

Hydraulics; Mathematical models; Probability distribution functions; River flow; Construction methods; Data acquisition
Stochastic Five Daily Stream Flow Model, Nath T. Kottegoda, 438

Hydraulics; Mathematical models; Probability theory; Statistical analysis; Stochastic models; Stream flow; Autocorrelation
Parameter Estimation for First-Order Autoregressive Model, Luis E. Garcia-Martinez, 426

Hydraulics; Mathematical models; Sewers; Urbanization; Costs; Drainage; Economic analysis
Methods for Predicting Urban Drainage Costs, Walter J. Rawls and John W. Knapp, 486

Hydraulics; Matrices (mathematics); Pipelines; Resonance; Characteristics; Frequency
Resonance in Pipes Having Variable Characteristics, M. Hanif Chaudry, 159

Hydraulics; Models; Pipe flow; Powerplants; Pumps; Water hammer; Computer programming; Computers; Conduits; Discharge
Computer Simulation of Waterhammer Effects, George Belonogoff, 323

Hydraulics; Models; Salinity; Statistical analysis; Virginia; Estuaries; Hydraulic models
Repeatability in Estuarine Hydraulic Model, Paul V. Hyer, 229

Hydraulics; Models; Simulation; Tidal currents; Tracers; Turbulence; Diffusion; Effluents; Field tests
Tracer Tests of Eddy Diffusion in Field and Model, Maurice J. Crickmore, 509

Hydraulics; Monte Carlo method; Probability theory; Simulation; Stochastic models; Stream flow
Adequacy of Hydrologic Records for Parameter Estimation, Charles T. Haan, 430

Hydraulics; Nappe; Parabolas; Spillways; Variations; Curvature; Fluid flow
Flow Over Rounded Spillways, Kamil H.M. Ali, 163

Hydraulics; Nevada; Regulation; Simulation; Statistical analysis; Systems engineering; Data systems
Streamflow Synthesis - A Case Study, Vulli L. Gupta and John W. Fordham, 336

Hydraulics; Nonlinear systems; Wave energy; Waves; Cylinders; Diffraction
Nonlinear Wave Forces on a Vertical Cylinder, Subrata K. Chakrabarti, 542

Hydraulics; Nonuniform flow; Open channel flow; Overland flow; Rainfall; Water flow; Flow resistance; Friction; Head losses
Resistance Coefficients for Steady Spatially Varied Flow, Ben Chie Yen, Harry G. Wenzel, Jr. and Yong Nam Yoon, 415

Hydraulics; Open channel flow; Broad-crested weirs; Flow measurement; Hydraulic models
Brink Depth for Trapezoidal Broad-Crested Weir, Birendra N. Neogy, 582

Hydraulics; Open channel flow; Pressure pipes; Transient flow; Unsteady flow; Water tunnels (conveyance); Computers
Transient Flow in Free-Surface, Pressurized Systems, David C. Wiggert, 87

Hydraulics; Open channel flow; Ripple marks; Alluvial deposits; Friction factor
Ripple and Dune Phases in a Narrowly Graded Sand, Christopher John Pratt and Kenneth V.H. Smith, 296

Hydraulics; Open channel flow; Sediment deposits; Suspended load; Temperature; Bed load
Temperature Effects in High-Transport, Flat-Bed Flows, Brent D. Taylor and Vito A. Vanoni, 597

Hydraulics; Overflow; Stratified flow; Fluid flow
Flow of Layered Fluid Over Broad Crested Weir, Ian R. Wood and K. K. Lai, 108

Hydraulics; Permeability; Stability; Structural stability; Uplift pressure; Foundations
Boundary Effects on Stability of Structures, A. S. Chawla, 481

Hydraulics; Pipe flow; Pipelines; Pumps; Water hammer; Water pressure; Discharge lines
Start-up Pressures in Short Pump Discharge Lines, Irving Joseph and Frank A. Hamill, 359

Hydraulics; Pipe flow; Pipelines; Valves; Cavitation
Choking and Supercavitating Valves, J. Paul Tullis, 69

Hydraulics; Pipe flow; Rivers; Sediments; Bed load; Channels; Flumes
Friction Factors in Solid Material Laden Systems, Ertan R. Acaroglu, 241

Hydraulics; Pipe flow; Sedimentation; Sediment deposits; Two phase flow
Pipelining of Low-Concentration Sand-Water Mixtures, Millard P. Robinson, Jr. and Walter H. Graf, 381

Hydraulics; Pipe flow; Water distribution; Computers; Hydraulic models
Graph-Theoretic Models for Pipe Network Analysis, H. K. Kesavan and M. Chandrashekar, 167

Hydraulics; Pipe flow; Water distribution; Water supply; Algorithms; Computers
Efficient Algorithm For Distribution Networks, Pierre F. Lemieux, 545

Hydraulics; Pipelines; Water hammer; Cavitation
Cavitation in Horizontal Pipelines Due to Water Hammer, J. P. Th. Kalkwijk and C. Kranenburg, 32

Hydraulics; Planning; Regional planning; Systems engineering; Water resources
Use of Systems Analysis in Water Resources Planning, William K. Johnson, 446

Hydraulics; Planning; Research; Fluid mechanics
Research and Planning in Fluid Mechanics, Stephen J. Kline, 281

Hydraulics; Pollution; Sanitary engineering; Settling basins; Sewage disposal; Tanks (containers); Trickling filters; Bacteria; Chlorine; Detention reservoirs; Filtration
Chlorine Disinfection in Final Settling Basins, Darrell W. Monroe and Donald C. Phillips, 296

Hydraulics; Power; Rivers; Sediments; Sediment transport; Statistical analysis; Concentration
Unit Stream Power and Sediment Transport, Chih Ted Yang, 519

Hydraulics; Powerplants; Stream flow; Temperature; Density stratification
Cooling Water Density Wedges in Streams, Edward M. Polk, Jr., Barry A. Benedict and Frank L. Parker, 37

Hydraulics; Precipitation (meteorology); Runoff; Watersheds; Discharge; Drainage; Evaporation
A Model to Predict Mean Annual Watershed Discharge, Steven I. Majtenyi, 373

Hydraulics; Pressure head; Water pressure; Flow control; Fluid flow; Gates
Reattaching Flow Downstream of Leaf Gate, Rangaswami Narayanan and Alan J. Reynolds, 301

Hydraulics; Rainfall; Silver iodide; South Dakota; Water resources; Weather modification
Weather Modification Program for South Dakota, Richard A. Schleusener and Edwin I. Boyd, 466

Hydraulics; Rainfall; Statistical analysis; Flood forecasting; Flood frequency; Floods
Floods Predicted From Rainfall Frequencies, Lee Robinson and Theodore T. Williams, 517

Hydraulics; Reaeration; Turbulence; Fluid flow
Wind Shear-Turbulence and Reaeration Coefficient, Aziz F. Eloubaidy and Erich J. Plate, 111

Hydraulics; Research; Skin friction; Transition flow; Turbulence; Fluid flow
Experiments on Plane Couette Flow, Hans J. Leutheusser and Vincent H. Chu, 7

Hydraulics; Reservoirs; Temperature; Thermal stratification; Water quality
Temperature Prediction in Stratified Reservoirs, Wayne C. Huber, Donald R.F. Harleman and Patrick J. Ryan, 234

Hydraulics; Ripple marks; Sand waves; Sedimentation; Bed movements; Channels (waterways)
Initiation of Ripples by Artificial Disturbances, Philip B. Williams and Patrick H. Kemp, 328

Hydraulics; River beds; Armoring (streambed); Bed roughness; Degradation; Egypt
River Bed Degradation After Closure of Dams, Hammad Y. Hammad, 220

Hydraulics; River closures; Rivers; Stability; Acceleration tolerance; Construction; Dams (embankment); Dams (rockfill)
Stability of Rockfill in End-Dump River Closures, Bishnu P. Das, 567

Hydraulics; Rivers; Channels (waterways); Computation; Diffusion; Floods
Diffusion Solution To Flows with Upstream Control, Alex J. Sutherland and Alistair G. Barnett, 537

Hydraulics; Rivers; Salinity; Salt removal; Water resources; Agriculture
Present and Future Salinity of Colorado River, Myron B. Holburt and Vernon E. Valentine, 192

Hydraulics; Rivers; Sands; Statistical analysis; Waterways; Waves
Statistical Properties of Missouri River Bed Forms, V.S. Shastri Annambhotla, William W. Sayre and Robert H. Livesey, 544

Hydraulics; Rivers; Sedimentation; Sediment load; Bed load
Sedimentation Transportation Mechanics: G. Fundamentals of Sediment Transportation, Task Committee on Preparation of Sedimentation Manual, Committee on Sedimentation, Vito A. Vanoni, Chmn., 64

Hydraulics; Rivers; Sedimentation; Streams; Bed load; Bedload movement
Sediment Discharge Computation Procedures, Nick Tywoniuk, 213

Hydraulics; Rivers; Sediment transport; Bed load
Sediment Transport Measurements in Gravel River, Albert B. Hollingshead, 47

Hydraulics; Rivers; Water flow; Channel stabilization; Curves
Flow Processes in Open Channel Bends, Robert P. Apmann, 263

Hydraulics; Salinity; Two phase flow; Computation; Density; Estuaries; Fluid flow
Numerical Computation of Stratified Nearly Horizontal Flows, John P. Grubert and Michael B. Abbott, 530

Hydraulics; Sands; Scour; Vortices; Beds under water; Dikes; Erosion
Erosion of Sand Beds Around Spur Dikes, Mohammad Akram Gill, 476

Hydraulics; Sanitary engineering; Sewers; Systems engineering; Utilities; Costs; Economics
Optimal Design of Urban Wastewater Collection Networks, Jarir S. Dajani, Robert S. Gemmell and Edward K. Morlok, 534

Hydraulics; Sanitary engineering; Siphons; Stilling basins; Storm water; Water pollution; Baffles
Stilling Pond Storm Overflow Studies, Y. R. Reddy and John Pickford, 428

Hydraulics; Scale effect; Siphons
Siphons: Some Scale-Effects in Models, Richard B. Whittington and Kamil H.M. Ali, 94

Hydraulics; Sedimentation; Sediments; Stream flow; Temperature; Bed load; Bedload movement
Temperature Effects in Low-Transport, Flat-Bed Flows, Brent D. Taylor and Vito A. Vanoni, 412

Hydraulics; Sedimentation; Sediment transport; Bed forms
Critical Review of Sediment Transport Experiments, Richard H. Cooper, Allan W. Peterson and Thomas Blench, 247

Hydraulics; Sedimentation; Sediment yield; Statistical analysis; Erosion
Predicting Sediment Yield in Western United States, Elliott M. Flaxman, 585

Hydraulics; Sedimentation; Streams; Suspended sediments; Bed load; Canals; Channels; Desilting; Hydraulic models
Chapter V: Sediment Control Methods: C. Control of Sediment in Canals, By the Task Committee on Preparation of Sedimentation Manual, Committee on Sedimentation of the Hydraulics Division, Vito A. Vanoni, Chmn., 455

Hydraulics; Seepage; Conformal mapping; Flow nets
Approximate Solution to Flow Problems Under Dams, Demetrious G. Christoulas, 84

Hydraulics; Shear stress; Two phase flow; Water pollution; Density; Estuaries
Gradually Varying Two-Layer Stratified Flow, Flemming Bo Pedersen, 155

Hydraulics; Slabs; Uplift pressure; Chute spillways; Dams (earth); Eductors; Ejectors; Failure; Hydraulic jump
Damage to Karnafuli Dam Spillway, Mohammad A. Rahman, 596

Hydraulics; Spatial distribution; Weirs; Discharge coefficients; Fluid flow
Spatially Varied Flow Over Side-Weirs, Kanakatti Subramanya and Subhash Chandra Awasthy, 84

Hydraulics; Spillways; Vibration; Design; Field tests; Gates
Spillway Gate Vibration on Arkansas River Dams, Tasso Schmidgall, 146

Hydraulics; Statistical analysis; Turbulence
Lagrangian Characteristics of Surface Turbulence, Eggert Hansen, 346

Hydraulics; Steady flow; Water distribution (applied); Algorithms; Computer programs; Head losses
Computer Analysis of Water Distribution Systems: Part I - Formulation of Equations, Chan F. Lam and M. L. Wolla, 173

Hydraulics; Stilling basins; Turbulence; Boundary shear; Energy dissipators; Hydraulic jump
Boundary Layer Effects on Hydraulic Jump Location, Edward H. Wilson and Andrew A. Turner, 341

Hydraulics; Stratified flow; Water quality; Cooling water; Diffusion
Dilution of Buoyant Two-Dimensional Surface Discharges, Heinz Stefan, 124

Hydraulics; Supercritical flow; Channels (waterways); Design; Drag; Hydraulic jump
Supercritical Flow Over Sills at Incipient Jump Conditions, Karam S. Karki and Subhash Chander, 503

Hydraulics; Supercritical flow; Supersonic flow; Water flow; Channels (waterways); Hydraulic models
Supercritical Flow in Rectangular Expansions, John B. Herbich and Peter Walsh, 497

Hydraulics; Supercritical flow; Weir crests; Baffles; Conformal mapping; Drag
Supercritical Flow Over Sills, John A. McCorquodale and M. K. Giratalla, 239

Hydraulics; Temperature; Tests; Thermal pollution; Coefficients; Evaporation; Heat exchangers; Hydraulic models
Evaluating Water Surface Heat Exchange Coefficients, Peter D. Hindley and Russell M. Miner, 421

Hydraulics; Tests; Tractive forces; Alluvial channels; Bed load
Bed Load Transportation in Alluvial Channels, Satya P. Garg, Ashutosh K. Agrawal and Prem Raj Singh, 2

Hydraulics; Time of concentration; Tracers; Dispersions
Hydraulic Treatment Efficiency of Waste Stabilization, Kenneth A. Mangelson and Gary Z. Watters, 333

Hydraulics; Transportation; Urban planning; Water management (applied); Flood control
Effect of Transportation Planning on Flood Plain Management, Thomas M. Lee, 178

Hydraulics; Turbulence; Covariance; Flow rate; Hot film anemometers
Measurement of Velocity-Concentration Covariance, Raul S. McQuivey and Thomas N. Keefer, 459

Hydraulics; Turbulent flow; Cylinders; Drag
Drag Coefficient of Cylinders in Turbulent Flow, Stephen C. Ko and Walter H. Graf, 305

Hydraulics; Underground storage; Wells; Aquifers; Density
Gravitational and Dispersive Mixing in Aquifers, Lynn W. Gelhar, John L. Wilson, III and John S. Miller, 588

Hydraulics; Viscosity; Bioengineering
Streamlines in Two-Dimensional Laminar Branch Flows, David Charles Blest, 127

Hydraulics; Waterways experiment station; ASCE (awards & prizes); History; Hydraulic laboratories; Hydraulic laboratories
Hydraulicians are Human Too, Hunter Rouse, 257

Hydraulics; Weirs; Broad-crested weirs; Control structures; Flow measurement
Characteristics of Flow Weirs of Finite Crest Width, Singamsetti Surya Rao and Manoj Kumar Shukla, 42

Hydrodynamic pressure; Natural frequency; Structural engineering; Underwater structures; Vibration; Damping
Virtual Mass of Submerged Structures, Anjur R. Chandrasekaran, Sarjit S. Sani and M. M. Malhotra, 308

Hydrodynamics; Jet flow; Turbulence; Velocity distribution; Water flow
Mean and Turbulent Velocities for Plane Jet, Walter C. Mih and John A. Hoopes, 378

Hydrodynamics; Mechanics; Ocean engineering; Structural engineering; Bridges (suspension); Cables (ropes); Dynamic structural analysis
Dynamic Analysis of Cable Systems, Richard F. Dominguez and Charles E. Smith, 388

Hydrodynamics; Models; Offshore structures; Waves; Coastal engineering; Coefficients
Mechanical Excitation of Offshore Tower Model, Charles P. Rains and Subrata K. Chakrabarti, 172

Hydrodynamics; Ocean engineering; Ocean waves; Subsurface structures; Waves; Coastal engineering
Wave Forces on Submerged Bodies, C. J. Garrison and P. Y. Chow, 371

Hydrodynamics; Railroads; Railroad trains; Simulation; Engineering mechanics
High-Speed Train Simulation Using Hydrodynamics, Robert A. Helfinstine and Charles Dalton, 162

Hydrodynamics; Seepage; Dams; Engineering mechanics; Fluid flow
Inverse Solution to Three-Dimensional Flows, Roland W. Jeppson, 374

Hydrodynamics; Turbulence; Vibration; Coefficients; Fluid flow; Hydraulics
Turbulence Effects On Drag of Sharp-Edged Bodies, John A. Roberson, Chi Yu Lin, Scott G. Rutherford and Marvin D. Stine, 386

Hydroelectric power; Irrigation; Low-flow augmentation; Multiple purpose projects; Optimization; Recreation; Water resources; Flood control; Hydraulics
Multireservoir Optimization Model, James S. Windsor and Ven Te Chow, 532

Hydroelectric power; Powerplants; Tidal power plants; Dams; Electric networks; Estuaries
Pumped Storage and Tidal Power in Energy Systems, Charles K. Haswell, Stephen W. Huntington, Thomas L. Shaw, Geoffrey R. Thorpe and Ian J. Westwood, 603

Hydroelectric power generation; Irrigation; Pakistan; Power; Cofferdams; Construction; Dams (buttress); Dams (earth); Embankments
Tarbela Dam Project, Pakistan, Wilson V. Binger, 594

Hydroelectric power generation; Mathematical models; Thermal stratification; Water quality; Biota; Dissolved oxygen; Environmental engineering
Predicting Quality Effects of Pumped Storage, Carl W. Chen and Gerald T. Orlob, 255

Hydroelectric power generation; Models; Powerplants; Pumped storage; Turbines; Conservation; Costs; Dams (concrete); Dams (gravity); Economics; Environmental engineering
Wallace Dam, Major H. Thompson, Jr., 550

Hydroelectric power generation; Multiple purpose reservoirs; Tennessee Valley Authority; Water supply; Environmental engineering; Flood control
Impact of Multiple-Purpose Reservoir System on Regional Environment, Edward H. Lesesne, 370

Hydroelectric power generation; Power; River flow; Sedimentation; Dredging; Harbors
Sedimentation Effects of Hydroelectric Development, Jack F. Rasmussen, 469

Hydroelectric power generation; Professional activities; Thermoelectric power generation; Dams; Environmental engineering
Positive Points on Electric Power, George R. Higgins, 204

Hydroelectric powerplants; Seepage control; Asphalts; Dam construction; Dams (rockfill)
Stone Asphalt Cores Waterproof French Dams, Victorien Lelu, 206

Hydrograph analysis; Irrigation; Subsurface irrigation; Convolution integrals
Subsurface Hydrograph Analysis by Convolution, Willard M. Snyder and Loris E. Asmussen, 514

Hydrographs; Hydrology; Mathematical models; Runoff; Urban areas; Watersheds; Hydraulics
University of Cincinnati Urban Runoff Model, Constantine Papadakis and Herbert C. Preul, 523

Hydrographs; Storm drains; Storm water; Unsteady flow; Hydraulics
Routing Storm Water Through a Drainage System, Subin Pinkayan, 102

Hydrography; Hydrology; Mapping; Maps; Water
Water Features on Topographic Maps, Morris M. Thompson, 175

Hydrology; Irrigation; Mathematical models; Floods
Border Irrigation Advance and Ephemeral Flood Waves, Roger E. Smith, 370

Hydrology; Irrigation; Meteorology; New Jersey; Water purification; Water quality; Water resources; Droughts; Environmental engineering; Estuaries
Impact of Drought on New Jersey's Water Resources, Peter W. Anderson, Samuel D. Faust and John E. McCall, 472

Hydrology; Kinematics; Models; Overland flow; Rational formula; Flood hydrographs; Hydraulics
Kinematic Wave Nomograph for Times of Concentration, Robert M. Ragan and J. Obiukwu Duru, 506

Hydrology; Land use; Legislation; Municipal engineering; Professional practice; Runoff; Subdivisions; Urban planning; Waterways (watercourses); Drainage; Floods; Hydraulics
An Engineer Looks at Drainage Law, Alfred R. Pagan, 511

Hydrology; Legislation; Water demand; Ground water; Groundwater management; Ground water recharge; Hydraulics
Ground Water Management, by the Committee on Ground Water, Manual and Report on Engineering Practice No. 40, Jack J. Coe, Chmn., 512

Hydrology; Mapping; Maps; Water; Hydrography
Water Features on Topographic Maps, Morris M. Thompson, 175

Hydrology; Markov processes; Mathematical models; Rainfall; Synthesis; Time series analysis; Hydraulics
Stochastic Generation of Rainfall, Kazimierz Adamowski and Anthony F. Smith, 548

Hydrology; Mathematical models; Reservoirs; Sedimentation; Water quality; Watersheds; Erosion; Hydraulics
Sediment Yield Computed With Universal Equation, Jimmy R. Williams and Harold D. Berndt, 578

Hydrology; Mathematical models; Runoff; Urban areas; Watersheds; Hydraulics; Hydrographs
University of Cincinnati Urban Runoff Model, Constantine Papadakis and Herbert C. Preul, 523

Hydrology; Measuring instruments; Data systems; Hydraulics
New Approach to Hydrologic Data Acquisition, Edward J. Langham, 56

Hydrology; Pollution control; Sanitary engineering; Sewage; Water quality; Biochemical oxygen demand; Concrete (reinforced)
In-Line Structure Stores and Treats Combined Overflows, Theodore G. Biehl and David M. Waring, 398

Hydrology; Reservoir storage; Runoff; Stochastic processes; Distribution functions; Hydraulics
Some Problems with Log-Normal Markov Runoff Models, Stephen J. Burges, 443

Hydrology; Runoff; Combined sewers; Computers
A System for Regulation of Combined Sewage Flows, Charles V. Gibbs, Stuart M. Alexander and Curtis P. Leiser, 506

Hydrology; Salt water intrusion; Water pollution; Water resources; Analogs; Aquifers; Ground water; Hydraulics
Hele-Shaw Model of Long Island Aquifer System, Michael A. Collins, Lynn W. Gelhar and John L. Wilson, III, 489

Hydrology; Small watersheds; Digital simulation; Floods; Hydraulics
Flood Frequency Estimating Techniques for Small Watersheds, George Fleming and Delbert D. Franz, 23

Hydrology; Statistical analysis; Benefit-cost ratios; Economic analysis; Flood control; Hydraulics
Bias in Computed Flood Risk, Clayton H. Hardison and Marshall E. Jennings, 188

Hydrometeorology; Precipitation gages; Weather modification; Cloud seeding; Hydraulics
Colorado Pilot Project: Design Hydrometeorology, Patrick A. Hurley, 291

Hydrostatic tests; Structural engineering; Underwater structures; Concrete; Field tests
Cylindrical Concrete Hulls Under Hydrostatic Loading, Harvey H. Haynes, Robert J. Ross and Norman D. Albertsen, 294

Hyperbaric medicine; Hyperbaric oxygenation; Materials stability; Pressurized cabins; Structural engineering
Material Safety Requirements of Hyperbaric Facilities, William J. Bobisch and Michael Yachnis, 322

Hyperbaric oxygenation; Materials stability; Pressurized cabins; Structural engineering; Hyperbaric medicine
Material Safety Requirements of Hyperbaric Facilities, William J. Bobisch and Michael Yachnis, 322

Hyperbolic parabolic shells; Mathematical logic; Shell structures; Structural engineering; Cooling towers
Differential Settlement of Hyperbolic Cooling Towers, Phillip L. Gould, 487

Hyperbolic parabolic shells; Membranes; Roofs; Shells (structural forms); Structural engineering; Buckling
Analysis of Thin-Steel Hyperbolic Paraboloid Shells, Prabodh V. Banavalkar and Peter Gergely, 557

Hyperbolic parabolic shells; Membranes; Roofs; Shells (structural forms); Structural engineering; Tests
Experimental Investigation Of Thin-Steel Hyperbolic Paraboloid Structures, Peter Gergely and George Winter, 473

Hyperbolic parabolic shells; Pollution abatement; Shell structures; Water vapor; Cooling towers; Electric power generation
Wet-Type Hyperbolic Cooling Towers, Paul Rogers, 262

Hyperbolic parabolic shells; Pressure; Shells (structural forms); Vibration; Cooling towers; Engineering mechanics; Finite elements
Vibrations of Pressure Loaded Hyperboloidal Shells, Mehran Lashkari, Victor I. Weingarten and David S. Margolias, 431

Hyperbolic parabolic shells; Roofs; Shells (structural forms); Thin shell structures
Analysis of Hipped Roof Hyperbolic Paraboloid Structures, William C. Schnobrich, 359

Hyperbolic parabolic shells; Shells (structural forms); Concrete (post-tensioned); Concrete (prestressed); Fire safety
Record Concrete Shell Roof Featured in Coliseum, Y. C. Yang, 275

Hyperbolic parabolic shells; Structural engineering; Airy function; Boundary conditions; Finite difference method; Harmonic functions
Finite Difference Approach to Hyperbolic Paraboloids, M. I. Beg, 146

I beams; Oregon; Bridge construction; Bridges (box girder); Bridges (structures)
Oregon Gets a Segmental Post-Tensioned Bridge, L. F. Pierce, 151

I beams; Stability; Structural engineering; Beams (supports); Buckling
Elastic Stability of Tapered I-Beams, Sritawat Kitipornchai and Nicholas S. Trahair, 165

Ice; Ice control; Mississippi River; Waterways; Aeration; Backwater; Dams (movable); Dikes; Gates
Reducing Ice Formation at Navigation Dams, Henry W. Harich, 387

Ice; Ice jams; Mathematical models; Rivers; Hydraulics
Stability of Floating Ice Blocks, Mehmet S. Uzuner and John F. Kennedy, 571

Ice; Marinas; Pile extraction; Piles (foundations); Reclamation; Wisconsin; Docks
Lake Superior Yachting Marinas Resist Ravages of Ice, C. Allen Wortley, 79

Ice; Permafrost; Pipelines; Settlement (structural); Soil mechanics; Thawing; Bending stress
Settlement of Pipeline on Thawing Permafrost, Andrew C. Palmer, 276

Ice; Rivers; Stability; Thermal conductivity; Flow patterns; Freeze-thaw cycle; Hydraulics
Ripples on Underside of River Ice Covers, George D. Ashton and John F. Kennedy, 470

Ice control; Mississippi River; Waterways; Aeration; Backwater; Dams (movable); Dikes; Gates; Ice
Reducing Ice Formation at Navigation Dams, Henry W. Harich, 387

Ice cover; Oxygen; Oxygen consumption; Rivers; Sag; Sanitary engineering; Stream pollution; Use rates
Oxygen Depletion in Ice Covered River, Patrick H. Bouthillier, 326

Ice jams; Mathematical models; Rivers; Hydraulics; Ice
Stability of Floating Ice Blocks, Mehmet S. Uzuner and John F. Kennedy, 571

Ice lenses; Permafrost; Pile foundations; Frost action; Frost heave
Frost Heaving of Piles in Permafrost, James Allen and Robert W. Huck, 215

Idaho; Irrigation; Water consumption; Evaporation; Evapotranspiration; Frequency distribution
Peak Water Requirements of Crops in Southern Idaho, James L. Wright and Marvin E. Jensen, 236

Idaho; Organic matter; Reservoirs; Sediment deposits; Watersheds; Density; Forest land
Volume Weight of Reservoir Sediment in Forested Areas, Walter F. Megahan, 435

Impact; Land use; Towers; Transmission lines; Environmental engineering; Esthetics
Transthetics, Harold P. Hulett, 313

Impact; New York; Structural engineering; Bridges (girder); Bridges (structures); Curved beams; Field tests
Dynamic Testing of Curved Bridge - Huyck Stream, William L. Armstrong, 429

Impact; Overland flow; Rainfall; Turbulence; Water flow; Drainage; Erosion; Friction
Mechanics of Sheet Flow Under Simulated Rainfall, Yong Nam Yoon and Harry G. Wenzel, Jr., 13

Impact; Sanitary engineering; Sewage disposal; Water resources; Cost effectiveness; Economic analysis; Environmental engineering; Ground water
Cost-Effectiveness Analysis of Wastewater Reuses, Stephen C. Ko and Lucien Duckstein, 552

Impact prediction; Land use; Power; Powerplants; Regional planning; Site selection; Statistical analysis
New Approach to Power Plant Siting, James D. Calvert and William L. Heilman, 201

Impact tests; Penetration; Projectiles; Sands; Soil mechanics; Bearing capacity
Low Velocity Projectile Penetration, Wen L. Wang, 104

Imperfections; Structural engineering; Axial compression; Buckling; Elastic-plastic analysis
Post-Buckling of Axially Compressed Plates, Archibald N. Sherbourne and Robert M. Korol, 477

Impulses; Loading; Boundary value problems; Engineering mechanics
Bounds for Impulsively Loaded Plastic Structures, John B. Martin and Alan R.S. Ronter, 156

Incineration; Incinerators; Leaching; Soil mechanics; Chemical composition; Compaction
Incinerator-Residue-Fill Site Investigation, Robert J. Schoenberger and A. Alexander Fungaroli, 65

Incinerators; Leaching; Soil mechanics; Chemical composition; Compaction; Incineration
Incinerator-Residue-Fill Site Investigation, Robert J. Schoenberger and A. Alexander Fungaroli, 65

Inclinometers; Instrumentation; Soil stability; Stability; Transportation; Earth movements; Highways
Instrumentation Applied to Slope Stability Problems, Stanley D. Wilson and David E. Hilts, 316

Inclinometers; Meteorology; Overconsolidation; Soil mechanics; Expansive clays; Failure; Harbor structures
Behavior of Wharf Affected by River Fluctuations, Richard A. Sullivan, 457

Indexes (documentation); Information retrieval; Reports; Sanitary engineering; Thermal pollution; Water pollution; Water quality; Abstracts
Information Sources on Water Quality, Including Thermal Pollution, the Committee on Thermal Pollution of the Sanitary Engineering Division, Fred A. Limpert, Chmn., 407

India; Mathematical models; Models; Rivers; Tides; Tidewater; Waterways (transportation); Estuaries
Mathematical Model of River Hooghly, Donald M. McDowell and David Prandle, 209

India; Rainfall-runoff relationships; Runoff; Storms; Antecedent precipitation; Hydraulics
Synthetic Storm Pattern and Run-off for Gauhati, India, M. Bandyopadnyay, 270

Industrial wastes; Irradiation; Plastics; Radioactivity; Refuse disposal; Sanitary engineering
Use of Irradiation in Plastic Wastes Disposal, Masaru Tanaka and Tsuyoshi Mifune, 414

Industrial wastes; Land use; Population; Regulations; Sanitary engineering; Streams; Agriculture; Aquatic plants
Water Pollution - Facts and Fantasies, John M. Henderson, 390

Industrial wastes; Municipal water; Research; Sanitary engineering; Solid wastes; Waste water; Water resources; Water treatment; Air pollution
Research Needs in Sanitary Engineering, Sanitary Engineering Research Committee of the Sanitary Engineering Division, Jack M. Betz, Chmn., 321

Industrial wastes; Sanitary engineering; Sewage treatment; Biological treatment; Capital costs
Design and Economics of Joint Wastewater Treatment, W. Wesley Eckenfelder, Jr., 261

Industrial wastes; Tidal currents; Water pollution; Water pollution control; Coastal engineering
Oil Booms in Tidal Currents, Ralph H. Cross and David P. Hoult, 192

Inelastic action; Slenderness ratio; Structural engineering; Struts; Tees; Thickness ratio; Width; Angle iron; Buckling; Columns (supports)
Buckling of Steel Angle and Tee Struts, John B. Kennedy and Madugula K.S. Murty, 547

Infiltration; Infiltration rate; Irrigation; Soil properties; Surface irrigation; Water; Water flow
Shape Factors in Irrigation Water Advance Equation, Pratap Singh and H. S. Chauhan, 502

Infiltration; Pavement bases; Soil mechanics; Soil moisture; Subgrade; Clays
Subgrade Moisture Under Oklahoma Highways, T. Allan Haliburton, Donald R. Snethen, Larry K. Shaw and B. Dan Marks, 114

Infiltration; Soil moisture; Soil moisture movement; Two phase flow; Capillary flow; Hydraulics
Perturbation Analysis of Two-Phase Infiltration, Alain Noblanc and Hubert J. Morel-Seytoux, 463

Infiltration rate; Irrigation; Soil properties; Surface irrigation; Water; Water flow; Infiltration
Shape Factors in Irrigation Water Advance Equation, Pratap Singh and H. S. Chauhan, 502

Inflation (economics); Mathematical models; Models; Sewage disposal; Water supply; Construction costs; Costs
Mathematical Model for Rate Studies, Kuan M. Yao, 442

Inflow; Turbulence; Water flow; Boundary shear; Flow rate; Hydraulic jump; Hydraulics
Effects of Inflow Condition on Hydraulic Jump, Hans J. Leutheusser and Viswanathan C. Kartha, 401

Information retrieval; Publications; Transportation; Airports; Bibliographies
List of Information Sources for Airport Planners, Robert K. Palmer, 65

Information retrieval; Reports; Sanitary engineering; Thermal pollution; Water pollution; Water quality; Abstracts; Indexes (documentation)
Information Sources on Water Quality, Including Thermal Pollution, the Committee on Thermal Pollution of the Sanitary Engineering Division, Fred A. Limpert, Chmn., 407

Inhibition; Oxygenation; Sanitary engineering; Sulfides; Catalysts
Oxidation of Sulfide by O_2: Catalysis and Inhibition, Kenneth Y. Chen and J. Carrell Morris, 181

Initial stress; Structural engineering; Concrete (reinforced); Elastic-plastic analysis; Finite element method
Nonlinear Stress Analysis of Reinforced Concrete, Somasundaram Valliappan and T. F. Doolan, 218

Injection wells; Mathematical studies; Recharge wells; Waste water; Dispersion; Engineering mechanics
Dispersion from Recharge Well, Charles W. Lenau, 197

Inland waterways; River regulation; River training; Thailand; Alluvial streams; Bank protection (waterways); France
Development of Bottom Panels in River Training, Maurice Remillieux, 300

Inlets (waterways); Jets; Meteorology; Momentum; Tornadoes; Vortices; Air entrainment; Drains; Dust storms; Engineering mechanics; Fluid mechanics; Friction; Hydraulics
Experiments on Unstable Vortices, Enzo Levi, 249

Inlets (waterways); Rivers; Simulation; Tides; Water waves; Waterways; Hydraulic models; Hydraulics
Simulation of Long Waves in Branching Waterways, Robert F. Henry, 224

Innovation; Professional societies; Sciences; Sociology; Training; Hydraulic engineering; Hydraulics
Technological Innovation and Hydraulic Engineering, George Bugliarello, 278

Inspection; Maintenance; Water pipes; Aqueducts
The Undersea Aqueduct -- A New Concept in Transportation, Ellis L. Armstrong, 195

Inspection; Personnel development; Quality control; Tests; Construction; Consulting engineers
Summary Report of Questionnaire on Construction Inspection, by the Task Committee on Inspection of the Construction Division, Joseph Goldbloom, Chmn., 524

Installation; Power; Power lines; Railroads; Transmission lines; Blasting; Costs; Excavation; Foundations
Powerline Foundations Installed along Railroad Tracks, Roger S. Chapman, 462

Instantaneous unit hydrograph; Mathematical models; Storm drains; Urbanization; Hydraulic models; Hydraulics
Conceptual Hydrologic Models for Urbanizing Basins, Ramachandra A. Rao, Jacques W. Delleur and B. S.P. Sarma, 362

Institutional constraints; Planning; Sanitary engineering; Water quality; Ecology; Environmental engineering
Clean Water -- An Environmental Challenge, Percy H. McGauhey, 290

Institutions; Professional activities; Regional planning; Water quality control; Environmental engineering; Government
Water Pollution Control Institutions, William Whipple, Jr., 215

Instrumentation; Soil mechanics; Cracking (fracturing); Dams; Dams (earth); Embankments; Finite element method
Stresses and Movements in Oroville Dam, Fred H. Kulhawy and James M. Duncan, 363

Instrumentation; Soil stability; Stability; Transportation; Earth movements; Highways; Inclinometers
Instrumentation Applied to Slope Stability Problems, Stanley D. Wilson and David E. Hilts, 316

Insurance; Insurance costs; Civil engineering; Civil engineers; Health
Overview of the Health Care Services Industry, Robert A. Tschetter, 591

Insurance; Liabilities; Professional activities; Professional practice; ASCE (insurance)
Professional Liability Insurance, Paul L. Genecki, 250

Insurance costs; Civil engineering; Civil engineers; Health; Insurance
Overview of the Health Care Services Industry, Robert A. Tschetter, 591

Integral transformations; Punches; Stresses; Engineering mechanics
Boussinesq Problems for Nonhomogeneous Solid, Mumtaz K. Kassir, 236

Interactions; Loads (forces); Nonlinear systems; Structural engineering; Trusses
Nonlinear Elastic Truss Analysis Partitioning, N. M. Singaraj and Jawalker K. Sridhar Rao, 562

Interchanges; Orthotropic plate; Skew bridges; Stiffness methods; Structural analysis; Structural engineering; Bridges (box girder); Computer programs; Finite elements; Folded plates
Cellular Structures of Arbitrary Plan Geometry, Kaspar J. William and Alexander C. Scordelis, 315

Interest groups; Land classification; Land management; Land use; Environmental surveys
Needed: A National Land Use Policy, Daniel A. Dreyfus, 245

Interstate highway system; Paving; Planning; Cost estimates; Excavation; Highway engineering
Cost Estimating Model for Rural Interstate Highways, John Whitman and Frederick J. Wegmann, 402

Investment; Planning; Professional activities; Benefit cost analysis; Budget estimates
Budget Constraints and Multiobjective Planning, Arthur Maass and David C. Major, 463

Investments; Land use; Pipelines; Planning; Railroads; Regional planning; Terminal facilities; Transmission lines; Urban planning; Urban transportation; Waterways (transportation); Freight terminals
Restructuring Freight Transportation in Chicago, James Robert Blaze, 353

Investments; Land use; Regional planning; Transportation; Benefit cost analysis; Canada; Economic analysis; Highway engineering; Highway planning; Highways
Programming of Regional Highway Investments, Bruce G. Hutchinson, 269

Inviscid flow; Shear flow; Velocity; Axisymmetric flow; Computers; Eddies; Engineering mechanics
Inviscid Shear Flow with Corner Eddies, P.A. Aswatha Narayana and M.V. Krishna Murthy, 81

Iodine; Meningitis; Microorganism control (water); Water treatment; Amoeba; Chlorine; Cysts; Disinfection; Dysentery
Amoebic Cysticidal Properties of Halogens in Water, Richard Stringer and Cornelius W. Kruse, 98

Iraq; Philippines; Venezuela; Weathering; Abutments; Dams (rockfill); Foundations; Geologic investigations; Grouting
Foundation and Abutment Treatment for Rockfill Dams, Richard C. Acker and Jack C. Jones, 494

Iron compounds; Phosphorus compounds; Activated sludge process; Anaerobic digestion; Eutrophication
Anaerobic Digestion of Sludge Containing Iron Phosphate, Sudershan Malhotra, Thomas P. Parrillo and Alan Gene Hartenstein, 74

Irradiation; Plastics; Radioactivity; Refuse disposal; Sanitary engineering; Industrial wastes
Use of Irradiation in Plastic Wastes Disposal, Masaru Tanaka and Tsuyoshi Mifune, 414

Irreversible processes; Kinetics; Sanitary engineering; Sorption; Waste treatment; Activated carbon; Adsorption
Sorption Kinetics in Finite-Bath Systems, Francis A. DiGiano and Walter J. Weber, Jr., 546

Irrigation; Agricultural products; Economic analysis; Evapotranspiration
Water-Yield Relations for Nonforage Crops, Lloyd A. Downey, 157

Irrigation; ASCE (executive secretary); Dams; Disease vectors; Drainage; Ecology; Egypt; Erosion
People, Ecology and the Aswan High Dam, William H. Wisely, 67

Irrigation; California; Drainage
Ecological Impacts of Water Projects in California, Robert M. Hagan and Edwin B. Roberts, 198

Irrigation; Climatology; Consumptive use (water); Evaporation; Evapotranspiration; Frequency distribution
Central California Evapotranspiration Frequencies, W. O. Pruitt, Sergius von Oettingen and D. L. Morgan, 251

Irrigation; Computers; Dimensional analysis; Field data; Forecasting; Functions (mathematics)
Prediction of Irrigation Advance Function by Dimensional Analysis, G. Sastry and S. C. Agarwal, 223

Irrigation; Conservation; Ecology; Environmental engineering
Tunnel Vision or Ecological View, Virginia M. Hines, 28

Irrigation; Irrigation canals; Surface irrigation; Water distribution (applied); Flow distribution; Hydraulics
Distribution Channels with Multiple Outlets, William E. Hart and John Borelli, 356

Irrigation; Irrigation efficiency; Sprinkler irrigation; Surface irrigation; Trickle irrigation; Water application rate; Water management (applied)
Attainable Irrigation Efficiencies, Lyman S. Willardson, 331

Irrigation; Irrigation operation " maintenance; Management; Soil moisture; Water consumption; Agricultural engineering
Irrigation Management - A Tool for Agribusiness, Neil W. Schild and Harvey R. Nelson, Jr., 486

Irrigation; Low-flow augmentation; Multiple purpose projects; Optimization; Recreation; Water resources; Flood control; Hydraulics; Hydroelectric power
Multireservoir Optimization Model, James S. Windsor and Ven Te Chow, 532

Irrigation; Low-flow augmentation; Probability theory; Reservoir storage; Safe yield; Water resources development; Water supply; Draft-storage curves
Potential United States Water-Supply Development, Clayton H. Hardison, 528

Irrigation; Maintenance; Operations; Organizations; Public opinion; Water management (applied); Drainage
Operation and Maintenance of Irrigation and Drainage Systems: Section II--Organization for Operation and Maintenance, Committee on Operation and Maintenance of Irrigation and Drainage Systems of the Irrigation and Drainage Division, Richard J. Willson, Chmn., 76

Irrigation; Mathematical models; Floods; Hydrology
Border Irrigation Advance and Ephemeral Flood Waves, Roger E. Smith, 370

Irrigation; Mathematical models; Soil moisture
Optimal Irrigation Quantity and Frequency, I-pai Wu and Tung Liang, 171

Irrigation; Measuring instruments; Open channel flow; Drainage; Flumes; Hydraulics
Generalized Discharge Relations for Cutthroat Flumes, Gaylord V. Skogerboe, Ray S. Bennett and Wynn R. Walker, 601

Irrigation; Meteorology; New Jersey; Water purification; Water quality; Water resources; Droughts; Environmental engineering; Estuaries; Hydrology
Impact of Drought on New Jersey's Water Resources, Peter W. Anderson, Samuel D. Faust and John E. McCall, 472

Irrigation; Meteorology; Rainfall; Rivers; Water resources; Weather modification; Cloud seeding
Cloud Seeding Interpreted Through Atmospheric Water Balance, James L. Rasmussen, 562

Irrigation; Open channel flow; Overfalls; Flow measurement; Flowmeters
Free Overfall As Flow Measuring Device, Sebastian W. Bauer and Walter H. Graf, 12

Irrigation; Pakistan; Power; Cofferdams; Construction; Dams (buttress); Dams (earth); Embankments; Hydroelectric power generation
Tarbela Dam Project, Pakistan, Wilson V. Binger, 594

Irrigation; Permeability; Aquifers; Drainage; Ground water; Groundwater recharge
Basin Recharge of the Ogallala Aquifer, Vladimir S. Aronovici, Arland D. Schneider and Ordie R. Jones, 104

Irrigation; Phreatophytes; Transpiration; Water consumption; Evaporation; Evapotranspiration
Simulation of Salt Cedar Evapotranspiration, William C. Hughes, 570

Irrigation; Pipe flow; Trickle irrigation
Uniform Irrigation with Low-Pressure Trickle Systems, Lloyd E. Myers and Dale A. Bucks, 436

Irrigation; Probability theory; Statistical analysis; Drainage; Evapotranspiration
Maximum Potential Evapotranspiration Frequency - East Central U.S., J. L. McGuinness and Leslie H. Parmele, 267

Irrigation; Pumping; Salinity; Tests; Agriculture; Aquifers; Artesian wells; Drainage
Pumping an Artesian Source for Water Table Control, Eugene J. Doering and Leo C. Benz, 344

Irrigation; Radiation; Advection; Evapotranspiration; Frequency distribution
Frequency of Potential Evapotranspiration Rates in Great Central Plains, Norman J. Rosenberg, 294

Irrigation; Reservoir storage; Reservoir yield; Stream flow; Water supply; Drainage; Droughts
Drought Severity and Water Supply Dependability, Leo R. Beard and Harold E. Kubik, 539

Irrigation; Root systems; Transpiration; Water loss; Darcys law
Simulation of Post-Irrigation Moisture Movement, Fred J. Molz, 580

Irrigation; Safety; Water distribution (applied); Water law; Water rights; Drainage; Ground water
General Statement of Principles to be Included in State Water Rights Laws, Committee on Water Laws of the Irrigation and Drainage Division, Floyd A. Bishop, Chmn., 396

Irrigation; Sea water intrusion; Wastewater treatment; Wastewater use; Water treatment; California; Desalting
Orange County Water District's Water Factory 21, James R. Cofer, 549

Irrigation; Seepage; Canals; Channels; Ground water; Hydraulics
Seepage from Shallow Open Channel, Bruce W. Hunt, 252

Irrigation; Soil properties; Surface irrigation; Water; Water flow; Infiltration; Infiltration rate
Shape Factors in Irrigation Water Advance Equation, Pratap Singh and H. S. Chauhan, 502

Irrigation; Solar radiation; Water consumption; Climatology; Consumptive use (water); Evaporation; Evapotranspiration
Coastal California Evapotranspiration Frequencies, Paul R. Nixon, G. Paul Lawless and Gary V. Richardson, 279

Irrigation; Subsurface drains; Subsurface irrigation; Tiles; Water; Drainage
Irrigation Through Subsurface Drains, R. Wayne Skaggs, George J. Kriz and Reynaldo Bernal, 460

Irrigation; Subsurface irrigation; Convolution integrals; Hydrograph analysis
Subsurface Hydrograph Analysis by Convolution, Willard M. Snyder and Loris E. Asmussen, 514

Irrigation; Wastewater disposal; Water quality; Water reuse; Water treatment; California
Wastewater Reclamation in Southern California, Jack J. Coe and Finley B. Laverty, 450

Irrigation; Water consumption; Evaporation; Evapotranspiration; Frequency distribution; Idaho
Peak Water Requirements of Crops in Southern Idaho, James L. Wright and Marvin E. Jensen, 236

Irrigation; Water deprivation; Agriculture; Droughts; Economic development
Water Deficits -Irrigation Design and Programming, Robert M. Hagan and J. Ian Stewart, 318

Irrigation canals; Surface irrigation; Water distribution (applied); Flow distribution; Hydraulics; Irrigation
Distribution Channels with Multiple Outlets, William E. Hart and John Borelli, 356

Irrigation efficiency; Sprinkler irrigation; Surface irrigation; Trickle irrigation; Water application rate; Water management (applied); Irrigation
Attainable Irrigation Efficiencies, Lyman S. Willardson, 331

Irrigation operation " maintenance; Management; Soil moisture; Water consumption; Agricultural engineering; Irrigation
Irrigation Management - A Tool for Agribusiness, Neil W. Schild and Harvey R. Nelson, Jr., 486

Irrigation practices; Soil moisture; Water distribution (applied); Water requirements
Water Requirements of Rostered Irrigation Schemes, Patrick D. Fitzgerald and Gregory C. Arnold, 131

Isotropy; Soil mechanics; Structural engineering; Beams (supports); Contact pressure; Foundations
Behavior of Crossed Beams on Elastic Foundations, Ami Glassman, 125

Israel; Project management; Quality control; Bridges (concrete); Concrete (reinforced); Deformed bars
An American Engineer in Israel, Irving Kett, 295

Iteration; Linear programming; Optimization; Structural engineering; Computers
Structural Optimization by Inscribed Hyperspheres, Roman Baldur, 242

Iteration; Stiffness matrix; Stiffness methods; Bridges (cable-stayed)
Stiffness-Analysis of Cable-Stayed Bridges, Benjamin E. Lazar, 349

Jet aircraft; New jersey; New york; Airports; Air traffic; Costs; Dikes; Estimates
Offshore Jetport for New York-New Jersey Megalopolis, Edward G. Nawy and Fred C. Koletty, 179

Jet flow; Mathematics; Temperature; Turbulence; Buoyancy; Fluid flow; Hydraulics
Buoyant Jets with Three-Dimensional Trajectories, Eric Hirst, 563

Jet flow; Turbulence; Velocity distribution; Water flow; Hydrodynamics
Mean and Turbulent Velocities for Plane Jet, Walter C. Mih and John A. Hoopes, 378

Jets; Coastal engineering; Desalting; Dilution; Hydraulics
Model Study of Dense Jet in Flowing Fluid, Forrest M. Holly, Jr. and John L. Grace, Jr., 552

Jets; Lakes; Rivers; Thermoelectric power generation; Environmental engineering; Finite element method; Fluid flow; Heated water; Hydraulics
Hydrothermal Analysis by Finite Element Method, Larry A. Loziuk, James C. Anderson and Ted Belytschko, 559

Jets; Laminar flow; Turbulent boundary layer; Fluid flow; Hydraulics
Appearance of Unstable Buoyant Jet, Habib O. Anwar, 354

Jets; Meteorology; Momentum; Tornadoes; Vortices; Air entrainment; Drains; Dust storms; Engineering mechanics; Fluid mechanics; Friction; Hydraulics; Inlets (waterways)
Experiments on Unstable Vortices, Enzo Levi, 249

Jets; Orifices; Valves; Cavitation; Energy dissipators; Hydraulics
Cavitation in High-Head Conduit Control Dissipators, John F. Ripken and Norio Hayakawa, 151

Jets; Pollution; Rivers; Streams; Thermoelectric power generation; Heated water; Hydraulic models; Hydraulics
Surface Jet Model for Heated Discharges, Louis H. Motz and Barry A. Benedict, 136

Jets; Rock fills; Soil mechanics; Abutments; Cutoffs; Dams (rockfill); Foundations; Geology; Grouting
Foundation Practices for Talbingo Dam, Australia, B. J. Wallace and J. I. Hilton, 492

Jets; Shear flow; Two phase flow; Flow characteristics; Fluid flow; Hydraulics
Turbulent Compound Annular Shear Layers, Nallamuthu Rajaratnam and B. S. Pani, 350

Jets; Trashracks; Vibration; Water flow; Bars
Flow-Induced Vibrations of Trashrack Bars, J. W. Fortey and Robert F. Tiry, 230

Jets; Turbulence; Boundaries; Boundary layer flow; Gates; Hydraulics
Theoretical Analysis of Flow Past Leaf Gate, Rangaswami Narayanan, 320

Joints (connections); Joint sealers; Polyvinyl chloride; Rigid pavements; Synthetic rubber
Pavement Joint Seals, Kneeland A. Godfrey, Jr., 127

Joints (connections); Joints (junctions); Stiffness; Stresses; Structural engineering
Shear Lag Analysis of Rectangular Full-Width Tube Junctions, Bharat L. Mehrotra and Ashok K. Govil, 128

Joints (connections); Lap joints; Moment distribution; Structural analysis; Structural engineering; Beams (supports); Bolted joints
Double Overlap Beam, Oliver A. Baer, 542

Joints (connections); Loads (forces); Structural engineering; Tubes; Beams (supports)
Strength of Square-Tube Connections Under Combined Loads, Roger L. Brockenbrough, 581

Joints (connections); Pipelines; Pipeline transportation; Tension; Ties; Water flow; Failure
Considerations of Pipeline Tension Tie Problems, Lloyd C. Fowler, Richard P. Lundahl and Robert W. Purdie, 573

Joints (connections); Safety factors; Tests; Welded joints; Welding; Fasteners
Eccentrically Loaded Welded Connections, Lorne J. Butler, Shubendu Pal and Geoffrey L. Kulak, 233

Joint sealers; Polyvinyl chloride; Rigid pavements; Synthetic rubber; Joints (connections)
Pavement Joint Seals, Kneeland A. Godfrey, Jr., 127

Joints (geology); Rock bolts; Soil mechanics; Dilatancy; Finite element method
Duplication of Dilatancy in Analysis of Jointed Rocks, Richard E. Goodman and Jacques Dubois, 274

Joints (junctions); Keys (splines); Pavements; Rigid pavements; Transportation; Aircraft; Air transportation; Construction
Keyed Joint Performance Under Heavy Loaded Aircraft, John L. Rice, 561

Joints (junctions); Nails; Slip joints; Structural engineering; Wood; Wooden structures; Elastic properties; Fasteners
Analysis of Nailed Joints with Dissimilar Members, Thomas Lee Wilkinson, 437

Joints (junctions); Steels; Structural engineering; Fatigue (materials); Galvanizing; High strength bolts
High Strength Bolted Galvanized Joints, D. J. Laurie Kennedy, 576

Joints (junctions); Stiffness; Stresses; Structural engineering; Joints (connections)
Shear Lag Analysis of Rectangular Full-Width Tube Junctions, Bharat L. Mehrotra and Ashok K. Govil, 128

Joints (junctions); Structural engineering; Welding; Beams (supports); Cyclic loads; Earthquakes
Beam-Column Subassemblages Under Repeated Loading, Vitelmo V. Bertero, Egor P. Popov and Helmut Krawinkler, 268

Keys (splines); Pavements; Rigid pavements; Transportation; Aircraft; Air transportation; Construction; Joints (junctions)
Keyed Joint Performance Under Heavy Loaded Aircraft, John L. Rice, 561

Kinematics; Models; Overland flow; Rational formula; Flood hydrographs; Hydraulics; Hydrology
Kinematic Wave Nomograph for Times of Concentration, Robert M. Ragan and J. Obiukwu Duru, 506

Kinetics; Nitrates; Sanitary engineering; Sewage treatment; Activated sludge; Anaerobic conditions; Denitrification; Eutrophication
Process Kinetics for Denitrification, Walter K. Johnson, 448

Kinetics; Pollution control; Sanitary engineering; Waste stabilization ponds; Waste treatment; Algae; Chlorination; Coliform bacteria; Disinfection
Kinetics of Chlorine Disinfection in an Ecosystem, Leonard W. Hom, 231

Kinetics; Sanitary engineering; Sorption; Waste treatment; Activated carbon; Adsorption; Irreversible processes
Sorption Kinetics in Finite-Bath Systems, Francis A. DiGiano and Walter J. Weber, Jr., 546

Laboratories; Pipe flow; Soil mechanics; Tests; Triaxial tests; Bubbles; Hydraulics
Time to Dissolve Air Bubbles in Drain Line, Kenneth L. Lee and David K. Black, 179

Laboratory tests; Mixing; Power; Salt; Temperature; Turbulence; Velocity; Hot film anemometers
Velocity and Temperature in Buoyant Jet, Richard Dornhelm, Manuel Nouel and Robert L. Wiegel, 148

Laboratory tests; Recession curves; Flow
Recession Flow in Surface Irrigation, I-pai Wu, 116

Laboratory tests; Sands; Sediment transport; Streams; Bed load; Hydraulics
Laboratory Study of Transport of Fine Sand, Joe C. Willis, Neil L. Coleman and Wilbert M. Ellis, 183

Laboratory tests; Sanitary engineering; Biochemical oxygen demand; Filter materials; Filters
Hydraulically Ventilated Underground Filter, David K. Hills and Ray B. Krone, 128

Laboratory tests; Saturation; Soil compacting; Compaction tests
A Possible 1-Point System Method For Laboratory Compaction Testing, John J. Galvan, 165

Laboratory tests; Shear modulus; Soil mechanics; Clay (material); Dynamic response
Time Effects on Dynamic Shear Modulus of Clays, William F. Marcuson, III and Harvey E. Wahls, 588

Laboratory tests; Shear stress; Shear tests; Soil mechanics; Torsion shear tests; Vibration; Damping
Shear Modulus and Damping in Soils: Measurement and Parameter Effects, Bobby O. Hardin and Vincent P. Drnevich, 328

Labor relations; Management; Salaries; Schools; Unionization; Civil engineers; Collective bargaining; Education; Engineering education
Collective Bargaining on the Campus, B. Austin Barry, 563

Lagrangian functions; Stability; Boundary conditions; Buckling; Composite materials; Deformation; Eigenvalues; Energy methods; Engineering mechanics; Equilibrium methods
Stability of Orthotropic Stiffened Composite Plates, Kao Ding Chiu, 508

Lakes; Mapping; Photogrammetric surveys; Surveys; Aerial surveys; Analytical techniques; Dams (earth)
Survey Design and Procedures, William E. Kreisle, 77

Lakes; Multivariate analysis; Sanitary engineering; Water quality; Environmental engineering; Eutrophication; Florida
Eutrophication Analysis: A Multivariate Approach, Earl E. Shannon and Patrick L. Brezonik, 237

Lakes; Remote sensing; Streams; Surveying; Water pollution; Water resources; Aerial photography; Flooding
Aerial Photography for Water Resource Studies, Ralph W. Kiefer and James P. Scherz, 149

Lakes; Rivers; Thermoelectric power generation; Environmental engineering; Finite element method; Fluid flow; Heated water; Hydraulics; Jets
Hydrothermal Analysis by Finite Element Method, Larry A. Loziuk, James C. Anderson and Ted Belytschko, 559

Laminar flow; Orifices; Pipe flow; Coefficients; Flow resistance; Hydraulics
Orifice Losses for Laminar Approach Flow, Nagar S. Lakshmana Rao and Kalambur Sridharan, 556

Laminar flow; Turbulent boundary layer; Fluid flow; Hydraulics; Jets
Appearance of Unstable Buoyant Jet, Habib O. Anwar, 354

Laminated wood; Structural engineering; Wooden bridges; Bridges (decking); Bridges (structures); Glued joints
FPL Timber Bridge Deck Research, Billy Bohannan, 169

Land classification; Land management; Land use; Environmental surveys; Interest groups
Needed: A National Land Use Policy, Daniel A. Dreyfus, 245

Landfills; Sanitary engineering; Sanitary landfill; Solid wastes; Waste disposal
Demonstration Sanitary Landfill in Kansas City, Kans., Gerald A. Neely and Nicholas S. Artz, 468

Land management; Land use; Environmental surveys; Interest groups; Land classification
Needed: A National Land Use Policy, Daniel A. Dreyfus, 245

Land ownership; Maps; Maps; Photogrammetry; Surveying; Environments
The Environment and a Two-Billion Dollar Property, Carl Hammerstrom, 393

Land reclamation; Marine terminals; Surcharge; Cargo transportation; Containerizing; Harbor facilities
Containerization and Its Impact on Port Development, Anthony J. Tozzoli, 426

Landslides; Pennsylvania; Rock mechanics; Shear strength; Slope stability; Soil mechanics; Engineering geology
Failure of Colluvial Slope, James V. Hamel and Norman K. Flint, 189

Land surveys; Canada; Control surveys; Engineering education
How Land Surveying Is Being Modernized, Robert T. Howe, 287

Land surveys; Public land; Right of way acquisition; Surveying; Boundaries (property)
Recommended Right-of-Way Practices, Harmer A. Weeden, 211

Land use; Buildings; Design; Foundation investigations; Foundations
Sample Approaches to Optimum Use of Marginal Lands, William W. Moore and Nicholas Chryssafopoulos, 207

Land use; Environmental surveys; Interest groups; Land classification; Land management
Needed: A National Land Use Policy, Daniel A. Dreyfus, 245

Land use; Legislation; Municipal engineering; Professional practice; Runoff; Subdivisions; Urban planning; Waterways (watercourses); Drainage; Floods; Hydraulics; Hydrology
An Engineer Looks at Drainage Law, Alfred R. Pagan, 511

Land use; Legislation; Regional planning; Transportation; Drainage; Environmental engineering; Highways
Impact of Environmental Controls on Highways, Wm. Campbell Graeub, Albert A. Grant and Robley Winfrey, 219

Land use; Legislation; Water management (applied); Waterways; Federal-state cooperation
Management Problems in Flood Plain Areas, Thomas M. Lee, 408

Land use; Management; Pollution control; Regional planning; Sanitary engineering; Sewerage; Water quality
Basin Management Techniques for Sewerage Agencies, Charles V. Gibbs and Allan L. Poole, 375

Land use; Matrices (mathematics); National historic sites; Planning; Pollution; Sanitary engineering; Conservation; Environmental effects; Environmental engineering; Esthetics
Environmental Assessment of Resource Development, Kenneth D. Kerri, 282

Land use; Models; Research; Transportation; Urban development
Analysis of BART Impacts on Bay Area Land Use, Douglass B. Lee, Jr., 226

Land use; Natural resources; Site surveys; Design practices; Environmental engineering
Environmental Aspects of Site Selection, Eugene F. Dudley, 120

Land use; Noise reduction; Parks; Urban planning; Water pollution; Air pollution; Esthetics; Housing
Esthetic Considerations in Urban General Planning, Wm. H. Claire, 404

Land use; Parks; Recreational facilities; Streams; Urban planning; Environmental engineering; Esthetics
Evaluating Recreational Potential of Small Streams, John A. Dearinger, 478

Land use; Passenger transportation; Terminal facilities (elect); Transportation; Urban planning
Environmental Factors in Passenger Terminal Design, John J. Fruin, 71

Land use; Pipelines; Planning; Railroads; Regional planning; Terminal facilities; Transmission lines; Urban planning; Urban transportation; Waterways (transportation); Freight terminals; Investments
Restructuring Freight Transportation in Chicago, James Robert Blaze, 353

Land use; Pipelines; Regional planning; Right-of-way; Right of way acquisition; Transmission towers; Alignment; Highways
Joint Utilization of Rights-of-Way, Francis J. Stastny, 130

Land use; Population; Regulations; Sanitary engineering; Streams; Agriculture; Aquatic plants; Industrial wastes
Water Pollution - Facts and Fantasies, John M. Henderson, 390

Land use; Population; Statistical analysis; Statistical distributions; Transportation management; Forecasting
Statistical Decision in Forecasting Planning Data, Kumares C. Sinha, 547

Land use; Power; Powerplants; Regional planning; Site selection; Statistical analysis; Impact prediction
New Approach to Power Plant Siting, James D. Calvert and William L. Heilman, 201

Land use; Professional activities; Regional planning; Social needs; Water resources
Principals and Standards for Water and Land Resources Planning, W. Don Maughn, 452

Land use; Recreational facilities; Regional planning; Regulations; Urban planning; Water resources; Zoning
Wisconsin's Shoreland Management Program, Thomas M. Lee, 605

Land use; Regional planning; Transportation; Benefit cost analysis; Canada; Economic analysis; Highway engineering; Highway planning; Highways; Investments
Programming of Regional Highway Investments, Bruce G. Hutchinson, 269

Land use; Research; Sedimentation; Sediment control; Urban development; Urban planning; Economics; Erosion; Hydraulics
Urban Sedimentation in Perspective, Harold P. Guy and D. Earl Jones, Jr., 574

Land use; Towers; Transmission lines; Environmental engineering; Esthetics; Impact
Transthetics, Harold P. Hulett, 313

Land use; Zoning; Computer programs; Economic analysis; Flood control; Hydraulics
Role of Economics in Planning Flood Plain Land Use, L. Douglas James, 314

Lap joints; Moment distribution; Structural analysis; Structural engineering; Beams (supports); Bolted joints; Joints (connections)
Double Overlap Beam, Oliver A. Baer, 542

Lateral forces; Loading; Pile foundations; Pile groups; Batter piles; Foundations
Practical Formulas for Loads and Movements in Battered Pile Foundations (without a computer), Murray I. Brill, 284

Lateral forces; Seismic design; Earthquake engineering; Earthquake resistant structures
Report on Conference on 1971 San Fernando, Ca., Earthquake, David J. Leeds, 254

Lateral forces; Seismic design; Standards; Structural engineering; ASCE (Committees); Buildings (codes)
Basic Design Criteria of the Recommended Lateral Force Requirements and Commentary, By the Ad Hoc Committee on Direction Study of the Joint SEAOC-ASCE Committee on Seismic Forces of the Committee on Dynamic Forces of the Structural Division, Henry J. Degenkolb, Chmn., 433

Lateral pressure; Model tests; Retaining walls; Soil mechanics; Clays; Earth pressure
Lateral Pressures from Soft Clay, Peter J. Moore and Graham K. Spencer, 538

Lateral pressure; Pile lateral loads; Piles (foundations); Soil mechanics; Design; Foundations
Behavior of Laterally Loaded Piles: III -- Socketed Piles, Harry G. Poulos, 243

Lateral stability; Stability; Structural engineering; Tall buildings; Buckling; Frames
Long-Wave Extensional Buckling of Large Regular Frames, Zdenek P. Bazant and M. Christensen, 504

Laterites; Soil formation; Soil mechanics; Construction materials; Ghana; Gravel
Lateritic Gravel Evaluation For Road Construction, J. W.S. de Graft-Johnson, Harbhajan S. Bhatia and A. A. Hammond, 545

Lattice design; Stability; Structural engineering; Architecture; Bibliographies; History
"Bibliography on Latticed Structures," by the Subcommittee on Latticed Structures of the Task Committee on Special Structures of the Committee on Metals of the Structural Division, Donald R. Sherman, Chmn., 365

Leaching; Soil mechanics; Chemical composition; Compaction; Incineration; Incinerators
Incinerator-Residue-Fill Site Investigation, Robert J. Schoenberger and A. Alexander Fungaroli, 65

Leaching; Waste disposal; Dissolved solids; Groundwater flow; Groundwater quality
Scientific and Administrative Criteria for Shallow Waste Disposal, George M. Hughes and Keros Cartwright, 153

Leakage; Sanitary engineering; Sewage disposal; Sewage filtration; Sewers; Bedding materials; Gravel; Hydraulic pressure
Sanitary Sewer Bedding Scored as Underdrain Conduit, Robert L. McFall, 240

Least squares method; Photogrammetry; Surveying; Accuracy; Algorithms; Computation
Nonlinear Least Squares Algorithm, Mohamed F. Madkour, 572

Legislation; Measurement; Metric system; United States government; Foreign projects; History
Metrication in the United States, a Status Report, L. E. Barbrow, 555

Legislation; Municipal engineering; Professional practice; Runoff; Subdivisions; Urban planning; Waterways (watercourses); Drainage; Floods; Hydraulics; Hydrology; Land use
An Engineer Looks at Drainage Law, Alfred R. Pagan, 511

Legislation; Natural gas; Transmission lines; Transportation; Utilities; Zoning; Costs; Engineering societies; Failure; Gas pipelines
Responsibility of Gas Utilities for Pipeline Safety, Carl T. Kallina, 148

Legislation; Philippine Islands; Sanitary engineering; Sewage treatment; Earthquake resistant structures; Economics
Master Sewerage System for Metropolitan Manila, John O. Schmidt, 187

Legislation; Professional activities; ASCE (National Affairs); Civil engineering; Civil engineers
Legislative Involvement, Stephen M. Olko, 573

Legislation; Professional activities; Public relations; Civil engineers
Action in Public Affairs -- A Way of Life, James W. McPhillips, Brian R. Hogan, Eugene R. McMaster and David A. Novick, 239

Legislation; Professional activities; Sewage treatment; Social needs; Solid wastes; Environmental engineering; Federal agencies
The Engineer and the New Environment, Eugene T. Jensen, 381

Legislation; Regional planning; Transportation; Drainage; Environmental engineering; Highways; Land use
Impact of Environmental Controls on Highways, Wm. Campbell Graeub, Albert A. Grant and Robley Winfrey, 219

Legislation; Sanitary engineering; Water law; Water resources; Forecasting
Can Engineering Forecasters Effect Water Law?, George W. Reid, E. Edd Pritchett and Susan Pritchett, 22

Legislation; Water demand; Ground water; Groundwater management; Ground water recharge; Hydraulics; Hydrology
Ground Water Management, by the Committee on Ground Water, Manual and Report on Engineering Practice No. 40, Jack J. Coe, Chmn., 512

Legislation; Water management (applied); Waterways; Federal-state cooperation; Land use
Management Problems in Flood Plain Areas, Thomas M. Lee, 408

Liabilities; Litigation; Product development; Safety engineering; Consumers; Costs
Designing to Prevent Liability Lawsuits, Norman B. Chew, 44

Liabilities; Professional activities; Professional practice; ASCE (insurance); Insurance
Professional Liability Insurance, Paul L. Genecki, 250

Liabilities; Professional advancement; Civil engineers; Construction; Construction procedure
Booby Traps for Young Engineers on Construction, Edward A. Merrill, 108

Libraries; Problem oriented languages; Programming languages; Reports; Hydraulics
Computer Languages and Program Libraries, by the Task Committee on Problem Orientation Languages in Hydrology of the Committee on Surface-Water Hydrology of the Hydraulics Division., George Bugliarello, Chmn., 397

Lime; Soil stabilization; Stabilization; Subgrades
Lime Reclaims Unstable Interior Subgrade During Construction, James M. Sheahan, 303

Lime; Soil stabilization; Subgrades; Transportation; Construction; Construction procedure; Flexible pavements; Highway engineering
Deep-Plow Lime Stabilization for Pavement Construction, Marshall R. Thompson, 107

Lime soil mixtures; Soil mechanics; Soil stabilization; Admixtures; Chemical stabilization; Clays
Acceleration of Lime-Clay Reactions with Salt, B. Dan Marks and T. Allan Haliburton, 235

Limestone; Pavements; Skid resistance; Aggregates; Highways
Sprinkle Treatment Increases Highway Skid Resistance, George W. Maupin, Jr., 86

Limit design method; Moment distribution; Plasticity; Structural engineering; Tall buildings; Computers
Optimum Plastic Design of Steel Frames, Bogdan O. Kuzmanovic and Nicholas Willems, 423

Limit design method; Plastic analysis; Plasticity; Plates (structural members); Yield; Engineering mechanics
Plastic Analysis of Anisotropic Disks and Plates, Archibald N. Sherbourne and Sridhara D.N. Murthy, 59

Limit design method; Reinforcement; Structural engineering; Composite structures; Engineering mechanics; Failure; Fibers
Limit Analysis of Ductile Fiber-Reinforced Structures, Richard H. Lance and David N. Robinson, 130

Limit design method; Sands; Slipping; Soil mechanics; Vehicles; Clays
Stress Field Under Slipping Rigid Wheel, Mohammed K. Elsamny and Ahmed A. Ghobarah, 113

Limit design method; Structural engineering; Bending; Biaxial loads; Columns (supports)
Interaction Equations for Biaxially Loaded Sections, Wai F. Chen and Toshio Atsuta, 245

Linear algebraic equations; Linear programming; Nonlinear algebraic equations; Optimization; Reservoirs; River flow; Canada; Diversion
Optimization Model for Churchill River Diversion, Abu M.Z. Alam, 409

Linear differential equations; Network analysis; Pipe flow; Fluid flow; Hydraulics
Hydraulic Network Analysis Using Linear Theory, Don J. Wood and Carl O.A. Charles, 366

Linearity; Photogrammetry; Surveys; Aerial photography; Coordinates
Space Resection from Collinearity Conditions, Kunwar K. Rampal, 92

Linear programming; Nonlinear algebraic equations; Optimization; Reservoirs; River flow; Canada; Diversion; Linear algebraic equations
Optimization Model for Churchill River Diversion, Abu M.Z. Alam, 409

Linear programming; Optimization; Structural engineering; Computers; Iteration
Structural Optimization by Inscribed Hyperspheres, Roman Baldur, 242

Linear responses; Random processes; Vibration; Dynamic response; Dynamic structural analysis; Engineering mechanics; Environmental tests; Excitation
Linear Response to Nonstationary Random Excitation, Timothy K. Hasselman, 278

Liner plates; Loads (forces); Power; Research; Steels; Structural engineering; Buckling; Chimneys; Design
Design of Steel Chimney Liners, Max Zar, Shih-Lung Chu and James M. Doyle, 500

Linings; Pipelines; Power; Pressure tunnels; Tunnels; Velocity; Water; Water flow; Canals; Construction; Financing; Fluid flow; Hydraulic radius
Aqueducts for the Least Cost Conveyance of Water, Nephi A. Christensen, 46

Liquefaction; Sands; Seismic design; Soil mechanics; Earthquakes
Simplified Procedure for Evaluating Soil Liquefaction Potential, H. Bolton Seed and Izzat M. Idriss, 8

Liquefaction; Structural engineering; Bridges (structures); Dynamic structural analysis; Earthquake engineering; Earthquake resistant structures; Earthquakes
The San Fernando Earthquake - A Lesson in Highway and Bridge Design, Arthur L. Elliott, 424

Litigation; Product development; Safety engineering; Consumers; Costs; Liabilities
Designing to Prevent Liability Lawsuits, Norman B. Chew, 44

Live loads; Statistical analysis; Structural engineering; Buildings
Statistical Analysis of Live Load in Column Design, Ross B. Corotis, 384

Loading; Boundary value problems; Engineering mechanics; Impulses
Bounds for Impulsively Loaded Plastic Structures, John B. Martin and Alan R.S. Ronter, 156

Loading; Pile foundations; Pile groups; Batter piles; Foundations; Lateral forces
Practical Formulas for Loads and Movements in Battered Pile Foundations (without a computer), Murray I. Brill, 284

Loading; Power lines; Structural engineering; Towers; Transmission lines; Wind (meteorology); Buildings (codes); Cables; Design criteria
Wind Recommendations for Transmission Towers, Gene M. Wilhoite, 142

Loading; Structural engineering; Tests; Thin-wall structures; Ultimate strength; Web beams; Buckling; Finite elements
Failure of Thin-Walled Members Under Patch Loading, Kenneth C. Rockey, Mohamed A. El-Gaaly and Debal K. Bagchi, 572

Loading tests; Pile bearing capacities; Pile foundations; Pile loading tests; Friction piles
Torque Shear Test For Cylindrical Friction Piles, Ulrich W. Stoll, 203

Loads (forces); Baffles; Blocks; Energy; Hydraulic jump; Hydraulics
Drag Forces on Baffle Blocks in Hydraulic Jump, David R. Basco and John R. Adams, 72

Loads (forces); Balancing; Bridges (cable-stayed); Computer applications
Load Balancing Analysis of Cable Stayed Bridges, Benjamin E. Lazar, Michael S. Troitsky and Matthew McC. Douglass, 379

Loads (forces); Models; Model tests; Structural engineering; Structural models; Bridges (box girder); Bridges (structures); Curved beams
Model Analysis of Curved Box-Beam Highway Bridge, Ish K. Aneja and Frederic Roll, 48

Loads (forces); Moments; Powerplants; Shells (structural forms); Structural engineering; Wind (meteorology); Analysis; Concrete (reinforced); Cooling towers; Design; Earthquakes
Analysis and Design of Hyperbolic Cooling Towers, German Gurfinkel and Adolf Walser, 340

Loads (forces); Nonlinear systems; Structural engineering; Trusses; Interactions
Nonlinear Elastic Truss Analysis Partitioning, N. M. Singaraj and Jawalker K. Sridhar Rao, 562

Loads (forces); Optimization; Costs; Design; Girders
Cost Optimization of Welded Plate Girders, Natarajan Annamalai, Albert D.M. Lewis and John E. Goldberg, 495

Loads (forces); Orthotropic plate; Plates (structural members); Stresses; Deflection; Design; Engineering mechanics; Epoxy resins
Large Deflection of Rectangular Orthotropic Plates, Chuen-Yuan Chia, 514

Loads (forces); Pipeline transportation; Pipes; Reactions (mechanics); Structural analysis; Bending; Deformation
Systematic Stress Analysis of Circular Pipe, Junkichi Katoh, 584

Loads (forces); Plasticity; Structural engineering; Buildings (codes); Computers; Design; Dynamics; Earthquake resistant structures; Earthquakes
Earthquake Resistant Design of Unbraced Frames, James C. Anderson and Raj P. Gupta, 540

Loads (forces); Plates; Structural engineering; Ultimate strength; Axial compression; Buckling; Forecasting
Strength Predictions of Plates in Uniaxial Compression, Robert M. Korol and Archibald N. Sherbourne, 444

Loads (forces); Power; Research; Steels; Structural engineering; Buckling; Chimneys; Design; Liner plates
Design of Steel Chimney Liners, Max Zar, Shih-Lung Chu and James M. Doyle, 500

Loads (forces); Rectangular bodies; Relaxation (mechanics); Structural engineering; Thin plates; Concentrated loads; Deflection; Dynamic properties; Finite differences
Large Deflection of Elastic Plates Under Patch Loading, Bijan Aalami, 559

Loads (forces); Steels; Structural engineering; Tall buildings; Wind (meteorology); Amplitude; Chicago; Columns (supports)
Bundled-tube Structure for Sears Tower, Hal S. Iyengar, 509

Loads (forces); Structural engineering; Concrete (reinforced); Folded plates; Fragmented materials
Safe Limit Loading of Folded Plate Structures, Morris N. Fialkow, 483

Loads (forces); Structural engineering; Transmission towers; Aluminum; Aluminum alloys; Field tests
Guide for the Design of Aluminum Transmission Towers, by the Task Committee on Lightweight Alloys of the Committee on Metals of the Structural Division, Robert J. Brungraber, Chmn., 596

Loads (forces); Structural engineering; Tubes; Beams (supports); Joints (connections)
Strength of Square-Tube Connections Under Combined Loads, Roger L. Brockenbrough, 581

Loads (forces); Structural engineering; Turbulence; Vibration; Wind (meteorology); Aerodynamics; Drag
Drag Spectra of Simple Structures in Turbulence, John Brian Roberts, 448

Loads (forces); Structural engineering; Wind pressure
Drag or Along-Wind Response of Slender Structures, Barry J. Vickery and Kwan H. Kao, 86

Locks (waterways); Navigable rivers; ASCE (History); ASCE (Outstanding Civil Engineering); Canals
Great Falls Canal and Locks: Civil Engineering Landmark496

Locks (waterways); Navigation; Waterways; Canals; Design; Ecology; Environmental engineering; Fish; Florida
Design Versus Ecology in St. Johns and Indian Rivers, Harold A. Scott, 475

Locks (waterways); Salinity; Salt water intrusion; Stratification; Water pollution; Water quality; Waterways; Density; Harbors
Mardyck Lock Acts as Salt-Water Barrier, Ch. Blanchet and B. Quetin, 600

Low-flow augmentation; Multiple purpose projects; Optimization; Recreation; Water resources; Flood control; Hydraulics; Hydroelectric power; Irrigation
Multireservoir Optimization Model, James S. Windsor and Ven Te Chow, 532

Low-flow augmentation; Probability theory; Reservoir storage; Safe yield; Water resources development; Water supply; Draft-storage curves; Irrigation
Potential United States Water-Supply Development, Clayton H. Hardison, 528

Magnetic separators; Refuse; Refuse disposal; Sanitary engineering; Sanitary landfill; Solid wastes; Baling
Refuse Reclamation and Recycle, Joseph F. Malina, Jr. and William T. Morgan, 564

Maintenance; Montana; Concrete (post-tensioned); Concrete (reinforced); Construction; Consultants; Dams; Dams (concrete); Government
Montana Power Company's Dam Repair Program, Clifford L. Emmerling, 565

Maintenance; Operations; Organizations; Public opinion; Water management (applied); Drainage; Irrigation
Operation and Maintenance of Irrigation and Drainage Systems: Section II--Organization for Operation and Maintenance, Committee on Operation and Maintenance of Irrigation and Drainage Systems of the Irrigation and Drainage Division, Richard J. Willson, Chmn., 76

Maintenance; Pavements; Safety; Traffic engineering; Drainage; Freeways; Highway engineering; Highways
Current Practices in Highway Maintenance: A Reference List, Committee on Construction, Maintenance and Operation of Highways of the Highway Division., Walter E. Capper, Chmn., 260

Maintenance; Water pipes; Aqueducts; Inspection
The Undersea Aqueduct -- A New Concept in Transportation, Ellis L. Armstrong, 195

Management; Construction; Construction industry; Construction management; Engineering education
Formal Education in Construction Management, Abraham Warszawski, 332

Management; Manpower; Planning; Construction; Construction equipment; Construction materials; Construction methods; Construction planning; Contracting; Foreign engineering
Construction Planning in South East Asia, Omar E. Rood and John L. Richards, 585

Management; Metric system; Planning; Standards; Training; Construction industry; Engineering education; Engineers; Foreign engineering; Great Britain
Metrication Progress in the United Kingdom, Gordon Bowen, 523

Management; Monitoring; Project control; Scheduling; Construction; Construction industry; Costs; Critical path method
Planning Monitoring Frequencies for CPM Projects, Douglas A. Elvers, 55

Management; Motivation; Benefit-cost ratios; Construction; Construction industry; Craftsmen
Motivation of Construction Craftsmen, Charles R. Schrader, 453

Management; Networks; Planning; Resource allocation; Scheduling; Computers; Construction; Critical path method
Man-Computer Concepts for Planning and Scheduling, Boyd C. Paulson, Jr., 546

Management; Optimization; Sanitary engineering; Solid wastes; Waste disposal; Dynamic characteristics; Hauling
Facility Selection and Haul Optimization Model, Houshang Esmaili, 528

Management; Planning; Projects; Surveying; Surveys; Civil engineering; Engineering
Project Planning, John M. Shields, 202

Management; Pollution control; Regional planning; Sanitary engineering; Sewerage; Water quality; Land use
Basin Management Techniques for Sewerage Agencies, Charles V. Gibbs and Allan L. Poole, 375

Management; Protective clothing; Safety; Safety engineering; Sound level meters
Surveying Safety, John M. Shields and Jack J. Wilks, 364

Management; Quality control; Systems engineering
System for Control of Construction Quality, Roland M. Parsons, 159

Management; Salaries; Schools; Unionization; Civil engineers; Collective bargaining; Education; Engineering education; Labor relations
Collective Bargaining on the Campus, B. Austin Barry, 563

Management; Soil moisture; Water consumption; Agricultural engineering; Irrigation; Irrigation operation " maintenance
Irrigation Management - A Tool for Agribusiness, Neil W. Schild and Harvey R. Nelson, Jr., 486

Management; Traffic engineering; Transportation; Transportation management; Human factors engineering
Four-Day Week and Transportation, Vincent R. Desimone, 361

Management control reports; Professional activities; Simulation; Computerized simulation; Cost control; Financing; Flood control
Flood Control Developed and Operated with Simulation, John M. Tellemer, 154

Management engineering; Refuse disposal; Sanitary engineering; Solid wastes; Decision making; Gaming models
Management Science and Gaming in Waste Management, Pran N. Wahi and Theodore I. Peterson, 476

Management planning; Management systems; Production capacity; Productivity; Professional practice; Employee relations
Boosting Construction-Worker Productivity, Charles R. Schrader, 458

Management planning; Natural resources; Planning; Sanitary engineering; Ecology; Environmental effects
Environmental Planning and Ecological Possibilities, David A. Bella and W. Scott Overton, 422

Management systems; Production capacity; Productivity; Professional practice; Employee relations; Management planning
Boosting Construction-Worker Productivity, Charles R. Schrader, 458

Manifolds; Pumps; Valves; Water; Water tunnels; Aqueducts; Earthquakes
Edmonston Pumping Plant: Nation's Mightiest, Robert B. Jansen, 465

Mannings equation; Pipe flow; Sanitary engineering; Smoothness; Coefficients; Graphs (charts); Hydraulics
Manning's Coefficient for Smooth Pipes, Henry Liu, 312

Manpower; Planning; Construction; Construction equipment; Construction materials; Construction methods; Construction planning; Contracting; Foreign engineering; Management
Construction Planning in South East Asia, Omar E. Rood and John L. Richards, 585

Manuals; Professional societies; Waste water treatment; Water pollution control; Design standards
Design Standards for Wastewater Treatment Systems, Robert A. Canham and Louis L. Guy, Jr., 70

Mapping; Maps; Water; Hydrography; Hydrology
Water Features on Topographic Maps, Morris M. Thompson, 175

Mapping; Natural resources; Photogrammetry; Space reconnaissance; Surveying; Television systems; Geodetic surveys
Applications of Extraterrestrial Surveying and Mapping, Robert B. McEwen and David A. Tyler, 604

Mapping; Photogrammetric surveys; Surveys; Aerial surveys; Analytical techniques; Dams (earth); Lakes
Survey Design and Procedures, William E. Kreisle, 77

Mapping; Photogrammetry; Remote sensing; Aerial photography; Environmental engineering
Photogrammetry Aids Solution of Environment Problems, Alfred O. Quinn, 228

Mapping; Pressure; Surveying; Tidal effects; Tides; Elevation; Granular materials
Elevation Changes Due to Tides, Long Beach, Calif., Dale S. Kunitomi, 445

Mapping; Reports; Scale (ratio); Surveying; Contours
Selection of Maps for Engineering and Planning, by the Task Committee for the Preparation of a Manual on Selection of Map Types, Scales, and Accuracies for Engineering and Planning of the Committee on Cartographic Surveying of the Surveying and Mapping Division, Antonio M. Aguilar, Chmn., 420

Mapping; Reports; Surveys; Awards; Civil engineers; Engineering education; Geodetic surveys
Status Report of Surveying and Mapping Division, William A. White, 121

Maps; Maps; Photogrammetry; Surveying; Environments; Land ownership
The Environment and a Two-Billion Dollar Property, Carl Hammerstrom, 393

Maps; Photogrammetry; Surveying; Environments; Land ownership; Maps
The Environment and a Two-Billion Dollar Property, Carl Hammerstrom, 393

Maps; Water; Hydrography; Hydrology; Mapping
Water Features on Topographic Maps, Morris M. Thompson, 175

Marinas; Pile extraction; Piles (foundations); Reclamation; Wisconsin; Docks; Ice
Lake Superior Yachting Marinas Resist Ravages of Ice, C. Allen Wortley, 79

Marine terminals; Surcharge; Cargo transportation; Containerizing; Harbor facilities; Land reclamation
Containerization and Its Impact on Port Development, Anthony J. Tozzoli, 426

Marine transportation; Towing; Tugboats; Barges; Coastal engineering
Ocean Tug-Barge Systems, Lawrence R. Glosten, 243

Market value; Sanitary engineering; Water; Water supply; Economic analysis; Economics
Economics of Water Quality and Wastewater Control, Fred E. Case, 353

Markov processes; Mathematical models; Rainfall; Synthesis; Time series analysis; Hydraulics; Hydrology
Stochastic Generation of Rainfall, Kazimierz Adamowski and Anthony F. Smith, 548

Markov processes; Mathematical models; Time dependence; Transportation; Urban planning
Markov Renewal Model of Linked Trip Travel Behavior, Gorman Gilbert, George L. Peterson and Joseph L. Schofer, 339

Maryland; Pollution control; Sanitary engineering; State governments; Water management (applied); Water pollution; Environmental engineering
Statewide Management-What Does the Future Hold?, Frank A. Butrico and James B. Coulter, 244

Masonry; Shear; Structural engineering; Walls; Wind (meteorology); Bearing capacity; Bending stress; Bricks; Buildings; Computer programs; Computers
Computer Design of Engineered Brick Masonry, Alan H. Yorkdale and Robert P. Anderson, 271

Mass; Offshore structures; Periodic functions; Resonance; Wave energy; Coastal engineering
Resonant Response of Offshore Structures, Lawrence G. Selna and David Cho, 155

Massachusetts; Professional activities; Professional practice; Engineering education; Esthetics
Aesthetics -- Part of Civil Engineering, Frederick M. Law, 324

Mass concrete; Placement; Reinforcement; Slabs; Walls; Beams (supports); Columns (supports); Compaction; Concrete; Consolidation; Distribution
Pertinent Techniques for Compacting Concrete, Shu-t'ien Li and Donald A. Stewart, 429

Mass transportation; Social needs; Urban planning; Urban transportation; Automobiles; Buses (vehicles)
Shopping and Work Trips in the Black Ghetto, Charles B. Notess, 325

Mass transportation; Tires; Tramways; Urban transportation; Automatic control; Elevated railroads
Transit System Employs Three Modes, Robert F. Seedlock, 226

Materials; Ocean engineering; Bedding materials; Hydraulics
Fluid-Dynamic Consideration of Bottom Materials, Hormoz Pazwash and James M. Robertson, 18

Materials; Pavements; Soil mechanics; Strains; Stresses; Subgrades; Transportation; Dynamic loads; Elastic properties
Dynamic Response of Model Pavement Structure, Stephen F. Brown and David I. Bush, 541

Materials; Powerplants; Soil mechanics; Solid wastes; Aggregates; Ashes
Bottom Ash: An Engineering Material, Roger K. Seals, Lyle K. Moulton and Byron E. Ruth, 224

Materials handling; Rapid transit railways; Transportation; Containerizing
Goods Movement on Urban Transit Systems, John J. Fruin, 411

Materials stability; Pressurized cabins; Structural engineering; Hyperbaric medicine; Hyperbaric oxygenation
Material Safety Requirements of Hyperbaric Facilities, William J. Bobisch and Michael Yachnis, 322

Materials tests; Rock mechanics; Tests; Dams; Dams (arch); Dams (concrete); Foundations; Hydraulic models; Hydraulics
Auburn Dam -- World's Longest Arch Dam, Alfred T. Lewis, 445

Materials tests; Statistical analysis; Tests; Time dependence; Vibration; Viscoelasticity; Data systems; Dynamics; Engineering mechanics; Field tests
Statistical Theory for Viscoelastic Materials, Joseph Soussou and Fred Moavenzadeh, 532

Mathematical logic; Shell structures; Structural engineering; Cooling towers; Hyperbolic parabolic shells
Differential Settlement of Hyperbolic Cooling Towers, Phillip L. Gould, 487

Mathematical models; Floods; Hydrology; Irrigation
Border Irrigation Advance and Ephemeral Flood Waves, Roger E. Smith, 370

Mathematical models; Mississippi; Time of concentration; Turbulence; Turbulent diffusion; Dispersion; Hydraulics
Dispersion in Natural Streams, Mahendra K. Bansal, 50

Mathematical models; Mixing; Plumes; Power
Computer Model for Thermal Plume, Robert E. Barry and David P. Hoffman, 286

Mathematical models; Modal split; Systems analysis; Transportation; Urban development
Evaluation of New Systems For Urban Transportation, Reed H. Winslow and Jerry L. Pfeffer, 518

Mathematical models; Modal split; Traffic surveys
Impedance Minimization Travel Choice Process, Edward A. Beimborn, 140

Mathematical models; Modal split; Traffic surveys; Transportation; Transportation models; Trip length
Variations of Urban Travel Characteristics with Age, Norman Ashford and Frank M. Holloway, 385

Mathematical models; Models; Rivers; Tides; Tidewater; Waterways (transportation); Estuaries; India
Mathematical Model of River Hooghly, Donald M. McDowell and David Prandle, 209

Mathematical models; Models; Sewage disposal; Water supply; Construction costs; Costs; Inflation (economics)
Mathematical Model for Rate Studies, Kuan M. Yao, 442

Mathematical models; Newton-Raphson method; Water distribution (applied); Computer programs; Hydraulics
Computer Analysis of Water Distribution Systems: Part II--Numerical Solution, Chan F. Lam and M. L. Wolla, 207

Mathematical models; North carolina; Regional analysis; Regional planning; Travel; Forecasting; Highways
Forecasting Regional Travel on Regional Highway Network, Arun Chatterjee and Paul D. Cribbins, 162

Mathematical models; Nuclear power plants; Nuclear reactors; Power; Seismic properties; Soil-structure interaction; Foundations
Interaction of Soil and Power Plants in Earthquakes, Jeremy Isenberg and Samy A. Adham, 419

Mathematical models; Optimum design; Sanitary engineering; Wastewater treatment; Activated sludge; Anaerobic digestion; Anaerobic processes; Computer applications
Optimal Design of Wastewater Treatment Systems by Enumeration, Gene F. Parkin and Richard R. Dague, 513

Mathematical models; Oxygen demand; Sanitary engineering; Stochastic processes; Water pollution; Biochemical oxygen demand; Estuaries
Stochastic Model of BOD and OD in Segmented Estuary, William R. Schofield and Richard G. Krutchkoff, 488

Mathematical models; Oxygen transport mechanisms; Plastics; Sanitary engineering; Trickling filters; Biochemical oxygen demand; Biological treatment
Oxygen Theory in Biological Treatment Plant Design, Dilip S. Mehta, Harry H. Davis and Robert P. Kingsburg, 360

Mathematical models; Parking areas; Parking facilities; Site selection; Traffic; Transportation
Location Model for Parking Facilities, Adib K. Kanafani, 54

Mathematical models; Planning; Population growth; Design; Environmental engineering; Forecasting
Stochastic Population Projection at Design Level, Peter M. Meier, 557

Mathematical models; Planning; Traffic surveys; Transit systems; Transportation; Accessibility
Analytical Estimation of Transit Access Impedances, Paul R. Rassam and Raymond H. Ellis, 154

Mathematical models; Predictions; Statistical tests; Temperature; Water quality; Algorithms; Coefficients; Evaporation
Stream Temperature Prediction Under Reduced Flow, William L. Morse, 332

Mathematical models; Probability distribution functions; River flow; Construction methods; Data acquisition; Hydraulics
Stochastic Five Daily Stream Flow Model, Nath T. Kottegoda, 438

Mathematical models; Probability theory; Concrete; Concrete properties; Engineering mechanics; Finite element method
Probabilistic Modeling of Concrete Structures, Masanobu Shinozuka, 598

Mathematical models; Probability theory; Statics; Beams (supports); Deflection; Engineering mechanics
Statics of Random Beams, Devendra K. Shukla and Robert M. Stark, 600

Mathematical models; Probability theory; Statistical analysis; Stochastic models; Stream flow; Autocorrelation; Hydraulics
Parameter Estimation for First-Order Autoregressive Model, Luis E. Garcia-Martinez, 426

Mathematical models; Rainfall; Synthesis; Time series analysis; Hydraulics; Hydrology; Markov processes
Stochastic Generation of Rainfall, Kazimierz Adamowski and Anthony F. Smith, 548

Mathematical models; Rapid transit railways; Statistical analysis; Transportation; Urban transportation
Assessing Impact of Urban Transportation, David E. Boyce, 330

Mathematical models; Regression analysis; Traffic surveys; Transportation; Urban planning; Forecasting
Time Stability of Zonal Trip Production Models, Norman Ashford and Frank M. Holloway, 535

Mathematical models; Replacement theory; Construction; Construction equipment
Sensitivity Analysis of Douglas Equipment Life Model, Neal B.H. Benjamin, 283

Mathematical models; Reservoirs; Sedimentation; Water quality; Watersheds; Erosion; Hydraulics; Hydrology
Sediment Yield Computed With Universal Equation, Jimmy R. Williams and Harold D. Berndt, 578

Mathematical models; Rivers; Hydraulics; Ice; Ice jams
Stability of Floating Ice Blocks, Mehmet S. Uzuner and John F. Kennedy, 571

Mathematical models; Runoff; Urban areas; Watersheds; Hydraulics; Hydrographs; Hydrology
University of Cincinnati Urban Runoff Model, Constantine Papadakis and Herbert C. Preul, 523

Mathematical models; Sanitary engineering; Systems analysis; Texas; Estuaries
Optimal Water Quality Management for Houston Ship Channel, Almond J. Hays, Jr. and Earnest F. Gloyna, 200

Mathematical models; Sanitary engineering; Water quality; Computer models
Water Quality Simulation Model, George R. Grantham, John C. Schaake, Jr. and Edwin E. Pyatt, 57

Mathematical models; Sewers; Urbanization; Costs; Drainage; Economic analysis; Hydraulics
Methods for Predicting Urban Drainage Costs, Walter J. Rawls and John W. Knapp, 486

Mathematical models; Simulation; Systems analysis; Computer programs
Delaware River Basin Modeling, Lewis G. Hulman and David K. Ericson, 132

Mathematical models; Soil moisture; Irrigation
Optimal Irrigation Quantity and Frequency, I-pai Wu and Tung Liang, 171

Mathematical models; Stability; Vibration; Beam columns; Buckling; Dynamics; Engineering mechanics
Beams Subjected to a Follower Force Within the Span, Jack C. Wiley and Richard E. Furkert, 569

Mathematical models; Storm drains; Urbanization; Hydraulic models; Hydraulics; Instantaneous unit hydrograph
Conceptual Hydrologic Models for Urbanizing Basins, Ramachandra A. Rao, Jacques W. Delleur and B. S.P. Sarma, 362

Mathematical models; Structural analysis; Calculators; Computer systems programs; Hydraulic models
Guidelines for Selecting a Programmable Calculator, Eugene E. Dallaire, 129

Mathematical models; Structural analysis; Computer models; Computer programming; Finite element method
Responsibilities of Computer-Aided Design, Charles F. Beck, 288

Mathematical models; Terminal facilities; Transportation; Containerizing; Design
Basis for Simulation Model of Container Terminal, Fraser Dunford, 299

Mathematical models; Thermal stratification; Water quality; Biota; Dissolved oxygen; Environmental engineering; Hydroelectric power generation
Predicting Quality Effects of Pumped Storage, Carl W. Chen and Gerald T. Orlob, 255

Mathematical models; Time dependence; Transportation; Urban planning; Markov processes
Markov Renewal Model of Linked Trip Travel Behavior, Gorman Gilbert, George L. Peterson and Joseph L. Schofer, 339

Mathematical models; Vibration; Dynamics; Elastic foundations; Engineering mechanics; Frequencies
Vibrations of Elastically Connected Ring Systems, Vincent X. Kunukkasseril and K. Rami Reddy, 350

Mathematical studies; Recharge wells; Waste water; Dispersion; Engineering mechanics; Injection wells
Dispersion from Recharge Well, Charles W. Lenau, 197

Mathematics; Numerical integration; Structural engineering; Computation; Dynamics; Dynamic structural analysis; Engineering mechanics; Finite differences
Temporal Operators for Nonlinear Structural Dynamics Problems, George Weeks, 495

Mathematics; Refuse disposal; Sanitary engineering; Solid wastes; Systems engineering; Urban planning; Waste disposal
Selecting Solid Waste Disposal Facilities, Billy P. Helms and Robert M. Clark, 4

Mathematics; Systems engineering; Vibration; Computers; Dynamics; Earthquakes; Engineering mechanics; Filters; Fourier transformation
Dynamic Analysis by Extra Fast Fourier Transform, Jethro W. Meek and Anestis S. Veletsos, 218

Mathematics; Temperature; Turbulence; Buoyancy; Fluid flow; Hydraulics; Jet flow
Buoyant Jets with Three-Dimensional Trajectories, Eric Hirst, 563

Matrices (mathematics); Computation; Computers; Dynamics; Engineering mechanics
Large Eigenvalue Problems in Dynamic Analysis, Klaus-Jurgen Bathe and Edward L. Wilson, 560

Matrices (mathematics); Matrix methods; Stiffness; Structural engineering; Algorithms
General Treatment of Structural Modifications, John H. Argyris and John R. Roy, 150

Matrices (mathematics); Mechanics; Structural engineering; Vibration; Computation; Dynamics; Engineering; Frames
Convergence in Modal Synthesis, Stephen E. Johnson and Walter C. Hurty, 527

Matrices (mathematics); Microenvironment; Professional activities; Buildings (hospitals); Environmental effects; Health
The Hospital as a Microenvironment, E. Todd Wheeler, 593

Matrices (mathematics); National historic sites; Planning; Pollution; Sanitary engineering; Conservation; Environmental effects; Environmental engineering; Esthetics; Land use
Environmental Assessment of Resource Development, Kenneth D. Kerri, 282

Matrices (mathematics); Pipelines; Resonance; Characteristics; Frequency; Hydraulics
Resonance in Pipes Having Variable Characteristics, M. Hanif Chaudry, 159

Matrices (mathematics); Plates (structural members); Shells (structural forms); Elastic properties; Engineering mechanics; Finite elements
Generalization of Plate Finite Elements to Shells, Robert G. Vos, 223

Matrices (mathematics); Revisions; Stiffness matrix; Structural design; Structural members; Algorithms; Engineering mechanics
Reanalysis for Limited Structural Design Modifications, Uri Kirsch and Moshe F. Rubinstein, 75

Matrices (mathematics); Sandwich laminates; Transfer functions; Composite structures; Elastic properties; Engineering mechanics
Transfer Matrix Approach to Layered Systems, Leon Y. Bahar, 479

Matrices (mathematics); Structural engineering; Topology; Algorithms; Computers
Algorithm for Matrix Bandwidth Reduction, Henry R. Grooms, 88

Matrix methods; Space frames; Stability; Structural engineering; Buckling; Deflection
Large Deflection Buckling of Space Frames, Kuang-Han Chu and Robert H. Rampetsreiter, 589

Matrix methods; Stiffness; Structural engineering; Algorithms; Matrices (mathematics)
General Treatment of Structural Modifications, John H. Argyris and John R. Roy, 150

Matrix methods; Stiffness matrix; Structural analysis; Structural engineering; Torsion; Bridges (structures)
Stiffness Analysis of Grids Including Warping, Robert J. Reilly, 333

Matrix methods; Structural engineering; Cylindrical shells; Finite elements
Analysis of Eccentrically Stiffened Cylindrical Shells, Peter C. Kohnke and William C. Schnobrich, 344

Measurement; Metric system; United States government; Foreign projects; History; Legislation
Metrication in the United States, a Status Report, L. E. Barbrow, 555

Measurement; Planning; Traffic surveys; Transportation
Integrated Measurement Framework for Transportation Planning, George C. Wickstrom, 241

Measuring instruments; Data systems; Hydraulics; Hydrology
New Approach to Hydrologic Data Acquisition, Edward J. Langham, 56

Measuring instruments; Open channel flow; Drainage; Flumes; Hydraulics; Irrigation
Generalized Discharge Relations for Cutthroat Flumes, Gaylord V. Skogerboe, Ray S. Bennett and Wynn R. Walker, 601

Measuring instruments; Porous materials; Turbulence; Turbulent flow; Boundary shear; Engineering mechanics
Turbulent Shear Flow in Porous Boundary, James F. Ruff and Lynn W. Gelhar, 404

Measuring instruments; Saturated soils; Test equipment; Triaxial shear; Vane shear tests
A Direct-Reading Pocket Shear Vane, Stanley Serota and Anil Jangle, 63

Measuring instruments; Statistical analysis; Surveying; Surveying instruments; Temperature; Atmospheric pressure; Barometers; Density
Barometric Leveling Analysis, James D. Gruendler, Frederick P. Thomack and James L. Clapp, 313

Mechanics; Ocean engineering; Structural engineering; Bridges (suspension); Cables (ropes); Dynamic structural analysis; Hydrodynamics
Dynamic Analysis of Cable Systems, Richard F. Dominguez and Charles E. Smith, 388

Mechanics; Sands; Soil mechanics; Vibration; Vibratory compaction
Subsidence of Sand Due to Surface Vibration, William F. Brumund and Gerald A. Leonards, 133

Mechanics; Structural engineering; Anisotropy; Elastic properties; Finite element method
Finite Element Method for Wood Mechanics, Adam Al-Dabbagh, James R. Goodman and Jozsef Bodig, 174

Mechanics; Structural engineering; Vibration; Computation; Dynamics; Engineering; Frames; Matrices (mathematics)
Convergence in Modal Synthesis, Stephen E. Johnson and Walter C. Hurty, 527

Membrane processes; Sanitary engineering; Sewage treatment; Suspended solids; Filters; Filtration
Filtrability Study on Secondary Effluent Filtration, Kou-Ying Hsiung, 384

Membranes; Roofs; Shells (structural forms); Structural engineering; Buckling; Hyperbolic parabolic shells
Analysis of Thin-Steel Hyperbolic Paraboloid Shells, Prabodh V. Banavalkar and Peter Gergely, 557

Membranes; Roofs; Shells (structural forms); Structural engineering; Tests; Hyperbolic parabolic shells
Experimental Investigation Of Thin-Steel Hyperbolic Paraboloid Structures, Peter Gergely and George Winter, 473

Meningitis; Microorganism control (water); Water treatment; Amoeba; Chlorine; Cysts; Disinfection; Dysentery; Iodine
Amoebic Cysticidal Properties of Halogens in Water, Richard Stringer and Cornelius W. Kruse, 98

Metals; Necking; Nonlinear differential equations; Columns (supports); Deformation; Engineering mechanics
Nonlinear Analysis of Instability in Tension, Sam Tang, 21

Metals; Structural engineering; Columns (supports); Curvature
Tangent Stiffness Method for Biaxial Bending, Sakda Santathadaporn and Wai F. Chen, 93

Meteorology; Momentum; Tornadoes; Vortices; Air entrainment; Drains; Dust storms; Engineering mechanics; Fluid mechanics; Friction; Hydraulics; Inlets (waterways); Jets
Experiments on Unstable Vortices, Enzo Levi, 249

Meteorology; New Jersey; Water purification; Water quality; Water resources; Droughts; Environmental engineering; Estuaries; Hydrology; Irrigation
Impact of Drought on New Jersey's Water Resources, Peter W. Anderson, Samuel D. Faust and John E. McCall, 472

Meteorology; Overconsolidation; Soil mechanics; Expansive clays; Failure; Harbor structures; Inclinometers
Behavior of Wharf Affected by River Fluctuations, Richard A. Sullivan, 457

Meteorology; Rainfall; Rivers; Water resources; Weather modification; Cloud seeding; Irrigation
Cloud Seeding Interpreted Through Atmospheric Water Balance, James L. Rasmussen, 562

Metric system; Planning; Standards; Training; Construction industry; Engineering education; Engineers; Foreign engineering; Great Britain; Management
Metrication Progress in the United Kingdom, Gordon Bowen, 523

Metric system; Surveying; Terminology; Definitions
Definitions of Surveying and Associated Terms -- Manual and Report on Engineering Practice No. 34606

Metric system; United States government; Foreign projects; History; Legislation; Measurement
Metrication in the United States, a Status Report, L. E. Barbrow, 555

Mica; Soil mechanics; Compression; Earth pressure coefficient
Effect of Mica on K_0 Compressibility of Two Soils, Charles A. Moore, 33

Michigan; Revenues; Taxes; Transportation; Government policies; Highway planning
Michigan Transportation in the Seventies, William C. Taylor, 510

Microenvironment; Professional activities; Buildings (hospitals); Environmental effects; Health; Matrices (mathematics)
The Hospital as a Microenvironment, E. Todd Wheeler, 593

Microorganism control (water); Water treatment; Amoeba; Chlorine; Cysts; Disinfection; Dysentery; Iodine; Meningitis
Amoebic Cysticidal Properties of Halogens in Water, Richard Stringer and Cornelius W. Kruse, 98

Minimum weight design; Optimum design; Plastic analysis; Cyclic loads; Engineering mechanics
Unified Approach to the Theory of Plastic Structures, M. A. Cohn, S. K. Ghosh and S. R. Parimi, 466

Minimum weight design; Optimum design; Plastic design; Elastic analysis; Engineering mechanics; Grillage footings
Rectangular Grillages of Least Weight, George I.N. Rozvany and Sai R. Adidam, 538

Minority groups; Professional activities; ASCE (education); ASCE (policy)
Training Minorities for Construction Work, Ewell W. Finley, 161

Minority groups; Professional activities; Professional advancement; Urban planning; Employment; Engineering education
Minority Programs for ASCE, Sol E. Cooper, Austin B. Milhollin and Benito A. Sinclair, 485

Mississippi; Time of concentration; Turbulence; Turbulent diffusion; Dispersion; Hydraulics; Mathematical models
Dispersion in Natural Streams, Mahendra K. Bansal, 50

Mississippi River; Waterways; Aeration; Backwater; Dams (movable); Dikes; Gates; Ice; Ice control
Reducing Ice Formation at Navigation Dams, Henry W. Harich, 387

Missouri; Outfall sewers; Pollution abatement; Sewage treatment; Waste treatment
St. Louis Cleans up the Mississippi259

Missouri; Prototypes; Channel stabilization; Hydraulic models
Navigation Model Tests for Straight Reach of Missouri River, Duane J. Sveum and Warren J. Mellema, 227

Missouri; U.S. Corps of Engineers; Civil engineers; Education; Engineering education
Corps of Engineers Promotes Continuing Education, Melford E. Monsees, 39

Mixing; Plumes; Power; Mathematical models
Computer Model for Thermal Plume, Robert E. Barry and David P. Hoffman, 286

Mixing; Power; Salt; Temperature; Turbulence; Velocity; Hot film anemometers; Laboratory tests
Velocity and Temperature in Buoyant Jet, Richard Dornhelm, Manuel Nouel and Robert L. Wiegel, 148

Mobility; Passenger transportation; Retirement; Transportation; Urban transportation; Automobiles; Ethnic groups
Transportation and Retirement, Frances M. Carp, 484

Mobility; Retaining walls; Soil mechanics; Soil-structure interaction; Stress distribution; Velocity distribution; Walls; Earth pressure
Effect of Wall Movement on Active and Passive Pressures, Ian K. Lee and John R. Herington, 347

Modal split; Systems analysis; Transportation; Urban development; Mathematical models
Evaluation of New Systems For Urban Transportation, Reed H. Winslow and Jerry L. Pfeffer, 518

Modal split; Traffic surveys; Mathematical models
Impedance Minimization Travel Choice Process, Edward A. Beimborn, 140

Modal split; Traffic surveys; Transportation; Transportation models; Trip length; Mathematical models
Variations of Urban Travel Characteristics with Age, Norman Ashford and Frank M. Holloway, 385

Modal split; Traffic surveys; Transportation models; Urban planning; Behavior; Forecasting
Behavioral Models in Transportation Planning, Frank E. Horton, 234

Models; Model tests; Structural engineering; Structural models; Bridges (box girder); Bridges (structures); Curved beams; Loads (forces)
Model Analysis of Curved Box-Beam Highway Bridge, Ish K. Aneja and Frederic Roll, 48

Models; Offshore structures; Waves; Coastal engineering; Coefficients; Hydrodynamics
Mechanical Excitation of Offshore Tower Model, Charles P. Rains and Subrata K. Chakrabarti, 172

Models; Overland flow; Rational formula; Flood hydrographs; Hydraulics; Hydrology; Kinematics
Kinematic Wave Nomograph for Times of Concentration, Robert M. Ragan and J. Obiukwu Duru, 506

Models; Pile drivers; Pile driving; Construction; Foundations; Hammers
Performance of Pile Driving Hammers, Frank Rausche and George G. Goble, 475

Models; Pipe flow; Powerplants; Pumps; Water hammer; Computer programming; Computers; Conduits; Discharge; Hydraulics
Computer Simulation of Waterhammer Effects, George Belonogoff, 323

Models; Powerplants; Pumped storage; Turbines; Conservation; Costs; Dams (concrete); Dams (gravity); Economics; Environmental engineering; Hydroelectric power generation
Wallace Dam, Major H. Thompson, Jr., 550

Models; Research; Transportation; Urban development; Land use
Analysis of BART Impacts on Bay Area Land Use, Douglass B. Lee, Jr., 226

Models; Rivers; Tides; Tidewater; Waterways (transportation); Estuaries; India; Mathematical models
Mathematical Model of River Hooghly, Donald M. McDowell and David Prandle, 209

Models; Salinity; Statistical analysis; Virginia; Estuaries; Hydraulic models; Hydraulics
Repeatability in Estuarine Hydraulic Model, Paul V. Hyer, 229

Models; Sands; Soil mechanics; Strains; Anchorages; Bearing capacity
Anchor Behavior in Sand, Thomas H. Hanna, Robert Sparks and Mehmet Yilmaz, 521

Models; Sewage disposal; Water supply; Construction costs; Costs; Inflation (economics); Mathematical models
Mathematical Model for Rate Studies, Kuan M. Yao, 442

Models; Shells (structural forms); Engineering mechanics; Folded plates
Experiments with Elastic Folded Plate Models, Stuart E. Swartz and Vernon H. Rosenbraugh, 325

Models; Shells (structural forms); Structural engineering; Concrete (reinforced); Cylindrical shells
Inelastic Behavior Of R/C Cylindrical Shells, Harry G. Harris and Richard N. White, 376

Models; Simulation; Tidal currents; Tracers; Turbulence; Diffusion; Effluents; Field tests; Hydraulics
Tracer Tests of Eddy Diffusion in Field and Model, Maurice J. Crickmore, 509

Models; Structural engineering; Box girders; Bridges (structures); Buckling; Composite structures; Design
Ultimate Design of Hollow Thin-Walled Box Girders, Dennis H. Parr, 329

Models; Structural engineering; Tests; Bridges (girder); Concrete (precast); Concrete (prestressed)
81-ft Model of Prestressed Bridge477

Models; Systems engineering; Water resources; California; Computers; Forecasting
Optimum Operations Model for Shasta-Trinity System, Dan M. Fults and Lawrence F. Hancock, 450

Models; Transportation; Urban planning; Commercial transportation; Commodity management
Analysis of Need for Goods Movement Forecasts, Davit Fresko, Gordon Shunk and Franklin Spielberg, 87

Model studies; Rock fills; Shear strength; Soil mechanics; Triaxial tests; Grain sizes
Evaluation of Properties of Rockfill Materials, N. Dean Marschi, Clarence K. Chan and H. Bolton Seed, 160

Model tests; Moorings; Buoys; Harbors
Two-Point Mooring System for Spar Buoy, John H. Nath and Steve Neshyba, 17

Model tests; Retaining walls; Soil mechanics; Clays; Earth pressure; Lateral pressure
Lateral Pressures from Soft Clay, Peter J. Moore and Graham K. Spencer, 538

Model tests; Structural engineering; Structural models; Bridges (box girder); Bridges (structures); Curved beams; Loads (forces); Models
Model Analysis of Curved Box-Beam Highway Bridge, Ish K. Aneja and Frederic Roll, 48

Mode (statistics); Statistical analysis; Statistical dispersion; Structural engineering; Eigenvalues; Eigenvectors; Engineering mechanics
Modal Analysis of Random Structural Systems, Timothy K. Hasselman and Gary C. Hart, 273

Modular structures; Modules; Systems management; Concrete (precast); Floors
Floor-Ceiling System Features Precast Concrete Units, Jerome S.B. Iffland, 186

Modules; Systems management; Concrete (precast); Floors; Modular structures
Floor-Ceiling System Features Precast Concrete Units, Jerome S.B. Iffland, 186

Moment distribution; Plasticity; Structural engineering; Tall buildings; Computers; Limit design method
Optimum Plastic Design of Steel Frames, Bogdan O. Kuzmanovic and Nicholas Willems, 423

Moment distribution; Plates (structural members); Structural engineering; Fourier analysis
Iterative Method for Solving Rectangular Plates, B. Sen, S. Sengupta and T. K. Nath, 113

Moment distribution; Structural analysis; Structural engineering; Beams (supports); Bolted joints; Joints (connections); Lap joints
Double Overlap Beam, Oliver A. Baer, 542

Moment distribution; Structural engineering; Arches; Design; Education
Hardy Cross and the Rise of Numerical Methods, James Michalos, 153

Moments; Powerplants; Shells (structural forms); Structural engineering; Wind (meteorology); Analysis; Concrete (reinforced); Cooling towers; Design; Earthquakes; Loads (forces)
Analysis and Design of Hyperbolic Cooling Towers, German Gurfinkel and Adolf Walser, 340

Moments; Stability; Strain hardening; Structural engineering; Buckling
Buckling of Inelastic I-Beams Under Uniform Moment, Nicholas S. Trahair and Sritawat Kitipornchai, 536

Moments; Vibration; Deflection; Dynamics; Engineering mechanics; Forced vibration; Grid systems
Dynamic Field Analysis of Torsionless Grids, Hota V.S. GangaRao and J. C. Smith, 330

Momentum; Tornadoes; Vortices; Air entrainment; Drains; Dust storms; Engineering mechanics; Fluid mechanics; Friction; Hydraulics; Inlets (waterways); Jets; Meteorology
Experiments on Unstable Vortices, Enzo Levi, 249

Monitoring; Project control; Scheduling; Construction; Construction industry; Costs; Critical path method; Management
Planning Monitoring Frequencies for CPM Projects, Douglas A. Elvers, 55

Monorail railways; Tolerances (mechanics); High strength concretes; High strength steels
Walt Disney World Monorail Designed for Smooth Riding, Robert F. Mast and Charles W. Dolan, 135

Montana; Concrete (post-tensioned); Concrete (reinforced); Construction; Consultants; Dams; Dams (concrete); Government; Maintenance
Montana Power Company's Dam Repair Program, Clifford L. Emmerling, 565

Monte Carlo method; Ocean waves; Plates; Stochastic processes; Boundary value problems
Analysis of Floating Plate Under Ocean Waves, Yi-Kwei Wen and Masanobu Shinozuka, 317

Monte Carlo method; Probability theory; Shear; Structural engineering; Buildings; Dynamics; Earthquakes
Probabilistic Response of Nonlinear Buildings During Earthquakes, Alain H. Peyrot, 531

Monte Carlo method; Probability theory; Simulation; Stochastic models; Stream flow; Hydraulics
Adequacy of Hydrologic Records for Parameter Estimation, Charles T. Haan, 430

Moorings; Buoys; Harbors; Model tests
Two-Point Mooring System for Spar Buoy, John H. Nath and Steve Neshyba, 17

Mortars (material); Pipelines; Pipe linings; Protective coatings; Steel pipes; Tunnels; Aqueducts; Conduits
Cement Mortar Lining of 20-Ft Diameter Steel Pipe, James E. Wolfe, 462

Motivation; Benefit-cost ratios; Construction; Construction industry; Craftsmen; Management
Motivation of Construction Craftsmen, Charles R. Schrader, 453

Movable bed models; Profiles; Scale effect; Beach ridges; Coastal engineering; Equilibrium; Harbors; Hydraulic models
Equilibrium Beach Profile Scale-Model Relationship, Edward K. Noda, 558

Multiple purpose projects; Optimization; Recreation; Water resources; Flood control; Hydraulics; Hydroelectric power; Irrigation; Low-flow augmentation
Multireservoir Optimization Model, James S. Windsor and Ven Te Chow, 532

Multiple purpose reservoirs; Tennessee Valley Authority; Water supply; Environmental engineering; Flood control; Hydroelectric power generation
Impact of Multiple-Purpose Reservoir System on Regional Environment, Edward H. Lesesne, 370

Multiple use; Right of way acquisition; Transportation; Urban transportation; Environments; Freeways; Highways
Multiple Use of City Transportation Corridor, Harry R. Powell and F. G. Alden, 285

Multivariate analysis; Sanitary engineering; Water quality; Environmental engineering; Eutrophication; Florida; Lakes
Eutrophication Analysis: A Multivariate Approach, Earl E. Shannon and Patrick L. Brezonik, 237

Municipal engineering; Planning; Sanitary engineering; Buildings (commercial); Field tests; Forecasting
Empirical Analysis of Commercial Solid Waste Generation, Truett V. DeGeare and Jerry E. Ongerth, 112

Municipal engineering; Professional practice; Reports; Salaries; Civil engineers; Consulting engineers
1971 ASCE Salary Survey, the Committee on Employment Conditions of the Department of Professional Activities, Charles J. Stevens, Chmn., 347

Municipal engineering; Professional practice; Runoff; Subdivisions; Urban planning; Waterways (watercourses); Drainage; Floods; Hydraulics; Hydrology; Land use; Legislation
An Engineer Looks at Drainage Law, Alfred R. Pagan, 511

Municipal water; Research; Sanitary engineering; Solid wastes; Waste water; Water resources; Water treatment; Air pollution; Industrial wastes
Research Needs in Sanitary Engineering, Sanitary Engineering Research Committee of the Sanitary Engineering Division, Jack M. Betz, Chmn., 321

Nails; Slip joints; Structural engineering; Wood; Wooden structures; Elastic properties; Fasteners; Joints (junctions)
Analysis of Nailed Joints with Dissimilar Members, Thomas Lee Wilkinson, 437

Nappe; Parabolas; Spillways; Variations; Curvature; Fluid flow; Hydraulics
Flow Over Rounded Spillways, Kamil H.M. Ali, 163

National historic sites; Planning; Pollution; Sanitary engineering; Conservation; Environmental effects; Environmental engineering; Esthetics; Land use; Matrices (mathematics)
Environmental Assessment of Resource Development, Kenneth D. Kerri, 282

Natural frequency; Plates; Sandwich laminates; Vibration; Engineering mechanics; Finite elements
Triangular Element for Multilayer Sandwich Plates, Tara P. Khatua and Yau Kai Cheung, 443

Natural frequency; Structural engineering; Underwater structures; Vibration; Damping; Hydrodynamic pressure
Virtual Mass of Submerged Structures, Anjur R. Chandrasekaran, Sarjit S. Sani and M. M. Malhotra, 308

Natural gas; Transmission lines; Transportation; Utilities; Zoning; Costs; Engineering societies; Failure; Gas pipelines; Legislation
Responsibility of Gas Utilities for Pipeline Safety, Carl T. Kallina, 148

Natural resources; Photogrammetry; Space reconnaissance; Surveying; Television systems; Geodetic surveys; Mapping
Applications of Extraterrestrial Surveying and Mapping, Robert B. McEwen and David A. Tyler, 604

Natural resources; Planning; Sanitary engineering; Ecology; Environmental effects; Management planning
Environmental Planning and Ecological Possibilities, David A. Bella and W. Scott Overton, 422

Natural resources; Professional activities; Rivers; Sewage disposal; Solid wastes
Interdisciplinary Planning to Meet Environmental Needs, Frederick J. Clarke, 535

Natural resources; Site surveys; Design practices; Environmental engineering; Land use
Environmental Aspects of Site Selection, Eugene F. Dudley, 120

Navigable rivers; ASCE (History); ASCE (Outstanding Civil Engineering); Canals; Locks (waterways)
Great Falls Canal and Locks: Civil Engineering Landmark496

Navigation; Surveys; Astronomy; Computation
Solar Astronavigation in High Latitudes, Gerald W. Johnson and James L. Clapp, 29

Navigation; Waterways; Canals; Design; Ecology; Environmental engineering; Fish; Florida; Locks (waterways)
Design Versus Ecology in St. Johns and Indian Rivers, Harold A. Scott, 475

Necking; Nonlinear differential equations; Columns (supports); Deformation; Engineering mechanics; Metals
Nonlinear Analysis of Instability in Tension, Sam Tang, 21

Netherlands; New Jersey; Savannas; Shore protection; Waves; Dikes; Dunes; Flood control; Floods
Best Shore Protection: Nature's Own Dunes, Ian McHarg, 400

Network analysis; Pipe flow; Fluid flow; Hydraulics; Linear differential equations
Hydraulic Network Analysis Using Linear Theory, Don J. Wood and Carl O.A. Charles, 366

Networks; New york; Systems analysis; Water tunnels; Computer systems programs; Design
Systems Analysis of Water Distribution Networks, Richard de Neufville, John C. Schaake, Jr. and Joseph H. Stafford, 105

Networks; Planning; Resource allocation; Scheduling; Computers; Construction; Critical path method; Management
Man-Computer Concepts for Planning and Scheduling, Boyd C. Paulson, Jr., 546

Nevada; Regulation; Simulation; Statistical analysis; Systems engineering; Data systems; Hydraulics
Streamflow Synthesis - A Case Study, Vulli L. Gupta and John W. Fordham, 336

New jersey; New york; Airports; Air traffic; Costs; Dikes; Estimates; Jet aircraft
Offshore Jetport for New York-New Jersey Megalopolis, Edward G. Nawy and Fred C. Koletty, 179

New Jersey; Savannas; Shore protection; Waves; Dikes; Dunes; Flood control; Floods; Netherlands
Best Shore Protection: Nature's Own Dunes, Ian McHarg, 400

New Jersey; Water purification; Water quality; Water resources; Droughts; Environmental engineering; Estuaries; Hydrology; Irrigation; Meteorology
Impact of Drought on New Jersey's Water Resources, Peter W. Anderson, Samuel D. Faust and John E. McCall, 472

Newton-Raphson method; Structural engineering; Bridges (suspension); Compatibility methods; Computer applications; Computers; Equilibrium methods
Static Analysis of Suspension Bridges, Alan Jennings and John E. Mairs, 508

Newton-Raphson method; Water distribution (applied); Computer programs; Hydraulics; Mathematical models
Computer Analysis of Water Distribution Systems: Part II--Numerical Solution, Chan F. Lam and M. L. Wolla, 207

New york; Airports; Air traffic; Costs; Dikes; Estimates; Jet aircraft; New jersey
Offshore Jetport for New York-New Jersey Megalopolis, Edward G. Nawy and Fred C. Koletty, 179

New york; Project management; Regional planning; Construction management; Contract terms; Financing
New York City Hacks Through Capital Construction Jungle, Thomas A. Graham, 199

New York; Sewage treatment plants; Dredging
New Pier in Jamaica Bay, Remig A. Papp, 372

New York; Structural engineering; Bridges (girder); Bridges (structures); Curved beams; Field tests; Impact
Dynamic Testing of Curved Bridge - Huyck Stream, William L. Armstrong, 429

New york; Systems analysis; Water tunnels; Computer systems programs; Design; Networks
Systems Analysis of Water Distribution Networks, Richard de Neufville, John C. Schaake, Jr. and Joseph H. Stafford, 105

Nitrates; Sanitary engineering; Sewage treatment; Activated sludge; Anaerobic conditions; Denitrification; Eutrophication; Kinetics
Process Kinetics for Denitrification, Walter K. Johnson, 448

Nitrogen oxides; Sanitary engineering; Water pollution; Water treatment plants; Biochemical oxygen demand; Government
Implications of Nitrogenous BOD in Treatment Plant Design, Russell C. Mt. Pleasant and Warren Schlickenrieder, 82

Noise; Noise masking; Transportation; Design; Environmental engineering; Highway engineering; Highways
Baltimore Plans Highways for Minimum Noise, Grant S. Anderson, Frederick Gottemoeller and Daniel G. Page, 410

Noise; Noise reduction; Passenger transportation; Rapid transit railways; Transportation; Vibration
Noise and Vibration Control in New Rapid Transit, Marshall L. Silver, 579

Noise masking; Transportation; Design; Environmental engineering; Highway engineering; Highways; Noise
Baltimore Plans Highways for Minimum Noise, Grant S. Anderson, Frederick Gottemoeller and Daniel G. Page, 410

Noise reduction; Parks; Urban planning; Water pollution; Air pollution; Esthetics; Housing; Land use
Esthetic Considerations in Urban General Planning, Wm. H. Claire, 404

Noise reduction; Passenger transportation; Rapid transit railways; Transportation; Vibration; Noise
Noise and Vibration Control in New Rapid Transit, Marshall L. Silver, 579

Noise reduction; Rapid transit railways; Social needs; Subways; Washington, D.C.; Contracts
Washington D.C.'s Metro--A Progress Report, Robert S. O'Neil, 194

Noise reduction; Real property; Transportation; Air pollution; Benefit-cost ratios; Community development
Community Values in Transport Network Evaluation, Dan G. Haney and George E. Klein, 449

Noise reduction; Sewage disposal; Sewers; Subsurface investigations; Tunneling (excavation); Freezing
Subsurface Freezing Used In Tunneling, Charles P. Gail, 221

Nonlinear algebraic equations; Optimization; Reservoirs; River flow; Canada; Diversion; Linear algebraic equations; Linear programming
Optimization Model for Churchill River Diversion, Abu M.Z. Alam, 409

Nonlinear differential equations; Columns (supports); Deformation; Engineering mechanics; Metals; Necking
Nonlinear Analysis of Instability in Tension, Sam Tang, 21

Nonlinear programming; Optimization; Stresses; Tall buildings; Computer programming; Computers; Design; Dynamic response; Dynamics; Earthquakes; Engineering mechanics
Optimum Earthquake Design of Shear Buildings, Ben Kato, Yuji Nakamura and Hidetake Anraku, 343

Nonlinear systems; Cables (ropes); Dynamics; Engineering mechanics; Finite elements
Nonlinear Dynamics of Cables with Low Initial Tension, John W. Leonard, 170

Nonlinear systems; Power; Thermal powerplants; Cooling towers; Dynamics; Finite element method
Nonlinear Dynamic Analysis of Cooling Tower, Chang-hua Yeh, 228

Nonlinear systems; Structural engineering; Trusses; Interactions; Loads (forces)
Nonlinear Elastic Truss Analysis Partitioning, N. M. Singaraj and Jawalker K. Sridhar Rao, 562

Nonlinear systems; Vibration; Engineering mechanics; Forced vibration; Harmonics
Transverse Beam Vibration Nonlinear Constraint, Mohammed Ali Dokainish and Rajnish Kumar, 556

Nonlinear systems; Wave energy; Waves; Cylinders; Diffraction; Hydraulics
Nonlinear Wave Forces on a Vertical Cylinder, Subrata K. Chakrabarti, 542

Nonuniform flow; Open channel flow; Overland flow; Rainfall; Water flow; Flow resistance; Friction; Head losses; Hydraulics
Resistance Coefficients for Steady Spatially Varied Flow, Ben Chie Yen, Harry G. Wenzel, Jr. and Yong Nam Yoon, 415

North carolina; Regional analysis; Regional planning; Travel; Forecasting; Highways; Mathematical models
Forecasting Regional Travel on Regional Highway Network, Arun Chatterjee and Paul D. Cribbins, 162

Nuclear electric power generation; Powerplants; Sanitary engineering; Temperature; Thermal shock; Water pollution; Bioassay; Estuaries; Fishkill
Parameters Necessary for Analyzing Thermal Bioassays, Robert D. Smith, 569

Nuclear electric power generation; Powerplants; Thermoelectric power generation; Utilities; Waste disposal; Cooling systems; Cooling towers
Power Plant Cooling Systems, George Kinsman, 364

Nuclear electric power generation; Professional activities; Professional engineering; Engineering education; Environmental engineering; Ethics
Engineering For People, Richard R. Harbert, 441

Nuclear electric power generation; Regional planning; Water; Water supply; Desalting; Electric power generation
Dual-Purpose Desalting in Pacific Southwest, Sam Shiozawa, 140

Nuclear power plants; Nuclear reactors; Power; Seismic properties; Soil-structure interaction; Foundations; Mathematical models
Interaction of Soil and Power Plants in Earthquakes, Jeremy Isenberg and Samy A. Adham, 419

Nuclear power plants; Powerplants; Pumped storage; Tidal power generation; Tidal power plants
Tidal Energy from the Bay of Fundy, Thomas L. Shaw and J. van den Heuvel, 531

Nuclear power plants; Soil properties; Surveying; Concrete (precast); Concrete (reinforced); Construction
Civil Engineers Help Construct the World's Largest Proton Accelerator, William D. Alexander, Marvin E. Warner, E. Parke Rohrer and Richard E. Pages, 474

Nuclear reactors; Power; Seismic properties; Soil-structure interaction; Foundations; Mathematical models; Nuclear power plants
Interaction of Soil and Power Plants in Earthquakes, Jeremy Isenberg and Samy A. Adham, 419

Numerical analysis; Plasticity; Shells (structural forms); Concrete (reinforced); Cylindrical shells; Elastic properties; Engineering mechanics
Elastic-Plastic Analysis of Cylindrical Shells, Nabil A. Shoeb and William C. Schnobrich, 96

Numerical analysis; Rings; Structural engineering; Vibration; Arches; Dynamics; Engineering mechanics
Free In-Plane Vibration of Circular Arches, Anestis S. Veletsos, Walter J. Austin, Carlos A. Lopes Pereia and Shyr-Jen Wung, 176

Numerical analysis; Seepage; Computation; Computer programming; Computers; Engineering mechanics
Summary Representation Applied to Seepage Problems, Antonio Santos-Moreno, Raymond J. Krizek and Gabor M. Karadi, 144

Numerical analysis; Structural engineering; Torsion; Torsional strength; Beams (supports)
Torsion of Nonprismatic Beams of Open Section, Donald R. Evick and Conrad P. Heins, Jr., 587

Numerical integration; Structural engineering; Computation; Dynamics; Dynamic structural analysis; Engineering mechanics; Finite differences; Mathematics
Temporal Operators for Nonlinear Structural Dynamics Problems, George Weeks, 495

Nutrients; Pollution; Runoff; Rural areas; Sanitary engineering; Agricultural wastes; Erosion
Agricultural Runoff-Characteristics and Control, Raymond C. Loehr, 520

Nutrition; Plants; Productivity; Sanitary engineering; Sea grasses; Benthic flora; Estuaries
Role Of Benthic Plants in Fertilized Estuary, Thomas D. Waite and Ralph Mitchell, 482

Ocean currents; Outfall sewers; Sewers; Waste disposal; Wind (meteorology); Coastal engineering
Coastal Current of Pacific Northwest, Bard Glenne and Robert H. Bourke, 574

Ocean engineering; Bedding materials; Hydraulics; Materials
Fluid-Dynamic Consideration of Bottom Materials, Hormoz Pazwash and James M. Robertson, 18

Ocean engineering; Ocean waves; Subsurface structures; Waves; Coastal engineering; Hydrodynamics
Wave Forces on Submerged Bodies, C. J. Garrison and P. Y. Chow, 371

Ocean engineering; Offshore structures; Structural engineering; Tides; Underwater construction; Fatigue (materials)
Offshore Structures - Statistical Strain Recording, Michael A. Garnett, Bhan Mabin and Terrence E.H. Lemmon, 177

Ocean engineering; Pore water pressure; Soil mechanics; Time dependence; Underwater construction; Bearing capacity; Deformation; Earth pressure
Breakout Resistance of Objects Embedded in Ocean Bottom, Aleksandar Sedmak Vesic, 19

Ocean engineering; Structural engineering; Bridges (suspension); Cables (ropes); Dynamic structural analysis; Hydrodynamics; Mechanics
Dynamic Analysis of Cable Systems, Richard F. Dominguez and Charles E. Smith, 388

Ocean waves; Overtopping; Breakwaters; Harbors; Hydraulic models
Wave Transmission by Overtopping, Ralph H. Cross and Charles K. Sollitt, 457

Ocean waves; Plates; Stochastic processes; Boundary value problems; Monte Carlo method
Analysis of Floating Plate Under Ocean Waves, Yi-Kwei Wen and Masanobu Shinozuka, 317

Ocean waves; Spectral energy distribution; Standing waves; Wave height; Breakwaters; Coastal engineering
Spectral Resolution of Breakwater Reflected Waves, Edward B. Thornton and Ronald J. Calhoun, 512

Ocean waves; Subsurface structures; Waves; Coastal engineering; Hydrodynamics; Ocean engineering
Wave Forces on Submerged Bodies, C. J. Garrison and P. Y. Chow, 371

Office equipment; Calculations; Calculators; Civil engineering; Computer applications
The Programmable Calculator: A Place In Civil Engineering, Eugene E. Dallaire, 106

Offsets; Surveys; Computer programs; Curves; Highway engineering
Offsets to Sight Obstructions Near the Ends of Horizontal Curves, William L. Raymond, Jr., 58

Offshore completion; Pile structures; Vortices; Wave energy; Waves; Coastal engineering; Drilling
Laboratory Study of Lift Forces on Circular Piles, Devidas D. Bidde, 60

Offshore structures; Periodic functions; Resonance; Wave energy; Coastal engineering; Mass
Resonant Response of Offshore Structures, Lawrence G. Selna and David Cho, 155

Offshore structures; Soil mechanics; Embankments; Foundations
Embankment Construction On Yielding Sea Bottom, Aris C. Stamatopoulos and Panaghiotis C. Kotzias, 391

Offshore structures; Steels; Structural engineering; Tube joints; Welded joints; Welding; Fatigue (materials); Fractures (materials)
Fatigue Failure of Welded Tubular Joints, James M. Becker, William W. Gerberich and Jack G. Bouwkamp, 62

Offshore structures; Structural engineering; Tides; Underwater construction; Fatigue (materials); Ocean engineering
Offshore Structures - Statistical Strain Recording, Michael A. Garnett, Bhan Mabin and Terrence E.H. Lemmon, 177

Offshore structures; Urban planning; Airports; Air transportation; Dikes; Environmental engineering
Trends in Offshore Airports, Richard D. Harza, 497

Offshore structures; Waves; Coastal engineering; Coefficients; Hydrodynamics; Models
Mechanical Excitation of Offshore Tower Model, Charles P. Rains and Subrata K. Chakrabarti, 172

Oils; Pipelines; Pipeline terminals; Pipeline transportation; Planning; Alaska; Conservation
Engineering the Trans-Alaska Pipeline415

Oily water; Pollution; Rivers; Sea water; Water pollution; Booms (equipment); Containment
Dynamics of Contained Oil Slicks, David L. Wilkinson, 324

Open channel flow; Broad-crested weirs; Flow measurement; Hydraulic models; Hydraulics
Brink Depth for Trapezoidal Broad-Crested Weir, Birendra N. Neogy, 582

Open channel flow; Drainage; Flumes; Hydraulics; Irrigation; Measuring instruments
Generalized Discharge Relations for Cutthroat Flumes, Gaylord V. Skogerboe, Ray S. Bennett and Wynn R. Walker, 601

Open channel flow; Overfalls; Flow measurement; Flowmeters; Irrigation
Free Overfall As Flow Measuring Device, Sebastian W. Bauer and Walter H. Graf, 12

Open channel flow; Overland flow; Rainfall; Water flow; Flow resistance; Friction; Head losses; Hydraulics; Nonuniform flow
Resistance Coefficients for Steady Spatially Varied Flow, Ben Chie Yen, Harry G. Wenzel, Jr. and Yong Nam Yoon, 415

Open channel flow; Pressure pipes; Transient flow; Unsteady flow; Water tunnels (conveyance); Computers; Hydraulics
Transient Flow in Free-Surface, Pressurized Systems, David C. Wiggert, 87

Open channel flow; Professional activities; Social needs; Environmental engineering; Flood control
Public Participation in Environmental Design of Flood Control Channels, Phillip F. Dunn, Jr., 432

Open channel flow; Ripple marks; Alluvial deposits; Friction factor; Hydraulics
Ripple and Dune Phases in a Narrowly Graded Sand, Christopher John Pratt and Kenneth V.H. Smith, 296

Open channel flow; Sanitary engineering; Water flow; Flow distribution; Hydraulic control
Hydraulic Control for Flow Distribution, Kuan M. Yao, 271

Open channel flow; Sedimentation; Sediments; Waterways; Degradation
Laboratory Study of Degradation and Aggradation, Suryanarayana Bhamidipaty and Hsieh W. Shen, 40

Open channel flow; Sediment deposits; Suspended load; Temperature; Bed load; Hydraulics
Temperature Effects in High-Transport, Flat-Bed Flows, Brent D. Taylor and Vito A. Vanoni, 597

Operations; Organizations; Public opinion; Water management (applied); Drainage; Irrigation; Maintenance
Operation and Maintenance of Irrigation and Drainage Systems: Section II--Organization for Operation and Maintenance, Committee on Operation and Maintenance of Irrigation and Drainage Systems of the Irrigation and Drainage Division, Richard J. Willson, Chmn., 76

Optics; Photogrammetry; Photography; Surveying; Water surface
Photogrammetry and Hydraulic Surfaces, Wolfgang Faig, 525

Optimization; Costs; Design; Girders; Loads (forces)
Cost Optimization of Welded Plate Girders, Natarajan Annamalai, Albert D.M. Lewis and John E. Goldberg, 495

Optimization; Probability theory; Structural engineering; Buildings; Fire protection; Fire resistance
Optimum Fire Resistance of Structures, T. T. Lie, 97

Optimization; Recreation; Water resources; Flood control; Hydraulics; Hydroelectric power; Irrigation; Low-flow augmentation; Multiple purpose projects
Multireservoir Optimization Model, James S. Windsor and Ven Te Chow, 532

Optimization; Reservoirs; River flow; Canada; Diversion; Linear algebraic equations; Linear programming; Nonlinear algebraic equations
Optimization Model for Churchill River Diversion, Abu M.Z. Alam, 409

Optimization; Sanitary engineering; Solid wastes; Waste disposal; Dynamic characteristics; Hauling; Management
Facility Selection and Haul Optimization Model, Houshang Esmaili, 528

Optimization; Stability; Buckling; Eigenvalues; Energy methods; Engineering mechanics
Simultaneous Buckling in Symmetric Structural Systems, Kenneth C. Johns, 369

Optimization; Stiffness methods; Structural design; Structural engineering
Optimum Design by Partitioning into Substructures, Uri Kirsch, Max Reiss and Uri Shamir, 117

Optimization; Stresses; Tall buildings; Computer programming; Computers; Design; Dynamic response; Dynamics; Earthquakes; Engineering mechanics; Nonlinear programming
Optimum Earthquake Design of Shear Buildings, Ben Kato, Yuji Nakamura and Hidetake Anraku, 343

Optimization; Structural engineering; Computers; Iteration; Linear programming
Structural Optimization by Inscribed Hyperspheres, Roman Baldur, 242

Optimization; Structural engineering; Trusses; Automation; Computers; Design; Geometry
Automated Design of Trusses for Optimum Geometry, Garret N. Vanderplaats and Fred Moses, 202

Optimum design; Plastic analysis; Cyclic loads; Engineering mechanics; Minimum weight design
Unified Approach to the Theory of Plastic Structures, M. A. Cohn, S. K. Ghosh and S. R. Parimi, 466

Optimum design; Plastic design; Elastic analysis; Engineering mechanics; Grillage footings; Minimum weight design
Rectangular Grillages of Least Weight, George I.N. Rozvany and Sai R. Adidam, 538

Optimum design; Probability theory; Statically determinate structures; Structural engineering; Trusses; Costs
Minimum Expected Cost Optimization, Shengtaur Mau and Robert G. Sexsmith, 447

Optimum design; Sanitary engineering; Wastewater treatment; Activated sludge; Anaerobic digestion; Anaerobic processes; Computer applications; Mathematical models
Optimal Design of Wastewater Treatment Systems by Enumeration, Gene F. Parkin and Richard R. Dague, 513

Optimum design; Structural engineering; Adaptive systems; Algorithms; Computer applications
On Adaptive Structural Design, William R. Spillers and Lewis Friedland, 480

Oregon; Bridge construction; Bridges (box girder); Bridges (structures); I beams
Oregon Gets a Segmental Post-Tensioned Bridge, L. F. Pierce, 151

Organic matter; Reservoirs; Sediment deposits; Watersheds; Density; Forest land; Idaho
Volume Weight of Reservoir Sediment in Forested Areas, Walter F. Megahan, 435

Organizations; Pollution control; Professional activities; Water pollution control; Environmental engineering; Environments; Federal agencies
Federal Reorganization to Protect the Environment, John F. Wall and Leonard B. Dworsky, 289

Organizations; Public opinion; Water management (applied); Drainage; Irrigation; Maintenance; Operations
Operation and Maintenance of Irrigation and Drainage Systems: Section II--Organization for Operation and Maintenance, Committee on Operation and Maintenance of Irrigation and Drainage Systems of the Irrigation and Drainage Division, Richard J. Willson, Chmn., 76

Orientation; Photogrammetric surveys; Photogrammetry; Surveys
Explicit Approach to Exterior Orientation, Santosh K. Mahajan, 62

Orientation; Surveying; Surveys; Aerial surveys; Computer programs
Comparison of Analytical Relative-Orientation Methods, Santosh K. Mahajan and Singh Vijay, 340

Orifices; Pipe flow; Coefficients; Flow resistance; Hydraulics; Laminar flow
Orifice Losses for Laminar Approach Flow, Nagar S. Lakshmana Rao and Kalambur Sridharan, 556

Orifices; Valves; Cavitation; Energy dissipators; Hydraulics; Jets
Cavitation in High-Head Conduit Control Dissipators, John F. Ripken and Norio Hayakawa, 151

Orthotropic plate; Boundary value problems; Comparison; Engineering mechanics
Frequency Analysis of Tapered Orthotropic Plates, Jayaraman Ramachandran, 68

Orthotropic plate; Plates (structural members); Stresses; Deflection; Design; Engineering mechanics; Epoxy resins; Loads (forces)
Large Deflection of Rectangular Orthotropic Plates, Chuen-Yuan Chia, 514

Orthotropic plate; Skew bridges; Stiffness methods; Structural analysis; Structural engineering; Bridges (box girder); Computer programs; Finite elements; Folded plates; Interchanges
Cellular Structures of Arbitrary Plan Geometry, Kaspar J. William and Alexander C. Scordelis, 315

Orthotropic plate; Stiffness; Buckling; Composite structures; Engineering mechanics
Shear-Flexible Orthotropic Plates Loaded in Plane, Charles W. Bert and Shyming Chang, 602

Outfall sewers; Pollution abatement; Sewage treatment; Waste treatment; Missouri
St. Louis Cleans up the Mississippi259

Outfall sewers; Sewers; Waste disposal; Wind (meteorology); Coastal engineering; Ocean currents
Coastal Current of Pacific Northwest, Bard Glenne and Robert H. Bourke, 574

Overconsolidation; Soil mechanics; Expansive clays; Failure; Harbor structures; Inclinometers; Meteorology
Behavior of Wharf Affected by River Fluctuations, Richard A. Sullivan, 457

Overfalls; Flow measurement; Flowmeters; Irrigation; Open channel flow
Free Overfall As Flow Measuring Device, Sebastian W. Bauer and Walter H. Graf, 12

Overflow; Stratified flow; Fluid flow; Hydraulics
Flow of Layered Fluid Over Broad Crested Weir, Ian R. Wood and K. K. Lai, 108

Overland flow; Rainfall; Turbulence; Water flow; Drainage; Erosion; Friction; Impact
Mechanics of Sheet Flow Under Simulated Rainfall, Yong Nam Yoon and Harry G. Wenzel, Jr., 13

Overland flow; Rainfall; Water flow; Flow resistance; Friction; Head losses; Hydraulics; Nonuniform flow; Open channel flow
Resistance Coefficients for Steady Spatially Varied Flow, Ben Chie Yen, Harry G. Wenzel, Jr. and Yong Nam Yoon, 415

Overland flow; Rational formula; Flood hydrographs; Hydraulics; Hydrology; Kinematics; Models
Kinematic Wave Nomograph for Times of Concentration, Robert M. Ragan and J. Obiukwu Duru, 506

Overland flow; Runoff; Seepage; Snow; Drainage
Volume of Snowmelt Intercepted by Logging Roads, Edward R. Burroughs, Jr., Michael A. Marsden and Harold F. Haupt, 145

Overland flow; Runoff; Water flow; Flow resistance
Obtaining Overland Flow Resistance by Optimization, David L. Schreiber and Donald L. Bender, 196

Overtopping; Breakwaters; Harbors; Hydraulic models; Ocean waves
Wave Transmission by Overtopping, Ralph H. Cross and Charles K. Sollitt, 457

Oxidation; Oxygen; Sanitary engineering; Sewage; Sewers; Weirs; Adsorption; Coefficients
Oxygen Adsorption in Streams, John D. Parkhurst and Richard D. Pomeroy, 156

Oxygen; Oxygen consumption; Rivers; Sag; Sanitary engineering; Stream pollution; Use rates; Ice cover
Oxygen Depletion in Ice Covered River, Patrick H. Bouthillier, 326

Oxygen; Sanitary engineering; Sewage; Sewers; Weirs; Adsorption; Coefficients; Oxidation
Oxygen Adsorption in Streams, John D. Parkhurst and Richard D. Pomeroy, 156

Oxygenation; Sanitary engineering; Sulfides; Catalysts; Inhibition
Oxidation of Sulfide by O_2: Catalysis and Inhibition, Kenneth Y. Chen and J. Carrell Morris, 181

Oxygen consumption; Rivers; Sag; Sanitary engineering; Stream pollution; Use rates; Ice cover; Oxygen
Oxygen Depletion in Ice Covered River, Patrick H. Bouthillier, 326

Oxygen content; Plants; Sanitary engineering; Streams; Eutrophication
Variable Respiration in Aquatic Plant Communities, Archie J. McDonnell and Dennis W. Weeter, 348

Oxygen demand; Sanitary engineering; Stochastic processes; Water pollution; Biochemical oxygen demand; Estuaries; Mathematical models
Stochastic Model of BOD and OD in Segmented Estuary, William R. Schofield and Richard G. Krutchkoff, 488

Oxygen transport mechanisms; Plastics; Sanitary engineering; Trickling filters; Biochemical oxygen demand; Biological treatment; Mathematical models
Oxygen Theory in Biological Treatment Plant Design, Dilip S. Mehta, Harry H. Davis and Robert P. Kingsburg, 360

Pakistan; Power; Cofferdams; Construction; Dams (buttress); Dams (earth); Embankments; Hydroelectric power generation; Irrigation
Tarbela Dam Project, Pakistan, Wilson V. Binger, 594

Pallets; Suspension; Transportation; Vehicles; Automation; Electric drives
Pallet Systems for Integrating Urban Transportation, David Gordon Wilson, 212

Panels; Structural engineering; Buildings; Buildings (apartment); Finite elements
Influence of Joints in Panelized Structural Systems, Eric F.P. Burnett and R. Clement S. Rajendra, 465

Paper mills; Permeability; Sanitary engineering; Sludge; Sludge disposal; Ashes; Drainage; Fly ash
Permeability of High Ash Papermill Sludge, Orlando B. Andersland and Robert W. Laza, 576

Parabolas; Spillways; Variations; Curvature; Fluid flow; Hydraulics; Nappe
Flow Over Rounded Spillways, Kamil H.M. Ali, 163

Parabolic bodies; Torque; Arches; Buckling; Fixed structures; Hinged structures
Lateral-Torsion Buckling of Parabolic Arches, Frank J. Tokarz and Raghbir S. Sandhu, 280

Parking areas; Parking facilities; Personnel; Regulations; Safety; Schools; Traffic; Data systems
Management System for Campus Traffic Planning, Michael J. Quillem and Jason C. Yu, 527

Parking areas; Parking facilities; Site selection; Traffic; Transportation; Mathematical models
Location Model for Parking Facilities, Adib K. Kanafani, 54

Parking facilities; Personnel; Regulations; Safety; Schools; Traffic; Data systems; Parking areas
Management System for Campus Traffic Planning, Michael J. Quillem and Jason C. Yu, 527

Parking facilities; Rapid transit railways; Transportation; Automation; Concrete (reinforced)
Novel Features on Lindenwold Line, Richard E. Pinkham, 187

Parking facilities; Site selection; Traffic; Transportation; Mathematical models; Parking areas
Location Model for Parking Facilities, Adib K. Kanafani, 54

Parking facilities; Toll roads; Traffic; Transportation; Urban planning; Economics; Highway engineering
Urban Road Pricing Through Selective Parking Taxes, Robert E. Burns, 440

Parks; Recreational facilities; Reservoir design; Skiing; Ecology; Environmental effects
Civil Engineering for Recreation, Ernst W. Kiesling and George A. Whetstone, 182

Parks; Recreational facilities; Streams; Urban planning; Environmental engineering; Esthetics; Land use
Evaluating Recreational Potential of Small Streams, John A. Dearinger, 478

Parks; Urban planning; Water pollution; Air pollution; Esthetics; Housing; Land use; Noise reduction
Esthetic Considerations in Urban General Planning, Wm. H. Claire, 404

Passenger transportation; Rapid transit railways; Traffic; Transportation; Vehicles; Vehicular traffic; Ground vehicles
Curbside Service Subways, Charles J. Swet, 469

Passenger transportation; Rapid transit railways; Transportation; Vibration; Noise; Noise reduction
Noise and Vibration Control in New Rapid Transit, Marshall L. Silver, 579

Passenger transportation; Retirement; Transportation; Urban transportation; Automobiles; Ethnic groups; Mobility
Transportation and Retirement, Frances M. Carp, 484

Passenger transportation; Routing; Social needs; Transportation; Urban transportation; Buses (vehicles)
Demand Activated Transportation for The Elderly, Charles B. Notess and Robert E. Paaswell, 456

Passenger transportation; Social needs; Transportation; Urban transportation; Chicago; Employment opportunities
Public Transit and Job Access in Chicago, Martin Wachs and Joseph L. Schofer, 170

Passenger transportation; Systems engineering; Transportation; Airports; Air transportation; Electronics
Satellite Transit at Seattle-Tacoma Airport, Ralph Mason, 566

Passenger transportation; Terminal facilities; Traffic; Transportation; Urban transportation; Buses (vehicles)
Location of Bus Stops, Walter H. Kraft and Thomas J. Boardman, 79

Passenger transportation; Terminal facilities (elect); Transportation; Urban planning; Land use
Environmental Factors in Passenger Terminal Design, John J. Fruin, 71

Passenger transportation; Traffic control; Traffic engineering; Buses (vehicles); Bus lines; Highway engineering
Federal Research in Urban Traffic Control, Juri Raus and Philip J. Tarnoff, 434

Pavement bases; Soil mechanics; Soil moisture; Subgrade; Clays; Infiltration
Subgrade Moisture Under Oklahoma Highways, T. Allan Haliburton, Donald R. Snethen, Larry K. Shaw and B. Dan Marks, 114

Pavements; Rigid pavements; Transportation; Aircraft; Air transportation; Construction; Joints (junctions); Keys (splines)
Keyed Joint Performance Under Heavy Loaded Aircraft, John L. Rice, 561

Pavements; Rigid pavements; Transportation; Elastic foundations; Foundations; Highway engineering
Advanced Analysis of Rigid Pavements, Sue K. Wang, Michel Sargious and Yau Kai Cheung, 36

Pavements; Rolling friction; Safety; Tires; Traffic safety; Human behavior
Current Methods For Improved Tire-Pavement Interaction, Bob M. Galloway and Jon A. Epps, 505

Pavements; Safety; Traffic engineering; Drainage; Freeways; Highway engineering; Highways; Maintenance
Current Practices in Highway Maintenance: A Reference List, Committee on Construction, Maintenance and Operation of Highways of the Highway Division., Walter E. Capper, Chmn., 260

Pavements; Shrinkage; Shrinkproofing; Transportation; Cracking; Flexible pavements; Highway engineering
Cracking Mechanism of Flexible Pavements, Jacob Uzan, Moshe Livneh and Elisha Shklarsky, 16

Pavements; Skid resistance; Aggregates; Highways; Limestone
Sprinkle Treatment Increases Highway Skid Resistance, George W. Maupin, Jr., 86

Pavements; Soil mechanics; Strains; Stresses; Subgrades; Transportation; Dynamic loads; Elastic properties; Materials
Dynamic Response of Model Pavement Structure, Stephen F. Brown and David I. Bush, 541

Pavements; Transportation; Bituminous coatings; Concrete (reinforced); Costs; Critical path method; Highways
Rehabilitating Chicago's Expressways, Thomas T. Morimoto, 541

Paving; Planning; Cost estimates; Excavation; Highway engineering; Interstate highway system
Cost Estimating Model for Rural Interstate Highways, John Whitman and Frederick J. Wegmann, 402

Penetration; Projectiles; Sands; Soil mechanics; Bearing capacity; Impact tests
Low Velocity Projectile Penetration, Wen L. Wang, 104

Pennsylvania; Rock mechanics; Shear strength; Slope stability; Soil mechanics; Engineering geology; Landslides
Failure of Colluvial Slope, James V. Hamel and Norman K. Flint, 189

Pennsylvania; Sheet piling; Shipbuilding; Waterways; Docks; Drydocks; Graving docks
1,200-Ft Graving Dock, Frederick E. Krauss and George H. Plude, 605

Penstocks; Physics; Pipelines; Power; Tracers; Turbines; Field tests
Radioisotopes and Turbine Flow Measurement, Jack C. Schuster and Robert L. Hansen, 61

Periodic functions; Resonance; Wave energy; Coastal engineering; Mass; Offshore structures
Resonant Response of Offshore Structures, Lawrence G. Selna and David Cho, 155

Perlite; Reservoirs; Temperature; Wind (meteorology); Drainage
Reducing Pond Evaporation with Perlite Ore, Keith R. Cooley and C. Brent Cluff, 305

Permafrost; Alaska; Embankments; Highways
Alaska Builds Highway Over Muskeg and Permafrost, John C. Becker, 349

Permafrost; Pile foundations; Frost action; Frost heave; Ice lenses
Frost Heaving of Piles in Permafrost, James Allen and Robert W. Huck, 215

Permafrost; Pipelines; Settlement (structural); Soil mechanics; Thawing; Bending stress; Ice
Settlement of Pipeline on Thawing Permafrost, Andrew C. Palmer, 276

Permeability; Aquifers; Drainage; Ground water; Groundwater recharge; Irrigation
Basin Recharge of the Ogallala Aquifer, Vladimir S. Aronovici, Arland D. Schneider and Ordie R. Jones, 104

Permeability; Plastics; Polyurethane resins; Soil mechanics; Foundations; Grouting
Polyurethane Foamed Plastics in Soil Grouting, Ted S. Vinson and James K. Mitchell, 321

Permeability; Sanitary engineering; Sludge; Sludge disposal; Ashes; Drainage; Fly ash; Paper mills
Permeability of High Ash Papermill Sludge, Orlando B. Andersland and Robert W. Laza, 576

Permeability; Seepage; Weirs; Foundations
End Effects in Models for Seepage Below Weirs, S. Muthukumaran and V. C. Kulandaiswamy, 216

Permeability; Stability; Structural stability; Uplift pressure; Foundations; Hydraulics
Boundary Effects on Stability of Structures, A. S. Chawla, 481

Personnel; Regulations; Safety; Schools; Traffic; Data systems; Parking areas; Parking facilities
Management System for Campus Traffic Planning, Michael J. Quillem and Jason C. Yu, 527

Personnel; Technicians; Engineering education; Engineers
The Engineering Technician: An Underutilized Resource, Ronald P. Shumate, 98

Personnel development; Quality control; Tests; Construction; Consulting engineers; Inspection
Summary Report of Questionnaire on Construction Inspection, by the Task Committee on Inspection of the Construction Division, Joseph Goldbloom, Chmn., 524

Personnel management; Salary administration; Budgeting; Consulting engineers; Financial management
Financial Tools for a Consulting Firm, Roy T. Sheehey, 48

Philippine Islands; Sanitary engineering; Sewage treatment; Earthquake resistant structures; Economics; Legislation
Master Sewerage System for Metropolitan Manila, John O. Schmidt, 187

Philippines; Venezuela; Weathering; Abutments; Dams (rockfill); Foundations; Geologic investigations; Grouting; Iraq
Foundation and Abutment Treatment for Rockfill Dams, Richard C. Acker and Jack C. Jones, 494

Philosophy; Reviews; Technology; Animal behavior; Books; Human engineering
Anti-Technology--The New Myth, Samuel C. Florman, 53

Phosphorus compounds; Activated sludge process; Anaerobic digestion; Eutrophication; Iron compounds
Anaerobic Digestion of Sludge Containing Iron Phosphate, Sudershan Malhotra, Thomas P. Parrillo and Alan Gene Hartenstein, 74

Photogrammetric surveys; Photogrammetry; Surveys; Orientation
Explicit Approach to Exterior Orientation, Santosh K. Mahajan, 62

Photogrammetric surveys; Surveys; Aerial surveys; Analytical techniques; Dams (earth); Lakes; Mapping
Survey Design and Procedures, William E. Kreisle, 77

Photogrammetry; Photography; Surveying; Water surface; Optics
Photogrammetry and Hydraulic Surfaces, Wolfgang Faig, 525

Photogrammetry; Probability theory; Random error; Standard deviation; Surveying; Variance (statistics); Weighting functions; Distribution; Focal length
Theoretical Weighting of Photogrammetric Equations, Charles Kendall Paul, 550

Photogrammetry; Remote sensing; Aerial photography; Environmental engineering; Mapping
Photogrammetry Aids Solution of Environment Problems, Alfred O. Quinn, 228

Photogrammetry; Space reconnaissance; Surveying; Television systems; Geodetic surveys; Mapping; Natural resources
Applications of Extraterrestrial Surveying and Mapping, Robert B. McEwen and David A. Tyler, 604

Photogrammetry; Surveying; Accuracy; Algorithms; Computation; Least squares method
Nonlinear Least Squares Algorithm, Mohamed F. Madkour, 572

Photogrammetry; Surveying; Environments; Land ownership; Maps; Maps
The Environment and a Two-Billion Dollar Property, Carl Hammerstrom, 393

Photogrammetry; Surveying; Triangulation; Aerial photography; Computer programs
Computer Program System for Aerotriangulation, Kam W. Wong and G. Elphingstone, 470

Photogrammetry; Surveys; Aerial photography; Coordinates; Linearity
Space Resection from Collinearity Conditions, Kunwar K. Rampal, 92

Photogrammetry; Surveys; Orientation; Photogrammetric surveys
Explicit Approach to Exterior Orientation, Santosh K. Mahajan, 62

Photography; Productivity; Time and motion studies; Construction; Efficiency; Films
Analysis of Time-Lapse Construction Films, Howard B. Sprinkle, 502

Photography; Surveying; Water surface; Optics; Photogrammetry
Photogrammetry and Hydraulic Surfaces, Wolfgang Faig, 525

Phreatophytes; Transpiration; Water consumption; Evaporation; Evapotranspiration; Irrigation
Simulation of Salt Cedar Evapotranspiration, William C. Hughes, 570

Physics; Pipelines; Power; Tracers; Turbines; Field tests; Penstocks
Radioisotopes and Turbine Flow Measurement, Jack C. Schuster and Robert L. Hansen, 61

Piers; Piles (foundations); Settlement (structural); Soil mechanics; Bearing capacity; Bridges (piers); Foundations
Load Settlement Prediction for Piles and Piers, Harry G. Poulos, 439

Piers; Storms; Stresses; Wind bracing; Wooden structures; Coastal engineering; Construction; Design; Foundations; Hurricanes
Wood Structures Can Resist Hurricanes, Gerald E. Sherwood, 417

Pile bearing capacities; Pile foundations; Pile loading tests; Friction piles; Loading tests
Torque Shear Test For Cylindrical Friction Piles, Ulrich W. Stoll, 203

Pile drivers; Pile driving; Construction; Foundations; Hammers; Models
Performance of Pile Driving Hammers, Frank Rausche and George G. Goble, 475

Pile driving; Construction; Foundations; Hammers; Models; Pile drivers
Performance of Pile Driving Hammers, Frank Rausche and George G. Goble, 475

Pile driving; Pile foundations; Breakwaters; Concrete piles; Concrete (prestressed)
Breakwater Built With Concrete Piles, Thomas F. Plodowski, 219

Pile driving; Pile foundations; Pile structures; Soil mechanics; Soil resistivity; Bearing capacity; Foundations
Soil Resistance Predictions from Pile Dynamics, Frank Rausche, Fred Moses and George G. Goble, 481

Pile driving; Pile foundations; Settlement (structural); Soil mechanics; Terzaghi lecture; Dams (earth); Engineering education; Foundations
The Integrated Civil Engineering Project, T. William Lambe, 337

Pile driving; Piles (foundations); Pollution; Transportation; Bridges (structures); Buses (vehicles); Foundations; Geology
First U.S. Center-City People Mover, Debuts in Morgantown, W. Va., Frank E. Lo Presti, 499

Pile driving; Reclamation; Soil mechanics; Subsidence; Fills; Fire protection; Foundations
Industry Builds on a Refuse Dump, Hans J. Pfister, 487

Pile extraction; Piles (foundations); Reclamation; Wisconsin; Docks; Ice; Marinas
Lake Superior Yachting Marinas Resist Ravages of Ice, C. Allen Wortley, 79

Pile foundations; Breakwaters; Concrete piles; Concrete (prestressed); Pile driving
Breakwater Built With Concrete Piles, Thomas F. Plodowski, 219

Pile foundations; Frost action; Frost heave; Ice lenses; Permafrost
Frost Heaving of Piles in Permafrost, James Allen and Robert W. Huck, 215

Pile foundations; Pile groups; Batter piles; Foundations; Lateral forces; Loading
Practical Formulas for Loads and Movements in Battered Pile Foundations (without a computer), Murray I. Brill, 284

Pile foundations; Pile loading tests; Friction piles; Loading tests; Pile bearing capacities
Torque Shear Test For Cylindrical Friction Piles, Ulrich W. Stoll, 203

Pile foundations; Pile structures; Soil mechanics; Soil resistivity; Bearing capacity; Foundations; Pile driving
Soil Resistance Predictions from Pile Dynamics, Frank Rausche, Fred Moses and George G. Goble, 481

Pile foundations; Settlement (structural); Soil mechanics; Terzaghi lecture; Dams (earth); Engineering education; Foundations; Pile driving
The Integrated Civil Engineering Project, T. William Lambe, 337

Pile foundations; Underpinning; Foundations; Grillage footings
Underpinning Massive Structures, Charles E. Mergentime, 123

Pile groups; Batter piles; Foundations; Lateral forces; Loading; Pile foundations
Practical Formulas for Loads and Movements in Battered Pile Foundations (without a computer), Murray I. Brill, 284

Pile lateral loads; Piles (foundations); Soil mechanics; Design; Foundations; Lateral pressure
Behavior of Laterally Loaded Piles: III -- Socketed Piles, Harry G. Poulos, 243

Pile loading tests; Friction piles; Loading tests; Pile bearing capacities; Pile foundations
Torque Shear Test For Cylindrical Friction Piles, Ulrich W. Stoll, 203

Piles (foundations); Pollution; Transportation; Bridges (structures); Buses (vehicles); Foundations; Geology; Pile driving
First U.S. Center-City People Mover, Debuts in Morgantown, W. Va., Frank E. Lo Presti, 499

Piles (foundations); Reclamation; Wisconsin; Docks; Ice; Marinas; Pile extraction
Lake Superior Yachting Marinas Resist Ravages of Ice, C. Allen Wortley, 79

Piles (foundations); Settlement (structural); Soil mechanics; Bearing capacity; Bridges (piers); Foundations; Piers
Load Settlement Prediction for Piles and Piers, Harry G. Poulos, 439

Piles (foundations); Soil mechanics; Design; Foundations; Lateral pressure; Pile lateral loads
Behavior of Laterally Loaded Piles: III -- Socketed Piles, Harry G. Poulos, 243

Pile structures; Soil mechanics; Soil resistivity; Bearing capacity; Foundations; Pile driving; Pile foundations
Soil Resistance Predictions from Pile Dynamics, Frank Rausche, Fred Moses and George G. Goble, 481

Pile structures; Vortices; Wave energy; Waves; Coastal engineering; Drilling; Offshore completion
Laboratory Study of Lift Forces on Circular Piles, Devidas D. Bidde, 60

Pipe cover; Pipelines; Sealants; Waterproofing; Corrosion; Corrosion control
Oil Based Fluid Corrosion-Proofs Gas Line, Buford Mizell, 280

Pipe design; Pipe flow; Polyvinyl chloride; Water distribution; Water hammer; Crushing
Design of PVC Water-Distribution Pipe, Robert T. Hucks, Jr., 298

Pipe flow; Coefficients; Flow resistance; Hydraulics; Laminar flow; Orifices
Orifice Losses for Laminar Approach Flow, Nagar S. Lakshmana Rao and Kalambur Sridharan, 556

Pipe flow; Computers; Culverts; Digital computers; Flow profiles; Hydraulic jump
Digital Computers in Circular Culvert Design, Bobby E. Price and Frank D. Masch, 369

Pipe flow; Fluid flow; Hydraulics; Linear differential equations; Network analysis
Hydraulic Network Analysis Using Linear Theory, Don J. Wood and Carl O.A. Charles, 366

Pipe flow; Pipelines; Pumps; Water hammer; Water pressure; Discharge lines; Hydraulics
Start-up Pressures in Short Pump Discharge Lines, Irving Joseph and Frank A. Hamill, 359

Pipe flow; Pipelines; Valves; Cavitation; Hydraulics
Choking and Supercavitating Valves, J. Paul Tullis, 69

Pipe flow; Polymers; Sanitary engineering; Additives; Drag; Fire fighting; Flow resistance
Drag Reduction Application in Fire Fighting Systems, Hillel Rubin, 149

Pipe flow; Polyvinyl chloride; Water distribution; Water hammer; Crushing; Pipe design
Design of PVC Water-Distribution Pipe, Robert T. Hucks, Jr., 298

Pipe flow; Powerplants; Pumps; Water hammer; Computer programming; Computers; Conduits; Discharge; Hydraulics; Models
Computer Simulation of Waterhammer Effects, George Belonogoff, 323

Pipe flow; Rivers; Sediments; Bed load; Channels; Flumes; Hydraulics
Friction Factors in Solid Material Laden Systems, Ertan R. Acaroglu, 241

Pipe flow; Sanitary engineering; Smoothness; Coefficients; Graphs (charts); Hydraulics; Mannings equation
Manning's Coefficient for Smooth Pipes, Henry Liu, 312

Pipe flow; Sedimentation; Sediment deposits; Two phase flow; Hydraulics
Pipelining of Low-Concentration Sand-Water Mixtures, Millard P. Robinson, Jr. and Walter H. Graf, 381

Pipe flow; Soil mechanics; Tests; Triaxial tests; Bubbles; Hydraulics; Laboratories
Time to Dissolve Air Bubbles in Drain Line, Kenneth L. Lee and David K. Black, 179

Pipe flow; Trickle irrigation; Irrigation
Uniform Irrigation with Low-Pressure Trickle Systems, Lloyd E. Myers and Dale A. Bucks, 436

Pipe flow; Water distribution; Computers; Hydraulic models; Hydraulics
Graph-Theoretic Models for Pipe Network Analysis, H. K. Kesavan and M. Chandrashekar, 167

Pipe flow; Water distribution; Water supply; Algorithms; Computers; Hydraulics
Efficient Algorithm For Distribution Networks, Pierre F. Lemieux, 545

Pipe joints; Pipelines; Slip joints; Steel pipes; Weld defects; Welded pipes; Brittle fracturing
Brittle Fracture of Steel Pipe Analyzed, Robert V. Phillips and Stephen M. Marynick, 345

Pipelines; Canals; Cofferdams; Concrete (reinforced); Culverts; Erosion; Flood control
New Culvert Carries Creek Underneath Canal, Alfred R. Pagan, 440

Pipelines; Pipeline terminals; Pipeline transportation; Planning; Alaska; Conservation; Oils
Engineering the Trans-Alaska Pipeline415

Pipelines; Pipeline transportation; Tension; Ties; Water flow; Failure; Joints (connections)
Considerations of Pipeline Tension Tie Problems, Lloyd C. Fowler, Richard P. Lundahl and Robert W. Purdie, 573

Pipelines; Pipe linings; Protective coatings; Steel pipes; Tunnels; Aqueducts; Conduits; Mortars (material)
Cement Mortar Lining of 20-Ft Diameter Steel Pipe, James E. Wolfe, 462

Pipelines; Planning; Railroads; Regional planning; Terminal facilities; Transmission lines; Urban planning; Urban transportation; Waterways (transportation); Freight terminals; Investments; Land use
Restructuring Freight Transportation in Chicago, James Robert Blaze, 353

Pipelines; Power; Pressure tunnels; Tunnels; Velocity; Water; Water flow; Canals; Construction; Financing; Fluid flow; Hydraulic radius; Linings
Aqueducts for the Least Cost Conveyance of Water, Nephi A. Christensen, 46

Pipelines; Power; Tracers; Turbines; Field tests; Penstocks; Physics
Radioisotopes and Turbine Flow Measurement, Jack C. Schuster and Robert L. Hansen, 61

Pipelines; Pumps; Water hammer; Water pressure; Discharge lines; Hydraulics; Pipe flow
Start-up Pressures in Short Pump Discharge Lines, Irving Joseph and Frank A. Hamill, 359

Pipelines; Regional planning; Right-of-way; Right of way acquisition; Transmission towers; Alignment; Highways; Land use
Joint Utilization of Rights-of-Way, Francis J. Stastny, 130

Pipelines; Resonance; Characteristics; Frequency; Hydraulics; Matrices (mathematics)
Resonance in Pipes Having Variable Characteristics, M. Hanif Chaudry, 159

Pipelines; Safety; Standards; Transportation; Utilities; Government
The State's Role in Gas Safety, Harold E. Shutt, 46

Pipelines; Sealants; Waterproofing; Corrosion; Corrosion control; Pipe cover
Oil Based Fluid Corrosion-Proofs Gas Line, Buford Mizell, 280

Pipelines; Settlement (structural); Soil mechanics; Thawing; Bending stress; Ice; Permafrost
Settlement of Pipeline on Thawing Permafrost, Andrew C. Palmer, 276

Pipelines; Slip joints; Steel pipes; Weld defects; Welded pipes; Brittle fracturing; Pipe joints
Brittle Fracture of Steel Pipe Analyzed, Robert V. Phillips and Stephen M. Marynick, 345

Pipelines; Valves; Cavitation; Hydraulics; Pipe flow
Choking and Supercavitating Valves, J. Paul Tullis, 69

Pipelines; Water hammer; Cavitation; Hydraulics
Cavitation in Horizontal Pipelines Due to Water Hammer, J. P. Th. Kalkwijk and C. Kranenburg, 32

Pipeline terminals; Pipeline transportation; Planning; Alaska; Conservation; Oils; Pipelines
Engineering the Trans-Alaska Pipeline415

Pipeline transportation; Pipes; Reactions (mechanics); Structural analysis; Bending; Deformation; Loads (forces)
Systematic Stress Analysis of Circular Pipe, Junkichi Katoh, 584

Pipeline transportation; Planning; Alaska; Conservation; Oils; Pipelines; Pipeline terminals
Engineering the Trans-Alaska Pipeline415

Pipeline transportation; Tension; Ties; Water flow; Failure; Joints (connections); Pipelines
Considerations of Pipeline Tension Tie Problems, Lloyd C. Fowler, Richard P. Lundahl and Robert W. Purdie, 573

Pipe linings; Protective coatings; Steel pipes; Tunnels; Aqueducts; Conduits; Mortars (material); Pipelines
Cement Mortar Lining of 20-Ft Diameter Steel Pipe, James E. Wolfe, 462

Pipes; Polyethylene; Sanitary engineering; Sewage treatment plants
Polyethylene Pipe Used For 36-in. Sewage Outfall455

Pipes; Reactions (mechanics); Structural analysis; Bending; Deformation; Loads (forces); Pipeline transportation
Systematic Stress Analysis of Circular Pipe, Junkichi Katoh, 584

Placement; Reinforcement; Slabs; Walls; Beams (supports); Columns (supports); Compaction; Concrete; Consolidation; Distribution; Mass concrete
Pertinent Techniques for Compacting Concrete, Shu-t'ien Li and Donald A. Stewart, 429

Plane structures; Plastic analysis; Strength; Structural engineering; Deformation; Elasto-plastic; Frames
Deformation Analysis of Elastic - Plastic Frames, Donald E. Grierson, 499

Planning; Alaska; Conservation; Oils; Pipelines; Pipeline terminals; Pipeline transportation
Engineering the Trans-Alaska Pipeline415

Planning; Civil engineering; Civil engineers; Economics; Education; Engineering education; Ethics
The Education of an Engineer (A Continuing Story), James E. Crews and Charles C. McCloskey, III, 544

Planning; Construction; Construction equipment; Construction materials; Construction methods; Construction planning; Contracting; Foreign engineering; Management; Manpower
Construction Planning in South East Asia, Omar E. Rood and John L. Richards, 585

Planning; Cost estimates; Excavation; Highway engineering; Interstate highway system; Paving
Cost Estimating Model for Rural Interstate Highways, John Whitman and Frederick J. Wegmann, 402

Planning; Pollution; Sanitary engineering; Conservation; Environmental effects; Environmental engineering; Esthetics; Land use; Matrices (mathematics); National historic sites
Environmental Assessment of Resource Development, Kenneth D. Kerri, 282

Planning; Population growth; Design; Environmental engineering; Forecasting; Mathematical models
Stochastic Population Projection at Design Level, Peter M. Meier, 557

Planning; Problem solving; Social needs; Urban development; Urban planning; Community relations
Goals for Dallas Program, Erik Jonsson, 394

Planning; Professional activities; Benefit cost analysis; Budget estimates; Investment
Budget Constraints and Multiobjective Planning, Arthur Maass and David C. Major, 463

Planning; Projects; Social needs; Civil engineering; Design; Engineering
Ethical and Social Responsibility in the Planning and Design of Engineering Projects, David Mann, 107

Planning; Projects; Surveying; Surveys; Civil engineering; Engineering; Management
Project Planning, John M. Shields, 202

Planning; Publicity; Public opinion; Water resources; Community relations; Decision making; Decisions
Fishbowl Planning Immerses Pacific Northwest Citizens in Corps Projects, Howard L. Sargent, 389

Planning; Railroads; Regional planning; Terminal facilities; Transmission lines; Urban planning; Urban transportation; Waterways (transportation); Freight terminals; Investments; Land use; Pipelines
Restructuring Freight Transportation in Chicago, James Robert Blaze, 353

Planning; Regional planning; Regression analysis; Sanitary engineering; Solid wastes; Statistical analysis; Costs
Cost of Residential Solid Waste Collection, Robert M. Clark, Betty L. Grupenhoff, George A. Garland and Albert J. Klee, 34

Planning; Regional planning; Systems engineering; Water resources; Hydraulics
Use of Systems Analysis in Water Resources Planning, William K. Johnson, 446

Planning; Research; Fluid mechanics; Hydraulics
Research and Planning in Fluid Mechanics, Stephen J. Kline, 281

Planning; Resource allocation; Scheduling; Computers; Construction; Critical path method; Management; Networks
Man-Computer Concepts for Planning and Scheduling, Boyd C. Paulson, Jr., 546

Planning; Sanitary engineering; Buildings (commercial); Field tests; Forecasting; Municipal engineering
Empirical Analysis of Commercial Solid Waste Generation, Truett V. DeGeare and Jerry E. Ongerth, 112

Planning; Sanitary engineering; Ecology; Environmental effects; Management planning; Natural resources
Environmental Planning and Ecological Possibilities, David A. Bella and W. Scott Overton, 422

Planning; Sanitary engineering; Water quality; Ecology; Environmental engineering; Institutional constraints
Clean Water -- An Environmental Challenge, Percy H. McGauhey, 290

Planning; Site selection; Systems engineering; Benefit-cost ratios; Esthetics
Inclusion of Social Values in Facility Location Planning, David Morris, 167

Planning; Standards; Training; Construction industry; Engineering education; Engineers; Foreign engineering; Great Britain; Management; Metric system
Metrication Progress in the United Kingdom, Gordon Bowen, 523

Planning; Structural engineering; Systems engineering; Urban planning; Architecture; Buildings; Environmental engineering
Tall Buildings--A Technological Assessment, Thomas C. Kavanagh, 54

Planning; Surveying instruments; Surveys; Colorado; Construction; Dams (earth)
Planning Concrete Dam Construction Control Surveys, Maynard J. Willis, 255

Planning; Traffic surveys; Transit systems; Transportation; Accessibility; Mathematical models
Analytical Estimation of Transit Access Impedances, Paul R. Rassam and Raymond H. Ellis, 154

Planning; Traffic surveys; Transportation; Measurement
Integrated Measurement Framework for Transportation Planning, George C. Wickstrom, 241

Planning; Urban planning; Bibliographies; Engineering education; History
City Planning Bibliography, George C. Bestor and Holway R. Jones, 266

Plants; Productivity; Sanitary engineering; Sea grasses; Benthic flora; Estuaries; Nutrition
Role Of Benthic Plants in Fertilized Estuary, Thomas D. Waite and Ralph Mitchell, 482

Plants; Sanitary engineering; Streams; Eutrophication; Oxygen content
Variable Respiration in Aquatic Plant Communities, Archie J. McDonnell and Dennis W. Weeter, 348

Plastic analysis; Cyclic loads; Engineering mechanics; Minimum weight design; Optimum design
Unified Approach to the Theory of Plastic Structures, M. A. Cohn, S. K. Ghosh and S. R. Parimi, 466

Plastic analysis; Plasticity; Plates (structural members); Yield; Engineering mechanics; Limit design method
Plastic Analysis of Anisotropic Disks and Plates, Archibald N. Sherbourne and Sridhara D.N. Murthy, 59

Plastic analysis; Strength; Structural engineering; Deformation; Elasto-plastic; Frames; Plane structures
Deformation Analysis of Elastic - Plastic Frames, Donald E. Grierson, 499

Plastic design; Elastic analysis; Engineering mechanics; Grillage footings; Minimum weight design; Optimum design
Rectangular Grillages of Least Weight, George I.N. Rozvany and Sai R. Adidam, 538

Plastic design; Skyscrapers; Structural engineering; Buildings; Computer programs; Frames
Storywise Plastic Design for Multistory Steel Frames, Leroy Z. Emkin and William A. Litle, 139

Plasticity; Blast loads; Dynamic loads; Dynamics; Engineering mechanics
Dynamic Response of Nonlinear Media at Large Strains, Joseph H. Heifitz and Carl J. Costantino, 603

Plasticity; Columns (supports); Dynamic characteristics; Dynamic structural analysis; Earthquake theory; Engineering mechanics
Finite Earthquake-Response of Inelastic Structure, Chi-Mou Ni and Lawrence H.N. Lee, 549

Plasticity; Composite materials; Engineering mechanics; Failure; Fiber composites
Yielding of Fiber Reinforced Tresca Material, John D. Helfinstine and Richard H. Lance, 389

Plasticity; Plates (structural members); Yield; Engineering mechanics; Limit design method; Plastic analysis
Plastic Analysis of Anisotropic Disks and Plates, Archibald N. Sherbourne and Sridhara D.N. Murthy, 59

Plasticity; Quadratic equations; Stresses; Computer programming; Engineering mechanics; Equations; Frames
Elastic-Plastic Analysis by Quadratic Programming, Antone F. Sayegh and Moshe F. Rubinstein, 564

Plasticity; Shells (structural forms); Concrete (reinforced); Cylindrical shells; Elastic properties; Engineering mechanics; Numerical analysis
Elastic-Plastic Analysis of Cylindrical Shells, Nabil A. Shoeb and William C. Schnobrich, 96

Plasticity; Stability; Structural engineering; Beam columns; Bending
Simple Interaction Equations for Beam-Columns, Wai F. Chen and Toshio Atsuta, 326

Plasticity; Steels; Structural engineering; Subassemblies; Buildings; Frames
Plastic Subassemblage Analysis for Unbraced Frames, J. Hartley Daniels and Le-Wu Lu, 409

Plasticity; Structural engineering; Buildings (codes); Computers; Design; Dynamics; Earthquake resistant structures; Earthquakes; Loads (forces)
Earthquake Resistant Design of Unbraced Frames, James C. Anderson and Raj P. Gupta, 540

Plasticity; Structural engineering; Tall buildings; Computers; Limit design method; Moment distribution
Optimum Plastic Design of Steel Frames, Bogdan O. Kuzmanovic and Nicholas Willems, 423

Plastic properties; Shells (structural forms); Spherical shells; Buckling; Elastic properties; Engineering mechanics
Symmetric Buckling of Inelastic Spherical Shells, Robert K. Emerton and Nicholas F. Morris, 586

Plastics; Polyurethane resins; Soil mechanics; Foundations; Grouting; Permeability
Polyurethane Foamed Plastics in Soil Grouting, Ted S. Vinson and James K. Mitchell, 321

Plastics; Radioactivity; Refuse disposal; Sanitary engineering; Industrial wastes; Irradiation
Use of Irradiation in Plastic Wastes Disposal, Masaru Tanaka and Tsuyoshi Mifune, 414

Plastics; Sanitary engineering; Trickling filters; Biochemical oxygen demand; Biological treatment; Mathematical models; Oxygen transport mechanisms
Oxygen Theory in Biological Treatment Plant Design, Dilip S. Mehta, Harry H. Davis and Robert P. Kingsburg, 360

Plastics; Strains; Stresses; Structural engineering; Bridges (box girder); Bridges (orthotropic)
Bending and Torsion in Orthotropic Deck Box Girder, Michael S. Troitsky and Abdul K. Azad, 427

Plastics; Structural engineering; Bridges (structures); Construction materials
Why Not Plastics Bridges?, Fred C. McCormick, 399

Plastic theory; Steel structures; Strain hardening; Structural engineering; Cyclic loads
Shakedown of Strain-Hardening Structures, John D. Meyer and Kurt H. Gerstle, 106

Plates; Elasticity (mechanical); Engineering mechanics; Foundations
Viscoelastic Plate on Poroelastic Foundation, Eugene L. Marvin, 395

Plates; Runge-Kutta method; Stiffness methods; Structural engineering; Beams (supports)
Nonlinear Beam and Plate Elements, Jimmy H. Smith, 158

Plates; Sandwich laminates; Vibration; Engineering mechanics; Finite elements; Natural frequency
Triangular Element for Multilayer Sandwich Plates, Tara P. Khatua and Yau Kai Cheung, 443

Plates; Shear; Bending; Deformation; Engineering mechanics; Finite elements
Some Elements for Analysis of Plate Bending, Robert D. Cook, 590

Plates; Shells (structural forms); Slabs; Stiffness; Structural engineering; Concrete (reinforced)
Stiffness of Reinforced Concrete Plates, Alex E. Cardenas, Rolf J. Lenschow and Mete A. Sozen, 566

Plates; Stability; Structural engineering; Buckling
Post-Buckling of Geometrically Imperfect Plates, Ralph G. Dawson and Alastair C. Walker, 67

Plates; Stochastic processes; Boundary value problems; Monte Carlo method; Ocean waves
Analysis of Floating Plate Under Ocean Waves, Yi-Kwei Wen and Masanobu Shinozuka, 317

Plates; Stresses; Deflection; Elastic foundations; Engineering mechanics
Stresses in Circular Plates on Elastic Foundations, Richard Bolton, 297

Plates; Structural engineering; Deflection
Analysis of Space Truss as Equivalent Plate, William R. Flower and Lewis C. Schmidt, 38

Plates; Structural engineering; Torsion; Bridges (girder); Bridges (structures); Buckling; Deflection; Design
Some Design Problems of Large Box Girder Bridges, Bogdan O. Kuzmanovic, 439

Plates; Structural engineering; Ultimate strength; Axial compression; Buckling; Forecasting; Loads (forces)
Strength Predictions of Plates in Uniaxial Compression, Robert M. Korol and Archibald N. Sherbourne, 444

Plates (structural members); Sandwich panels; Boundary conditions; Engineering mechanics; Finite elements
Finite Element Method for Elastic Plastic Plates, Ted Belytschko and Milan Velebit, 103

Plates (structural members); Shear strength; Structural engineering; Tests; Columns (supports); Continuous beams
Shear Strength of Continuous Plates, M. Daniel Vanderbilt, 237

Plates (structural members); Shells (structural forms); Elastic properties; Engineering mechanics; Finite elements; Matrices (mathematics)
Generalization of Plate Finite Elements to Shells, Robert G. Vos, 223

Plates (structural members); Stresses; Deflection; Design; Engineering mechanics; Epoxy resins; Loads (forces); Orthotropic plate
Large Deflection of Rectangular Orthotropic Plates, Chuen-Yuan Chia, 514

Plates (structural members); Structural engineering; Bridge decks; Bridges (orthotropic); Bridges (structures); Floors; Fourier series
Rapid Design of Orthotropic Floor Beams, Peter G. Perry and Conrad P. Heins, Jr., 526

Plates (structural members); Structural engineering; Computation; Concrete structures; Elastic properties
Column-Plate Interaction in Flat Slab Structures, Dieter D. Pfaffinger, 134

Plates (structural members); Structural engineering; Deflection; Finite difference theory
Large Deflections of Curved Plates, Henry W.L. Lee and Conrad P. Heins, Jr., 1

Plates (structural members); Structural engineering; Fourier analysis; Moment distribution
Iterative Method for Solving Rectangular Plates, B. Sen, S. Sengupta and T. K. Nath, 113

Plates (structural members); Yield; Engineering mechanics; Limit design method; Plastic analysis; Plasticity
Plastic Analysis of Anisotropic Disks and Plates, Archibald N. Sherbourne and Sridhara D.N. Murthy, 59

Plumes; Power; Mathematical models; Mixing
Computer Model for Thermal Plume, Robert E. Barry and David P. Hoffman, 286

Point set topology; Polygons; Bars; Engineering mechanics
Torsion of Bars of Regular Polygonal Cross Section, Enrique Romanelli, Mario J. Maurizi and Patricio A. Laura, 191

Poland; Sanitary engineering; Sewage; Water supply; Construction costs
Construction Costs of Water Supply and Sewage Networks in Poland 1961-1970, Miroslaw Gorczyca, 580

Poles (supports); Structural engineering; Concrete (precast); Concrete (prestressed); Cost analysis; Design
Optimal Design of Prestressed Concrete Poles, Manhar C. Thakkar and Bakul S. Bulsari, 77

Political aspects; Pollution; Professional activities; Social change; Civil engineering; Environmental engineering
Pollution, Politics and Protest, Charles L. Gould, 39

Political aspects; Social aspects; Social needs; Civil engineering; Civil engineers
Are Civil Engineers Socially Responsible?, David Crump, 35

Pollution; Population growth; Social needs; Ecology; Environmental effects
The Engineer and the Environment, C. Maxwell Stanley, 352

Pollution; Professional activities; Social change; Civil engineering; Environmental engineering; Political aspects
Pollution, Politics and Protest, Charles L. Gould, 39

Pollution; Rivers; Sea water; Water pollution; Booms (equipment); Containment; Oily water
Dynamics of Contained Oil Slicks, David L. Wilkinson, 324

Pollution; Rivers; Streams; Thermoelectric power generation; Heated water; Hydraulic models; Hydraulics; Jets
Surface Jet Model for Heated Discharges, Louis H. Motz and Barry A. Benedict, 136

Pollution; Runoff; Rural areas; Sanitary engineering; Agricultural wastes; Erosion; Nutrients
Agricultural Runoff-Characteristics and Control, Raymond C. Loehr, 520

Pollution; Sanitary engineering; Conservation; Environmental effects; Environmental engineering; Esthetics; Land use; Matrices (mathematics); National historic sites; Planning
Environmental Assessment of Resource Development, Kenneth D. Kerri, 282

Pollution; Sanitary engineering; Settling basins; Sewage disposal; Tanks (containers); Trickling filters; Bacteria; Chlorine; Detention reservoirs; Filtration; Hydraulics
Chlorine Disinfection in Final Settling Basins, Darrell W. Monroe and Donald C. Phillips, 296

Pollution; Transportation; Bridges (structures); Buses (vehicles); Foundations; Geology; Pile driving; Piles (foundations)
First U.S. Center-City People Mover, Debuts in Morgantown, W. Va., Frank E. Lo Presti, 499

Pollution abatement; Sewage treatment; Waste treatment; Missouri; Outfall sewers
St. Louis Cleans up the Mississippi259

Pollution abatement; Shell structures; Water vapor; Cooling towers; Electric power generation; Hyperbolic parabolic shells
Wet-Type Hyperbolic Cooling Towers, Paul Rogers, 262

Pollution control; Professional activities; Social aspects; Social needs; Civil engineering; Ecology; Environmental engineering
Ecology - Rage and Reason, Robert Moses, 474

Pollution control; Professional activities; Water pollution control; Environmental engineering; Environments; Federal agencies; Organizations
Federal Reorganization to Protect the Environment, John F. Wall and Leonard B. Dworsky, 289

Pollution control; Regional planning; Sanitary engineering; Sewerage; Water quality; Land use; Management
Basin Management Techniques for Sewerage Agencies, Charles V. Gibbs and Allan L. Poole, 375

Pollution control; Sanitary engineering; Sewage; Sludge; Sludge disposal; Strip mining
Chicago Reclaiming Strip Mines With Sewage Sludge427

Pollution control; Sanitary engineering; Sewage; Water quality; Biochemical oxygen demand; Concrete (reinforced); Hydrology
In-Line Structure Stores and Treats Combined Overflows, Theodore G. Biehl and David M. Waring, 398

Pollution control; Sanitary engineering; State governments; Water management (applied); Water pollution; Environmental engineering; Maryland
Statewide Management-What Does the Future Hold?, Frank A. Butrico and James B. Coulter, 244

Pollution control; Sanitary engineering; Waste stabilization ponds; Waste treatment; Algae; Chlorination; Coliform bacteria; Disinfection; Kinetics
Kinetics of Chlorine Disinfection in an Ecosystem, Leonard W. Hom, 231

Polyethylene; Sanitary engineering; Sewage treatment plants; Pipes
Polyethylene Pipe Used For 36-in. Sewage Outfall455

Polygons; Bars; Engineering mechanics; Point set topology
Torsion of Bars of Regular Polygonal Cross Section, Enrique Romanelli, Mario J. Maurizi and Patricio A. Laura, 191

Polymers; Sanitary engineering; Additives; Drag; Fire fighting; Flow resistance; Pipe flow
Drag Reduction Application in Fire Fighting Systems, Hillel Rubin, 149

Polyurethane resins; Soil mechanics; Foundations; Grouting; Permeability; Plastics
Polyurethane Foamed Plastics in Soil Grouting, Ted S. Vinson and James K. Mitchell, 321

Polyvinyl chloride; Rigid pavements; Synthetic rubber; Joints (connections); Joint sealers
Pavement Joint Seals, Kneeland A. Godfrey, Jr., 127

Polyvinyl chloride; Water distribution; Water hammer; Crushing; Pipe design; Pipe flow
Design of PVC Water-Distribution Pipe, Robert T. Hucks, Jr., 298

Population; Regulations; Sanitary engineering; Streams; Agriculture; Aquatic plants; Industrial wastes; Land use
Water Pollution - Facts and Fantasies, John M. Henderson, 390

Population; Statistical analysis; Statistical distributions; Transportation management; Forecasting; Land use
Statistical Decision in Forecasting Planning Data, Kumares C. Sinha, 547

Population growth; Design; Environmental engineering; Forecasting; Mathematical models; Planning
Stochastic Population Projection at Design Level, Peter M. Meier, 557

Population growth; Social needs; Ecology; Environmental effects; Pollution
The Engineer and the Environment, C. Maxwell Stanley, 352

Population growth; Social needs; Urban development; Urban transportation; Water reuse; Water supply
The Urban Growth Syndrome, William H. Wisely, 358

Pore water pressure; Soil mechanics; Consolidation; Drainage; Drains
Consolidation of Clay Layer in Two Dimensions, Sivajogi D. Koppula and Norbert R. Morgenstern, 168

Pore water pressure; Soil mechanics; Time dependence; Underwater construction; Bearing capacity; Deformation; Earth pressure; Ocean engineering
Breakout Resistance of Objects Embedded in Ocean Bottom, Aleksandar Sedmak Vesic, 19

Porous materials; Turbulence; Turbulent flow; Boundary shear; Engineering mechanics; Measuring instruments
Turbulent Shear Flow in Porous Boundary, James F. Ruff and Lynn W. Gelhar, 404

Porous media; Clay soils; Drainage; Groundwater flow
Drainage in Soils with Initial Gradient, Arun J. Valsangkar and Kanakatti Subramanya, 383

Porous media flow; Wave propagation; Dynamics; Engineering mechanics; Finite elements
Variational Formulation of Dynamics of Fluid-Saturated Porous Elastic Solids, Jamshid Ghaboussi and Edward L. Wilson, 425

Potable water; Sewage; Sewage effluents; Sewage filtration; Water treatment; Water treatment plants
Windhoek Reclaiming Sewage for Drinking Water, A. J. Clayton and P. J. Pybus, 430

Power; Cofferdams; Construction; Dams (buttress); Dams (earth); Embankments; Hydroelectric power generation; Irrigation; Pakistan
Tarbela Dam Project, Pakistan, Wilson V. Binger, 594

Power; Mathematical models; Mixing; Plumes
Computer Model for Thermal Plume, Robert E. Barry and David P. Hoffman, 286

Power; Power lines; Railroads; Transmission lines; Blasting; Costs; Excavation; Foundations; Installation
Powerline Foundations Installed along Railroad Tracks, Roger S. Chapman, 462

Power; Powerplants; Pumped storage; Tidal energy; Tidal power generation; Dams; Estuaries
Integration Of Pumped-Storage With Tidal Power, Thomas L. Shaw and Geoffrey R. Thorpe, 29

Power; Powerplants; Regional planning; Site selection; Statistical analysis; Impact prediction; Land use
New Approach to Power Plant Siting, James D. Calvert and William L. Heilman, 201

Power; Pressure tunnels; Tunnels; Velocity; Water; Water flow; Canals; Construction; Financing; Fluid flow; Hydraulic radius; Linings; Pipelines
Aqueducts for the Least Cost Conveyance of Water, Nephi A. Christensen, 46

Power; Research; Steels; Structural engineering; Buckling; Chimneys; Design; Liner plates; Loads (forces)
Design of Steel Chimney Liners, Max Zar, Shih-Lung Chu and James M. Doyle, 500

Power; River flow; Sedimentation; Dredging; Harbors; Hydroelectric power generation
Sedimentation Effects of Hydroelectric Development, Jack F. Rasmussen, 469

Power; Rivers; Sediments; Sediment transport; Statistical analysis; Concentration; Hydraulics
Unit Stream Power and Sediment Transport, Chih Ted Yang, 519

Power; Salt; Temperature; Turbulence; Velocity; Hot film anemometers; Laboratory tests; Mixing
Velocity and Temperature in Buoyant Jet, Richard Dornhelm, Manuel Nouel and Robert L. Wiegel, 148

Power; Seismic properties; Soil-structure interaction; Foundations; Mathematical models; Nuclear power plants; Nuclear reactors
Interaction of Soil and Power Plants in Earthquakes, Jeremy Isenberg and Samy A. Adham, 419

Power; Shear strength; Bearing values; Compaction tests; Consolidation; Embankments; Field density; Fly ash
Fly Ash as Structural Fill, Anthony M. DiGioia and William L. Nuzzo, 175

Power; Thermal pollution; Water conservation; Air cooling; Cooling systems; Cooling towers; Electric power generation
Dry-Type Cooling Towers, Edward A. Cecil, Paul R. Cunningham, Clarence J. Steiert and Roger O. Young, 92

Power; Thermal powerplants; Cooling towers; Dynamics; Finite element method; Nonlinear systems
Nonlinear Dynamic Analysis of Cooling Tower, Chang-hua Yeh, 228

Power; Tracers; Turbines; Field tests; Penstocks; Physics; Pipelines
Radioisotopes and Turbine Flow Measurement, Jack C. Schuster and Robert L. Hansen, 61

Power lines; Railroads; Transmission lines; Blasting; Costs; Excavation; Foundations; Installation; Power
Powerline Foundations Installed along Railroad Tracks, Roger S. Chapman, 462

Power lines; Structural engineering; Towers; Transmission lines; Wind (meteorology); Buildings (codes); Cables; Design criteria; Loading
Wind Recommendations for Transmission Towers, Gene M. Wilhoite, 142

Powerplants; Concrete (reinforced); Cooling towers; Cooling water; Heat exchangers
Dry-Type Hyberbolic Cooling Tower, Paul Rogers and Laszlo Heller, 452

Powerplants; Pumped storage; Tidal energy; Tidal power generation; Dams; Estuaries; Power
Integration Of Pumped-Storage With Tidal Power, Thomas L. Shaw and Geoffrey R. Thorpe, 29

Powerplants; Pumped storage; Tidal power generation; Tidal power plants; Nuclear power plants
Tidal Energy from the Bay of Fundy, Thomas L. Shaw and J. van den Heuvel, 531

Powerplants; Pumped storage; Turbines; Conservation; Costs; Dams (concrete); Dams (gravity); Economics; Environmental engineering; Hydroelectric power generation; Models
Wallace Dam, Major H. Thompson, Jr., 550

Powerplants; Pump intakes; Pumps; Thermoelectric power generation; Water hammer; Cooling systems; Cooling water
Circulating Water Systems Without Valves, Rudolf J. Wahanik, 571

Powerplants; Pumps; Water hammer; Computer programming; Computers; Conduits; Discharge; Hydraulics; Models; Pipe flow
Computer Simulation of Waterhammer Effects, George Belonogoff, 323

Powerplants; Regional planning; Site selection; Statistical analysis; Impact prediction; Land use; Power
New Approach to Power Plant Siting, James D. Calvert and William L. Heilman, 201

Powerplants; Sanitary engineering; Solid wastes; Waste disposal; Environmental engineering
St. Louis Powerplant Burns City Refuse, F. E. Wisely, G. Wayne Sutterfield and David L. Klumb, 518

Powerplants; Sanitary engineering; Temperature; Thermal shock; Water pollution; Bioassay; Estuaries; Fishkill; Nuclear electric power generation
Parameters Necessary for Analyzing Thermal Bioassays, Robert D. Smith, 569

Powerplants; Shells (structural forms); Structural engineering; Wind (meteorology); Analysis; Concrete (reinforced); Cooling towers; Design; Earthquakes; Loads (forces); Moments
Analysis and Design of Hyperbolic Cooling Towers, German Gurfinkel and Adolf Walser, 340

Powerplants; Soil mechanics; Solid wastes; Aggregates; Ashes; Materials
Bottom Ash: An Engineering Material, Roger K. Seals, Lyle K. Moulton and Byron E. Ruth, 224

Powerplants; Stream flow; Temperature; Density stratification; Hydraulics
Cooling Water Density Wedges in Streams, Edward M. Polk, Jr., Barry A. Benedict and Frank L. Parker, 37

Powerplants; Thermoelectric power generation; Utilities; Waste disposal; Cooling systems; Cooling towers; Nuclear electric power generation
Power Plant Cooling Systems, George Kinsman, 364

Powerplants; Tidal power plants; Dams; Electric networks; Estuaries; Hydroelectric power
Pumped Storage and Tidal Power in Energy Systems, Charles K. Haswell, Stephen W. Huntington, Thomas L. Shaw, Geoffrey R. Thorpe and Ian J. Westwood, 603

Power reactors (nuclear); Dams; Environmental effects; Highways
Environmental Litigation: Lessons From the Courts, William K. Johnson, 31

Power spectra; Shock; Vibration; Earthquakes; Engineering mechanics
An Approach to Time-Varying Spectral Analysis, Shih-Chi Liu, 126

Power supplies; Site selection; Electric power generation; Environmental engineering; Environments
Logical Approaches to Power Supply and Environment, Riley D. Woodson, 525

Precipitation (atmospheric); Water resources; Water users; Connecticut; Costs; Drainage
Potential of Precipitation Modification, Eugene J. Aubert, Gurbachan P. Malhotra and D. B. Spiegler, 212

Precipitation gages; Weather modification; Cloud seeding; Hydraulics; Hydrometeorology
Colorado Pilot Project: Design Hydrometeorology, Patrick A. Hurley, 291

Precipitation (meteorology); Runoff; Watersheds; Discharge; Drainage; Evaporation; Hydraulics
A Model to Predict Mean Annual Watershed Discharge, Steven I. Majtenyi, 373

Predictions; Quarrying; Blasting; Construction; Environments; Excavation; Explosives
Rapid Excavation With Explosives, Richard H. Groves and Robert L. LaFrenz, 380

Predictions; Statistical tests; Temperature; Water quality; Algorithms; Coefficients; Evaporation; Mathematical models
Stream Temperature Prediction Under Reduced Flow, William L. Morse, 332

Prefabrication; Reinforcement; Steels; Traffic control; Tunnels; Underwater construction; Vehicular tunnels; Cofferdams; Fabrication
Submerged-Tube Tunnel in Mobile, Ray R. Slocum, 368

Prefabrication; Slabs; Tendons; Transportation; Bridges (structures); City planning; Concrete (post-tensioned); Concrete (precast); Foundations; Highways
Prefabricated Highways, William Zuk, 204

Prefabrication; Structural engineering; Bridge decks; Bridges (box girder); Bridges (cable-stayed); Bridges (piers); Bridges (structures); Bridges (suspension); Concrete (prestressed)
Denmark's Lillebaelt Suspension Bridge, Christen Ostenfeld, 526

Pressure; Shells (structural forms); Vibration; Cooling towers; Engineering mechanics; Finite elements; Hyperbolic parabolic shells
Vibrations of Pressure Loaded Hyperboloidal Shells, Mehran Lashkari, Victor I. Weingarten and David S. Margolias, 431

Pressure; Surveying; Tidal effects; Tides; Elevation; Granular materials; Mapping
Elevation Changes Due to Tides, Long Beach, Calif., Dale S. Kunitomi, 445

Pressure gages; Research; Structural engineering; Trenches; Buried structures; Culverts; Field tests
Concrete Arch Culvert Behavior-Phase 2, Raymond Eugene Davis and Alfred E. Bacher, 521

Pressure gradients; Turbulence; Wind pressure; Boundary layer; Buildings; Engineering mechanics
Turbulence Effect on Wall Pressure Fluctuations, Willy Z. Sadeh and Jack E. Cermak, 579

Pressure head; Water pressure; Flow control; Fluid flow; Gates; Hydraulics
Reattaching Flow Downstream of Leaf Gate, Rangaswami Narayanan and Alan J. Reynolds, 301

Pressure pipes; Transient flow; Unsteady flow; Water tunnels (conveyance); Computers; Hydraulics; Open channel flow
Transient Flow in Free-Surface, Pressurized Systems, David C. Wiggert, 87

Pressure tunnels; Tunnels; Velocity; Water; Water flow; Canals; Construction; Financing; Fluid flow; Hydraulic radius; Linings; Pipelines; Power
Aqueducts for the Least Cost Conveyance of Water, Nephi A. Christensen, 46

Pressurized cabins; Structural engineering; Hyperbaric medicine; Hyperbaric oxygenation; Materials stability
Material Safety Requirements of Hyperbaric Facilities, William J. Bobisch and Michael Yachnis, 322

Prestressing; Roofs; Stiffness methods; Structural engineering; Cables (ropes); Computation; Finite elements
Large Deflection Analysis of Prestressed Networks, John H. Argyris and Dieter W. Scharpf, 185

Probability distribution functions; River flow; Construction methods; Data acquisition; Hydraulics; Mathematical models
Stochastic Five Daily Stream Flow Model, Nath T. Kottegoda, 438

Probability theory; Concrete; Concrete properties; Engineering mechanics; Finite element method; Mathematical models
Probabilistic Modeling of Concrete Structures, Masanobu Shinozuka, 598

Probability theory; Random error; Standard deviation; Surveying; Variance (statistics); Weighting functions; Distribution; Focal length; Photogrammetry
Theoretical Weighting of Photogrammetric Equations, Charles Kendall Paul, 550

Probability theory; Reservoir storage; Safe yield; Water resources development; Water supply; Draft-storage curves; Irrigation; Low-flow augmentation
Potential United States Water-Supply Development, Clayton H. Hardison, 528

Probability theory; Safety; Safety engineering; Structural engineering; Bibliographies; Construction
Structural Safety--A Literature Review, Task Committee on Structural Safety of the Administrative Committee on Analysis and Design for the Structural Division, Alfredo H.S. Ang, Chmn., 214

Probability theory; Safety factors; Dynamic loads; Engineering mechanics
Filtered Poisson Process for Random Vibration Problems, Ronald L. Racicot and Fred Moses, 110

Probability theory; Shear; Structural engineering; Buildings; Dynamics; Earthquakes; Monte Carlo method
Probabilistic Response of Nonlinear Buildings During Earthquakes, Alain H. Peyrot, 531

Probability theory; Simulation; Stochastic models; Stream flow; Hydraulics; Monte Carlo method
Adequacy of Hydrologic Records for Parameter Estimation, Charles T. Haan, 430

Probability theory; Spectral energy distribution; Vibration; Dynamics; Engineering mechanics
Properties of Spectral Moments with Applications to Random, Erik H. Vanmarcke, 211

Probability theory; Stability; Statistical analysis; Structural engineering; Buckling; Columns (supports); Deflection; Elastic properties; Engineering mechanics
Nonstationary Random Column Buckling Problem, Raymond G. Jacquot, 501

Probability theory; Statically determinate structures; Structural engineering; Trusses; Costs; Optimum design
Minimum Expected Cost Optimization, Shengtaur Mau and Robert G. Sexsmith, 447

Probability theory; Statics; Beams (supports); Deflection; Engineering mechanics; Mathematical models
Statics of Random Beams, Devendra K. Shukla and Robert M. Stark, 600

Probability theory; Statistical analysis; Bids; Construction; Construction industry; Contractors
Competitive Bidding: The Probability of Winning, Neal B.H. Benjamin, 601

Probability theory; Statistical analysis; Drainage; Evapotranspiration; Irrigation
Maximum Potential Evapotranspiration Frequency - East Central U.S., J. L. McGuinness and Leslie H. Parmele, 267

Probability theory; Statistical analysis; Stochastic models; Stream flow; Autocorrelation; Hydraulics; Mathematical models
Parameter Estimation for First-Order Autoregressive Model, Luis E. Garcia-Martinez, 426

Probability theory; Statistical analysis; Structural engineering; Design; Earthquakes; Engineering mechanics
Reliability Optimization in Isostatic Structures, Emilio Rosenblueth and Enrique Mendoza, 38

Probability theory; Structural engineering; Buildings; Fire protection; Fire resistance; Optimization
Optimum Fire Resistance of Structures, T. T. Lie, 97

Problem oriented languages; Programming languages; Reports; Hydraulics; Libraries
Computer Languages and Program Libraries, by the Task Committee on Problem Orientation Languages in Hydrology of the Committee on Surface-Water Hydrology of the Hydraulics Division., George Bugliarello, Chmn., 397

Problem solving; Social needs; Technology; Civil engineers
Engineering and Today's Social Problems, Donald C. Slichter, 147

Problem solving; Social needs; Urban development; Urban planning; Community relations; Planning
Goals for Dallas Program, Erik Jonsson, 394

Product development; Safety engineering; Consumers; Costs; Liabilities; Litigation
Designing to Prevent Liability Lawsuits, Norman B. Chew, 44

Production capacity; Productivity; Professional practice; Employee relations; Management planning; Management systems
Boosting Construction-Worker Productivity, Charles R. Schrader, 458

Productivity; Professional practice; Employee relations; Management planning; Management systems; Production capacity
Boosting Construction-Worker Productivity, Charles R. Schrader, 458

Productivity; Professional practice; Safety; Safety devices; Safety engineering; Employee relations
What a Good Safety Program Means, C. H. Shaw, Jr., 447

Productivity; Sanitary engineering; Sea grasses; Benthic flora; Estuaries; Nutrition; Plants
Role Of Benthic Plants in Fertilized Estuary, Thomas D. Waite and Ralph Mitchell, 482

Productivity; Time and motion studies; Construction; Efficiency; Films; Photography
Analysis of Time-Lapse Construction Films, Howard B. Sprinkle, 502

Professional activities; ASCE (education); ASCE (policy); Minority groups
Training Minorities for Construction Work, Ewell W. Finley, 161

Professional activities; ASCE (Employment Conditions); ASCE (Professional Activities); Employee relations; Employment
Guideline: Employer--Engineer Relationship, Committee on Employment Conditions of the Professional Practice Division, Charles J. Stevens, Chmn., 583

Professional activities; ASCE (National Affairs); Civil engineering; Civil engineers; Legislation
Legislative Involvement, Stephen M. Olko, 573

Professional activities; ASCE (professional activities); ASCE (professional practice); ASCE (registration of engineers)
Professional Recognition -- How?, James Gordon Clark, 335

Professional activities; ASCE (public affairs forum)
Guidelines for Engaging in Public Affairs Activities, by the Committee on Public Affairs of the Member Activities Division, James W. McPhillips, Chmn., 68

Professional activities; Benefit cost analysis; Budget estimates; Investment; Planning
Budget Constraints and Multiobjective Planning, Arthur Maass and David C. Major, 463

Professional activities; Buildings (hospitals); Environmental effects; Health; Matrices (mathematics); Microenvironment
The Hospital as a Microenvironment, E. Todd Wheeler, 593

Professional activities; Civil engineering; Civil engineers; Esthetics
The Engineer and Pollution Control - Some Objections to the Simplistic Approach, Samuel C. Florman, 418

Professional activities; Civil engineering; Computer programming; Computers; Computer systems hardware
Computer Use in Civil Engineering, Robert L. Schiffman and E. Rex Krueger, 299

Professional activities; Engineering education; Engineering schools
The Nature of Continuing Education, Alfred C. Ingersoll, 144

Professional activities; Professional advancement; ASCE (younger members); Civil engineers; Education
Professional Development for Consulting Engineers, Gerald L. Baker, 166

Professional activities; Professional advancement; Professional engineering; Schools; Civil engineers; Education; Engineering education; Engineers
Civil Engineering Education in the Future, Richard Tucker, 191

Professional activities; Professional advancement; Urban planning; Employment; Engineering education; Minority groups
Minority Programs for ASCE, Sol E. Cooper, Austin B. Milhollin and Benito A. Sinclair, 485

Professional activities; Professional development; Professional practice; Technical writing; Communication
Clear Communication--Key to Professional Development, M. D. Morris, 131

Professional activities; Professional engineering; Engineering education; Environmental engineering; Ethics; Nuclear electric power generation
Engineering For People, Richard R. Harbert, 441

Professional activities; Professional engineering; Professional practice; Engineering education; Engineers
Professional Education: The Need for Creativity, Charles R. Schrader, 80

Professional activities; Professional engineering; Social needs; Civil engineering; Engineering
Considering Social Value in Engineering Projects, Charles G. Sudduth, 96

Professional activities; Professional practice; ASCE (insurance); Insurance; Liabilities
Professional Liability Insurance, Paul L. Genecki, 250

Professional activities; Professional practice; Engineering education; Esthetics; Massachusetts
Aesthetics -- Part of Civil Engineering, Frederick M. Law, 324

Professional activities; Professional practice; Registration; ASCE (members); ASCE (membership); Civil engineers; Employment
A Profile of ASCE Membership, George K. Wadlin, Jr., 312

Professional activities; Professional societies; Civil engineers; Ecology; Environmental engineering; Government
Integrity and the Ecological Crisis, Myron Tribus, 227

Professional activities; Public health; Tests; Automation; Buildings (hospitals); Design
Multiphase Health Screening Facility Design, Paul R. DeCicco, 593

Professional activities; Public relations; Civil engineers; Legislation
Action in Public Affairs -- A Way of Life, James W. McPhillips, Brian R. Hogan, Eugene R. McMaster and David A. Novick, 239

Professional activities; Public relations; Universities; Education; Engineering education
The Continuing Challenge of Engineering Education, Arthur G. Hansen, 395

Professional activities; Regional planning; Social needs; Water resources; Land use
Principals and Standards for Water and Land Resources Planning, W. Don Maughn, 452

Professional activities; Regional planning; Water quality control; Environmental engineering; Government; Institutions
Water Pollution Control Institutions, William Whipple, Jr., 215

Professional activities; Research; ASCE (Activities); ASCE (Policy); ASCE (Research); Civil engineering; Government policies
Goals of Civil Engineering Research -- Its Responsiveness to the Needs, Desires and Aspirations of Man, ASCE Committee on Research, Robert F. Baker, Chmn., 599

Professional activities; Rivers; Sewage disposal; Solid wastes; Natural resources
Interdisciplinary Planning to Meet Environmental Needs, Frederick J. Clarke, 535

Professional activities; Sewage treatment; Social needs; Solid wastes; Environmental engineering; Federal agencies; Legislation
The Engineer and the New Environment, Eugene T. Jensen, 381

Professional activities; Simulation; Computerized simulation; Cost control; Financing; Flood control; Management control reports
Flood Control Developed and Operated with Simulation, John M. Tellemer, 154

Professional activities; Social aspects; Social needs; Civil engineering; Ecology; Environmental engineering; Pollution control
Ecology - Rage and Reason, Robert Moses, 474

Professional activities; Social change; Civil engineering; Environmental engineering; Political aspects; Pollution
Pollution, Politics and Protest, Charles L. Gould, 39

Professional activities; Social needs; ASCE (presidents); Environmental engineering
Antidote for Environmental Hysteria, Samuel S. Baxter, 180

Professional activities; Social needs; Civil engineering; Civil engineers; Health
The Role of the Civil Engineer in Statewide Health Planning, William H. Wisely, 592

Professional activities; Social needs; Environmental engineering; Flood control; Open channel flow
Public Participation in Environmental Design of Flood Control Channels, Phillip F. Dunn, Jr., 432

Professional activities; Social needs; Systems analysis; Civil engineering; Civil engineers
The Civil Engineer in the Multidisciplinary Design Team, David A. Novick, 277

Professional activities; Thermoelectric power generation; Dams; Environmental engineering; Hydroelectric power generation
Positive Points on Electric Power, George R. Higgins, 204

Professional activities; Water pollution control; Environmental engineering; Environments; Federal agencies; Organizations; Pollution control
Federal Reorganization to Protect the Environment, John F. Wall and Leonard B. Dworsky, 289

Professional activities; Water resources; Water reuse; Water use; Civil engineering; Forecasting
Water Resources in the Future: Directions and Prospects, Joseph L. Fisher, 407

Professional advancement; ASCE (younger members); Civil engineers; Education; Professional activities
Professional Development for Consulting Engineers, Gerald L. Baker, 166

Professional advancement; Civil engineers; Construction; Construction procedure; Liabilities
Booby Traps for Young Engineers on Construction, Edward A. Merrill, 108

Professional advancement; Professional engineering; Schools; Civil engineers; Education; Engineering education; Engineers; Professional activities
Civil Engineering Education in the Future, Richard Tucker, 191

Professional advancement; Urban planning; Employment; Engineering education; Minority groups; Professional activities
Minority Programs for ASCE, Sol E. Cooper, Austin B. Milhollin and Benito A. Sinclair, 485

Professional development; Professional practice; Technical writing; Communication; Professional activities
Clear Communication--Key to Professional Development, M. D. Morris, 131

Professional development; Universities; ASCE (education); Careers; Engineering education
University of Wisconsin Offers Professional Development Degree, John P. Klus and C. Allen Wortley, 20

Professional engineering; Engineering education; Environmental engineering; Ethics; Nuclear electric power generation; Professional activities
Engineering For People, Richard R. Harbert, 441

Professional engineering; Professional practice; Engineering education; Engineers; Professional activities
Professional Education: The Need for Creativity, Charles R. Schrader, 80

Professional engineering; Schools; Civil engineers; Education; Engineering education; Engineers; Professional activities; Professional advancement
Civil Engineering Education in the Future, Richard Tucker, 191

Professional engineering; Social needs; Civil engineering; Engineering; Professional activities
Considering Social Value in Engineering Projects, Charles G. Sudduth, 96

Professional engineering; Structural analysis; Buildings (codes); Earthquake damage
Badly Needed: Changes in Building Codes for Houses, Melvin W. Jackson, 190

Professional practice; ASCE (insurance); Insurance; Liabilities; Professional activities
Professional Liability Insurance, Paul L. Genecki, 250

Professional practice; Employee relations; Management planning; Management systems; Production capacity; Productivity
Boosting Construction-Worker Productivity, Charles R. Schrader, 458

Professional practice; Engineering education; Engineers; Professional activities; Professional engineering
Professional Education: The Need for Creativity, Charles R. Schrader, 80

Professional practice; Engineering education; Esthetics; Massachusetts; Professional activities
Aesthetics -- Part of Civil Engineering, Frederick M. Law, 324

Professional practice; Professional societies; ASCE (Ethics); ASCE (Presidents); Bids; Civil engineering; Finance
State of the Society, Oscar S. Bray, 602

Professional practice; Registration; ASCE (members); ASCE (membership); Civil engineers; Employment; Professional activities
A Profile of ASCE Membership, George K. Wadlin, Jr., 312

Professional practice; Reports; Salaries; Civil engineers; Consulting engineers; Municipal engineering
1971 ASCE Salary Survey, the Committee on Employment Conditions of the Department of Professional Activities, Charles J. Stevens, Chmn., 347

Professional practice; Runoff; Subdivisions; Urban planning; Waterways (watercourses); Drainage; Floods; Hydraulics; Hydrology; Land use; Legislation; Municipal engineering
An Engineer Looks at Drainage Law, Alfred R. Pagan, 511

Professional practice; Safety; Safety devices; Safety engineering; Employee relations; Productivity
What a Good Safety Program Means, C. H. Shaw, Jr., 447

Professional practice; Social needs; Technology; Environmental engineering
In Defense of Dubos and Ellul, Kim de Rubertis, 534

Professional practice; Technical writing; Communication; Professional activities; Professional development
Clear Communication--Key to Professional Development, M. D. Morris, 131

Professional societies; ASCE (Ethics); ASCE (Presidents); Bids; Civil engineering; Finance; Professional practice
State of the Society, Oscar S. Bray, 602

Professional societies; Civil engineers; Ecology; Environmental engineering; Government; Professional activities
Integrity and the Ecological Crisis, Myron Tribus, 227

Professional societies; Registration; ASCE (membership); Employment
Profile of ASCE Membership, George K. Wadlin, Jr., 5

Professional societies; Sciences; Sociology; Training; Hydraulic engineering; Hydraulics; Innovation
Technological Innovation and Hydraulic Engineering, George Bugliarello, 278

Professional societies; Waste water treatment; Water pollution control; Design standards; Manuals
Design Standards for Wastewater Treatment Systems, Robert A. Canham and Louis L. Guy, Jr., 70

Profiles; Scale effect; Beach ridges; Coastal engineering; Equilibrium; Harbors; Hydraulic models; Movable bed models
Equilibrium Beach Profile Scale-Model Relationship, Edward K. Noda, 558

Programming languages; Reports; Hydraulics; Libraries; Problem oriented languages
Computer Languages and Program Libraries, by the Task Committee on Problem Orientation Languages in Hydrology of the Committee on Surface-Water Hydrology of the Hydraulics Division., George Bugliarello, Chmn., 397

Project control; Scheduling; Construction; Construction industry; Costs; Critical path method; Management; Monitoring
Planning Monitoring Frequencies for CPM Projects, Douglas A. Elvers, 55

Projectiles; Sands; Soil mechanics; Bearing capacity; Impact tests; Penetration
Low Velocity Projectile Penetration, Wen L. Wang, 104

Project management; Quality control; Bridges (concrete); Concrete (reinforced); Deformed bars; Israel
An American Engineer in Israel, Irving Kett, 295

Project management; Regional planning; Construction management; Contract terms; Financing; New york
New York City Hacks Through Capital Construction Jungle, Thomas A. Graham, 199

Projects; Social needs; Civil engineering; Design; Engineering; Planning
Ethical and Social Responsibility in the Planning and Design of Engineering Projects, David Mann, 107

Projects; Surveying; Surveys; Civil engineering; Engineering; Management; Planning
Project Planning, John M. Shields, 202

Protamines; Sanitary engineering; Water treatment; Activated sludge; Chlorine; Coagulation; Epidemiology; Filtration
Integrated Approach to Problem of Viruses in Water, Gerald Berg, 122

Protective clothing; Safety; Safety engineering; Sound level meters; Management
Surveying Safety, John M. Shields and Jack J. Wilks, 364

Protective coatings; Steel pipes; Tunnels; Aqueducts; Conduits; Mortars (material); Pipelines; Pipe linings
Cement Mortar Lining of 20-Ft Diameter Steel Pipe, James E. Wolfe, 462

Prototypes; Channel stabilization; Hydraulic models; Missouri
Navigation Model Tests for Straight Reach of Missouri River, Duane J. Sveum and Warren J. Mellema, 227

Protuberances; Aerodynamics; Cylinders; Engineering mechanics
Wind Load on Cylinder With Spanwise Protrusion, David F. James and Quan-Si Truong, 543

Publications; Transportation; Airports; Bibliographies; Information retrieval
List of Information Sources for Airport Planners, Robert K. Palmer, 65

Public health; Recreation facilities; Research; Sanitary engineering; Bacteria; Chemical stabilization; Chlorine
Bactericidal Properties of Chlorsulfamates, John E. Delaney and J. Carrell Morris, 209

Public health; Tests; Automation; Buildings (hospitals); Design; Professional activities
Multiphase Health Screening Facility Design, Paul R. DeCicco, 593

Publicity; Public opinion; Water resources; Community relations; Decision making; Decisions; Planning
Fishbowl Planning Immerses Pacific Northwest Citizens in Corps Projects, Howard L. Sargent, 389

Public land; Right of way acquisition; Surveying; Boundaries (property); Land surveys
Recommended Right-of-Way Practices, Harmer A. Weeden, 211

Public opinion; Water management (applied); Drainage; Irrigation; Maintenance; Operations; Organizations
Operation and Maintenance of Irrigation and Drainage Systems: Section II--Organization for Operation and Maintenance, Committee on Operation and Maintenance of Irrigation and Drainage Systems of the Irrigation and Drainage Division, Richard J. Willson, Chmn., 76

Public opinion; Water resources; Community relations; Decision making; Decisions; Planning; Publicity
Fishbowl Planning Immerses Pacific Northwest Citizens in Corps Projects, Howard L. Sargent, 389

Public relations; Civil engineers; Legislation; Professional activities
Action in Public Affairs -- A Way of Life, James W. McPhillips, Brian R. Hogan, Eugene R. McMaster and David A. Novick, 239

Public relations; Universities; Education; Engineering education; Professional activities
The Continuing Challenge of Engineering Education, Arthur G. Hansen, 395

Pumped storage; Reservoirs; Sealers; Tests; Asphalts; Bituminous concretes; Concrete; Dams; Dikes; Embankments
Bituminous Blanket for Dike, F. P. Robertson and Johannes Lehnert, 537

Pumped storage; Tidal energy; Tidal power generation; Dams; Estuaries; Power; Powerplants
Integration Of Pumped-Storage With Tidal Power, Thomas L. Shaw and Geoffrey R. Thorpe, 29

Pumped storage; Tidal power generation; Tidal power plants; Nuclear power plants; Powerplants
Tidal Energy from the Bay of Fundy, Thomas L. Shaw and J. van den Heuvel, 531

Pumped storage; Turbines; Conservation; Costs; Dams (concrete); Dams (gravity); Economics; Environmental engineering; Hydroelectric power generation; Models; Powerplants
Wallace Dam, Major H. Thompson, Jr., 550

Pumping; Salinity; Tests; Agriculture; Aquifers; Artesian wells; Drainage; Irrigation
Pumping an Artesian Source for Water Table Control, Eugene J. Doering and Leo C. Benz, 344

Pump intakes; Pumps; Thermoelectric power generation; Water hammer; Cooling systems; Cooling water; Powerplants
Circulating Water Systems Without Valves, Rudolf J. Wahanik, 571

Pumps; Thermoelectric power generation; Water hammer; Cooling systems; Cooling water; Powerplants; Pump intakes
Circulating Water Systems Without Valves, Rudolf J. Wahanik, 571

Pumps; Valves; Water; Water tunnels; Aqueducts; Earthquakes; Manifolds
Edmonston Pumping Plant: Nation's Mightiest, Robert B. Jansen, 465

Pumps; Water hammer; Computer programming; Computers; Conduits; Discharge; Hydraulics; Models; Pipe flow; Powerplants
Computer Simulation of Waterhammer Effects, George Belonogoff, 323

Pumps; Water hammer; Water pressure; Discharge lines; Hydraulics; Pipe flow; Pipelines
Start-up Pressures in Short Pump Discharge Lines, Irving Joseph and Frank A. Hamill, 359

Punches; Stresses; Engineering mechanics; Integral transformations
Boussinesq Problems for Nonhomogeneous Solid, Mumtaz K. Kassir, 236

Purification; Sanitary engineering; Sewage; Sewage treatment; Viruses; Waste disposal
Inactivation of Virus in Sewage, Vincent P. Olivieri, Thomas K. Donovan and Kazuyoshi Kawata, 41

Purification; Sanitary engineering; Water; Water purification; Bromates; Bromine
Bromine and Bromamine Disinfection Chemistry, J. Donald Johnson and Ragnar Overby, 49

Quadratic equations; Cables (ropes); Computers; Engineering mechanics
Analysis of Structures by Quadratic Programming, Mehdi S. Zarghamee, 27

Quadratic equations; Stresses; Computer programming; Engineering mechanics; Equations; Frames; Plasticity
Elastic-Plastic Analysis by Quadratic Programming, Antone F. Sayegh and Moshe F. Rubinstein, 564

Quality control; Bridges (concrete); Concrete (reinforced); Deformed bars; Israel; Project management
An American Engineer in Israel, Irving Kett, 295

Quality control; Systems engineering; Management
System for Control of Construction Quality, Roland M. Parsons, 159

Quality control; Tests; Construction; Consulting engineers; Inspection; Personnel development
Summary Report of Questionnaire on Construction Inspection, by the Task Committee on Inspection of the Construction Division, Joseph Goldbloom, Chmn., 524

Quarrying; Blasting; Construction; Environments; Excavation; Explosives; Predictions
Rapid Excavation With Explosives, Richard H. Groves and Robert L. LaFrenz, 380

Questionnaires; Surveys; Construction; Delay time
Causes of Delay in the Construction Industry, John R. Baldwin, James M. Manthei, Harold Rothbart and Robert B. Harris, 27

Queueing theory; Rates (costs); Thailand; Capacity; Cargo transportation; Harbors
Capacity-Feedback Relationship for Port of Bangkok, Donald R. Drew, Pakorn Adulbhan, Wai Ling Woo and Manu Juaseekoon, 441

Radiation; Advection; Evapotranspiration; Frequency distribution; Irrigation
Frequency of Potential Evapotranspiration Rates in Great Central Plains, Norman J. Rosenberg, 294

Radioactivity; Refuse disposal; Sanitary engineering; Industrial wastes; Irradiation; Plastics
Use of Irradiation in Plastic Wastes Disposal, Masaru Tanaka and Tsuyoshi Mifune, 414

Railroads; Railroad trains; Simulation; Engineering mechanics; Hydrodynamics
High-Speed Train Simulation Using Hydrodynamics, Robert A. Helfinstine and Charles Dalton, 162

Railroads; Regional planning; Terminal facilities; Transmission lines; Urban planning; Urban transportation; Waterways (transportation); Freight terminals; Investments; Land use; Pipelines; Planning
Restructuring Freight Transportation in Chicago, James Robert Blaze, 353

Railroads; Transmission lines; Blasting; Costs; Excavation; Foundations; Installation; Power; Power lines
Powerline Foundations Installed along Railroad Tracks, Roger S. Chapman, 462

Railroad trains; Simulation; Engineering mechanics; Hydrodynamics; Railroads
High-Speed Train Simulation Using Hydrodynamics, Robert A. Helfinstine and Charles Dalton, 162

Rail transportation; Rapid transit railways; Transportation; Urban transportation; BART
BART Rail Transit System Begins Operations505

Rainfall; Rivers; Water resources; Weather modification; Cloud seeding; Irrigation; Meteorology
Cloud Seeding Interpreted Through Atmospheric Water Balance, James L. Rasmussen, 562

Rainfall; Silver iodide; South Dakota; Water resources; Weather modification; Hydraulics
Weather Modification Program for South Dakota, Richard A. Schleusener and Edwin I. Boyd, 466

Rainfall; Statistical analysis; Flood forecasting; Flood frequency; Floods; Hydraulics
Floods Predicted From Rainfall Frequencies, Lee Robinson and Theodore T. Williams, 517

Rainfall; Synthesis; Time series analysis; Hydraulics; Hydrology; Markov processes; Mathematical models
Stochastic Generation of Rainfall, Kazimierz Adamowski and Anthony F. Smith, 548

Rainfall; Turbulence; Water flow; Drainage; Erosion; Friction; Impact; Overland flow
Mechanics of Sheet Flow Under Simulated Rainfall, Yong Nam Yoon and Harry G. Wenzel, Jr., 13

Rainfall; Water flow; Flow resistance; Friction; Head losses; Hydraulics; Nonuniform flow; Open channel flow; Overland flow
Resistance Coefficients for Steady Spatially Varied Flow, Ben Chie Yen, Harry G. Wenzel, Jr. and Yong Nam Yoon, 415

Rainfall-runoff relationships; Runoff; Storms; Antecedent precipitation; Hydraulics; India
Synthetic Storm Pattern and Run-off for Gauhati, India, M. Bandyopadnyay, 270

Random error; Standard deviation; Surveying; Variance (statistics); Weighting functions; Distribution; Focal length; Photogrammetry; Probability theory
Theoretical Weighting of Photogrammetric Equations, Charles Kendall Paul, 550

Random processes; Vibration; Dynamic response; Dynamic structural analysis; Engineering mechanics; Environmental tests; Excitation; Linear responses
Linear Response to Nonstationary Random Excitation, Timothy K. Hasselman, 278

Rapid transit railways; Regional planning; Right-of-way; Right of way acquisition; Street railroads; Subways; Transportation; Construction costs; Elevated railroads
Expressway Rapid Transit, George Krambles, 590

Rapid transit railways; Social needs; Subways; Washington, D.C.; Contracts; Noise reduction
Washington D.C.'s Metro--A Progress Report, Robert S. O'Neil, 194

Rapid transit railways; Statistical analysis; Transportation; Urban transportation; Mathematical models
Assessing Impact of Urban Transportation, David E. Boyce, 330

Rapid transit railways; Traffic; Transportation; Vehicles; Vehicular traffic; Ground vehicles; Passenger transportation
Curbside Service Subways, Charles J. Swet, 469

Rapid transit railways; Transportation; Automation; Concrete (reinforced); Parking facilities
Novel Features on Lindenwold Line, Richard E. Pinkham, 187

Rapid transit railways; Transportation; Containerizing; Materials handling
Goods Movement on Urban Transit Systems, John J. Fruin, 411

Rapid transit railways; Transportation; Urban transportation; BART; Rail transportation
BART Rail Transit System Begins Operations505

Rapid transit railways; Transportation; Vibration; Noise; Noise reduction; Passenger transportation
Noise and Vibration Control in New Rapid Transit, Marshall L. Silver, 579

Rates (costs); Thailand; Capacity; Cargo transportation; Harbors; Queueing theory
Capacity-Feedback Relationship for Port of Bangkok, Donald R. Drew, Pakorn Adulbhan, Wai Ling Woo and Manu Juaseekoon, 441

Rational formula; Flood hydrographs; Hydraulics; Hydrology; Kinematics; Models; Overland flow
Kinematic Wave Nomograph for Times of Concentration, Robert M. Ragan and J. Obiukwu Duru, 506

Reactions (mechanics); Structural analysis; Bending; Deformation; Loads (forces); Pipeline transportation; Pipes
Systematic Stress Analysis of Circular Pipe, Junkichi Katoh, 584

Reaeration; Turbulence; Fluid flow; Hydraulics
Wind Shear-Turbulence and Reaeration Coefficient, Aziz F. Eloubaidy and Erich J. Plate, 111

Real property; Transportation; Air pollution; Benefit-cost ratios; Community development; Noise reduction
Community Values in Transport Network Evaluation, Dan G. Haney and George E. Klein, 449

Recession curves; Flow; Laboratory tests
Recession Flow in Surface Irrigation, I-pai Wu, 116

Recharge wells; Waste water; Dispersion; Engineering mechanics; Injection wells; Mathematical studies
Dispersion from Recharge Well, Charles W. Lenau, 197

Reclamation; Soil mechanics; Subsidence; Fills; Fire protection; Foundations; Pile driving
Industry Builds on a Refuse Dump, Hans J. Pfister, 487

Reclamation; Wisconsin; Docks; Ice; Marinas; Pile extraction; Piles (foundations)
Lake Superior Yachting Marinas Resist Ravages of Ice, C. Allen Wortley, 79

Recreation; Water resources; Flood control; Hydraulics; Hydroelectric power; Irrigation; Low-flow augmentation; Multiple purpose projects; Optimization
Multireservoir Optimization Model, James S. Windsor and Ven Te Chow, 532

Recreational facilities; Regional planning; Regulations; Urban planning; Water resources; Zoning; Land use
Wisconsin's Shoreland Management Program, Thomas M. Lee, 605

Recreational facilities; Reservoir design; Skiing; Ecology; Environmental effects; Parks
Civil Engineering for Recreation, Ernst W. Kiesling and George A. Whetstone, 182

Recreational facilities; Streams; Urban planning; Environmental engineering; Esthetics; Land use; Parks
Evaluating Recreational Potential of Small Streams, John A. Dearinger, 478

Recreational facilities; Subsidence; Water conduits; Water distribution; Water resources development; California; Earthquake engineering
California Water Project, William R. Gianelli and Robert B. Jansen, 307

Recreational facilities; Water pollution control; Water pollution effects; California; Estuaries
Cleanup of San Diego Bay, Roy E. Dodson, 142

Recreation facilities; Research; Sanitary engineering; Bacteria; Chemical stabilization; Chlorine; Public health
Bactericidal Properties of Chlorsulfamates, John E. Delaney and J. Carrell Morris, 209

Rectangular bodies; Relaxation (mechanics); Structural engineering; Thin plates; Concentrated loads; Deflection; Dynamic properties; Finite differences; Loads (forces)
Large Deflection of Elastic Plates Under Patch Loading, Bijan Aalami, 559

Refineries; Sanitary engineering; Waste treatment; Water pollution; Water reclamation
Treatment of Refinery Waste by Physicochemical Processes, Ju-Chang Huang and Michael G. Hardie, 14

Refuse; Refuse disposal; Sanitary engineering; Sanitary landfill; Solid wastes; Baling; Magnetic separators
Refuse Reclamation and Recycle, Joseph F. Malina, Jr. and William T. Morgan, 564

Refuse disposal; Sanitary engineering; Industrial wastes; Irradiation; Plastics; Radioactivity
Use of Irradiation in Plastic Wastes Disposal, Masaru Tanaka and Tsuyoshi Mifune, 414

Refuse disposal; Sanitary engineering; Sanitary landfill; Solid wastes; Baling; Magnetic separators; Refuse
Refuse Reclamation and Recycle, Joseph F. Malina, Jr. and William T. Morgan, 564

Refuse disposal; Sanitary engineering; Solid wastes; Computers; Costs; Data systems; Economics
Basic Data for Solid Waste: A Pilot Study, Robert M. Clark, John M. Sweeten and Daniel G. Greathouse, 540

Refuse disposal; Sanitary engineering; Solid wastes; Decision making; Gaming models; Management engineering
Management Science and Gaming in Waste Management, Pran N. Wahi and Theodore I. Peterson, 476

Refuse disposal; Sanitary engineering; Solid wastes; Systems engineering; Economics
Fleet Selection for Solid Waste Collection Systems, Robert M. Clark and Billy P. Helms, 216

Refuse disposal; Sanitary engineering; Solid wastes; Systems engineering; Urban planning; Waste disposal; Mathematics
Selecting Solid Waste Disposal Facilities, Billy P. Helms and Robert M. Clark, 4

Regional analysis; Regional planning; Travel; Forecasting; Highways; Mathematical models; North carolina
Forecasting Regional Travel on Regional Highway Network, Arun Chatterjee and Paul D. Cribbins, 162

Regional planning; Construction management; Contract terms; Financing; New york; Project management
New York City Hacks Through Capital Construction Jungle, Thomas A. Graham, 199

Regional planning; Regression analysis; Sanitary engineering; Solid wastes; Statistical analysis; Costs; Planning
Cost of Residential Solid Waste Collection, Robert M. Clark, Betty L. Grupenhoff, George A. Garland and Albert J. Klee, 34

Regional planning; Regulations; Urban planning; Water resources; Zoning; Land use; Recreational facilities
Wisconsin's Shoreland Management Program, Thomas M. Lee, 605

Regional planning; Right-of-way; Right of way acquisition; Street railroads; Subways; Transportation; Construction costs; Elevated railroads; Rapid transit railways
Expressway Rapid Transit, George Krambles, 590

Regional planning; Right-of-way; Right of way acquisition; Transmission towers; Alignment; Highways; Land use; Pipelines
Joint Utilization of Rights-of-Way, Francis J. Stastny, 130

Regional planning; Sanitary engineering; Sewerage; Water quality; Land use; Management; Pollution control
Basin Management Techniques for Sewerage Agencies, Charles V. Gibbs and Allan L. Poole, 375

Regional planning; Site selection; Statistical analysis; Impact prediction; Land use; Power; Powerplants
New Approach to Power Plant Siting, James D. Calvert and William L. Heilman, 201

Regional planning; Social needs; Water resources; Land use; Professional activities
Principals and Standards for Water and Land Resources Planning, W. Don Maughn, 452

Regional planning; Systems engineering; Water resources; Hydraulics; Planning
Use of Systems Analysis in Water Resources Planning, William K. Johnson, 446

Regional planning; Terminal facilities; Transmission lines; Urban planning; Urban transportation; Waterways (transportation); Freight terminals; Investments; Land use; Pipelines; Planning; Railroads
Restructuring Freight Transportation in Chicago, James Robert Blaze, 353

Regional planning; Transportation; Benefit cost analysis; Canada; Economic analysis; Highway engineering; Highway planning; Highways; Investments; Land use
Programming of Regional Highway Investments, Bruce G. Hutchinson, 269

Regional planning; Transportation; Drainage; Environmental engineering; Highways; Land use; Legislation
Impact of Environmental Controls on Highways, Wm. Campbell Graeub, Albert A. Grant and Robley Winfrey, 219

Regional planning; Travel; Forecasting; Highways; Mathematical models; North carolina; Regional analysis
Forecasting Regional Travel on Regional Highway Network, Arun Chatterjee and Paul D. Cribbins, 162

Regional planning; Urban planning; Conflict; Highways
Regional-Local Conflicts in Transportation Planning, Harvey R. Joyner, 394

Regional planning; Water; Water supply; Desalting; Electric power generation; Nuclear electric power generation
Dual-Purpose Desalting in Pacific Southwest, Sam Shiozawa, 140

Regional planning; Water quality control; Environmental engineering; Government; Institutions; Professional activities
Water Pollution Control Institutions, William Whipple, Jr., 215

Registration; ASCE (members); ASCE (membership); Civil engineers; Employment; Professional activities; Professional practice
A Profile of ASCE Membership, George K. Wadlin, Jr., 312

Registration; ASCE (membership); Employment; Professional societies
Profile of ASCE Membership, George K. Wadlin, Jr., 5

Registration; ASCE (Professional Objectives); ASCE (Professional Practice); ASCE (Registration of Engineers)
Specialty Registration for Engineers, Thomas deS. Furman, 522

Regression analysis; Sanitary engineering; Solid wastes; Statistical analysis; Costs; Planning; Regional planning
Cost of Residential Solid Waste Collection, Robert M. Clark, Betty L. Grupenhoff, George A. Garland and Albert J. Klee, 34

Regression analysis; Traffic surveys; Transportation; Urban planning; Forecasting; Mathematical models
Time Stability of Zonal Trip Production Models, Norman Ashford and Frank M. Holloway, 535

Regulation; Simulation; Statistical analysis; Systems engineering; Data systems; Hydraulics; Nevada
Streamflow Synthesis - A Case Study, Vulli L. Gupta and John W. Fordham, 336

Regulations; Safety; Schools; Traffic; Data systems; Parking areas; Parking facilities; Personnel
Management System for Campus Traffic Planning, Michael J. Quillem and Jason C. Yu, 527

Regulations; Sanitary engineering; Streams; Agriculture; Aquatic plants; Industrial wastes; Land use; Population
Water Pollution - Facts and Fantasies, John M. Henderson, 390

Regulations; Urban planning; Water resources; Zoning; Land use; Recreational facilities; Regional planning
Wisconsin's Shoreland Management Program, Thomas M. Lee, 605

Reinforcement; Research; Shear strength; Structural engineering; Tests; Torsion; Beams (supports); Concrete (reinforced)
Total Interaction Method for Torsion Design, K. S. Rajagopalan, Umakanta Behera and Phil M. Ferguson, 467

Reinforcement; Slabs; Walls; Beams (supports); Columns (supports); Compaction; Concrete; Consolidation; Distribution; Mass concrete; Placement
Pertinent Techniques for Compacting Concrete, Shu-t'ien Li and Donald A. Stewart, 429

Reinforcement; Soil mechanics; Stratification; Anisotropy; Earth materials; Elastic theory
Elastic Theory Applied to Reinforced Earth, W. Jill Harrison and Charles M. Gerrard, 575

Reinforcement; Steels; Traffic control; Tunnels; Underwater construction; Vehicular tunnels; Cofferdams; Fabrication; Prefabrication
Submerged-Tube Tunnel in Mobile, Ray R. Slocum, 368

Reinforcement; Stresses; Structural engineering; Tensile strength; Tests; Concrete (reinforced)
Strength of Fiber-Reinforced Concrete, Jitendra N. Kar and Anil K. Pal, 253

Reinforcement; Stresses; Structural engineering; Tests; Beams (supports); Buildings
Tests on Beams with Reinforced Web Openings, Peter B. Cooper and Robert R. Snell, 189

Reinforcement; Structural engineering; Cements; Concrete; Concrete (reinforced); Dams; Distribution systems; Foundations; Heat of hydration
Temperature Rises in Low-Heat Cement Concrete, Barry P. Hughes, 43

Reinforcement; Structural engineering; Composite structures; Engineering mechanics; Failure; Fibers; Limit design method
Limit Analysis of Ductile Fiber-Reinforced Structures, Richard H. Lance and David N. Robinson, 130

Reinforcement (structures); Rubber; Bearing pads; Bridges (piers); Elastomers
Elastomeric Bridge Bearings, Charles E. Rejcha, 233

Relaxation (mechanics); Structural engineering; Thin plates; Concentrated loads; Deflection; Dynamic properties; Finite differences; Loads (forces); Rectangular bodies
Large Deflection of Elastic Plates Under Patch Loading, Bijan Aalami, 559

Remote sensing; Aerial photography; Environmental engineering; Mapping; Photogrammetry
Photogrammetry Aids Solution of Environment Problems, Alfred O. Quinn, 228

Remote sensing; Streams; Surveying; Water pollution; Water resources; Aerial photography; Flooding; Lakes
Aerial Photography for Water Resource Studies, Ralph W. Kiefer and James P. Scherz, 149

Repeated loading; Shear modulus; Soils; Stress-strain curves; Vibration; Analysis; Damping; Design data; Earthquakes
Shear Modulus and Damping in Soils: Design Equations and Curves, Bobby O. Hardin and Vincent P. Drnevich, 354

Replacement theory; Construction; Construction equipment; Mathematical models
Sensitivity Analysis of Douglas Equipment Life Model, Neal B.H. Benjamin, 283

Reports; Abutments; Dams (earth); Dams (embankment); Dams (rockfill); Foundations
Foundation and Abutment Treatment for High Embankment Dams on Rock by the Committee on Embankment Dams and Slopes of the Soil Mechanics and Foundations Division, H. Bolton Seed, Chmn., 490

Reports; ASCE (committees); ASCE (professional activities); ASCE (service to members); ASCE (younger members)
The Associate Member in ASCE, Committee on Younger Members of the Member Activities Division (PAC), Norman J. Overbeek, Chmn., 119

Reports; Hydraulics; Libraries; Problem oriented languages; Programming languages
Computer Languages and Program Libraries, by the Task Committee on Problem Orientation Languages in Hydrology of the Committee on Surface-Water Hydrology of the Hydraulics Division., George Bugliarello, Chmn., 397

Reports; Reviews; Sanitary engineering; Systems engineering; ASCE (Committees); ASCE (Education); ASCE (Publications)
Professional Papers in Sanitary Engineering, By the Committee on Publications of the Sanitary Engineering Division, Roy E. Ramseier, Chmn., 461

Reports; Rivers; Sedimentation; Bed movements; Channel stabilization; Channels (waterways)
Sediment Control Methods: B. Stream Channels, by the Task Committee on Preparation of Sedimentation Manual, Committee on Sedimentation, Vito A. Vanoni, Chmn., 391

Reports; Salaries; Civil engineers; Consulting engineers; Municipal engineering; Professional practice
1971 ASCE Salary Survey, the Committee on Employment Conditions of the Department of Professional Activities, Charles J. Stevens, Chmn., 347

Reports; Sanitary engineering; Thermal pollution; Water pollution; Water quality; Abstracts; Indexes (documentation); Information retrieval
Information Sources on Water Quality, Including Thermal Pollution, the Committee on Thermal Pollution of the Sanitary Engineering Division, Fred A. Limpert, Chmn., 407

Reports; Scale (ratio); Surveying; Contours; Mapping
Selection of Maps for Engineering and Planning, by the Task Committee for the Preparation of a Manual on Selection of Map Types, Scales, and Accuracies for Engineering and Planning of the Committee on Cartographic Surveying of the Surveying and Mapping Division, Antonio M. Aguilar, Chmn., 420

Reports; Surveys; Awards; Civil engineers; Engineering education; Geodetic surveys; Mapping
Status Report of Surveying and Mapping Division, William A. White, 121

Research; ASCE (Activities); ASCE (Policy); ASCE (Research); Civil engineering; Government policies; Professional activities
Goals of Civil Engineering Research -- Its Responsiveness to the Needs, Desires and Aspirations of Man, ASCE Committee on Research, Robert F. Baker, Chmn., 599

Research; Fluid mechanics; Hydraulics; Planning
Research and Planning in Fluid Mechanics, Stephen J. Kline, 281

Research; Sanitary engineering; Bacteria; Chemical stabilization; Chlorine; Public health; Recreation facilities
Bactericidal Properties of Chlorsulfamates, John E. Delaney and J. Carrell Morris, 209

Research; Sanitary engineering; Sewage treatment; Waste disposal; Waste treatment; Water quality
Research Needs for Advanced Waste Treatment, Francis M. Middleton and Robert L. Stenburg, 367

Research; Sanitary engineering; Solid wastes; Waste water; Water resources; Water treatment; Air pollution; Industrial wastes; Municipal water
Research Needs in Sanitary Engineering, Sanitary Engineering Research Committee of the Sanitary Engineering Division, Jack M. Betz, Chmn., 321

Research; Schools; Traffic surveys; Transportation; Community relations; Decision making; Disadvantaged groups; Government
Transportation Research for Community Objectives, Arthur Saltzman, Sidney H. Evans, Alice E. Kidder and Florentine Sowell, 555

Research; Sedimentation; Sediment control; Urban development; Urban planning; Economics; Erosion; Hydraulics; Land use
Urban Sedimentation in Perspective, Harold P. Guy and D. Earl Jones, Jr., 574

Research; Shear strength; Structural engineering; Tests; Torsion; Beams (supports); Concrete (reinforced); Reinforcement
Total Interaction Method for Torsion Design, K. S. Rajagopalan, Umakanta Behera and Phil M. Ferguson, 467

Research; Skin friction; Transition flow; Turbulence; Fluid flow; Hydraulics
Experiments on Plane Couette Flow, Hans J. Leutheusser and Vincent H. Chu, 7

Research; Steels; Structural engineering; Buckling; Chimneys; Design; Liner plates; Loads (forces); Power
Design of Steel Chimney Liners, Max Zar, Shih-Lung Chu and James M. Doyle, 500

Research; Structural engineering; Trenches; Buried structures; Culverts; Field tests; Pressure gages
Concrete Arch Culvert Behavior-Phase 2, Raymond Eugene Davis and Alfred E. Bacher, 521

Research; Transportation; Urban development; Land use; Models
Analysis of BART Impacts on Bay Area Land Use, Douglass B. Lee, Jr., 226

Research and development; Soil mechanics; Test procedures; Chemical grouts; Chemical reactions; Compacting
Strength Properties of Chemically Solidified Soils, James Warner, 503

Reservoir design; Skiing; Ecology; Environmental effects; Parks; Recreational facilities
Civil Engineering for Recreation, Ernst W. Kiesling and George A. Whetstone, 182

Reservoirs; River flow; Canada; Diversion; Linear algebraic equations; Linear programming; Nonlinear algebraic equations; Optimization
Optimization Model for Churchill River Diversion, Abu M.Z. Alam, 409

Reservoirs; Sealers; Tests; Asphalts; Bituminous concretes; Concrete; Dams; Dikes; Embankments; Pumped storage
Bituminous Blanket for Dike, F. P. Robertson and Johannes Lehnert, 537

Reservoirs; Sedimentation; Water quality; Watersheds; Erosion; Hydraulics; Hydrology; Mathematical models
Sediment Yield Computed With Universal Equation, Jimmy R. Williams and Harold D. Berndt, 578

Reservoirs; Sediment deposits; Watersheds; Density; Forest land; Idaho; Organic matter
Volume Weight of Reservoir Sediment in Forested Areas, Walter F. Megahan, 435

Reservoirs; Temperature; Thermal stratification; Water quality; Hydraulics
Temperature Prediction in Stratified Reservoirs, Wayne C. Huber, Donald R.F. Harleman and Patrick J. Ryan, 234

Reservoirs; Temperature; Wind (meteorology); Drainage; Perlite
Reducing Pond Evaporation with Perlite Ore, Keith R. Cooley and C. Brent Cluff, 305

Reservoir storage; Reservoir yield; Stream flow; Water supply; Drainage; Droughts; Irrigation
Drought Severity and Water Supply Dependability, Leo R. Beard and Harold E. Kubik, 539

Reservoir storage; Runoff; Stochastic processes; Distribution functions; Hydraulics; Hydrology
Some Problems with Log-Normal Markov Runoff Models, Stephen J. Burges, 443

Reservoir storage; Safe yield; Water resources development; Water supply; Draft-storage curves; Irrigation; Low-flow augmentation; Probability theory
Potential United States Water-Supply Development, Clayton H. Hardison, 528

Reservoir yield; Stream flow; Water supply; Drainage; Droughts; Irrigation; Reservoir storage
Drought Severity and Water Supply Dependability, Leo R. Beard and Harold E. Kubik, 539

Resonance; Characteristics; Frequency; Hydraulics; Matrices (mathematics); Pipelines
Resonance in Pipes Having Variable Characteristics, M. Hanif Chaudry, 159

Resonance; Sands; Shear modulus; Soil mechanics; Tests; Undrained shear tests; Confining pressure; Cyclic loads; Damping
Undrained Cyclic Shear of Saturated Sand, Vincent P. Drnevich, 431

Resonance; Wave energy; Coastal engineering; Mass; Offshore structures; Periodic functions
Resonant Response of Offshore Structures, Lawrence G. Selna and David Cho, 155

Resource allocation; Scheduling; Computers; Construction; Critical path method; Management; Networks; Planning
Man-Computer Concepts for Planning and Scheduling, Boyd C. Paulson, Jr., 546

Resources; Sanitary landfill; Solid wastes; Waste disposal; Economic feasibility; Environmental engineering
How Urgent the Need to Recycle Solid Waste, Robert D. Bargman, 434

Retaining walls; Soil mechanics; Clays; Earth pressure; Lateral pressure; Model tests
Lateral Pressures from Soft Clay, Peter J. Moore and Graham K. Spencer, 538

Retaining walls; Soil mechanics; Soil-structure interaction; Earth pressure
Finite Element Analyses of Retaining Wall Behavior, Gerald W. Clough and James M. Duncan, 95

Retaining walls; Soil mechanics; Soil-structure interaction; Stress distribution; Velocity distribution; Walls; Earth pressure; Mobility
Effect of Wall Movement on Active and Passive Pressures, Ian K. Lee and John R. Herington, 347

Retirement; Transportation; Urban transportation; Automobiles; Ethnic groups; Mobility; Passenger transportation
Transportation and Retirement, Frances M. Carp, 484

Revenue; Urban planning; Urban renewal; Government
HUD Sewer Policy in Urban Renewal Areas, Francis J. Blesso, 246

Revenues; Taxes; Transportation; Government policies; Highway planning; Michigan
Michigan Transportation in the Seventies, William C. Taylor, 510

Reviews; Sanitary engineering; Systems engineering; ASCE (Committees); ASCE (Education); ASCE (Publications); Reports
Professional Papers in Sanitary Engineering, By the Committee on Publications of the Sanitary Engineering Division, Roy E. Ramseier, Chmn., 461

Reviews; Technology; Animal behavior; Books; Human engineering; Philosophy
Anti-Technology--The New Myth, Samuel C. Florman, 53

Revisions; Stiffness matrix; Structural design; Structural members; Algorithms; Engineering mechanics; Matrices (mathematics)
Reanalysis for Limited Structural Design Modifications, Uri Kirsch and Moshe F. Rubinstein, 75

Rhode island; Strands; Structural engineering; Bridges (suspension); Cables (ropes)
Main Cables of Newport Suspension Bridge, Blair Birdsall, 58

Ribs (supports); Steels; Structural engineering; Tests; Welding; Bridges (decking); Bridges (orthotropic); Fatigue (materials)
Fatigue of Orthotropic Steel Decks, Hacik Erzurumlu and A. Anthony Toprac, 205

Right-of-way; Right of way acquisition; Street railroads; Subways; Transportation; Construction costs; Elevated railroads; Rapid transit railways; Regional planning
Expressway Rapid Transit, George Krambles, 590

Right-of-way; Right of way acquisition; Transmission towers; Alignment; Highways; Land use; Pipelines; Regional planning
Joint Utilization of Rights-of-Way, Francis J. Stastny, 130

Right of way acquisition; Esthetics; Grading (earthwork); Highway beautification; Highway engineering
Esthetics in Highway Design, Donald Van Riper, 177

Right of way acquisition; Street railroads; Subways; Transportation; Construction costs; Elevated railroads; Rapid transit railways; Regional planning; Right-of-way
Expressway Rapid Transit, George Krambles, 590

Right of way acquisition; Surveying; Boundaries (property); Land surveys; Public land
Recommended Right-of-Way Practices, Harmer A. Weeden, 211

Right of way acquisition; Transmission towers; Alignment; Highways; Land use; Pipelines; Regional planning; Right-of-way
Joint Utilization of Rights-of-Way, Francis J. Stastny, 130

Right of way acquisition; Transportation; Urban transportation; Environments; Freeways; Highways; Multiple use
Multiple Use of City Transportation Corridor, Harry R. Powell and F. G. Alden, 285

Rigid frames; Shear; Structural analysis; Structural engineering; Tall buildings; Walls
Approximate Inelastic Analysis of Shear Wall-Frame Structures, James G. MacGregor, Sauren N. Guha Majumdar, Rajendra P. Nikhed and Peter F. Adams, 551

Rigid frames; Skyscrapers; Structural engineering; Tests; Buckling; Columns (supports)
Inelastic Multistory Frame Buckling, Bernard M. McNamee and Le-Wu Lu, 368

Rigid frames; Static structural analysis; Structural analysis
Rapid Design of Tapered Rigid Frames, Duane S. Ellifritt, 323

Rigid pavements; Synthetic rubber; Joints (connections); Joint sealers; Polyvinyl chloride
Pavement Joint Seals, Kneeland A. Godfrey, Jr., 127

Rigid pavements; Transportation; Aircraft; Air transportation; Construction; Joints (junctions); Keys (splines); Pavements
Keyed Joint Performance Under Heavy Loaded Aircraft, John L. Rice, 561

Rigid pavements; Transportation; Elastic foundations; Foundations; Highway engineering; Pavements
Advanced Analysis of Rigid Pavements, Sue K. Wang, Michel Sargious and Yau Kai Cheung, 36

Rings; Static structural analysis; Deflection; Displacement; Engineering mechanics; Equilibrium; Fourier series
Linear Theory of Thin Rings, Harry E. Williams, 436

Rings; Structural engineering; Vibration; Arches; Dynamics; Engineering mechanics; Numerical analysis
Free In-Plane Vibration of Circular Arches, Anestis S. Veletsos, Walter J. Austin, Carlos A. Lopes Pereia and Shyr-Jen Wung, 176

Ripple marks; Alluvial deposits; Friction factor; Hydraulics; Open channel flow
Ripple and Dune Phases in a Narrowly Graded Sand, Christopher John Pratt and Kenneth V.H. Smith, 296

Ripple marks; Sand waves; Sedimentation; Bed movements; Channels (waterways); Hydraulics
Initiation of Ripples by Artificial Disturbances, Philip B. Williams and Patrick H. Kemp, 328

Risk; Safety factors; Seismic design; Building codes; Buildings; Earthquake resistant structures; Earthquakes
The Balanced Risk Concept: New Approach to Earthquake Building Codes, John H. Wiggins, 377

River beds; Armoring (streambed); Bed roughness; Degradation; Egypt; Hydraulics
River Bed Degradation After Closure of Dams, Hammad Y. Hammad, 220

River closures; Rivers; Stability; Acceleration tolerance; Construction; Dams (embankment); Dams (rockfill); Hydraulics
Stability of Rockfill in End-Dump River Closures, Bishnu P. Das, 567

River flow; Canada; Diversion; Linear algebraic equations; Linear programming; Nonlinear algebraic equations; Optimization; Reservoirs
Optimization Model for Churchill River Diversion, Abu M.Z. Alam, 409

River flow; Construction methods; Data acquisition; Hydraulics; Mathematical models; Probability distribution functions
Stochastic Five Daily Stream Flow Model, Nath T. Kottegoda, 438

River flow; Sedimentation; Dredging; Harbors; Hydroelectric power generation; Power
Sedimentation Effects of Hydroelectric Development, Jack F. Rasmussen, 469

River regulation; River training; Thailand; Alluvial streams; Bank protection (waterways); France; Inland waterways
Development of Bottom Panels in River Training, Maurice Remillieux, 300

Rivers; Building codes; Flood control; Flood protection; Floods; Floods
Pullman Tackles its Flooding Problems, Howard D. Copp, 360

Rivers; Channels (waterways); Computation; Diffusion; Floods; Hydraulics
Diffusion Solution To Flows with Upstream Control, Alex J. Sutherland and Alistair G. Barnett, 537

Rivers; Hydraulics; Ice; Ice jams; Mathematical models
Stability of Floating Ice Blocks, Mehmet S. Uzuner and John F. Kennedy, 571

Rivers; Sag; Sanitary engineering; Stream pollution; Use rates; Ice cover; Oxygen; Oxygen consumption
Oxygen Depletion in Ice Covered River, Patrick H. Bouthillier, 326

Rivers; Salinity; Salt removal; Water resources; Agriculture; Hydraulics
Present and Future Salinity of Colorado River, Myron B. Holburt and Vernon E. Valentine, 192

Rivers; Sands; Statistical analysis; Waterways; Waves; Hydraulics
Statistical Properties of Missouri River Bed Forms, V.S. Shastri Annambhotla, William W. Sayre and Robert H. Livesey, 544

Rivers; Sanitary engineering; Sewage treatment; Aeration; Dissolved oxygen
Aeration System for Large Navigable Rivers, William Whipple, Jr. and Shaw L. Yu, 135

Rivers; Sea water; Water pollution; Booms (equipment); Containment; Oily water; Pollution
Dynamics of Contained Oil Slicks, David L. Wilkinson, 324

Rivers; Sedimentation; Bed movements; Channel stabilization; Channels (waterways); Reports
Sediment Control Methods: B. Stream Channels, by the Task Committee on Preparation of Sedimentation Manual, Committee on Sedimentation, Vito A. Vanoni, Chmn., 391

Rivers; Sedimentation; Sediment load; Bed load; Hydraulics
Sedimentation Transportation Mechanics: G. Fundamentals of Sediment Transportation, Task Committee on Preparation of Sedimentation Manual, Committee on Sedimentation, Vito A. Vanoni, Chmn., 64

Rivers; Sedimentation; Streams; Bed load; Bedload movement; Hydraulics
Sediment Discharge Computation Procedures, Nick Tywoniuk, 213

Rivers; Sediments; Bed load; Channels; Flumes; Hydraulics; Pipe flow
Friction Factors in Solid Material Laden Systems, Ertan R. Acaroglu, 241

Rivers; Sediments; Sediment transport; Statistical analysis; Concentration; Hydraulics; Power
Unit Stream Power and Sediment Transport, Chih Ted Yang, 519

Rivers; Sediment transport; Bed load; Hydraulics
Sediment Transport Measurements in Gravel River, Albert B. Hollingshead, 47

Rivers; Sewage disposal; Solid wastes; Natural resources; Professional activities
Interdisciplinary Planning to Meet Environmental Needs, Frederick J. Clarke, 535

Rivers; Simulation; Tides; Water waves; Waterways; Hydraulic models; Hydraulics; Inlets (waterways)
Simulation of Long Waves in Branching Waterways, Robert F. Henry, 224

Rivers; Stability; Acceleration tolerance; Construction; Dams (embankment); Dams (rockfill); Hydraulics; River closures
Stability of Rockfill in End-Dump River Closures, Bishnu P. Das, 567

Rivers; Stability; Thermal conductivity; Flow patterns; Freeze-thaw cycle; Hydraulics; Ice
Ripples on Underside of River Ice Covers, George D. Ashton and John F. Kennedy, 470

Rivers; Streams; Thermoelectric power generation; Heated water; Hydraulic models; Hydraulics; Jets; Pollution
Surface Jet Model for Heated Discharges, Louis H. Motz and Barry A. Benedict, 136

Rivers; Thermoelectric power generation; Environmental engineering; Finite element method; Fluid flow; Heated water; Hydraulics; Jets; Lakes
Hydrothermal Analysis by Finite Element Method, Larry A. Loziuk, James C. Anderson and Ted Belytschko, 559

Rivers; Tides; Tidewater; Waterways (transportation); Estuaries; India; Mathematical models; Models
Mathematical Model of River Hooghly, Donald M. McDowell and David Prandle, 209

Rivers; Water flow; Channel stabilization; Curves; Hydraulics
Flow Processes in Open Channel Bends, Robert P. Apmann, 263

Rivers; Water resources; Weather modification; Cloud seeding; Irrigation; Meteorology; Rainfall
Cloud Seeding Interpreted Through Atmospheric Water Balance, James L. Rasmussen, 562

River training; Thailand; Alluvial streams; Bank protection (waterways); France; Inland waterways; River regulation
Development of Bottom Panels in River Training, Maurice Remillieux, 300

Roads; Statistical analysis; Transportation; Costs; Economics; Highways
Local Rural Road Costs and Economies of Scale, William D. Berg, 478

Rock bolts; Soil mechanics; Dilatancy; Finite element method; Joints (geology)
Duplication of Dilatancy in Analysis of Jointed Rocks, Richard E. Goodman and Jacques Dubois, 274

Rock drilling; Room and pillar mining; Tunneling (excavation); Underground storage; Cost savings
How to Cut Underground Construction Costs, R. L. Loofbourow, 310

Rock fills; Shear strength; Soil mechanics; Triaxial tests; Grain sizes; Model studies
Evaluation of Properties of Rockfill Materials, N. Dean Marschi, Clarence K. Chan and H. Bolton Seed, 160

Rock fills; Soil mechanics; Abutments; Cutoffs; Dams (rockfill); Foundations; Geology; Grouting; Jets
Foundation Practices for Talbingo Dam, Australia, B. J. Wallace and J. I. Hilton, 492

Rock mechanics; Bids; Claims (contracts); Construction; Contracts
Changed Soil and Rock Conditions in Construction, George F. Sowers, 83

Rock mechanics; Seepage; Soil mechanics; Abutments; Dams; Dams (embankment); Foundations
Abutment and Foundation Treatment for High Embankment Dams on Rock, Reginald A. Barron, 491

Rock mechanics; Shear strength; Slope stability; Soil mechanics; Engineering geology; Landslides; Pennsylvania
Failure of Colluvial Slope, James V. Hamel and Norman K. Flint, 189

Rock mechanics; Tests; Dams; Dams (arch); Dams (concrete); Foundations; Hydraulic models; Hydraulics; Materials tests
Auburn Dam -- World's Longest Arch Dam, Alfred T. Lewis, 445

Rocks; Shields (tunneling); Tunneling (excavation); Vehicular tunnels; Boring machines; Construction; Faults (geology)
Vehicular Tunnels in Rock - Direction for Development, Richard J. Robbins, 379

Rolling friction; Safety; Tires; Traffic safety; Human behavior; Pavements
Current Methods For Improved Tire-Pavement Interaction, Bob M. Galloway and Jon A. Epps, 505

Roofs; Sandwich structures; Shells (structural forms); Structural engineering; Structural plastics; Computation; Construction procedure; Finite elements; Glass fibers
Plastic Sandwich Buckle-Shell Structures, V. James Meyers, Dhamo T. Ramani and Mark E. Greenwood, 515

Roofs; Shells (structural forms); Structural engineering; Buckling; Hyperbolic parabolic shells; Membranes
Analysis of Thin-Steel Hyperbolic Paraboloid Shells, Prabodh V. Banavalkar and Peter Gergely, 557

Roofs; Shells (structural forms); Structural engineering; Tests; Hyperbolic parabolic shells; Membranes
Experimental Investigation Of Thin-Steel Hyperbolic Paraboloid Structures, Peter Gergely and George Winter, 473

Roofs; Shells (structural forms); Thin shell structures; Hyperbolic parabolic shells
Analysis of Hipped Roof Hyperbolic Paraboloid Structures, William C. Schnobrich, 359

Roofs; Stadiums; Suspended structures; Cables (ropes); Germany
Cable Suspended Roof for Munich Olympics, Fritz Leonhardt and Jorg Schlaich, 319

Roofs; Stiffness methods; Structural engineering; Cables (ropes); Computation; Finite elements; Prestressing
Large Deflection Analysis of Prestressed Networks, John H. Argyris and Dieter W. Scharpf, 185

Roofs; Structural engineering; Bridges (cable-stayed); Bridges (structures); Buildings; Cables (ropes)
Mechanical Properties of Structural Cables, John B. Scalzi and William K. McGrath, 52

Room and pillar mining; Tunneling (excavation); Underground storage; Cost savings; Rock drilling
How to Cut Underground Construction Costs, R. L. Loofbourow, 310

Root systems; Transpiration; Water loss; Darcys law; Irrigation
Simulation of Post-Irrigation Moisture Movement, Fred J. Molz, 580

Rotation; Structural engineering; Beams (supports); Boundary value problems; Buckling; Composite structures
Moment-Rotation Curves for Locally Buckling Beams, J. Jay Climenhaga and R. Paul Johnson, 290

Routing; Social needs; Transportation; Urban transportation; Buses (vehicles); Passenger transportation
Demand Activated Transportation for The Elderly, Charles B. Notess and Robert E. Paaswell, 456

Rubber; Bearing pads; Bridges (piers); Elastomers; Reinforcement (structures)
Elastomeric Bridge Bearings, Charles E. Rejcha, 233

Rubble mounds; Wave height; Breakwaters; Coastal engineering; Harbors
Effect of Irregular Wave Trains on Rubble-Mound Breakwaters, Yvon Ouellet, 119

Runge-Kutta method; Stiffness methods; Structural engineering; Beams (supports); Plates
Nonlinear Beam and Plate Elements, Jimmy H. Smith, 158

Runoff; Combined sewers; Computers; Hydrology
A System for Regulation of Combined Sewage Flows, Charles V. Gibbs, Stuart M. Alexander and Curtis P. Leiser, 506

Runoff; Rural areas; Sanitary engineering; Agricultural wastes; Erosion; Nutrients; Pollution
Agricultural Runoff-Characteristics and Control, Raymond C. Loehr, 520

Runoff; Seepage; Snow; Drainage; Overland flow
Volume of Snowmelt Intercepted by Logging Roads, Edward R. Burroughs, Jr., Michael A. Marsden and Harold F. Haupt, 145

Runoff; Stochastic processes; Distribution functions; Hydraulics; Hydrology; Reservoir storage
Some Problems with Log-Normal Markov Runoff Models, Stephen J. Burges, 443

Runoff; Storms; Antecedent precipitation; Hydraulics; India; Rainfall-runoff relationships
Synthetic Storm Pattern and Run-off for Gauhati, India, M. Bandyopadnyay, 270

Runoff; Subdivisions; Urban planning; Waterways (watercourses); Drainage; Floods; Hydraulics; Hydrology; Land use; Legislation; Municipal engineering; Professional practice
An Engineer Looks at Drainage Law, Alfred R. Pagan, 511

Runoff; Urban areas; Watersheds; Hydraulics; Hydrographs; Hydrology; Mathematical models
University of Cincinnati Urban Runoff Model, Constantine Papadakis and Herbert C. Preul, 523

Runoff; Water flow; Flow resistance; Overland flow
Obtaining Overland Flow Resistance by Optimization, David L. Schreiber and Donald L. Bender, 196

Runoff; Watersheds; Discharge; Drainage; Evaporation; Hydraulics; Precipitation (meteorology)
A Model to Predict Mean Annual Watershed Discharge, Steven I. Majtenyi, 373

Rural areas; Sanitary engineering; Agricultural wastes; Erosion; Nutrients; Pollution; Runoff
Agricultural Runoff-Characteristics and Control, Raymond C. Loehr, 520

Safety; Safety devices; Construction equipment; Cranes (hoists)
Crane Safety, Suzy Fisher, 93

Safety; Safety devices; Safety engineering; Employee relations; Productivity; Professional practice
What a Good Safety Program Means, C. H. Shaw, Jr., 447

Safety; Safety devices; Tests; Transportation; Attenuators; Collisions; Highways
Recent Developments in Roadside Crash Cushions, John G. Viner, 99

Safety; Safety engineering; Sound level meters; Management; Protective clothing
Surveying Safety, John M. Shields and Jack J. Wilks, 364

Safety; Safety engineering; Structural engineering; Bibliographies; Construction; Probability theory
Structural Safety--A Literature Review, Task Committee on Structural Safety of the Administrative Committee on Analysis and Design for the Structural Division, Alfredo H.S. Ang, Chmn., 214

Safety; Schools; Traffic; Data systems; Parking areas; Parking facilities; Personnel; Regulations
Management System for Campus Traffic Planning, Michael J. Quillem and Jason C. Yu, 527

Safety; Signals; Traffic; Benefit-cost ratios; Costs; Federal agencies; Highways
Federal Experience in TOPICS, Hugh B. Henry, 292

Safety; Standards; Transportation; Utilities; Government; Pipelines
The State's Role in Gas Safety, Harold E. Shutt, 46

Safety; Tires; Traffic safety; Human behavior; Pavements; Rolling friction
Current Methods For Improved Tire-Pavement Interaction, Bob M. Galloway and Jon A. Epps, 505

Safety; Traffic engineering; Drainage; Freeways; Highway engineering; Highways; Maintenance; Pavements
Current Practices in Highway Maintenance: A Reference List, Committee on Construction, Maintenance and Operation of Highways of the Highway Division., Walter E. Capper, Chmn., 260

Safety; Traffic engineering; Transportation; Automobiles; Computers; Dynamics; Highways
Vehicle-Roadway Interaction Studies by Math Model, Hayes E. Ross, Jr. and Don L. Ivey, 249

Safety; Water distribution (applied); Water law; Water rights; Drainage; Ground water; Irrigation
General Statement of Principles to be Included in State Water Rights Laws, Committee on Water Laws of the Irrigation and Drainage Division, Floyd A. Bishop, Chmn., 396

Safety belts; Safety devices; Safety engineering; Construction; Construction equipment; Construction industry
Will OSHA Make The Construction Industry Safer, Darrell J. Turner, 89

Safety devices; Construction equipment; Cranes (hoists); Safety
Crane Safety, Suzy Fisher, 93

Safety devices; Safety engineering; Construction; Construction equipment; Construction industry; Safety belts
Will OSHA Make The Construction Industry Safer, Darrell J. Turner, 89

Safety devices; Safety engineering; Employee relations; Productivity; Professional practice; Safety
What a Good Safety Program Means, C. H. Shaw, Jr., 447

Safety devices; Tests; Transportation; Attenuators; Collisions; Highways; Safety
Recent Developments in Roadside Crash Cushions, John G. Viner, 99

Safety engineering; Construction; Construction equipment; Construction industry; Safety belts; Safety devices
Will OSHA Make The Construction Industry Safer, Darrell J. Turner, 89

Safety engineering; Consumers; Costs; Liabilities; Litigation; Product development
Designing to Prevent Liability Lawsuits, Norman B. Chew, 44

Safety engineering; Employee relations; Productivity; Professional practice; Safety; Safety devices
What a Good Safety Program Means, C. H. Shaw, Jr., 447

Safety engineering; Sound level meters; Management; Protective clothing; Safety
Surveying Safety, John M. Shields and Jack J. Wilks, 364

Safety engineering; Structural engineering; Bibliographies; Construction; Probability theory; Safety
Structural Safety--A Literature Review, Task Committee on Structural Safety of the Administrative Committee on Analysis and Design for the Structural Division, Alfredo H.S. Ang, Chmn., 214

Safety factor; Structural engineering; Dynamics; Earthquake loads
Concept of Structural Control, James T. P. Yao, 357

Safety factors; Dynamic loads; Engineering mechanics; Probability theory
Filtered Poisson Process for Random Vibration Problems, Ronald L. Racicot and Fred Moses, 110

Safety factors; Seismic design; Building codes; Buildings; Earthquake resistant structures; Earthquakes; Risk
The Balanced Risk Concept: New Approach to Earthquake Building Codes, John H. Wiggins, 377

Safety factors; Slope stability; Soil mechanics; Stress distribution; Cracking; Failure
Influence of Progressive Failure On Slope Stabilities, Fredy Romani, C. William Lovell, Jr. and Milton E. Harr, 530

Safety factors; Steels; Strength; Stress analysis; Bridge design; Bridges (structures); Cracking (fracturing); Criteria; Failure; Fractures
Fracture Mechanics, With High-Strength Steels A Must, Stanley T. Rolfe, 357

Safety factors; Tests; Welded joints; Welding; Fasteners; Joints (connections)
Eccentrically Loaded Welded Connections, Lorne J. Butler, Shubendu Pal and Geoffrey L. Kulak, 233

Safe yield; Water resources development; Water supply; Draft-storage curves; Irrigation; Low-flow augmentation; Probability theory; Reservoir storage
Potential United States Water-Supply Development, Clayton H. Hardison, 528

Sag; Sanitary engineering; Stream pollution; Use rates; Ice cover; Oxygen; Oxygen consumption; Rivers
Oxygen Depletion in Ice Covered River, Patrick H. Bouthillier, 326

Salaries; Civil engineers; Consulting engineers; Municipal engineering; Professional practice; Reports
1971 ASCE Salary Survey, the Committee on Employment Conditions of the Department of Professional Activities, Charles J. Stevens, Chmn., 347

Salaries; Schools; Unionization; Civil engineers; Collective bargaining; Education; Engineering education; Labor relations; Management
Collective Bargaining on the Campus, B. Austin Barry, 563

Salaries; Unionization; ASCE (committees); ASCE (professional activities); Economic factors
National ASCE Drafts Proposed Salary Guidelines9

Salaries; Unionization; ASCE (Employment Conditions); ASCE (Salaries and Fees); Collective bargaining; Engineering societies
Civil Engineer's Compensation - ASCE's Future, Daniel J. Smyers, 500

Salaries; Working conditions; ASCE (local sections); California; Civil engineers
California ASCE Sections Prepare Employment Guidelines, George S. Korbay and Ronald P. Gallagher, 25

Salary administration; Budgeting; Consulting engineers; Financial management; Personnel management
Financial Tools for a Consulting Firm, Roy T. Sheehey, 48

Salinity; Salt removal; Water resources; Agriculture; Hydraulics; Rivers
Present and Future Salinity of Colorado River, Myron B. Holburt and Vernon E. Valentine, 192

Salinity; Salt water intrusion; Stratification; Water pollution; Water quality; Waterways; Density; Harbors; Locks (waterways)
Mardyck Lock Acts as Salt-Water Barrier, Ch. Blanchet and B. Quetin, 600

Salinity; Statistical analysis; Virginia; Estuaries; Hydraulic models; Hydraulics; Models
Repeatability in Estuarine Hydraulic Model, Paul V. Hyer, 229

Salinity; Tests; Agriculture; Aquifers; Artesian wells; Drainage; Irrigation; Pumping
Pumping an Artesian Source for Water Table Control, Eugene J. Doering and Leo C. Benz, 344

Salinity; Two phase flow; Computation; Density; Estuaries; Fluid flow; Hydraulics
Numerical Computation of Stratified Nearly Horizontal Flows, John P. Grubert and Michael B. Abbott, 530

Salt; Temperature; Turbulence; Velocity; Hot film anemometers; Laboratory tests; Mixing; Power
Velocity and Temperature in Buoyant Jet, Richard Dornhelm, Manuel Nouel and Robert L. Wiegel, 148

Salt marshes; Sediments; Water quality; Coastal engineering; Dredging; Estuaries
Environmental Aspects of Dredging in Estuaries, Herbert L. Windom, 529

Salt removal; Water resources; Agriculture; Hydraulics; Rivers; Salinity
Present and Future Salinity of Colorado River, Myron B. Holburt and Vernon E. Valentine, 192

Salt water intrusion; Stratification; Water pollution; Water quality; Waterways; Density; Harbors; Locks (waterways); Salinity
Mardyck Lock Acts as Salt-Water Barrier, Ch. Blanchet and B. Quetin, 600

Salt water intrusion; Water pollution; Water resources; Analogs; Aquifers; Ground water; Hydraulics; Hydrology
Hele-Shaw Model of Long Island Aquifer System, Michael A. Collins, Lynn W. Gelhar and John L. Wilson, III, 489

Samples; Sanitary engineering; Solid wastes; Statistical analysis
Improving Manual Solid Waste Separation Studies, Paul W. Britton, 454

Sands; Scour; Vortices; Beds under water; Dikes; Erosion; Hydraulics
Erosion of Sand Beds Around Spur Dikes, Mohammad Akram Gill, 476

Sands; Sediment transport; Streams; Bed load; Hydraulics; Laboratory tests
Laboratory Study of Transport of Fine Sand, Joe C. Willis, Neil L. Coleman and Wilbert M. Ellis, 183

Sands; Seismic design; Soil mechanics; Earthquakes; Liquefaction
Simplified Procedure for Evaluating Soil Liquefaction Potential, H. Bolton Seed and Izzat M. Idriss, 8

Sands; Shear modulus; Soil mechanics; Tests; Undrained shear tests; Confining pressure; Cyclic loads; Damping; Resonance
Undrained Cyclic Shear of Saturated Sand, Vincent P. Drnevich, 431

Sands; Shear strain; Soil mechanics; Compaction; Density
Compaction of Sands By Repeated Shear Straining, T. Leslie Youd, 382

Sands; Shear strain; Soil mechanics; Vibration; Cohesionless soils; Earthquakes
Settlement of Dry Sands During Earthquakes, H. Bolton Seed and Marshall L. Silver, 264

Sands; Slipping; Soil mechanics; Vehicles; Clays; Limit design method
Stress Field Under Slipping Rigid Wheel, Mohammed K. Elsamny and Ahmed A. Ghobarah, 113

Sands; Soil mechanics; Bearing capacity; Impact tests; Penetration; Projectiles
Low Velocity Projectile Penetration, Wen L. Wang, 104

Sands; Soil mechanics; Strains; Anchorages; Bearing capacity; Models
Anchor Behavior in Sand, Thomas H. Hanna, Robert Sparks and Mehmet Yilmaz, 521

Sands; Soil mechanics; Vibration; Vibratory compaction; Mechanics
Subsidence of Sand Due to Surface Vibration, William F. Brumund and Gerald A. Leonards, 133

Sands; Statistical analysis; Waterways; Waves; Hydraulics; Rivers
Statistical Properties of Missouri River Bed Forms, V.S. Shastri Annambhotla, William W. Sayre and Robert H. Livesey, 544

Sand waves; Sedimentation; Bed movements; Channels (waterways); Hydraulics; Ripple marks
Initiation of Ripples by Artificial Disturbances, Philip B. Williams and Patrick H. Kemp, 328

Sandwich laminates; Transfer functions; Composite structures; Elastic properties; Engineering mechanics; Matrices (mathematics)
Transfer Matrix Approach to Layered Systems, Leon Y. Bahar, 479

Sandwich laminates; Vibration; Engineering mechanics; Finite elements; Natural frequency; Plates
Triangular Element for Multilayer Sandwich Plates, Tara P. Khatua and Yau Kai Cheung, 443

Sandwich panels; Boundary conditions; Engineering mechanics; Finite elements; Plates (structural members)
Finite Element Method for Elastic Plastic Plates, Ted Belytschko and Milan Velebit, 103

Sandwich panels; Shells (structural forms); Structural analysis; Continuum mechanics; Engineering mechanics
Cosserat Surface and Sandwich Shell Equilibrium, David J. Malcolm and Peter G. Glockner, 453

Sandwich panels; Structural engineering; Aluminum; Folded plates; Honeycomb cores
Failure Modes of Folded Sandwich Panel Roofs, Paul P. Fazio, 261

Sandwich structures; Arches; Buckling; Engineering mechanics
Nonlinear Buckling Analysis of Sandwich Arches, Parviz Sharifi and Egor P. Popov, 11

Sandwich structures; Shells (structural forms); Compatibility; Continuum mechanics; Engineering mechanics
Nonlinear Sandwich Shell and Cosserat Surface Theory, David J. Malcolm and Peter G. Glockner, 459

Sandwich structures; Shells (structural forms); Structural engineering; Structural plastics; Computation; Construction procedure; Finite elements; Glass fibers; Roofs
Plastic Sandwich Buckle-Shell Structures, V. James Meyers, Dhamo T. Ramani and Mark E. Greenwood, 515

Sanitary engineering; Additives; Drag; Fire fighting; Flow resistance; Pipe flow; Polymers
Drag Reduction Application in Fire Fighting Systems, Hillel Rubin, 149

Sanitary engineering; Agricultural wastes; Erosion; Nutrients; Pollution; Runoff; Rural areas
Agricultural Runoff-Characteristics and Control, Raymond C. Loehr, 520

Sanitary engineering; Bacteria; Chemical stabilization; Chlorine; Public health; Recreation facilities; Research
Bactericidal Properties of Chlorsulfamates, John E. Delaney and J. Carrell Morris, 209

Sanitary engineering; Biochemical oxygen demand; Filter materials; Filters; Laboratory tests
Hydraulically Ventilated Underground Filter, David K. Hills and Ray B. Krone, 128

Sanitary engineering; Buildings (commercial); Field tests; Forecasting; Municipal engineering; Planning
Empirical Analysis of Commercial Solid Waste Generation, Truett V. DeGeare and Jerry E. Ongerth, 112

Sanitary engineering; Chlorination; Chlorine; Disinfection; Exchange reactions
Fixed Resin Bed Chlorination of Water, Edgar J. Dewar and Morris Wayman, 172

Sanitary engineering; Conservation; Environmental effects; Environmental engineering; Esthetics; Land use; Matrices (mathematics); National historic sites; Planning; Pollution
Environmental Assessment of Resource Development, Kenneth D. Kerri, 282

Sanitary engineering; Ecology; Environmental effects; Management planning; Natural resources; Planning
Environmental Planning and Ecological Possibilities, David A. Bella and W. Scott Overton, 422

Sanitary engineering; Flocculants; Flocculating; Flocculation
Floc Breakup in Turbulent Flocculation Processes, Denny S. Parker, Warren J. Kaufman and David Jenkins, 164

Sanitary engineering; Industrial wastes; Irradiation; Plastics; Radioactivity; Refuse disposal
Use of Irradiation in Plastic Wastes Disposal, Masaru Tanaka and Tsuyoshi Mifune, 414

Sanitary engineering; Sanitary landfill; Sewage sludge; Solid wastes; Absorption
Water and Sewage Sludge Absorption by Solid Waste, Ralph Stone and Richard L. Kahle, 467

Sanitary engineering; Sanitary landfill; Solid wastes; Baling; Magnetic separators; Refuse; Refuse disposal
Refuse Reclamation and Recycle, Joseph F. Malina, Jr. and William T. Morgan, 564

Sanitary engineering; Sanitary landfill; Solid wastes; Waste disposal; Landfills
Demonstration Sanitary Landfill in Kansas City, Kans., Gerald A. Neely and Nicholas S. Artz, 468

Sanitary engineering; Sea grasses; Benthic flora; Estuaries; Nutrition; Plants; Productivity
Role Of Benthic Plants in Fertilized Estuary, Thomas D. Waite and Ralph Mitchell, 482

Sanitary engineering; Settling basins; Sewage disposal; Tanks (containers); Trickling filters; Bacteria; Chlorine; Detention reservoirs; Filtration; Hydraulics; Pollution
Chlorine Disinfection in Final Settling Basins, Darrell W. Monroe and Donald C. Phillips, 296

Sanitary engineering; Sewage; Sewage treatment; Viruses; Waste disposal; Purification
Inactivation of Virus in Sewage, Vincent P. Olivieri, Thomas K. Donovan and Kazuyoshi Kawata, 41

Sanitary engineering; Sewage; Sewers; Weirs; Adsorption; Coefficients; Oxidation; Oxygen
Oxygen Adsorption in Streams, John D. Parkhurst and Richard D. Pomeroy, 156

Sanitary engineering; Sewage; Sludge; Sludge disposal; Strip mining; Pollution control
Chicago Reclaiming Strip Mines With Sewage Sludge427

Sanitary engineering; Sewage; Water quality; Biochemical oxygen demand; Concrete (reinforced); Hydrology; Pollution control
In-Line Structure Stores and Treats Combined Overflows, Theodore G. Biehl and David M. Waring, 398

Sanitary engineering; Sewage; Water supply; Construction costs; Poland
Construction Costs of Water Supply and Sewage Networks in Poland 1961-1970, Miroslaw Gorczyca, 580

Sanitary engineering; Sewage disposal; Sewage filtration; Sewers; Bedding materials; Gravel; Hydraulic pressure; Leakage
Sanitary Sewer Bedding Scored as Underdrain Conduit, Robert L. McFall, 240

Sanitary engineering; Sewage disposal; Water resources; Cost effectiveness; Economic analysis; Environmental engineering; Ground water; Impact
Cost-Effectiveness Analysis of Wastewater Reuses, Stephen C. Ko and Lucien Duckstein, 552

Sanitary engineering; Sewage treatment; Activated sludge; Anaerobic conditions; Denitrification; Eutrophication; Kinetics; Nitrates
Process Kinetics for Denitrification, Walter K. Johnson, 448

Sanitary engineering; Sewage treatment; Aeration; Dissolved oxygen; Rivers
Aeration System for Large Navigable Rivers, William Whipple, Jr. and Shaw L. Yu, 135

Sanitary engineering; Sewage treatment; Biological treatment; Capital costs; Industrial wastes
Design and Economics of Joint Wastewater Treatment, W. Wesley Eckenfelder, Jr., 261

Sanitary engineering; Sewage treatment; Earthquake resistant structures; Economics; Legislation; Philippine Islands
Master Sewerage System for Metropolitan Manila, John O. Schmidt, 187

Sanitary engineering; Sewage treatment; Slime; Sludge; Statistical analysis; Trickling filters; Chemical removal (sewage treatment)
Enhanced Phosphorus Removal in Trickling Filters, Harold J. Jebens and William C. Boyle, 399

Sanitary engineering; Sewage treatment; Suspended solids; Filters; Filtration; Membrane processes
Filtrability Study on Secondary Effluent Filtration, Kou-Ying Hsiung, 384

Sanitary engineering; Sewage treatment; Waste disposal; Waste treatment; Water quality; Research
Research Needs for Advanced Waste Treatment, Francis M. Middleton and Robert L. Stenburg, 367

Sanitary engineering; Sewage treatment; Waste treatment; Bacteria; Chlorination; Coliform bacteria
Problems in Obtaining Adequate Sewage Disinfection, Harvey F. Collins, Robert E. Selleck and George C. White, 66

Sanitary engineering; Sewage treatment; Water filters; Water treatment; Filters; Filtration; Fluidized bed processing
Backwashing of Granular Water Filters, Thomas R. Camp, S. David Graber and Gerard T. Conklin, 143

Sanitary engineering; Sewage treatment plants; Pipes; Polyethylene
Polyethylene Pipe Used For 36-in. Sewage Outfall455

Sanitary engineering; Sewerage; Water quality; Land use; Management; Pollution control; Regional planning
Basin Management Techniques for Sewerage Agencies, Charles V. Gibbs and Allan L. Poole, 375

Sanitary engineering; Sewers; Systems engineering; Utilities; Costs; Economics; Hydraulics
Optimal Design of Urban Wastewater Collection Networks, Jarir S. Dajani, Robert S. Gemmell and Edward K. Morlok, 534

Sanitary engineering; Shear flow; Velocity distribution; Water pollution; Diffusion; Dispersion; Estuaries; Flow
Velocity Profiles and Dispersion in Estuarine Flow, Burton A. Segall and Erik R. Gidlund, 435

Sanitary engineering; Siphons; Stilling basins; Storm water; Water pollution; Baffles; Hydraulics
Stilling Pond Storm Overflow Studies, Y. R. Reddy and John Pickford, 428

Sanitary engineering; Sludge; Sludge disposal; Ashes; Drainage; Fly ash; Paper mills; Permeability
Permeability of High Ash Papermill Sludge, Orlando B. Andersland and Robert W. Laza, 576

Sanitary engineering; Smoothness; Coefficients; Graphs (charts); Hydraulics; Mannings equation; Pipe flow
Manning's Coefficient for Smooth Pipes, Henry Liu, 312

Sanitary engineering; Solid wastes; Computers; Costs; Data systems; Economics; Refuse disposal
Basic Data for Solid Waste: A Pilot Study, Robert M. Clark, John M. Sweeten and Daniel G. Greathouse, 540

Sanitary engineering; Solid wastes: Decision making; Gaming models; Management engineering; Refuse disposal
Management Science and Gaming in Waste Management, Pran N. Wahi and Theodore I. Peterson, 476

Sanitary engineering; Solid wastes; Statistical analysis; Costs; Planning; Regional planning; Regression analysis
Cost of Residential Solid Waste Collection, Robert M. Clark, Betty L. Grupenhoff, George A. Garland and Albert J. Klee, 34

Sanitary engineering; Solid wastes; Statistical analysis; Samples
Improving Manual Solid Waste Separation Studies, Paul W. Britton, 454

Sanitary engineering; Solid wastes; Systems engineering; Economics; Refuse disposal
Fleet Selection for Solid Waste Collection Systems, Robert M. Clark and Billy P. Helms, 216

Sanitary engineering; Solid wastes; Systems engineering; Urban planning; Waste disposal; Mathematics; Refuse disposal
Selecting Solid Waste Disposal Facilities, Billy P. Helms and Robert M. Clark, 4

Sanitary engineering; Solid wastes; Waste disposal; Dynamic characteristics; Hauling; Management; Optimization
Facility Selection and Haul Optimization Model, Houshang Esmaili, 528

Sanitary engineering; Solid wastes; Waste disposal; Environmental engineering; Powerplants
St. Louis Powerplant Burns City Refuse, F. E. Wisely, G. Wayne Sutterfield and David L. Klumb, 518

Sanitary engineering; Solid wastes; Waste water; Water resources; Water treatment; Air pollution; Industrial wastes; Municipal water; Research
Research Needs in Sanitary Engineering, Sanitary Engineering Research Committee of the Sanitary Engineering Division, Jack M. Betz, Chmn., 321

Sanitary engineering; Sorption; Waste treatment; Activated carbon; Adsorption; Irreversible processes; Kinetics
Sorption Kinetics in Finite-Bath Systems, Francis A. DiGiano and Walter J. Weber, Jr., 546

Sanitary engineering; Stabilization; Algae; Chlorination; Flocculating
Disinfection of Algal Laden Waters, Wayne F. Echelberger, Jr., Joseph L. Pavoni, Philip C. Singer and Mark W. Tenney, 91

Sanitary engineering; State governments; Water management (applied); Water pollution; Environmental engineering; Maryland; Pollution control
Statewide Management-What Does the Future Hold?, Frank A. Butrico and James B. Coulter, 244

Sanitary engineering; Stochastic processes; Water pollution; Biochemical oxygen demand; Estuaries; Mathematical models; Oxygen demand
Stochastic Model of BOD and OD in Segmented Estuary, William R. Schofield and Richard G. Krutchkoff, 488

Sanitary engineering; Stream pollution; Biochemical oxygen demand; Dispersion; Dissolved oxygen
Effects of Dispersion on DO-sag in Uniform Flow, Wen-Hsiung Li, 251

Sanitary engineering; Stream pollution; Use rates; Ice cover; Oxygen; Oxygen consumption; Rivers; Sag
Oxygen Depletion in Ice Covered River, Patrick H. Bouthillier, 326

Sanitary engineering; Streams; Agriculture; Aquatic plants; Industrial wastes; Land use; Population; Regulations
Water Pollution - Facts and Fantasies, John M. Henderson, 390

Sanitary engineering; Streams; Eutrophication; Oxygen content; Plants
Variable Respiration in Aquatic Plant Communities, Archie J. McDonnell and Dennis W. Weeter, 348

Sanitary engineering; Sulfides; Catalysts; Inhibition; Oxygenation
Oxidation of Sulfide by O_2: Catalysis and Inhibition, Kenneth Y. Chen and J. Carrell Morris, 181

Sanitary engineering; Suspended solids; Water treatment; Backwashing; Desorption; Filters; Filtration
Desorption and Retentivity of Filtering Materials, Andre Leclerc and Truong Tri Vu, 498

Sanitary engineering; Systems analysis; Texas; Estuaries; Mathematical models
Optimal Water Quality Management for Houston Ship Channel, Almond J. Hays, Jr. and Earnest F. Gloyna, 200

Sanitary engineering; Systems engineering; ASCE (Committees); ASCE (Education); ASCE (Publications); Reports; Reviews
Professional Papers in Sanitary Engineering, By the Committee on Publications of the Sanitary Engineering Division, Roy E. Ramseier, Chmn., 461

Sanitary engineering; Temperature; Thermal shock; Water pollution; Bioassay; Estuaries; Fishkill; Nuclear electric power generation; Powerplants
Parameters Necessary for Analyzing Thermal Bioassays, Robert D. Smith, 569

Sanitary engineering; Thermal pollution; Water pollution; Water quality; Abstracts; Indexes (documentation); Information retrieval; Reports
Information Sources on Water Quality, Including Thermal Pollution, the Committee on Thermal Pollution of the Sanitary Engineering Division, Fred A. Limpert, Chmn., 407

Sanitary engineering; Tidal waters; Waste assimilative capacity; Water pollution; California; Estuaries
Tidal Exchange at Golden Gate, Denny S. Parker, Dan P. Norris and Austin W. Nelson, 276

Sanitary engineering; Trickling filters; Biochemical oxygen demand; Biological treatment; Mathematical models; Oxygen transport mechanisms; Plastics
Oxygen Theory in Biological Treatment Plant Design, Dilip S. Mehta, Harry H. Davis and Robert P. Kingsburg, 360

Sanitary engineering; Waste stabilization ponds; Algae; Bacteriology; Enteric bacteria
Bacterial Dieoff in Ponds, Ernst M. Davis and Earnest F. Gloyna, 193

Sanitary engineering; Waste stabilization ponds; Waste treatment; Algae; Chlorination; Coliform bacteria; Disinfection; Kinetics; Pollution control
Kinetics of Chlorine Disinfection in an Ecosystem, Leonard W. Hom, 231

Sanitary engineering; Waste treatment; Water pollution; Water reclamation; Refineries
Treatment of Refinery Waste by Physicochemical Processes, Ju-Chang Huang and Michael G. Hardie, 14

Sanitary engineering; Wastewater treatment; Activated sludge; Anaerobic digestion; Anaerobic processes; Computer applications; Mathematical models; Optimum design
Optimal Design of Wastewater Treatment Systems by Enumeration, Gene F. Parkin and Richard R. Dague, 513

Sanitary engineering; Water; Water purification; Bromates; Bromine; Purification
Bromine and Bromamine Disinfection Chemistry, J. Donald Johnson and Ragnar Overby, 49

Sanitary engineering; Water; Water supply; Economic analysis; Economics; Market value
Economics of Water Quality and Wastewater Control, Fred E. Case, 353

Sanitary engineering; Water flow; Flow distribution; Hydraulic control; Open channel flow
Hydraulic Control for Flow Distribution, Kuan M. Yao, 271

Sanitary engineering; Water law; Water resources; Forecasting; Legislation
Can Engineering Forecasters Effect Water Law?, George W. Reid, E. Edd Pritchett and Susan Pritchett, 22

Sanitary engineering; Water pollution; Aeration; Bacteria; Beaches; Chlorination
Pneumatic Barrier and Beach Pollution, Martin S. Hertzendorf, Joseph V. Fiore, Herbert E. Klei and I. J. Kopelman, 304

Sanitary engineering; Water pollution; Water treatment plants; Biochemical oxygen demand; Government; Nitrogen oxides
Implications of Nitrogenous BOD in Treatment Plant Design, Russell C. Mt. Pleasant and Warren Schlickenrieder, 82

Sanitary engineering; Water quality; Computer models; Mathematical models
Water Quality Simulation Model, George R. Grantham, John C. Schaake, Jr. and Edwin E. Pyatt, 57

Sanitary engineering; Water quality; Ecology; Environmental engineering; Institutional constraints; Planning
Clean Water -- An Environmental Challenge, Percy H. McGauhey, 290

Sanitary engineering; Water quality; Environmental engineering; Eutrophication; Florida; Lakes; Multivariate analysis
Eutrophication Analysis: A Multivariate Approach, Earl E. Shannon and Patrick L. Brezonik, 237

Sanitary engineering; Water treatment; Activated sludge; Chlorine; Coagulation; Epidemiology; Filtration; Protamines
Integrated Approach to Problem of Viruses in Water, Gerald Berg, 122

Sanitary engineering; Water treatment; Aquatic plants; Biodegradation; Environmental engineering; Herbicides
Herbicidal Control of Aquatic Plants, Edward O. Ganstad, 341

Sanitary landfill; Sewage sludge; Solid wastes; Absorption; Sanitary engineering
Water and Sewage Sludge Absorption by Solid Waste, Ralph Stone and Richard L. Kahle, 467

Sanitary landfill; Solid wastes; Baling; Magnetic separators; Refuse; Refuse disposal; Sanitary engineering
Refuse Reclamation and Recycle, Joseph F. Malina, Jr. and William T. Morgan, 564

Sanitary landfill; Solid wastes; Waste disposal; Economic feasibility; Environmental engineering; Resources
How Urgent the Need to Recycle Solid Waste, Robert D. Bargman, 434

Sanitary landfill; Solid wastes; Waste disposal; Landfills; Sanitary engineering
Demonstration Sanitary Landfill in Kansas City, Kans., Gerald A. Neely and Nicholas S. Artz, 468

Saturated soils; Test equipment; Triaxial shear; Vane shear tests; Measuring instruments
A Direct-Reading Pocket Shear Vane, Stanley Serota and Anil Jangle, 63

Saturation; Soil compacting; Compaction tests; Laboratory tests
A Possible 1-Point System Method For Laboratory Compaction Testing, John J. Galvan, 165

Savannas; Shore protection; Waves; Dikes; Dunes; Flood control; Floods; Netherlands; New Jersey
Best Shore Protection: Nature's Own Dunes, Ian McHarg, 400

Scale effect; Beach ridges; Coastal engineering; Equilibrium; Harbors; Hydraulic models; Movable bed models; Profiles
Equilibrium Beach Profile Scale-Model Relationship, Edward K. Noda, 558

Scale effect; Siphons; Hydraulics
Siphons: Some Scale-Effects in Models, Richard B. Whittington and Kamil H.M. Ali, 94

Scale (ratio); Surveying; Contours; Mapping; Reports
Selection of Maps for Engineering and Planning, by the Task Committee for the Preparation of a Manual on Selection of Map Types, Scales, and Accuracies for Engineering and Planning of the Committee on Cartographic Surveying of the Surveying and Mapping Division, Antonio M. Aguilar, Chmn., 420

Scheduling; Computers; Construction; Critical path method; Management; Networks; Planning; Resource allocation
Man-Computer Concepts for Planning and Scheduling, Boyd C. Paulson, Jr., 546

Scheduling; Construction; Construction industry; Costs; Critical path method; Management; Monitoring; Project control
Planning Monitoring Frequencies for CPM Projects, Douglas A. Elvers, 55

Schools; Civil engineers; Education; Engineering education; Engineers; Professional activities; Professional advancement; Professional engineering
Civil Engineering Education in the Future, Richard Tucker, 191

Schools; Traffic; Data systems; Parking areas; Parking facilities; Personnel; Regulations; Safety
Management System for Campus Traffic Planning, Michael J. Quillem and Jason C. Yu, 527

Schools; Traffic surveys; Transportation; Community relations; Decision making; Disadvantaged groups; Government; Research
Transportation Research for Community Objectives, Arthur Saltzman, Sidney H. Evans, Alice E. Kidder and Florentine Sowell, 555

Schools; Unionization; Civil engineers; Collective bargaining; Education; Engineering education; Labor relations; Management; Salaries
Collective Bargaining on the Campus, B. Austin Barry, 563

Sciences; Sociology; Training; Hydraulic engineering; Hydraulics; Innovation; Professional societies
Technological Innovation and Hydraulic Engineering, George Bugliarello, 278

Scour; Vortices; Beds under water; Dikes; Erosion; Hydraulics; Sands
Erosion of Sand Beds Around Spur Dikes, Mohammad Akram Gill, 476

Sea grasses; Benthic flora; Estuaries; Nutrition; Plants; Productivity; Sanitary engineering
Role Of Benthic Plants in Fertilized Estuary, Thomas D. Waite and Ralph Mitchell, 482

Sealants; Waterproofing; Corrosion; Corrosion control; Pipe cover; Pipelines
Oil Based Fluid Corrosion-Proofs Gas Line, Buford Mizell, 280

Sealers; Tests; Asphalts; Bituminous concretes; Concrete; Dams; Dikes; Embankments; Pumped storage; Reservoirs
Bituminous Blanket for Dike, F. P. Robertson and Johannes Lehnert, 537

Sea water; Water pollution; Booms (equipment); Containment; Oily water; Pollution; Rivers
Dynamics of Contained Oil Slicks, David L. Wilkinson, 324

Sea water intrusion; Seepage; Wells; California; Drainage; Ground water
Seawater Intrusion Extraction Barrier, Jack J. Coe, 425

Sea water intrusion; Wastewater treatment; Wastewater use; Water treatment; California; Desalting; Irrigation
Orange County Water District's Water Factory 21, James R. Cofer, 549

Sedimentation; Bed movements; Channel stabilization; Channels (waterways); Reports; Rivers
Sediment Control Methods: B. Stream Channels, by the Task Committee on Preparation of Sedimentation Manual, Committee on Sedimentation, Vito A. Vanoni, Chmn., 391

Sedimentation; Bed movements; Channels (waterways); Hydraulics; Ripple marks; Sand waves
Initiation of Ripples by Artificial Disturbances, Philip B. Williams and Patrick H. Kemp, 328

Sedimentation; Dredging; Harbors; Hydroelectric power generation; Power; River flow
Sedimentation Effects of Hydroelectric Development, Jack F. Rasmussen, 469

Sedimentation; Sediment control; Urban development; Urban planning; Economics; Erosion; Hydraulics; Land use; Research
Urban Sedimentation in Perspective, Harold P. Guy and D. Earl Jones, Jr., 574

Sedimentation; Sediment deposits; Two phase flow; Hydraulics; Pipe flow
Pipelining of Low-Concentration Sand-Water Mixtures, Millard P. Robinson, Jr. and Walter H. Graf, 381

Sedimentation; Sediment load; Bed load; Hydraulics; Rivers
Sedimentation Transportation Mechanics: G. Fundamentals of Sediment Transportation, Task Committee on Preparation of Sedimentation Manual, Committee on Sedimentation, Vito A. Vanoni, Chmn., 64

Sedimentation; Sediment load; Bedload movement
Einstein Bed-Load Function at High Sediment Rates, Hans Albert Einstein and Farouk M. Abdel-Aal, 117

Sedimentation; Sediments; Stream flow; Temperature; Bed load; Bedload movement; Hydraulics
Temperature Effects in Low-Transport, Flat-Bed Flows, Brent D. Taylor and Vito A. Vanoni, 412

Sedimentation; Sediments; Waterways; Degradation; Open channel flow
Laboratory Study of Degradation and Aggradation, Suryanarayana Bhamidipaty and Hsieh W. Shen, 40

Sedimentation; Sediment transport; Amplitude; Bedding materials; Friction
Bed-Material Transport and Bed Forms, Marion R. Carstens and Hilmi D. Altinbilek, 273

Sedimentation; Sediment transport; Bed forms; Hydraulics
Critical Review of Sediment Transport Experiments, Richard H. Cooper, Allan W. Peterson and Thomas Blench, 247

Sedimentation; Sediment yield; Statistical analysis; Erosion; Hydraulics
Predicting Sediment Yield in Western United States, Elliott M. Flaxman, 585

Sedimentation; Streams; Bed load; Bedload movement; Hydraulics; Rivers
Sediment Discharge Computation Procedures, Nick Tywoniuk, 213

Sedimentation; Streams; Suspended sediments; Bed load; Canals; Channels; Desilting; Hydraulic models; Hydraulics
Chapter V: Sediment Control Methods: C. Control of Sediment in Canals, By the Task Committee on Preparation of Sedimentation Manual, Committee on Sedimentation of the Hydraulics Division, Vito A. Vanoni, Chmn., 455

Sedimentation; Water quality; Watersheds; Erosion; Hydraulics; Hydrology; Mathematical models; Reservoirs
Sediment Yield Computed With Universal Equation, Jimmy R. Williams and Harold D. Berndt, 578

Sediment control; Urban development; Urban planning; Economics; Erosion; Hydraulics; Land use; Research; Sedimentation
Urban Sedimentation in Perspective, Harold P. Guy and D. Earl Jones, Jr., 574

Sediment deposits; Suspended load; Temperature; Bed load; Hydraulics; Open channel flow
Temperature Effects in High-Transport, Flat-Bed Flows, Brent D. Taylor and Vito A. Vanoni, 597

Sediment deposits; Two phase flow; Hydraulics; Pipe flow; Sedimentation
Pipelining of Low-Concentration Sand-Water Mixtures, Millard P. Robinson, Jr. and Walter H. Graf, 381

Sediment deposits; Watersheds; Density; Forest land; Idaho; Organic matter; Reservoirs
Volume Weight of Reservoir Sediment in Forested Areas, Walter F. Megahan, 435

Sediment load; Bed load; Hydraulics; Rivers; Sedimentation
Sedimentation Transportation Mechanics: G. Fundamentals of Sediment Transportation, Task Committee on Preparation of Sedimentation Manual, Committee on Sedimentation, Vito A. Vanoni, Chmn., 64

Sediment load; Bedload movement; Sedimentation
Einstein Bed-Load Function at High Sediment Rates, Hans Albert Einstein and Farouk M. Abdel-Aal, 117

Sediments; Bed load; Channels; Flumes; Hydraulics; Pipe flow; Rivers
Friction Factors in Solid Material Laden Systems, Ertan R. Acaroglu, 241

Sediments; Sediment transport; Statistical analysis; Concentration; Hydraulics; Power; Rivers
Unit Stream Power and Sediment Transport, Chih Ted Yang, 519

Sediments; Stream flow; Temperature; Bed load; Bedload movement; Hydraulics; Sedimentation
Temperature Effects in Low-Transport, Flat-Bed Flows, Brent D. Taylor and Vito A. Vanoni, 412

Sediments; Water quality; Coastal engineering; Dredging; Estuaries; Salt marshes
Environmental Aspects of Dredging in Estuaries, Herbert L. Windom, 529

Sediments; Waterways; Degradation; Open channel flow; Sedimentation
Laboratory Study of Degradation and Aggradation, Suryanarayana Bhamidipaty and Hsieh W. Shen, 40

Sediment transport; Amplitude; Bedding materials; Friction; Sedimentation
Bed-Material Transport and Bed Forms, Marion R. Carstens and Hilmi D. Altinbilek, 273

Sediment transport; Bed forms; Hydraulics; Sedimentation
Critical Review of Sediment Transport Experiments, Richard H. Cooper, Allan W. Peterson and Thomas Blench, 247

Sediment transport; Bed load; Hydraulics; Rivers
Sediment Transport Measurements in Gravel River, Albert B. Hollingshead, 47

Sediment transport; Statistical analysis; Concentration; Hydraulics; Power; Rivers; Sediments
Unit Stream Power and Sediment Transport, Chih Ted Yang, 519

Sediment transport; Streams; Bed load; Hydraulics; Laboratory tests; Sands
Laboratory Study of Transport of Fine Sand, Joe C. Willis, Neil L. Coleman and Wilbert M. Ellis, 183

Sediment yield; Statistical analysis; Erosion; Hydraulics; Sedimentation
Predicting Sediment Yield in Western United States, Elliott M. Flaxman, 585

Seepage; Canals; Channels; Ground water; Hydraulics; Irrigation
Seepage from Shallow Open Channel, Bruce W. Hunt, 252

Seepage; Computation; Computer programming; Computers; Engineering mechanics; Numerical analysis
Summary Representation Applied to Seepage Problems, Antonio Santos-Moreno, Raymond J. Krizek and Gabor M. Karadi, 144

Seepage; Conformal mapping; Flow nets; Hydraulics
Approximate Solution to Flow Problems Under Dams, Demetrious G. Christoulas, 84

Seepage; Dams; Engineering mechanics; Fluid flow; Hydrodynamics
Inverse Solution to Three-Dimensional Flows, Roland W. Jeppson, 374

Seepage; Snow; Drainage; Overland flow; Runoff
Volume of Snowmelt Intercepted by Logging Roads, Edward R. Burroughs, Jr., Michael A. Marsden and Harold F. Haupt, 145

Seepage; Soil mechanics; Abutments; Dams; Dams (embankment); Foundations; Rock mechanics
Abutment and Foundation Treatment for High Embankment Dams on Rock, Reginald A. Barron, 491

Seepage; Soil mechanics; Computers; Dams (earth); Drains
Seepage Through Dams with Horizontal Toe Drain, Mohammad S. Moayeri, 282

Seepage; Soil mechanics; Dams; Dams (earth); Drawdown; Finite element method; Hydraulic models
Seepage Analysis of Earth Banks Under Drawdown, Chandrakant S. Desai, 511

Seepage; Soil mechanics; Topography; Abutments; Construction; Foundations; Geology; Grouting
Current Practice in Abutment and Foundation Treatment, Harris H. Burke, Charles S. Content and Richard L. Kulesza, 489

Seepage; Soils; Drainage; Homogeneity
Seepage from Trenches Through Nonhomogeneous Soils, Ahmed El Nimur and Robert L. Street, 185

Seepage; Subsurface drainage; Subsurface drains; Underdrains; Drainage; Filtration
Prefabricated Filter-Fin for Subsurface Drains, Kent A. Healy and Richard P. Long, 594

Seepage; Tile drainage; Transient flow; Conformal mapping; Drains; Engineering mechanics
Transient Seepage Flow Toward Two Parallel Drains, Imre Gyuk and Gabor M. Karadi, 138

Seepage; Weirs; Foundations; Permeability
End Effects in Models for Seepage Below Weirs, S. Muthukumaran and V. C. Kulandaiswamy, 216

Seepage; Wells; California; Drainage; Ground water; Sea water intrusion
Seawater Intrusion Extraction Barrier, Jack J. Coe, 425

Seepage control; Asphalts; Dam construction; Dams (rockfill); Hydroelectric powerplants
Stone Asphalt Cores Waterproof French Dams, Victorien Lelu, 206

Seismic design; Building codes; Buildings; Earthquake resistant structures; Earthquakes; Risk; Safety factors
The Balanced Risk Concept: New Approach to Earthquake Building Codes, John H. Wiggins, 377

Seismic design; Damping; Design; Engineering mechanics; Filters; Frequency
Spectrum-Compatible Motions for Design Purposes, Nien-Chien Tsai, 184

Seismic design; Earthquake engineering; Earthquake resistant structures; Lateral forces
Report on Conference on 1971 San Fernando, Ca., Earthquake, David J. Leeds, 254

Seismic design; Soil mechanics; Earthquakes; Liquefaction; Sands
Simplified Procedure for Evaluating Soil Liquefaction Potential, H. Bolton Seed and Izzat M. Idriss, 8

Seismic design; Standards; Structural engineering; ASCE (Committees); Buildings (codes); Lateral forces
Basic Design Criteria of the Recommended Lateral Force Requirements and Commentary, By the Ad Hoc Committee on Direction Study of the Joint SEAOC-ASCE Committee on Seismic Forces of the Committee on Dynamic Forces of the Structural Division, Henry J. Degenkolb, Chmn., 433

Seismic design; Structural engineering; Bridges (structures); Design criteria; Dynamic structural analysis; Earthquakes
Seismic Design of Highway Structures, Keith D. Bull, 393

Seismic investigations; Shear modulus; Soil mechanics; Field tests; Geophysical prospecting
In Situ Shear Wave Velocity by Cross-Hole Method, Kenneth H. Stokoe, II and Richard D. Woods, 293

Seismic properties; Soil-structure interaction; Foundations; Mathematical models; Nuclear power plants; Nuclear reactors; Power
Interaction of Soil and Power Plants in Earthquakes, Jeremy Isenberg and Samy A. Adham, 419

Settlement (structural); Abutments; Canada; Dams (earth); Foundations; Grouting
Foundations and Abutments -- Bennet and Mica Dams, Harold K. Pratt, Robert C. McMordie and Robert M. Dundas, 493

Settlement (structural); Airports; Air transportation; Drainage; Embankments; Fills
KCI Airport Planned for Jet Age, Edwin Joe Runyan, 480

Settlement (structural); Calculations; Consolidation; Footings
Simplified Method to Calculate Settlement Beneath Footings, Max L. Calhoon, 110

Settlement (structural); Shear modulus; Soil mechanics; Bearing capacity; Foundations
Initial Settlement of Structures on Clay, David J. D'Appolonia, Harry G. Poulos and Charles C. Ladd, 43

Settlement (structural); Soil mechanics; Bearing capacity; Bridges (piers); Foundations; Piers; Piles (foundations)
Load Settlement Prediction for Piles and Piers, Harry G. Poulos, 439

Settlement (structural); Soil mechanics; Construction; Foundations
Heave and Lateral Movements Due to Pile Driving, Donald J. Hagerty and Ralph B. Peck, 73

Settlement (structural); Soil mechanics; Terzaghi lecture; Dams (earth); Engineering education; Foundations; Pile driving; Pile foundations
The Integrated Civil Engineering Project, T. William Lambe, 337

Settlement (structural); Soil mechanics; Thawing; Bending stress; Ice; Permafrost; Pipelines
Settlement of Pipeline on Thawing Permafrost, Andrew C. Palmer, 276

Settlement (structural); Soil mechanics; Time; Anisotropy; Consolidation
Consolidation of a Layer Under a Strip Load, John T. Christian, Jan Willem Boehmer and Philippe P. Martin, 374

Settling basins; Sewage disposal; Tanks (containers); Trickling filters; Bacteria; Chlorine; Detention reservoirs; Filtration; Hydraulics; Pollution; Sanitary engineering
Chlorine Disinfection in Final Settling Basins, Darrell W. Monroe and Donald C. Phillips, 296

Sewage; Sewage effluents; Sewage filtration; Water treatment; Water treatment plants; Potable water
Windhoek Reclaiming Sewage for Drinking Water, A. J. Clayton and P. J. Pybus, 430

Sewage; Sewage treatment; Viruses; Waste disposal; Purification; Sanitary engineering
Inactivation of Virus in Sewage, Vincent P. Olivieri, Thomas K. Donovan and Kazuyoshi Kawata, 41

Sewage; Sewers; Weirs; Adsorption; Coefficients; Oxidation; Oxygen; Sanitary engineering
Oxygen Adsorption in Streams, John D. Parkhurst and Richard D. Pomeroy, 156

Sewage; Sludge; Sludge disposal; Strip mining; Pollution control; Sanitary engineering
Chicago Reclaiming Strip Mines With Sewage Sludge427

Sewage; Water quality; Biochemical oxygen demand; Concrete (reinforced); Hydrology; Pollution control; Sanitary engineering
In-Line Structure Stores and Treats Combined Overflows, Theodore G. Biehl and David M. Waring, 398

Sewage; Water supply; Construction costs; Poland; Sanitary engineering
Construction Costs of Water Supply and Sewage Networks in Poland 1961-1970, Miroslaw Gorczyca, 580

Sewage disposal; Sewage filtration; Sewers; Bedding materials; Gravel; Hydraulic pressure; Leakage; Sanitary engineering
Sanitary Sewer Bedding Scored as Underdrain Conduit, Robert L. McFall, 240

Sewage disposal; Sewers; Subsurface investigations; Tunneling (excavation); Freezing; Noise reduction
Subsurface Freezing Used In Tunneling, Charles P. Gail, 221

Sewage disposal; Solid wastes; Natural resources; Professional activities; Rivers
Interdisciplinary Planning to Meet Environmental Needs, Frederick J. Clarke, 535

Sewage disposal; Tanks (containers); Trickling filters; Bacteria; Chlorine; Detention reservoirs; Filtration; Hydraulics; Pollution; Sanitary engineering; Settling basins
Chlorine Disinfection in Final Settling Basins, Darrell W. Monroe and Donald C. Phillips, 296

Sewage disposal; Washington; Water pollution control; Eutrophication
Swimming Again in Lake Washington, Walter E. Jessup, 139

Sewage disposal; Water resources; Cost effectiveness; Economic analysis; Environmental engineering; Ground water; Impact; Sanitary engineering
Cost-Effectiveness Analysis of Wastewater Reuses, Stephen C. Ko and Lucien Duckstein, 552

Sewage disposal; Water supply; Construction costs; Costs; Inflation (economics); Mathematical models; Models
Mathematical Model for Rate Studies, Kuan M. Yao, 442

Sewage effluents; Sewage filtration; Water treatment; Water treatment plants; Potable water; Sewage
Windhoek Reclaiming Sewage for Drinking Water, A. J. Clayton and P. J. Pybus, 430

Sewage filtration; Sewers; Bedding materials; Gravel; Hydraulic pressure; Leakage; Sanitary engineering; Sewage disposal
Sanitary Sewer Bedding Scored as Underdrain Conduit, Robert L. McFall, 240

Sewage filtration; Water treatment; Water treatment plants; Potable water; Sewage; Sewage effluents
Windhoek Reclaiming Sewage for Drinking Water, A. J. Clayton and P. J. Pybus, 430

Sewage sludge; Solid wastes; Absorption; Sanitary engineering; Sanitary landfill
Water and Sewage Sludge Absorption by Solid Waste, Ralph Stone and Richard L. Kahle, 467

Sewage treatment; Activated sludge; Anaerobic conditions; Denitrification; Eutrophication; Kinetics; Nitrates; Sanitary engineering
Process Kinetics for Denitrification, Walter K. Johnson, 448

Sewage treatment; Aeration; Dissolved oxygen; Rivers; Sanitary engineering
Aeration System for Large Navigable Rivers, William Whipple, Jr. and Shaw L. Yu, 135

Sewage treatment; Biological treatment; Capital costs; Industrial wastes; Sanitary engineering
Design and Economics of Joint Wastewater Treatment, W. Wesley Eckenfelder, Jr., 261

Sewage treatment; Earthquake resistant structures; Economics; Legislation; Philippine Islands; Sanitary engineering
Master Sewerage System for Metropolitan Manila, John O. Schmidt, 187

Sewage treatment; Slime; Sludge; Statistical analysis; Trickling filters; Chemical removal (sewage treatment); Sanitary engineering
Enhanced Phosphorus Removal in Trickling Filters, Harold J. Jebens and William C. Boyle, 399

Sewage treatment; Social needs; Solid wastes; Environmental engineering; Federal agencies; Legislation; Professional activities
The Engineer and the New Environment, Eugene T. Jensen, 381

Sewage treatment; Suspended solids; Filters; Filtration; Membrane processes; Sanitary engineering
Filtrability Study on Secondary Effluent Filtration, Kou-Ying Hsiung, 384

Sewage treatment; Viruses; Waste disposal; Purification; Sanitary engineering; Sewage
Inactivation of Virus in Sewage, Vincent P. Olivieri, Thomas K. Donovan and Kazuyoshi Kawata, 41

Sewage treatment; Waste disposal; Waste treatment; Water quality; Research; Sanitary engineering
Research Needs for Advanced Waste Treatment, Francis M. Middleton and Robert L. Stenburg, 367

Sewage treatment; Waste treatment; Bacteria; Chlorination; Coliform bacteria; Sanitary engineering
Problems in Obtaining Adequate Sewage Disinfection, Harvey F. Collins, Robert E. Selleck and George C. White, 66

Sewage treatment; Waste treatment; Missouri; Outfall sewers; Pollution abatement
St. Louis Cleans up the Mississippi259

Sewage treatment; Wastewater treatment; Water quality; Adsorption; Chemical removal (sewage treatment); Filtration
No Innovation in Wastewater Treatment, Russell L. Culp, 327

Sewage treatment; Water filters; Water treatment; Filters; Filtration; Fluidized bed processing; Sanitary engineering
Backwashing of Granular Water Filters, Thomas R. Camp, S. David Graber and Gerard T. Conklin, 143

Sewage treatment plants; Dredging; New York
New Pier in Jamaica Bay, Remig A. Papp, 372

Sewage treatment plants; Pipes; Polyethylene; Sanitary engineering
Polyethylene Pipe Used For 36-in. Sewage Outfall455

Sewerage; Water quality; Land use; Management; Pollution control; Regional planning; Sanitary engineering
Basin Management Techniques for Sewerage Agencies, Charles V. Gibbs and Allan L. Poole, 375

Sewers; Bedding materials; Gravel; Hydraulic pressure; Leakage; Sanitary engineering; Sewage disposal; Sewage filtration
Sanitary Sewer Bedding Scored as Underdrain Conduit, Robert L. McFall, 240

Sewers; Chemical cleaning; Cleaning; Drainage; Drains
Restoring Subsurface Drain Performance, Luther B. Grass and Arnold J. MacKenzie, 90

Sewers; Subsurface investigations; Tunneling (excavation); Freezing; Noise reduction; Sewage disposal
Subsurface Freezing Used In Tunneling, Charles P. Gail, 221

Sewers; Systems engineering; Utilities; Costs; Economics; Hydraulics; Sanitary engineering
Optimal Design of Urban Wastewater Collection Networks, Jarir S. Dajani, Robert S. Gemmell and Edward K. Morlok, 534

Sewers; Urbanization; Costs; Drainage; Economic analysis; Hydraulics; Mathematical models
Methods for Predicting Urban Drainage Costs, Walter J. Rawls and John W. Knapp, 486

Sewers; Waste disposal; Wind (meteorology); Coastal engineering; Ocean currents; Outfall sewers
Coastal Current of Pacific Northwest, Bard Glenne and Robert H. Bourke, 574

Sewers; Weirs; Adsorption; Coefficients; Oxidation; Oxygen; Sanitary engineering; Sewage
Oxygen Adsorption in Streams, John D. Parkhurst and Richard D. Pomeroy, 156

Shale; Shear strength; Sliding; Soil mechanics; Stability; Clays; Dams
Analysis of Waco Dam Slide, Stephen G. Wright and James M. Duncan, 472

Shear; Bending; Deformation; Engineering mechanics; Finite elements; Plates
Some Elements for Analysis of Plate Bending, Robert D. Cook, 590

Shear; Skyscrapers; Structural engineering; Walls; Buildings (apartment)
Model Investigations of Shear Wall Structures, Alexander Coull and A. W. Irwin, 284

Shear; Structural analysis; Structural engineering; Tall buildings; Walls; Rigid frames
Approximate Inelastic Analysis of Shear Wall-Frame Structures, James G. MacGregor, Sauren N. Guha Majumdar, Rajendra P. Nikhed and Peter F. Adams, 551

Shear; Structural engineering; Buildings; Dynamics; Earthquakes; Monte Carlo method; Probability theory
Probabilistic Response of Nonlinear Buildings During Earthquakes, Alain H. Peyrot, 531

Shear; Structural engineering; Walls; Wind (meteorology); Bearing capacity; Bending stress; Bricks; Buildings; Computer programs; Computers; Masonry
Computer Design of Engineered Brick Masonry, Alan H. Yorkdale and Robert P. Anderson, 271

Shear flow; Structural engineering; Vibration; Wind pressure; Chimneys
Lift or Across-Wind Response to Tapered Stacks, Barry J. Vickery and Arthur W. Clark, 85

Shear flow; Two phase flow; Flow characteristics; Fluid flow; Hydraulics; Jets
Turbulent Compound Annular Shear Layers, Nallamuthu Rajaratnam and B. S. Pani, 350

Shear flow; Velocity; Axisymmetric flow; Computers; Eddies; Engineering mechanics; Inviscid flow
Inviscid Shear Flow with Corner Eddies, P.A. Aswatha Narayana and M.V. Krishna Murthy, 81

Shear flow; Velocity distribution; Water pollution; Diffusion; Dispersion; Estuaries; Flow; Sanitary engineering
Velocity Profiles and Dispersion in Estuarine Flow, Burton A. Segall and Erik R. Gidlund, 435

Shear modulus; Shear stress; Composite materials; Elastic properties; Engineering mechanics
Torsion of Multilayered Rectangular Section, John R. Booker and Sritawat Kitipornchai, 3

Shear modulus; Soil mechanics; Bearing capacity; Foundations; Settlement (structural)
Initial Settlement of Structures on Clay, David J. D'Appolonia, Harry G. Poulos and Charles C. Ladd, 43

Shear modulus; Soil mechanics; Clay (material); Dynamic response; Laboratory tests
Time Effects on Dynamic Shear Modulus of Clays, William F. Marcuson, III and Harvey E. Wahls, 588

Shear modulus; Soil mechanics; Field tests; Geophysical prospecting; Seismic investigations
In Situ Shear Wave Velocity by Cross-Hole Method, Kenneth H. Stokoe, II and Richard D. Woods, 293

Shear modulus; Soil mechanics; Tests; Undrained shear tests; Confining pressure; Cyclic loads; Damping; Resonance; Sands
Undrained Cyclic Shear of Saturated Sand, Vincent P. Drnevich, 431

Shear modulus; Soils; Stress-strain curves; Vibration; Analysis; Damping; Design data; Earthquakes; Repeated loading
Shear Modulus and Damping in Soils: Design Equations and Curves, Bobby O. Hardin and Vincent P. Drnevich, 354

Shear strain; Soil mechanics; Compaction; Density; Sands
Compaction of Sands By Repeated Shear Straining, T. Leslie Youd, 382

Shear strain; Soil mechanics; Vibration; Cohesionless soils; Earthquakes; Sands
Settlement of Dry Sands During Earthquakes, H. Bolton Seed and Marshall L. Silver, 264

Shear strength; Bearing values; Compaction tests; Consolidation; Embankments; Field density; Fly ash; Power
Fly Ash as Structural Fill, Anthony M. DiGioia and William L. Nuzzo, 175

Shear strength; Shear tests; Structural engineering; Concrete; Concrete (reinforced); Cracks
Experimental Studies of Membrane Shear Transfer, Richard N. White and Myle J. Holley, Jr., 406

Shear strength; Sliding; Soil mechanics; Stability; Clays; Dams; Shale
Analysis of Waco Dam Slide, Stephen G. Wright and James M. Duncan, 472

Shear strength; Slope stability; Soil mechanics; Engineering geology; Landslides; Peansylvania; Rock mechanics
Failure of Colluvial Slope, James V. Hamel and Norman K. Flint, 189

Shear strength; Soil mechanics; Stress-strain curves; Cohesive soils; Field tests
Expansion of Cylindrical Probes in Cohesive Soils, Francois Baguelin, Jean-Francois Jezequel, Eugene LeMee and Alain LeMehaute, 553

Shear strength; Soil mechanics; Triaxial tests; Grain sizes; Model studies; Rock fills
Evaluation of Properties of Rockfill Materials, N. Dean Marschi, Clarence K. Chan and H. Bolton Seed, 160

Shear strength; Structural engineering; Aluminum; Girders
Thin Aluminum Shear Webs, Maurice L. Sharp and John W. Clark, 5

Shear strength; Structural engineering; Tests; Beams (supports); Concrete (reinforced)
Shear Strength of Large Beams, Howard P.J. Taylor, 533

Shear strength; Structural engineering; Tests; Columns (supports); Continuous beams; Plates (structural members)
Shear Strength of Continuous Plates, M. Daniel Vanderbilt, 237

Shear strength; Structural engineering; Tests; Torsion; Beams (supports); Concrete (reinforced); Reinforcement; Research
Total Interaction Method for Torsion Design, K. S. Rajagopalan, Umakanta Behera and Phil M. Ferguson, 467

Shear stress; Composite materials; Elastic properties; Engineering mechanics; Shear modulus
Torsion of Multilayered Rectangular Section, John R. Booker and Sritawat Kitipornchai, 3

Shear stress; Shear tests; Soil mechanics; Torsion shear tests; Vibration; Damping; Laboratory tests
Shear Modulus and Damping in Soils: Measurement and Parameter Effects, Bobby O. Hardin and Vincent P. Drnevich, 328

Shear stress; Turbulence; Axial flow; Boundary layer; Engineering mechanics; Flow resistance; Fluid flow
Helical Flow Through Concentric Annulus, M. H. Abdul Khader and H. Suresh Rao, 231

Shear stress; Two phase flow; Water pollution; Density; Estuaries; Hydraulics
Gradually Varying Two-Layer Stratified Flow, Flemming Bo Pedersen, 155

Shear tests; Soil mechanics; Torsion shear tests; Vibration; Damping; Laboratory tests; Shear stress
Shear Modulus and Damping in Soils: Measurement and Parameter Effects, Bobby O. Hardin and Vincent P. Drnevich, 328

Shear tests; Structural engineering; Concrete; Concrete (reinforced); Cracks; Shear strength
Experimental Studies of Membrane Shear Transfer, Richard N. White and Myle J. Holley, Jr., 406

Sheet piling; Shipbuilding; Waterways; Docks; Drydocks; Graving docks; Pennsylvania
1,200-Ft Graving Dock, Frederick E. Krauss and George H. Plude, 605

Shells (structural forms); Boundary value problems; Buckling; Engineering mechanics
Buckling of Arbitrary Open Cylindrical Shells, Jack W. Vetter and Donald E. Boyd, 115

Shells (structural forms); Buckling; Design; Engineering mechanics
Buckling of Shells: An Old Idea with a New Twist, John Roorda, 266

Shells (structural forms); Compatibility; Continuum mechanics; Engineering mechanics; Sandwich structures
Nonlinear Sandwich Shell and Cosserat Surface Theory, David J. Malcolm and Peter G. Glockner, 459

Shells (structural forms); Concrete (post-tensioned); Concrete (prestressed); Fire safety; Hyperbolic parabolic shells
Record Concrete Shell Roof Featured in Coliseum, Y. C. Yang, 275

Shells (structural forms); Concrete (reinforced); Cylindrical shells; Elastic properties; Engineering mechanics; Numerical analysis; Plasticity
Elastic-Plastic Analysis of Cylindrical Shells, Nabil A. Shoeb and William C. Schnobrich, 96

Shells (structural forms); Displacement; Elastic properties; Energy; Engineering mechanics; Equilibrium methods
Thick Shell and Oriented Surface Theories, Frank G. Bercha and Peter G. Glockner, 355

Shells (structural forms); Elastic properties; Engineering mechanics; Finite elements; Matrices (mathematics); Plates (structural members)
Generalization of Plate Finite Elements to Shells, Robert G. Vos, 223

Shells (structural forms); Engineering mechanics; Folded plates; Models
Experiments with Elastic Folded Plate Models, Stuart E. Swartz and Vernon H. Rosenbraugh, 325

Shells (structural forms); Ship hulls; Structural engineering; Concrete (reinforced); Containment vessels
Impact Resistance of Ferro-Cement, Surendra P. Shah and William H. Key, Jr., 101

Shells (structural forms); Slabs; Stiffness; Structural engineering; Concrete (reinforced); Plates
Stiffness of Reinforced Concrete Plates, Alex E. Cardenas, Rolf J. Lenschow and Mete A. Sozen, 566

Shells (structural forms); Spherical shells; Buckling; Elastic properties; Engineering mechanics; Plastic properties
Symmetric Buckling of Inelastic Spherical Shells, Robert K. Emerton and Nicholas F. Morris, 586

Shells (structural forms); Spherical shells; Stability; Buckling; Engineering mechanics; Finite differences
Asymmetrical Buckling of Imperfect Spherical Shells, George N. Freskakis and Nicholas F. Morris, 471

Shells (structural forms); Spherical shells; Underwater structures; Dynamic structural analysis; Engineering mechanics
Acoustic Approximations in Fluid-Shell Interactions, Bedros Bedrosian and Frank L. DiMaggio, 337

Shells (structural forms); Stress distribution; Stress strain diagrams; Elastic shells; Engineering mechanics
Invariant Multicouple Theory of Shells, Gerald A. Wempner, 577

Shells (structural forms); Structural analysis; Continuum mechanics; Engineering mechanics; Sandwich panels
Cosserat Surface and Sandwich Shell Equilibrium, David J. Malcolm and Peter G. Glockner, 453

Shells (structural forms); Structural engineering; Buckling; Hyperbolic parabolic shells; Membranes; Roofs
Analysis of Thin-Steel Hyperbolic Paraboloid Shells, Prabodh V. Banavalkar and Peter Gergely, 557

Shells (structural forms); Structural engineering; Concrete (reinforced); Cylindrical shells; Models
Inelastic Behavior Of R/C Cylindrical Shells, Harry G. Harris and Richard N. White, 376

Shells (structural forms); Structural engineering; Cylindrical shells; Deformation; Differential equations; Engineering mechanics
Accurate Fourth Order Equation for Circular Cylindrical Shells, Shun Cheng, 311

Shells (structural forms); Structural engineering; Structural plastics; Computation; Construction procedure; Finite elements; Glass fibers; Roofs; Sandwich structures
Plastic Sandwich Buckle-Shell Structures, V. James Meyers, Dhamo T. Ramani and Mark E. Greenwood, 515

Shells (structural forms); Structural engineering; Tests; Hyperbolic parabolic shells; Membranes; Roofs
Experimental Investigation Of Thin-Steel Hyperbolic Paraboloid Structures, Peter Gergely and George Winter, 473

Shells (structural forms); Structural engineering; Wind (meteorology); Analysis; Concrete (reinforced); Cooling towers; Design; Earthquakes; Loads (forces); Moments; Powerplants
Analysis and Design of Hyperbolic Cooling Towers, German Gurfinkel and Adolf Walser, 340

Shells (structural forms); Thin shell structures; Hyperbolic parabolic shells; Roofs
Analysis of Hipped Roof Hyperbolic Paraboloid Structures, William C. Schnobrich, 359

Shells (structural forms); Vibration; Cooling towers; Engineering mechanics; Finite elements; Hyperbolic parabolic shells; Pressure
Vibrations of Pressure Loaded Hyperboloidal Shells, Mehran Lashkari, Victor I. Weingarten and David S. Margolias, 431

Shell structures; Structural engineering; Cooling towers; Hyperbolic parabolic shells; Mathematical logic
Differential Settlement of Hyperbolic Cooling Towers, Phillip L. Gould, 487

Shell structures; Water vapor; Cooling towers; Electric power generation; Hyperbolic parabolic shells; Pollution abatement
Wet-Type Hyperbolic Cooling Towers, Paul Rogers, 262

Shelters; Slabs; Cold weather construction; Concrete (precast); Concrete (prestressed); Construction; Costs
Meeting the Challenge of Winter Construction, Allen T. Johnson, 507

Shielding; Vibration; Dynamics; Engineering mechanics; Footings; Foundations
Shear Waves in Plane Infinite Structures, John Lysmer and Gunter Waas, 89

Shields (tunneling); Slurries; Tunnel construction; Compressed air; Excavation
Pressurized-Slurry Shields Bore Submarine Tunnels, Takuya Ohira and Shunta Shiraishi, 248

Shields (tunneling); Tunneling (excavation); Vehicular tunnels; Boring machines; Construction; Faults (geology); Rocks
Vehicular Tunnels in Rock - Direction for Development, Richard J. Robbins, 379

Shipbuilding; Waterways; Docks; Drydocks; Graving docks; Pennsylvania; Sheet piling
1,200-Ft Graving Dock, Frederick E. Krauss and George H. Plude, 605

Ship hulls; Structural engineering; Concrete (reinforced); Containment vessels; Shells (structural forms)
Impact Resistance of Ferro-Cement, Surendra P. Shah and William H. Key, Jr., 101

Shipping containers; Cargo transportation; Containerizing; Containers; Containment vessels; Harbors
Containerization - A System Still Evolving, Walter C. Boyer, 494

Shock; Vibration; Earthquakes; Engineering mechanics; Power spectra
An Approach to Time-Varying Spectral Analysis, Shih-Chi Liu, 126

Shore protection; Waves; Dikes; Dunes; Flood control; Floods; Netherlands; New Jersey; Savannas
Best Shore Protection: Nature's Own Dunes, Ian McHarg, 400

Shrinkage; Shrinkproofing; Transportation; Cracking; Flexible pavements; Highway engineering; Pavements
Cracking Mechanism of Flexible Pavements, Jacob Uzan, Moshe Livneh and Elisha Shklarsky, 16

Shrinkage; Soil cement; Soil mechanics; Stresses; Viscoelasticity; Base courses; Cracking
Viscoelastic Shrinkage Stress in Soil-Cement Base, Bal K. Sanan and Kalankamary P. George, 598

Shrinkproofing; Transportation; Cracking; Flexible pavements; Highway engineering; Pavements; Shrinkage
Cracking Mechanism of Flexible Pavements, Jacob Uzan, Moshe Livneh and Elisha Shklarsky, 16

Sidesway; Stability; Structural engineering; Beam columns; Buckling; Framed structures
Approximate Determination of Frame Critical Loads, F. David Edmonds and Ian C. Medland, 161

Sidesway; Steel; Structural engineering; Tubes; Construction; Earthquakes; Frames
Perimetral Tube for 37-Story Steel Building, L. Agustin Mazzeo and Armin De Fries, 288

Signals; Traffic; Benefit-cost ratios; Costs; Federal agencies; Highways; Safety
Federal Experience in TOPICS, Hugh B. Henry, 292

Silver iodide; South Dakota; Water resources; Weather modification; Hydraulics; Rainfall
Weather Modification Program for South Dakota, Richard A. Schleusener and Edwin I. Boyd, 466

Simulation; Computerized simulation; Cost control; Financing; Flood control; Management control reports; Professional activities
Flood Control Developed and Operated with Simulation, John M. Tellemer, 154

Simulation; Engineering mechanics; Hydrodynamics; Railroads; Railroad trains
High-Speed Train Simulation Using Hydrodynamics, Robert A. Helfinstine and Charles Dalton, 162

Simulation; Statistical analysis; Systems engineering; Data systems; Hydraulics; Nevada; Regulation
Streamflow Synthesis - A Case Study, Vulli L. Gupta and John W. Fordham, 336

Simulation; Stochastic models; Stream flow; Hydraulics; Monte Carlo method; Probability theory
Adequacy of Hydrologic Records for Parameter Estimation, Charles T. Haan, 430

Simulation; Systems analysis; Computer programs; Mathematical models
Delaware River Basin Modeling, Lewis G. Hulman and David K. Ericson, 132

Simulation; Tidal currents; Tracers; Turbulence; Diffusion; Effluents; Field tests; Hydraulics; Models
Tracer Tests of Eddy Diffusion in Field and Model, Maurice J. Crickmore, 509

Simulation; Tides; Water waves; Waterways; Hydraulic models; Hydraulics; Inlets (waterways); Rivers
Simulation of Long Waves in Branching Waterways, Robert F. Henry, 224

Siphons; Hydraulics; Scale effect
Siphons: Some Scale-Effects in Models, Richard B. Whittington and Kamil H.M. Ali, 94

Siphons; Stilling basins; Storm water; Water pollution; Baffles; Hydraulics; Sanitary engineering
Stilling Pond Storm Overflow Studies, Y. R. Reddy and John Pickford, 428

Site selection; Electric power generation; Environmental engineering; Environments; Power supplies
Logical Approaches to Power Supply and Environment, Riley D. Woodson, 525

Site selection; Statistical analysis; Impact prediction; Land use; Power; Powerplants; Regional planning
New Approach to Power Plant Siting, James D. Calvert and William L. Heilman, 201

Site selection; Systems engineering; Benefit-cost ratios; Esthetics; Planning
Inclusion of Social Values in Facility Location Planning, David Morris, 167

Site selection; Traffic; Transportation; Mathematical models; Parking areas; Parking facilities
Location Model for Parking Facilities, Adib K. Kanafani, 54

Site surveys; Design practices; Environmental engineering; Land use; Natural resources
Environmental Aspects of Site Selection, Eugene F. Dudley, 120

Skew bridges; Stiffness methods; Structural analysis; Structural engineering; Bridges (box girder); Computer programs; Finite elements; Folded plates; Interchanges; Orthotropic plate
Cellular Structures of Arbitrary Plan Geometry, Kaspar J. William and Alexander C. Scordelis, 315

Skid resistance; Aggregates; Highways; Limestone; Pavements
Sprinkle Treatment Increases Highway Skid Resistance, George W. Maupin, Jr., 86

Skiing; Ecology; Environmental effects; Parks; Recreational facilities; Reservoir design
Civil Engineering for Recreation, Ernst W. Kiesling and George A. Whetstone, 182

Skin friction; Transition flow; Turbulence; Fluid flow; Hydraulics; Research
Experiments on Plane Couette Flow, Hans J. Leutheusser and Vincent H. Chu, 7

Skyscrapers; Steel structures; Structural engineering; Beam columns; Buildings; Columns (supports)
Aspects of Column Design in Tall Steel Buildings, John Springfield and Peter F. Adams, 258

Skyscrapers; Structural engineering; Buildings; Computer programs; Frames; Plastic design
Storywise Plastic Design for Multistory Steel Frames, Leroy Z. Emkin and William A. Litle, 139

Skyscrapers; Structural engineering; Tests; Buckling; Columns (supports); Rigid frames
Inelastic Multistory Frame Buckling, Bernard M. McNamee and Le-Wu Lu, 368

Skyscrapers; Structural engineering; Walls; Buildings (apartment); Shear
Model Investigations of Shear Wall Structures, Alexander Coull and A. W. Irwin, 284

Slabs; Cold weather construction; Concrete (precast); Concrete (prestressed); Construction; Costs; Shelters
Meeting the Challenge of Winter Construction, Allen T. Johnson, 507

Slabs; Stiffness; Structural engineering; Concrete (reinforced); Plates; Shells (structural forms)
Stiffness of Reinforced Concrete Plates, Alex E. Cardenas, Rolf J. Lenschow and Mete A. Sozen, 566

Slabs; Tendons; Transportation; Bridges (structures); City planning; Concrete (post-tensioned); Concrete (precast); Foundations; Highways; Prefabrication
Prefabricated Highways, William Zuk, 204

Slabs; Uplift pressure; Chute spillways; Dams (earth); Eductors; Ejectors; Failure; Hydraulic jump; Hydraulics
Damage to Karnafuli Dam Spillway, Mohammad A. Rahman, 596

Slabs; Walls; Beams (supports); Columns (supports); Compaction; Concrete; Consolidation; Distribution; Mass concrete; Placement; Reinforcement
Pertinent Techniques for Compacting Concrete, Shu-t'ien Li and Donald A. Stewart, 429

Slenderness ratio; Stability; Dynamics; Dynamic stability; Engineering mechanics
Dynamic Stability of Thin-Walled Column, Carl H. Popelar, 304

Slenderness ratio; Structural engineering; Struts; Tees; Thickness ratio; Width; Angle iron; Buckling; Columns (supports); Inelastic action
Buckling of Steel Angle and Tee Struts, John B. Kennedy and Madugula K.S. Murty, 547

Slenderness ratio; Structural engineering; Tests; Box beams; Box girders
Plastic Behavior of Hollow Structural Sections, Robert M. Korol and John Hudoba, 230

Sliding; Soil mechanics; Stability; Clays; Dams; Shale; Shear strength
Analysis of Waco Dam Slide, Stephen G. Wright and James M. Duncan, 472

Sliding; Values; Vibration; Embedding; Foundations; Half Space
Coupled Sliding and Rocking of Embedded Foundations, Raymond J. Krizek, Dinesh C. Gupta and Richard A. Parmelee, 582

Slime; Sludge; Statistical analysis; Trickling filters; Chemical removal (sewage treatment); Sanitary engineering; Sewage treatment
Enhanced Phosphorus Removal in Trickling Filters, Harold J. Jebens and William C. Boyle, 399

Slip joints; Steel pipes; Weld defects; Welded pipes; Brittle fracturing; Pipe joints; Pipelines
Brittle Fracture of Steel Pipe Analyzed, Robert V. Phillips and Stephen M. Marynick, 345

Slip joints; Structural engineering; Wood; Wooden structures; Elastic properties; Fasteners; Joints (junctions); Nails
Analysis of Nailed Joints with Dissimilar Members, Thomas Lee Wilkinson, 437

Slipping; Soil mechanics; Vehicles; Clays; Limit design method; Sands
Stress Field Under Slipping Rigid Wheel, Mohammed K. Elsamny and Ahmed A. Ghobarah, 113

Slipping; Structural engineering; Beams (supports); Bonding strength; Concrete (reinforced); Cracking
Cracking and Bond Slip in Concrete Beams, Bandaru Venkateswarlu and Hans Gesund, 578

Slope stability; Soil mechanics; Engineering geology; Landslides; Pennsylvania; Rock mechanics; Shear strength
Failure of Colluvial Slope, James V. Hamel and Norman K. Flint, 189

Slope stability; Soil mechanics; Stress distribution; Cracking; Failure; Safety factors
Influence of Progressive Failure On Slope Stabilities, Fredy Romani, C. William Lovell, Jr. and Milton E. Harr, 530

Sludge; Sludge disposal; Ashes; Drainage; Fly ash; Paper mills; Permeability; Sanitary engineering
Permeability of High Ash Papermill Sludge, Orlando B. Andersland and Robert W. Laza, 576

Sludge; Sludge disposal; Strip mining; Pollution control; Sanitary engineering; Sewage
Chicago Reclaiming Strip Mines With Sewage Sludge427

Sludge; Statistical analysis; Trickling filters; Chemical removal (sewage treatment); Sanitary engineering; Sewage treatment; Slime
Enhanced Phosphorus Removal in Trickling Filters, Harold J. Jebens and William C. Boyle, 399

Sludge disposal; Ashes; Drainage; Fly ash; Paper mills; Permeability; Sanitary engineering; Sludge
Permeability of High Ash Papermill Sludge, Orlando B. Andersland and Robert W. Laza, 576

Sludge disposal; Strip mining; Pollution control; Sanitary engineering; Sewage; Sludge
Chicago Reclaiming Strip Mines With Sewage Sludge427

Sluice gates; Water flow; Coefficients; Engineering mechanics; Gates
Solution of Flow Under Sluice Gate, Yong K. Chung, 152

Slurries; Bored piles; Clay (material); Field tests
Behavior of Bored Piles in Beaumont Clay, Michael W. O'Neill and Lymon C. Reese, 197

Slurries; Tunnel construction; Compressed air; Excavation; Shields (tunneling)
Pressurized-Slurry Shields Bore Submarine Tunnels, Takuya Ohira and Shunta Shiraishi, 248

Small watersheds; Digital simulation; Floods; Hydraulics; Hydrology
Flood Frequency Estimating Techniques for Small Watersheds, George Fleming and Delbert D. Franz, 23

Smoothness; Coefficients; Graphs (charts); Hydraulics; Mannings equation; Pipe flow; Sanitary engineering
Manning's Coefficient for Smooth Pipes, Henry Liu, 312

Snow; Drainage; Overland flow; Runoff; Seepage
Volume of Snowmelt Intercepted by Logging Roads, Edward R. Burroughs, Jr., Michael A. Marsden and Harold F. Haupt, 145

Social aspects; Social needs; Civil engineering; Civil engineers; Political aspects
Are Civil Engineers Socially Responsible?, David Crump, 35

Social aspects; Social needs; Civil engineering; Ecology; Environmental engineering; Pollution control; Professional activities
Ecology - Rage and Reason, Robert Moses, 474

Social change; Civil engineering; Environmental engineering; Political aspects; Pollution; Professional activities
Pollution, Politics and Protest, Charles L. Gould, 39

Social needs; ASCE (aims and activities); ASCE (executive secretary); ASCE (professional objectives)
Some Reflections at Retirement Time, William H. Wisely, 174

Social needs; ASCE (presidents); Environmental engineering; Professional activities
Antidote for Environmental Hysteria, Samuel S. Baxter, 180

Social needs; Civil engineering; Civil engineers; Engineering education
The Engineer's Role, Frederick J. Clarke, 264

Social needs; Civil engineering; Civil engineers; Health; Professional activities
The Role of the Civil Engineer in Statewide Health Planning, William H. Wisely, 592

Social needs; Civil engineering; Civil engineers; Political aspects; Social aspects
Are Civil Engineers Socially Responsible?, David Crump, 35

Social needs; Civil engineering; Design; Engineering; Planning; Projects
Ethical and Social Responsibility in the Planning and Design of Engineering Projects, David Mann, 107

Social needs; Civil engineering; Ecology; Environmental engineering; Pollution control; Professional activities; Social aspects
Ecology - Rage and Reason, Robert Moses, 474

Social needs; Civil engineering; Engineering; Professional activities; Professional engineering
Considering Social Value in Engineering Projects, Charles G. Sudduth, 96

Social needs; Ecology; Environmental effects; Pollution; Population growth
The Engineer and the Environment, C. Maxwell Stanley, 352

Social needs; Environmental engineering; Flood control; Open channel flow; Professional activities
Public Participation in Environmental Design of Flood Control Channels, Phillip F. Dunn, Jr., 432

Social needs; Solid wastes; Environmental engineering; Federal agencies; Legislation; Professional activities; Sewage treatment
The Engineer and the New Environment, Eugene T. Jensen, 381

Social needs; Subways; Washington, D.C.; Contracts; Noise reduction; Rapid transit railways
Washington D.C.'s Metro--A Progress Report, Robert S. O'Neil, 194

Social needs; Systems analysis; Civil engineering; Civil engineers; Professional activities
The Civil Engineer in the Multidisciplinary Design Team, David A. Novick, 277

Social needs; Technology; Civil engineers; Problem solving
Engineering and Today's Social Problems, Donald C. Slichter, 147

Social needs; Technology; Environmental engineering; Professional practice
In Defense of Dubos and Ellul, Kim de Rubertis, 534

Social needs; Telecommunication; Transportation; Urban development; Urban planning; Buildings (office); Communication; Forecasting
Communications Substitutes for Intra-Urban Travel, Richard C. Harkness, 307

Social needs; Transportation; Urban transportation; Buses (vehicles); Passenger transportation; Routing
Demand Activated Transportation for The Elderly, Charles B. Notess and Robert E. Paaswell, 456

Social needs; Transportation; Urban transportation; Chicago; Employment opportunities; Passenger transportation
Public Transit and Job Access in Chicago, Martin Wachs and Joseph L. Schofer, 170

Social needs; Urban development; Urban planning; Community relations; Planning; Problem solving
Goals for Dallas Program, Erik Jonsson, 394

Social needs; Urban development; Urban transportation; Water reuse; Water supply; Population growth
The Urban Growth Syndrome, William H. Wisely, 358

Social needs; Urban planning; Urban transportation; Automobiles; Buses (vehicles); Mass transportation
Shopping and Work Trips in the Black Ghetto, Charles B. Notess, 325

Social needs; Water resources; Assessments; Drainage; Droughts; Environments
Assessing Social Consequences of Water Deficiencies, William K. Johnson, 60

Social needs; Water resources; Land use; Professional activities; Regional planning
Principals and Standards for Water and Land Resources Planning, W. Don Maughn, 452

Social values; Trucks; Urban development; Cargo transportation; Freight terminals
Urban Commodity Flow - Suggested Research Projects, Warren B. Lovejoy, 554

Sociology; Training; Hydraulic engineering; Hydraulics; Innovation; Professional societies; Sciences
Technological Innovation and Hydraulic Engineering, George Bugliarello, 278

Soil cement; Soil mechanics; Stresses; Viscoelasticity; Base courses; Cracking; Shrinkage
Viscoelastic Shrinkage Stress in Soil-Cement Base, Bal K. Sanan and Kalankamary P. George, 598

Soil cement; Transportation; Cements; Deformation; Highways
Soil-Cement Bases Under Thin Bituminous Surfacing, Boniface C. Obi, 124

Soil compacting; Compaction tests; Laboratory tests; Saturation
A Possible 1-Point System Method For Laboratory Compaction Testing, John J. Galvan, 165

Soil formation; Soil mechanics; Construction materials; Ghana; Gravel; Laterites
Lateritic Gravel Evaluation For Road Construction, J. W.S. de Graft-Johnson, Harbhajan S. Bhatia and A. A. Hammond, 545

Soil mechanics; Abutments; Cutoffs; Dams (rockfill); Foundations; Geology; Grouting; Jets; Rock fills
Foundation Practices for Talbingo Dam, Australia, B. J. Wallace and J. I. Hilton, 492

Soil mechanics; Abutments; Dams; Dams (embankment); Foundations; Rock mechanics; Seepage
Abutment and Foundation Treatment for High Embankment Dams on Rock, Reginald A. Barron, 491

Soil mechanics; Bearing capacity; Bridges (piers); Foundations; Piers; Piles (foundations); Settlement (structural)
Load Settlement Prediction for Piles and Piers, Harry G. Poulos, 439

Soil mechanics; Bearing capacity; Cohesionless soils; Footings; Foundations
Bearing Capacity Theory From Experimental Results, A. Verghese Chummar, 561

Soil mechanics; Bearing capacity; Foundations; Settlement (structural); Shear modulus
Initial Settlement of Structures on Clay, David J. D'Appolonia, Harry G. Poulos and Charles C. Ladd, 43

Soil mechanics; Bearing capacity; Impact tests; Penetration; Projectiles; Sands
Low Velocity Projectile Penetration, Wen L. Wang, 104

Soil mechanics; Blasting; Dams; Embankments; Excavation; Foundations; Grouting
Foundation Treatment for Embankment Dams on Rock, Elmer W. Stroppini, Donald H. Babbitt and Henry E. Struckmeyer, 493

Soil mechanics; Cavities; Elastic-plastic analysis; Expansion
Expansion of Cavities in Infinite Soil Mass, Aleksandar Sedmak Vesic, 217

Soil mechanics; Chemical composition; Compaction; Incineration; Incinerators; Leaching
Incinerator-Residue-Fill Site Investigation, Robert J. Schoenberger and A. Alexander Fungaroli, 65

Soil mechanics; Clay (material); Dynamic response; Laboratory tests; Shear modulus
Time Effects on Dynamic Shear Modulus of Clays, William F. Marcuson, III and Harvey E. Wahls, 588

Soil mechanics; Clays; Earth pressure; Lateral pressure; Model tests; Retaining walls
Lateral Pressures from Soft Clay, Peter J. Moore and Graham K. Spencer, 538

Soil mechanics; Compaction; Density; Sands; Shear strain
Compaction of Sands By Repeated Shear Straining, T. Leslie Youd, 382

Soil mechanics; Compression; Earth pressure coefficient; Mica
Effect of Mica on K_o Compressibility of Two Soils, Charles A. Moore, 33

Soil mechanics; Computers; Dams (earth); Drains; Seepage
Seepage Through Dams with Horizontal Toe Drain, Mohammad S. Moayeri, 282

Soil mechanics; Consolidation; Drainage; Drains; Pore water pressure
Consolidation of Clay Layer in Two Dimensions, Sivajogi D. Koppula and Norbert R. Morgenstern, 168

Soil mechanics; Construction; Foundations; Settlement (structural)
Heave and Lateral Movements Due to Pile Driving, Donald J. Hagerty and Ralph B. Peck, 73

Soil mechanics; Construction materials; Ghana; Gravel; Laterites; Soil formation
Lateritic Gravel Evaluation For Road Construction, J. W.S. de Graft-Johnson, Harbhajan S. Bhatia and A. A. Hammond, 545

Soil mechanics; Cracking (fracturing); Dams; Dams (earth); Embankments; Finite element method; Instrumentation
Stresses and Movements in Oroville Dam, Fred H. Kulhawy and James M. Duncan, 363

Soil mechanics; Dams; Dams (earth); Drawdown; Finite element method; Hydraulic models; Seepage
Seepage Analysis of Earth Banks Under Drawdown, Chandrakant S. Desai, 511

Soil mechanics; Design; Foundations; Lateral pressure; Pile lateral loads; Piles (foundations)
Behavior of Laterally Loaded Piles: III -- Socketed Piles, Harry G. Poulos, 243

Soil mechanics; Dilatancy; Finite element method; Joints (geology); Rock bolts
Duplication of Dilatancy in Analysis of Jointed Rocks, Richard E. Goodman and Jacques Dubois, 274

Soil mechanics; Earthquakes; Liquefaction; Sands; Seismic design
Simplified Procedure for Evaluating Soil Liquefaction Potential, H. Bolton Seed and Izzat M. Idriss, 8

Soil mechanics; Embankments; Foundations; Offshore structures
Embankment Construction On Yielding Sea Bottom, Aris C. Stamatopoulos and Panaghiotis C. Kotzias, 391

Soil mechanics; Engineering geology; Landslides; Pennsylvania; Rock mechanics; Shear strength; Slope stability
Failure of Colluvial Slope, James V. Hamel and Norman K. Flint, 189

Soil mechanics; Expansive clays; Failure; Harbor structures; Inclinometers; Meteorology; Overconsolidation
Behavior of Wharf Affected by River Fluctuations, Richard A. Sullivan, 457

Soil mechanics; Field tests; Geophysical prospecting; Seismic investigations; Shear modulus
In Situ Shear Wave Velocity by Cross-Hole Method, Kenneth H. Stokoe, II and Richard D. Woods, 293

Soil mechanics; Foundations; Grouting; Permeability; Plastics; Polyurethane resins
Polyurethane Foamed Plastics in Soil Grouting, Ted S. Vinson and James K. Mitchell, 321

Soil mechanics; Foundations; Half Space
Tilting Foundations, Gerd F. Weissmann, 152

Soil mechanics; Soil moisture; Subgrade; Clays; Infiltration; Pavement bases
Subgrade Moisture Under Oklahoma Highways, T. Allan Haliburton, Donald R. Snethen, Larry K. Shaw and B. Dan Marks, 114

Soil mechanics; Soil resistivity; Bearing capacity; Foundations; Pile driving; Pile foundations; Pile structures
Soil Resistance Predictions from Pile Dynamics, Frank Rausche, Fred Moses and George G. Goble, 481

Soil mechanics; Soil stabilization; Admixtures; Chemical stabilization; Clays; Lime soil mixtures
Acceleration of Lime-Clay Reactions with Salt, B. Dan Marks and T. Allan Haliburton, 235

Soil mechanics; Soil stabilization; Compaction; Fills; Fly ash; Frost action
Engineering Properties of Compacted Fly Ash, Donald H. Gray and Yen-Kuang Lin, 253

Soil mechanics; Soil-structure interaction; Earth pressure; Retaining walls
Finite Element Analyses of Retaining Wall Behavior, Gerald W. Clough and James M. Duncan, 95

Soil mechanics; Soil-structure interaction; Stress distribution; Velocity distribution; Walls; Earth pressure; Mobility; Retaining walls
Effect of Wall Movement on Active and Passive Pressures, Ian K. Lee and John R. Herington, 347

Soil mechanics; Soil-structure interaction; Structural engineering; Buildings; Buildings (codes); Earthquakes
Earthquake Design Formula Considering Local Soil Conditions, Semih S. Tezcan, 15

Soil mechanics; Soil-structure interaction; Structural engineering; Elastic properties; Foundations; Frames
Structure-Foundation Interaction Analyses, Ian K. Lee and Peter T. Brown, 554

Soil mechanics; Solid wastes; Aggregates; Ashes; Materials; Powerplants
Bottom Ash: An Engineering Material, Roger K. Seals, Lyle K. Moulton and Byron E. Ruth, 224

Soil mechanics; Stability; Clays; Dams; Shale; Shear strength; Sliding
Analysis of Waco Dam Slide, Stephen G. Wright and James M. Duncan, 472

Soil mechanics; Stability criteria; Subsurface structures; Cavities; Creep; Frozen soils
In Situ Creep Analysis of Room in Frozen Soil, Erik G. Thompson and Francis H. Sales, 464

Soil mechanics; Strain rate; Stress-strain curves; Consolidation; Consolidation coefficient
Consolidation at Constant Rate of Strain, Anwar E.Z. Wissa, John T. Christian, Edward H. Davis and Sigurd Heiberg, 51

Soil mechanics; Strains; Anchorages; Bearing capacity; Models; Sands
Anchor Behavior in Sand, Thomas H. Hanna, Robert Sparks and Mehmet Yilmaz, 521

Soil mechanics; Strains; Stresses; Bearing capacity; Deformation; Finite elements
Finite Element Analysis of Strain-Softening Clay, Kaare Hoeg, 141

Soil mechanics; Strains; Stresses; Subgrades; Transportation; Dynamic loads; Elastic properties; Materials; Pavements
Dynamic Response of Model Pavement Structure, Stephen F. Brown and David I. Bush, 541

Soil mechanics; Stratification; Anisotropy; Earth materials; Elastic theory; Reinforcement
Elastic Theory Applied to Reinforced Earth, W. Jill Harrison and Charles M. Gerrard, 575

Soil mechanics; Stress distribution; Cracking; Failure; Safety factors; Slope stability
Influence of Progressive Failure On Slope Stabilities, Fredy Romani, C. William Lovell, Jr. and Milton E. Harr, 530

Soil mechanics; Stresses; Viscoelasticity; Base courses; Cracking; Shrinkage; Soil cement
Viscoelastic Shrinkage Stress in Soil-Cement Base, Bal K. Sanan and Kalankamary P. George, 598

Soil mechanics; Stress-strain curves; Cohesive soils; Field tests; Shear strength
Expansion of Cylindrical Probes in Cohesive Soils, Francois Baguelin, Jean-Francois Jezequel, Eugene LeMee and Alain LeMehaute, 553

Soil mechanics; Structural engineering; Beams (supports); Contact pressure; Foundations; Isotropy
Behavior of Crossed Beams on Elastic Foundations, Ami Glassman, 125

Soil mechanics; Subsidence; Fills; Fire protection; Foundations; Pile driving; Reclamation
Industry Builds on a Refuse Dump, Hans J. Pfister, 487

Soil mechanics; Terzaghi lecture; Dams (earth); Engineering education; Foundations; Pile driving; Pile foundations; Settlement (structural)
The Integrated Civil Engineering Project, T. William Lambe, 337

Soil mechanics; Test procedures; Chemical grouts; Chemical reactions; Compacting; Research and development
Strength Properties of Chemically Solidified Soils, James Warner, 503

Soil mechanics; Tests; Triaxial tests; Bubbles; Hydraulics; Laboratories; Pipe flow
Time to Dissolve Air Bubbles in Drain Line, Kenneth L. Lee and David K. Black, 179

Soil mechanics; Tests; Undrained shear tests; Confining pressure; Cyclic loads; Damping; Resonance; Sands; Shear modulus
Undrained Cyclic Shear of Saturated Sand, Vincent P. Drnevich, 431

Soil mechanics; Thawing; Bending stress; Ice; Permafrost; Pipelines; Settlement (structural)
Settlement of Pipeline on Thawing Permafrost, Andrew C. Palmer, 276

Soil mechanics; Time; Anisotropy; Consolidation; Settlement (structural)
Consolidation of a Layer Under a Strip Load, John T. Christian, Jan Willem Boehmer and Philippe P. Martin, 374

Soil mechanics; Time dependence; Underwater construction; Bearing capacity; Deformation; Earth pressure; Ocean engineering; Pore water pressure
Breakout Resistance of Objects Embedded in Ocean Bottom, Aleksandar Sedmak Vesic, 19

Soil mechanics; Topography; Abutments; Construction; Foundations; Geology; Grouting; Seepage
Current Practice in Abutment and Foundation Treatment, Harris H. Burke, Charles S. Content and Richard L. Kulesza, 489

Soil mechanics; Torsion shear tests; Vibration; Damping; Laboratory tests; Shear stress; Shear tests
Shear Modulus and Damping in Soils: Measurement and Parameter Effects, Bobby O. Hardin and Vincent P. Drnevich, 328

Soil mechanics; Triaxial tests; Grain sizes; Model studies; Rock fills; Shear strength
Evaluation of Properties of Rockfill Materials, N. Dean Marschi, Clarence K. Chan and H. Bolton Seed, 160

Soil mechanics; Vehicles; Clays; Limit design method; Sands; Slipping
Stress Field Under Slipping Rigid Wheel, Mohammed K. Elsamny and Ahmed A. Ghobarah, 113

Soil mechanics; Venezuela; Damage; Earthquake resistant structures; Earthquakes
Soil Conditions and Building Damage in 1967 Caracas Earthquake, H. Bolton Seed, Ricardo V. Whitman, Houshang Dezfulian, Ricardo Dobry and Izzat M. Idriss, 423

Soil mechanics; Vibration; Cohesionless soils; Earthquakes; Sands; Shear strain
Settlement of Dry Sands During Earthquakes, H. Bolton Seed and Marshall L. Silver, 264

Soil mechanics; Vibration; Dynamics; Foundations
Vertical Vibration of Embedded Footings, Milos Novak and Youpele O. Beredugo, 568

Soil mechanics; Vibration; Vibratory compaction; Mechanics; Sands
Subsidence of Sand Due to Surface Vibration, William F. Brumund and Gerald A. Leonards, 133

Soil moisture; Irrigation; Mathematical models
Optimal Irrigation Quantity and Frequency, I-pai Wu and Tung Liang, 171

Soil moisture; Soil moisture movement; Two phase flow; Capillary flow; Hydraulics; Infiltration
Perturbation Analysis of Two-Phase Infiltration, Alain Noblanc and Hubert J. Morel-Seytoux, 463

Soil moisture; Subgrade; Clays; Infiltration; Pavement bases; Soil mechanics
Subgrade Moisture Under Oklahoma Highways, T. Allan Haliburton, Donald R. Snethen, Larry K. Shaw and B. Dan Marks, 114

Soil moisture; Water consumption; Agricultural engineering; Irrigation; Irrigation operation " maintenance; Management
Irrigation Management - A Tool for Agribusiness, Neil W. Schild and Harvey R. Nelson, Jr., 486

Soil moisture; Water distribution (applied); Water requirements; Irrigation practices
Water Requirements of Rostered Irrigation Schemes, Patrick D. Fitzgerald and Gregory C. Arnold, 131

Soil moisture movement; Two phase flow; Capillary flow; Hydraulics; Infiltration; Soil moisture
Perturbation Analysis of Two-Phase Infiltration, Alain Noblanc and Hubert J. Morel-Seytoux, 463

Soil pressure; Backfills; Corrugated metal pipes; Deformation
New Design Method for Corrugated Steel Pipe, Alma P. Moser and Reynold K. Watkins, 291

Soil properties; Field tests; Foundation investigations; Foundations
Subsurface Investigation for Design and Construction of Foundations of Buildings: Part I, Task Committee for Foundation Design Manual of the Committee on Shallow Foundations of the Soil Mechanics and Foundations Division, William F. Swiger, Chmn., 302

Soil properties; Field tests; Foundation investigations; Foundations
"Subsurface Investigation for Design and Construction of Foundations of Buildings: Part III and IV," by the Task Committee for Foundation Design Manual of the Committee on Shallow Foundations of the Soil Mechanics and Foundations Division, William F. Swiger, Chmn., 403

Soil properties; Surface irrigation; Water; Water flow; Infiltration; Infiltration rate; Irrigation
Shape Factors in Irrigation Water Advance Equation, Pratap Singh and H. S. Chauhan, 502

Soil properties; Surveying; Concrete (precast); Concrete (reinforced); Construction; Nuclear power plants
Civil Engineers Help Construct the World's Largest Proton Accelerator, William D. Alexander, Marvin E. Warner, E. Parke Rohrer and Richard E. Pages, 474

Soil properties; Terminology; Field tests; Foundation investigations; Foundations
Subsurface Investigations for Design and Construction of Foundations of Buildings: Appendices A and B, Task Committee for Foundation Design Manual of the Committee on Shallow Foundations of the Soil Mechanics and Foundations Division, William F. Swiger, Chmn., 413

Soil properties; Terminology; Tests; Field tests; Foundation investigations; Foundations
Subsurface Investigation for Design and Construction of Foundations of Buildings: Part II, Task Committee for Foundation Design Manual of the Committee on Shallow Foundations of the Soil Mechanics and Foundations Division, William F. Swiger, Chmn., 309

Soil resistivity; Bearing capacity; Foundations; Pile driving; Pile foundations; Pile structures; Soil mechanics
Soil Resistance Predictions from Pile Dynamics, Frank Rausche, Fred Moses and George G. Goble, 481

Soils; Drainage; Homogeneity; Seepage
Seepage from Trenches Through Nonhomogeneous Soils, Ahmed El Nimur and Robert L. Street, 185

Soils; Stress-strain curves; Vibration; Analysis; Damping; Design data; Earthquakes; Repeated loading; Shear modulus
Shear Modulus and Damping in Soils: Design Equations and Curves, Bobby O. Hardin and Vincent P. Drnevich, 354

Soil stability; Stability; Transportation; Earth movements; Highways; Inclinometers; Instrumentation
Instrumentation Applied to Slope Stability Problems, Stanley D. Wilson and David E. Hilts, 316

Soil stabilization; Admixtures; Chemical stabilization; Clays; Lime soil mixtures; Soil mechanics
Acceleration of Lime-Clay Reactions with Salt, B. Dan Marks and T. Allan Haliburton, 235

Soil stabilization; Compaction; Fills; Fly ash; Frost action; Soil mechanics
Engineering Properties of Compacted Fly Ash, Donald H. Gray and Yen-Kuang Lin, 253

Soil stabilization; Stabilization; Subgrades; Lime
Lime Reclaims Unstable Interior Subgrade During Construction, James M. Sheahan, 303

Soil stabilization; Subgrades; Transportation; Construction; Construction procedure; Flexible pavements; Highway engineering; Lime
Deep-Plow Lime Stabilization for Pavement Construction, Marshall R. Thompson, 107

Soil-structure interaction; Earth pressure; Retaining walls; Soil mechanics
Finite Element Analyses of Retaining Wall Behavior, Gerald W. Clough and James M. Duncan, 95

Soil-structure interaction; Foundations; Mathematical models; Nuclear power plants; Nuclear reactors; Power; Seismic properties
Interaction of Soil and Power Plants in Earthquakes, Jeremy Isenberg and Samy A. Adham, 419

Soil-structure interaction; Stress distribution; Velocity distribution; Walls; Earth pressure; Mobility; Retaining walls; Soil mechanics
Effect of Wall Movement on Active and Passive Pressures, Ian K. Lee and John R. Herington, 347

Soil-structure interaction; Structural engineering; Buildings; Buildings (codes); Earthquakes; Soil mechanics
Earthquake Design Formula Considering Local Soil Conditions, Semih S. Tezcan, 15

Soil-structure interaction; Structural engineering; Elastic properties; Foundations; Frames; Soil mechanics
Structure-Foundation Interaction Analyses, Ian K. Lee and Peter T. Brown, 554

Soil-structure interaction; Structural engineering; White noise; Earthquakes; Foundations
Dynamic Soil-Structure Interaction, Mauricio A. Sarrazin, 338

Soil-structure interaction; Tall buildings; Vibration; Buildings; Earthquakes; Engineering mechanics
Earthquake Interaction for Multistory Building, Lawrence W. Fagel and Shih-Chi Liu, 416

Solar radiation; Water consumption; Climatology; Consumptive use (water); Evaporation; Evapotranspiration; Irrigation
Coastal California Evapotranspiration Frequencies, Paul R. Nixon, G. Paul Lawless and Gary V. Richardson, 279

Solid wastes; Absorption; Sanitary engineering; Sanitary landfill; Sewage sludge
Water and Sewage Sludge Absorption by Solid Waste, Ralph Stone and Richard L. Kahle, 467

Solid wastes; Aggregates; Ashes; Materials; Powerplants; Soil mechanics
Bottom Ash: An Engineering Material, Roger K. Seals, Lyle K. Moulton and Byron E. Ruth, 224

Solid wastes; Baling; Magnetic separators; Refuse; Refuse disposal; Sanitary engineering; Sanitary landfill
Refuse Reclamation and Recycle, Joseph F. Malina, Jr. and William T. Morgan, 564

Solid wastes; Computers; Costs; Data systems; Economics; Refuse disposal; Sanitary engineering
Basic Data for Solid Waste: A Pilot Study, Robert M. Clark, John M. Sweeten and Daniel G. Greathouse, 540

Solid wastes; Decision making; Gaming models; Management engineering; Refuse disposal; Sanitary engineering
Management Science and Gaming in Waste Management, Pran N. Wahi and Theodore I. Peterson, 476

Solid wastes; Environmental engineering; Federal agencies; Legislation; Professional activities; Sewage treatment; Social needs
The Engineer and the New Environment, Eugene T. Jensen, 381

Solid wastes; Natural resources; Professional activities; Rivers; Sewage disposal
Interdisciplinary Planning to Meet Environmental Needs, Frederick J. Clarke, 535

Solid wastes; Statistical analysis; Costs; Planning; Regional planning; Regression analysis; Sanitary engineering
Cost of Residential Solid Waste Collection, Robert M. Clark, Betty L. Grupenhoff, George A. Garland and Albert J. Klee, 34

Solid wastes; Statistical analysis; Samples; Sanitary engineering
Improving Manual Solid Waste Separation Studies, Paul W. Britton, 454

Solid wastes; Systems engineering; Economics; Refuse disposal; Sanitary engineering
Fleet Selection for Solid Waste Collection Systems, Robert M. Clark and Billy P. Helms, 216

Solid wastes; Systems engineering; Urban planning; Waste disposal; Mathematics; Refuse disposal; Sanitary engineering
Selecting Solid Waste Disposal Facilities, Billy P. Helms and Robert M. Clark, 4

Solid wastes; Waste disposal; Dynamic characteristics; Hauling; Management; Optimization; Sanitary engineering
Facility Selection and Haul Optimization Model, Houshang Esmaili, 528

Solid wastes; Waste disposal; Economic feasibility; Environmental engineering; Resources; Sanitary landfill
How Urgent the Need to Recycle Solid Waste, Robert D. Bargman, 434

Solid wastes; Waste disposal; Environmental engineering; Powerplants; Sanitary engineering
St. Louis Powerplant Burns City Refuse, F. E. Wisely, G. Wayne Sutterfield and David L. Klumb, 518

Solid wastes; Waste disposal; Landfills; Sanitary engineering; Sanitary landfill
Demonstration Sanitary Landfill in Kansas City, Kans., Gerald A. Neely and Nicholas S. Artz, 468

Solid wastes; Waste water; Water resources; Water treatment; Air pollution; Industrial wastes; Municipal water; Research; Sanitary engineering
Research Needs in Sanitary Engineering, Sanitary Engineering Research Committee of the Sanitary Engineering Division, Jack M. Betz, Chmn., 321

Sorption; Waste treatment; Activated carbon; Adsorption; Irreversible processes; Kinetics; Sanitary engineering
Sorption Kinetics in Finite-Bath Systems, Francis A. DiGiano and Walter J. Weber, Jr., 546

Sound level meters; Management; Protective clothing; Safety; Safety engineering
Surveying Safety, John M. Shields and Jack J. Wilks, 364

South Carolina; Traffic; Traffic surveys; Transportation; Urban planning; Highways
Annual Surveillance of Urban Traffic Growth, Peter S. Parsonson, 346

South Dakota; Water resources; Weather modification; Hydraulics; Rainfall; Silver iodide
Weather Modification Program for South Dakota, Richard A. Schleusener and Edwin I. Boyd, 466

Space frames; Stability; Structural engineering; Buckling; Deflection; Matrix methods
Large Deflection Buckling of Space Frames, Kuang-Han Chu and Robert H. Rampetsreiter, 589

Space reconnaissance; Surveying; Television systems; Geodetic surveys; Mapping; Natural resources; Photogrammetry
Applications of Extraterrestrial Surveying and Mapping, Robert B. McEwen and David A. Tyler, 604

Spacing; Structural engineering; Beams (supports); Concrete (prestressed); Concrete (reinforced); Cracking
Theory of Cracking in Concrete Members, Arthur D. Edwards and Andre Picard, 584

Spatial distribution; Weirs; Discharge coefficients; Fluid flow; Hydraulics
Spatially Varied Flow Over Side-Weirs, Kanakatti Subramanya and Subhash Chandra Awasthy, 84

Specifications; Structural design; Structural engineering; Webs (supports); Beams (supports)
Suggested Design Guides for Beams with Web Holes, by the Subcommittee on Beams with Web Openings of the Task Committee on Flexural Members of the Structural Division, John E. Bower, Chmn., 30

Spectral energy distribution; Standing waves; Wave height; Breakwaters; Coastal engineering; Ocean waves
Spectral Resolution of Breakwater Reflected Waves, Edward B. Thornton and Ronald J. Calhoun, 512

Spectral energy distribution; Vibration; Dynamics; Engineering mechanics; Probability theory
Properties of Spectral Moments with Applications to Random, Erik H. Vanmarcke, 211

Spherical shells; Buckling; Elastic properties; Engineering mechanics; Plastic properties; Shells (structural forms)
Symmetric Buckling of Inelastic Spherical Shells, Robert K. Emerton and Nicholas F. Morris, 586

Spherical shells; Stability; Buckling; Engineering mechanics; Finite differences; Shells (structural forms)
Asymmetrical Buckling of Imperfect Spherical Shells, George N. Freskakis and Nicholas F. Morris, 471

Spherical shells; Underwater structures; Dynamic structural analysis; Engineering mechanics; Shells (structural forms)
Acoustic Approximations in Fluid-Shell Interactions, Bedros Bedrosian and Frank L. DiMaggio, 337

Spillways; Variations; Curvature; Fluid flow; Hydraulics; Nappe; Parabolas
Flow Over Rounded Spillways, Kamil H.M. Ali, 163

Spillways; Vibration; Design; Field tests; Gates; Hydraulics
Spillway Gate Vibration on Arkansas River Dams, Tasso Schmidgall, 146

Sprinkler irrigation; Surface irrigation; Trickle irrigation; Water application rate; Water management (applied); Irrigation; Irrigation efficiency
Attainable Irrigation Efficiencies, Lyman S. Willardson, 331

Stability; Acceleration tolerance; Construction; Dams (embankment); Dams (rockfill); Hydraulics; River closures; Rivers
Stability of Rockfill in End-Dump River Closures, Bishnu P. Das, 567

Stability; Boundary conditions; Buckling; Composite materials; Deformation; Eigenvalues; Energy methods; Engineering mechanics; Equilibrium methods; Lagrangian functions
Stability of Orthotropic Stiffened Composite Plates, Kao Ding Chiu, 508

Stability; Buckling; Eigenvalues; Energy methods; Engineering mechanics; Optimization
Simultaneous Buckling in Symmetric Structural Systems, Kenneth C. Johns, 369

Stability; Buckling; Engineering mechanics; Finite differences; Shells (structural forms); Spherical shells
Asymmetrical Buckling of Imperfect Spherical Shells, George N. Freskakis and Nicholas F. Morris, 471

Stability; Clays; Dams; Shale; Shear strength; Sliding; Soil mechanics
Analysis of Waco Dam Slide, Stephen G. Wright and James M. Duncan, 472

Stability; Dynamics; Dynamic stability; Engineering mechanics; Slenderness ratio
Dynamic Stability of Thin-Walled Column, Carl H. Popelar, 304

Stability; Statistical analysis; Structural engineering; Buckling; Columns (supports); Deflection; Elastic properties; Engineering mechanics; Probability theory
Nonstationary Random Column Buckling Problem, Raymond G. Jacquot, 501

Stability; Steels; Structural engineering; Beam columns; Beams (supports); Buckling; Columns (supports)
Finite Deformation of Biaxially Loaded Columns, Lawrence A. Soltis and Paul P. Christiano, 568

Stability; Strain hardening; Structural engineering; Buckling; Moments
Buckling of Inelastic I-Beams Under Uniform Moment, Nicholas S. Trahair and Sritawat Kitipornchai, 536

Stability; Structural engineering; Architecture; Bibliographies; History; Lattice design
"Bibliography on Latticed Structures," by the Subcommittee on Latticed Structures of the Task Committee on Special Structures of the Committee on Metals of the Structural Division, Donald R. Sherman, Chmn., 365

Stability; Structural engineering; Beam columns; Bending; Plasticity
Simple Interaction Equations for Beam-Columns, Wai F. Chen and Toshio Atsuta, 326

Stability; Structural engineering; Beam columns; Buckling; Framed structures; Sidesway
Approximate Determination of Frame Critical Loads, F. David Edmonds and Ian C. Medland, 161

Stability; Structural engineering; Beam columns; Buckling; Frames
Unbraced Multistory Steel Frames with Wind Load, E. Whitman Wright, 78

Stability; Structural engineering; Beams (supports); Buckling; Cantilevers
Stability of Monosymmetric Beams and Cantilevers, John M. Anderson and Nicholas S. Trahair, 122

Stability; Structural engineering; Beams (supports); Buckling; I beams
Elastic Stability of Tapered I-Beams, Sritawat Kitipornchai and Nicholas S. Trahair, 165

Stability; Structural engineering; Buckling; Deflection; Matrix methods; Space frames
Large Deflection Buckling of Space Frames, Kuang-Han Chu and Robert H. Rampetsreiter, 589

Stability; Structural engineering; Buckling; Plates
Post-Buckling of Geometrically Imperfect Plates, Ralph G. Dawson and Alastair C. Walker, 67

Stability; Structural engineering; Tall buildings; Buckling; Frames; Lateral stability
Long-Wave Extensional Buckling of Large Regular Frames, Zdenek P. Bazant and M. Christensen, 504

Stability; Structural engineering; Torsion; Walls; Buildings; Frames
Analysis of Three-Dimensional Structures, Jacobus H. Wynhoven and Peter F. Adams, 109

Stability; Structural engineering; Torsion; Walls; Buildings; Frames
Behavior of Structures Under Loads Causing Torsion, Jacobus H. Wynhoven and Peter F. Adams, 306

Stability; Structural stability; Uplift pressure; Foundations; Hydraulics; Permeability
Boundary Effects on Stability of Structures, A. S. Chawla, 481

Stability; Thermal conductivity; Flow patterns; Freeze-thaw cycle; Hydraulics; Ice; Rivers
Ripples on Underside of River Ice Covers, George D. Ashton and John F. Kennedy, 470

Stability; Torsion; Vibration; Beam columns; Buckling; Columns (supports); Computation; Dynamic stability; Engineering mechanics
Coupled, Nonconservative Stability-Finite Element, C. D. Mote, Jr. and Gerald Y. Matsumoto, 286

Stability; Transportation; Earth movements; Highways; Inclinometers; Instrumentation; Soil stability
Instrumentation Applied to Slope Stability Problems, Stanley D. Wilson and David E. Hilts, 316

Stability; Vibration; Beam columns; Buckling; Dynamics; Engineering mechanics; Mathematical models
Beams Subjected to a Follower Force Within the Span, Jack C. Wiley and Richard E. Furkert, 569

Stability criteria; Subsurface structures; Cavities; Creep; Frozen soils; Soil mechanics
In Situ Creep Analysis of Room in Frozen Soil, Erik G. Thompson and Francis H. Sales, 464

Stabilization; Algae; Chlorination; Flocculating; Sanitary engineering
Disinfection of Algal Laden Waters, Wayne F. Echelberger, Jr., Joseph L. Pavoni, Philip C. Singer and Mark W. Tenney, 91

Stabilization; Subgrades; Lime; Soil stabilization
Lime Reclaims Unstable Interior Subgrade During Construction, James M. Sheahan, 303

Stadiums; Suspended structures; Cables (ropes); Germany; Roofs
Cable Suspended Roof for Munich Olympics, Fritz Leonhardt and Jorg Schlaich, 319

Standard deviation; Surveying; Variance (statistics); Weighting functions; Distribution; Focal length; Photogrammetry; Probability theory; Random error
Theoretical Weighting of Photogrammetric Equations, Charles Kendall Paul, 550

Standards; Building codes; Concrete (reinforced); Criteria; Earthquakes
Implications of the New ACI Building Code, Edward Cohen, 365

Standards; Structural engineering; ASCE (Committees); Buildings (codes); Lateral forces; Seismic design
Basic Design Criteria of the Recommended Lateral Force Requirements and Commentary, By the Ad Hoc Committee on Direction Study of the Joint SEAOC-ASCE Committee on Seismic Forces of the Committee on Dynamic Forces of the Structural Division, Henry J. Degenkolb, Chmn., 433

Standards; Training; Construction industry; Engineering education; Engineers; Foreign engineering; Great Britain; Management; Metric system; Planning
Metrication Progress in the United Kingdom, Gordon Bowen, 523

Standards; Transportation; Utilities; Government; Pipelines; Safety
The State's Role in Gas Safety, Harold E. Shutt, 46

Standing waves; Wave height; Breakwaters; Coastal engineering; Ocean waves; Spectral energy distribution
Spectral Resolution of Breakwater Reflected Waves, Edward B. Thornton and Ronald J. Calhoun, 512

State governments; Water management (applied); Water pollution; Environmental engineering; Maryland; Pollution control; Sanitary engineering
Statewide Management-What Does the Future Hold?, Frank A. Butrico and James B. Coulter, 244

Statically determinate structures; Structural engineering; Trusses; Costs; Optimum design; Probability theory
Minimum Expected Cost Optimization, Shengtaur Mau and Robert G. Sexsmith, 447

Statics; Beams (supports); Deflection; Engineering mechanics; Mathematical models; Probability theory
Statics of Random Beams, Devendra K. Shukla and Robert M. Stark, 600

Static structural analysis; Deflection; Displacement; Engineering mechanics; Equilibrium; Fourier series; Rings
Linear Theory of Thin Rings, Harry E. Williams, 436

Static structural analysis; Structural analysis; Rigid frames
Rapid Design of Tapered Rigid Frames, Duane S. Ellifritt, 323

Statistical analysis; Benefit-cost ratios; Economic analysis; Flood control; Hydraulics; Hydrology
Bias in Computed Flood Risk, Clayton H. Hardison and Marshall E. Jennings, 188

Statistical analysis; Bids; Construction; Construction industry; Contractors; Probability theory
Competitive Bidding: The Probability of Winning, Neal B.H. Benjamin, 601

Statistical analysis; Concentration; Hydraulics; Power; Rivers; Sediments; Sediment transport
Unit Stream Power and Sediment Transport, Chih Ted Yang, 519

Statistical analysis; Costs; Planning; Regional planning; Regression analysis; Sanitary engineering; Solid wastes
Cost of Residential Solid Waste Collection, Robert M. Clark, Betty L. Grupenhoff, George A. Garland and Albert J. Klee, 34

Statistical analysis; Drainage; Evapotranspiration; Irrigation; Probability theory
Maximum Potential Evapotranspiration Frequency - East Central U.S., J. L. McGuinness and Leslie H. Parmele, 267

Statistical analysis; Erosion; Hydraulics; Sedimentation; Sediment yield
Predicting Sediment Yield in Western United States, Elliott M. Flaxman, 585

Statistical analysis; Flood forecasting; Flood frequency; Floods; Hydraulics; Rainfall
Floods Predicted From Rainfall Frequencies, Lee Robinson and Theodore T. Williams, 517

Statistical analysis; Impact prediction; Land use; Power; Powerplants; Regional planning; Site selection
New Approach to Power Plant Siting, James D. Calvert and William L. Heilman, 201

Statistical analysis; Samples; Sanitary engineering; Solid wastes
Improving Manual Solid Waste Separation Studies, Paul W. Britton, 454

Statistical analysis; Statistical dispersion; Structural engineering; Eigenvalues; Eigenvectors; Engineering mechanics; Mode (statistics)
Modal Analysis of Random Structural Systems, Timothy K. Hasselman and Gary C. Hart, 273

Statistical analysis; Statistical distributions; Transportation management; Forecasting; Land use; Population
Statistical Decision in Forecasting Planning Data, Kumares C. Sinha, 547

Statistical analysis; Stochastic models; Stream flow; Autocorrelation; Hydraulics; Mathematical models; Probability theory
Parameter Estimation for First-Order Autoregressive Model, Luis E. Garcia-Martinez, 426

Statistical analysis; Stochastic processes; Vibration; Engineering mechanics
First Passage of Nonstationary Random Processes, Ross B. Corotis, Erik H. Vanmarcke and C. Allin Cornell, 205

Statistical analysis; Structural engineering; Buckling; Columns (supports); Deflection; Elastic properties; Engineering mechanics; Probability theory; Stability
Nonstationary Random Column Buckling Problem, Raymond G. Jacquot, 501

Statistical analysis; Structural engineering; Buildings; Live loads
Statistical Analysis of Live Load in Column Design, Ross B. Corotis, 384

Statistical analysis; Structural engineering; Design; Earthquakes; Engineering mechanics; Probability theory
Reliability Optimization in Isostatic Structures, Emilio Rosenblueth and Enrique Mendoza, 38

Statistical analysis; Surveying; Surveying instruments; Temperature; Atmospheric pressure; Barometers; Density; Measuring instruments
Barometric Leveling Analysis, James D. Gruendler, Frederick P. Thomack and James L. Clapp, 313

Statistical analysis; Systems engineering; Data systems; Hydraulics; Nevada; Regulation; Simulation
Streamflow Synthesis - A Case Study, Vulli L. Gupta and John W. Fordham, 336

Statistical analysis; Tests; Time dependence; Vibration; Viscoelasticity; Data systems; Dynamics; Engineering mechanics; Field tests; Materials tests
Statistical Theory for Viscoelastic Materials, Joseph Soussou and Fred Moavenzadeh, 532

Statistical analysis; Transportation; Costs; Economics; Highways; Roads
Local Rural Road Costs and Economies of Scale, William D. Berg, 478

Statistical analysis; Transportation; Urban transportation; Mathematical models; Rapid transit railways
Assessing Impact of Urban Transportation, David E. Boyce, 330

Statistical analysis; Trickling filters; Chemical removal (sewage treatment); Sanitary engineering; Sewage treatment; Slime; Sludge
Enhanced Phosphorus Removal in Trickling Filters, Harold J. Jebens and William C. Boyle, 399

Statistical analysis; Turbulence; Hydraulics
Lagrangian Characteristics of Surface Turbulence, Eggert Hansen, 346

Statistical analysis; Virginia; Estuaries; Hydraulic models; Hydraulics; Models; Salinity
Repeatability in Estuarine Hydraulic Model, Paul V. Hyer, 229

Statistical analysis; Waterways; Waves; Hydraulics; Rivers; Sands
Statistical Properties of Missouri River Bed Forms, V.S. Shastri Annambhotla, William W. Sayre and Robert H. Livesey, 544

Statistical dispersion; Structural engineering; Eigenvalues; Eigenvectors; Engineering mechanics; Mode (statistics); Statistical analysis
Modal Analysis of Random Structural Systems, Timothy K. Hasselman and Gary C. Hart, 273

Statistical distributions; Transportation management; Forecasting; Land use; Population; Statistical analysis
Statistical Decision in Forecasting Planning Data, Kumares C. Sinha, 547

Statistical tests; Temperature; Water quality; Algorithms; Coefficients; Evaporation; Mathematical models; Predictions
Stream Temperature Prediction Under Reduced Flow, William L. Morse, 332

Steady flow; Water distribution (applied); Algorithms; Computer programs; Head losses; Hydraulics
Computer Analysis of Water Distribution Systems: Part I - Formulation of Equations, Chan F. Lam and M. L. Wolla, 173

Steel; Structural engineering; Tubes; Construction; Earthquakes; Frames; Sidesway
Perimetral Tube for 37-Story Steel Building, L. Agustin Mazzeo and Armin De Fries, 288

Steel construction; Concrete (reinforced); Concrete structures; Construction methods; Critical path method
Composite Steel-Concrete Building Frame, Don Belford, 334

Steel pipes; Tunnels; Aqueducts; Conduits; Mortars (material); Pipelines; Pipe linings; Protective coatings
Cement Mortar Lining of 20-Ft Diameter Steel Pipe, James E. Wolfe, 462

Steel pipes; Weld defects; Welded pipes; Brittle fracturing; Pipe joints; Pipelines; Slip joints
Brittle Fracture of Steel Pipe Analyzed, Robert V. Phillips and Stephen M. Marynick, 345

Steels; Beam columns; Cables (ropes); Economic analysis
Economical Design of Prestressed Plate Girder, Miloslav Tochacek and Champa L. Mehta, 298

Steels; Strength; Stress analysis; Bridge design; Bridges (structures); Cracking (fracturing); Criteria; Failure; Fractures; Safety factors
Fracture Mechanics, With High-Strength Steels A Must, Stanley T. Rolfe, 357

Steels; Structural engineering; Beam columns; Beams (supports); Buckling; Columns (supports); Stability
Finite Deformation of Biaxially Loaded Columns, Lawrence A. Soltis and Paul P. Christiano, 568

Steels; Structural engineering; Buckling; Chimneys; Design; Liner plates; Loads (forces); Power; Research
Design of Steel Chimney Liners, Max Zar, Shih-Lung Chu and James M. Doyle, 500

Steels; Structural engineering; Fatigue (materials); Galvanizing; High strength bolts; Joints (junctions)
High Strength Bolted Galvanized Joints, D. J. Laurie Kennedy, 576

Steels; Structural engineering; Subassemblies; Buildings; Frames; Plasticity
Plastic Subassemblage Analysis for Unbraced Frames, J. Hartley Daniels and Le-Wu Lu, 409

Steels; Structural engineering; Tall buildings; Wind (meteorology); Amplitude; Chicago; Columns (supports); Loads (forces)
Bundled-tube Structure for Sears Tower, Hal S. Iyengar, 509

Steels; Structural engineering; Tests; Welding; Bridges (decking); Bridges (orthotropic); Fatigue (materials); Ribs (supports)
Fatigue of Orthotropic Steel Decks, Hacik Erzurumlu and A. Anthony Toprac, 205

Steels; Structural engineering; Tube joints; Welded joints; Welding; Fatigue (materials); Fractures (materials); Offshore structures
Fatigue Failure of Welded Tubular Joints, James M. Becker, William W. Gerberich and Jack G. Bouwkamp, 62

Steels; Traffic control; Tunnels; Underwater construction; Vehicular tunnels; Cofferdams; Fabrication; Prefabrication; Reinforcement
Submerged-Tube Tunnel in Mobile, Ray R. Slocum, 368

Steel structures; Strain hardening; Structural engineering; Cyclic loads; Plastic theory
Shakedown of Strain-Hardening Structures, John D. Meyer and Kurt H. Gerstle, 106

Steel structures; Structural engineering; Beam columns; Buildings; Columns (supports); Skyscrapers
Aspects of Column Design in Tall Steel Buildings, John Springfield and Peter F. Adams, 258

Stiffness; Buckling; Composite structures; Engineering mechanics; Orthotropic plate
Shear-Flexible Orthotropic Plates Loaded in Plane, Charles W. Bert and Shyming Chang, 602

Stiffness; Stresses; Structural engineering; Joints (connections); Joints (junctions)
Shear Lag Analysis of Rectangular Full-Width Tube Junctions, Bharat L. Mehrotra and Ashok K. Govil, 128

Stiffness; Structural engineering; Algorithms; Matrices (mathematics); Matrix methods
General Treatment of Structural Modifications, John H. Argyris and John R. Roy, 150

Stiffness; Structural engineering; Concrete (reinforced); Plates; Shells (structural forms); Slabs
Stiffness of Reinforced Concrete Plates, Alex E. Cardenas, Rolf J. Lenschow and Mete A. Sozen, 566

Stiffness matrix; Stiffness methods; Bridges (cable-stayed); Iteration
Stiffness-Analysis of Cable-Stayed Bridges, Benjamin E. Lazar, 349

Stiffness matrix; Structural analysis; Structural engineering; Torsion; Bridges (structures); Matrix methods
Stiffness Analysis of Grids Including Warping, Robert J. Reilly, 333

Stiffness matrix; Structural design; Structural members; Algorithms; Engineering mechanics; Matrices (mathematics); Revisions
Reanalysis for Limited Structural Design Modifications, Uri Kirsch and Moshe F. Rubinstein, 75

Stiffness methods; Bridges (cable-stayed); Iteration; Stiffness matrix
Stiffness-Analysis of Cable-Stayed Bridges, Benjamin E. Lazar, 349

Stiffness methods; Structural analysis; Structural engineering; Bridges (box girder); Computer programs; Finite elements; Folded plates; Interchanges; Orthotropic plate; Skew bridges
Cellular Structures of Arbitrary Plan Geometry, Kaspar J. William and Alexander C. Scordelis, 315

Stiffness methods; Structural design; Structural engineering; Optimization
Optimum Design by Partitioning into Substructures, Uri Kirsch, Max Reiss and Uri Shamir, 117

Stiffness methods; Structural engineering; Beams (supports); Plates; Runge-Kutta method
Nonlinear Beam and Plate Elements, Jimmy H. Smith, 158

Stiffness methods; Structural engineering; Buildings; Curved beams; Folded plates
Analysis of Curved Folded Plate Structures, Christian Meyer and Alexander C. Scordelis, 20

Stiffness methods; Structural engineering; Cables (ropes); Computation; Finite elements; Prestressing; Roofs
Large Deflection Analysis of Prestressed Networks, John H. Argyris and Dieter W. Scharpf, 185

Stilling basins; Storm water; Water pollution; Baffles; Hydraulics; Sanitary engineering; Siphons
Stilling Pond Storm Overflow Studies, Y. R. Reddy and John Pickford, 428

Stilling basins; Turbulence; Boundary shear; Energy dissipators; Hydraulic jump; Hydraulics
Boundary Layer Effects on Hydraulic Jump Location, Edward H. Wilson and Andrew A. Turner, 341

Stochastic models; Stream flow; Autocorrelation; Hydraulics; Mathematical models; Probability theory; Statistical analysis
Parameter Estimation for First-Order Autoregressive Model, Luis E. Garcia-Martinez, 426

Stochastic models; Stream flow; Hydraulics; Monte Carlo method; Probability theory; Simulation
Adequacy of Hydrologic Records for Parameter Estimation, Charles T. Haan, 430

Stochastic processes; Boundary value problems; Monte Carlo method; Ocean waves; Plates
Analysis of Floating Plate Under Ocean Waves, Yi-Kwei Wen and Masanobu Shinozuka, 317

Stochastic processes; Distribution functions; Hydraulics; Hydrology; Reservoir storage; Runoff
Some Problems with Log-Normal Markov Runoff Models, Stephen J. Burges, 443

Stochastic processes; Vibration; Engineering mechanics; Statistical analysis
First Passage of Nonstationary Random Processes, Ross B. Corotis, Erik H. Vanmarcke and C. Allin Cornell, 205

Stochastic processes; Water pollution; Biochemical oxygen demand; Estuaries; Mathematical models; Oxygen demand; Sanitary engineering
Stochastic Model of BOD and OD in Segmented Estuary, William R. Schofield and Richard G. Krutchkoff, 488

Storm drains; Storm water; Unsteady flow; Hydraulics; Hydrographs
Routing Storm Water Through a Drainage System, Subin Pinkayan, 102

Storm drains; Urbanization; Hydraulic models; Hydraulics; Instantaneous unit hydrograph; Mathematical models
Conceptual Hydrologic Models for Urbanizing Basins, Ramachandra A. Rao, Jacques W. Delleur and B. S.P. Sarma, 362

Storm runoff; Flood control; Golf courses
Flood Channel Doubles as Golf Course, Clifford C. Hood, 238

Storm runoff; Water pollution control; Water quality control; Water treatment; Federal government
Corps of Engineers Plans Regional Water Quality Program, William Whipple, Jr., 118

Storms; Antecedent precipitation; Hydraulics; India; Rainfall-runoff relationships; Runoff
Synthetic Storm Pattern and Run-off for Gauhati, India, M. Bandyopadnyay, 270

Storms; Stresses; Wind bracing; Wooden structures; Coastal engineering; Construction; Design; Foundations; Hurricanes; Piers
Wood Structures Can Resist Hurricanes, Gerald E. Sherwood, 417

Storm water; Unsteady flow; Hydraulics; Hydrographs; Storm drains
Routing Storm Water Through a Drainage System, Subin Pinkayan, 102

Storm water; Water pollution; Baffles; Hydraulics; Sanitary engineering; Siphons; Stilling basins
Stilling Pond Storm Overflow Studies, Y. R. Reddy and John Pickford, 428

Strain hardening; Structural engineering; Buckling; Moments; Stability
Buckling of Inelastic I-Beams Under Uniform Moment, Nicholas S. Trahair and Sritawat Kitipornchai, 536

Strain hardening; Structural engineering; Cyclic loads; Plastic theory; Steel structures
Shakedown of Strain-Hardening Structures, John D. Meyer and Kurt H. Gerstle, 106

Strain rate; Stress-strain curves; Consolidation; Consolidation coefficient; Soil mechanics
Consolidation at Constant Rate of Strain, Anwar E.Z. Wissa, John T. Christian, Edward H. Davis and Sigurd Heiberg, 51

Strains; Anchorages; Bearing capacity; Models; Sands; Soil mechanics
Anchor Behavior in Sand, Thomas H. Hanna, Robert Sparks and Mehmet Yilmaz, 521

Strains; Stresses; Bearing capacity; Deformation; Finite elements; Soil mechanics
Finite Element Analysis of Strain-Softening Clay, Kaare Hoeg, 141

Strains; Stresses; Structural engineering; Bridges (box girder); Bridges (orthotropic); Plastics
Bending and Torsion in Orthotropic Deck Box Girder, Michael S. Troitsky and Abdul K. Azad, 427

Strains; Stresses; Subgrades; Transportation; Dynamic loads; Elastic properties; Materials; Pavements; Soil mechanics
Dynamic Response of Model Pavement Structure, Stephen F. Brown and David I. Bush, 541

Strains; Structural engineering; Bridges (structures); Concrete (reinforced); Field tests; Folded plates
Model and Prototype Studies of Box Girder Bridge, Raymond Eugene Davis, Charles F. Scheffey, Gary A. Castleton and Evan E. Evans, 70

Strands; Structural engineering; Bridges (suspension); Cables (ropes); Rhode island
Main Cables of Newport Suspension Bridge, Blair Birdsall, 58

Stratification; Anisotropy; Earth materials; Elastic theory; Reinforcement; Soil mechanics
Elastic Theory Applied to Reinforced Earth, W. Jill Harrison and Charles M. Gerrard, 575

Stratification; Thermal pollution; Waste heat; Cooling systems; Cooling water; Heat budget
Impact of Cooling Water on Lake Temperatures, Heinz Stefan, Chung-Sang Chu and Ho Wing, 392

Stratification; Water pollution; Water quality; Waterways; Density; Harbors; Locks (waterways); Salinity; Salt water intrusion
Mardyck Lock Acts as Salt-Water Barrier, Ch. Blanchet and B. Quetin, 600

Stratified flow; Fluid flow; Hydraulics; Overflow
Flow of Layered Fluid Over Broad Crested Weir, Ian R. Wood and K. K. Lai, 108

Stratified flow; Water quality; Cooling water; Diffusion; Hydraulics
Dilution of Buoyant Two-Dimensional Surface Discharges, Heinz Stefan, 124

Stream flow; Autocorrelation; Hydraulics; Mathematical models; Probability theory; Statistical analysis; Stochastic models
Parameter Estimation for First-Order Autoregressive Model, Luis E. Garcia-Martinez, 426

Stream flow; Hydraulics; Monte Carlo method; Probability theory; Simulation; Stochastic models
Adequacy of Hydrologic Records for Parameter Estimation, Charles T. Haan, 430

Stream flow; Temperature; Bed load; Bedload movement; Hydraulics; Sedimentation; Sediments
Temperature Effects in Low-Transport, Flat-Bed Flows, Brent D. Taylor and Vito A. Vanoni, 412

Stream flow; Temperature; Density stratification; Hydraulics; Powerplants
Cooling Water Density Wedges in Streams, Edward M. Polk, Jr., Barry A. Benedict and Frank L. Parker, 37

Stream flow; Water supply; Drainage; Droughts; Irrigation; Reservoir storage; Reservoir yield
Drought Severity and Water Supply Dependability, Leo R. Beard and Harold E. Kubik, 539

Stream pollution; Biochemical oxygen demand; Dispersion; Dissolved oxygen; Sanitary engineering
Effects of Dispersion on DO-sag in Uniform Flow, Wen-Hsiung Li, 251

Stream pollution; Use rates; Ice cover; Oxygen; Oxygen consumption; Rivers; Sag; Sanitary engineering
Oxygen Depletion in Ice Covered River, Patrick H. Bouthillier, 326

Streams; Agriculture; Aquatic plants; Industrial wastes; Land use; Population; Regulations; Sanitary engineering
Water Pollution - Facts and Fantasies, John M. Henderson, 390

Streams; Bed load; Bedload movement; Hydraulics; Rivers; Sedimentation
Sediment Discharge Computation Procedures, Nick Tywoniuk, 213

Streams; Bed load; Hydraulics; Laboratory tests; Sands; Sediment transport
Laboratory Study of Transport of Fine Sand, Joe C. Willis, Neil L. Coleman and Wilbert M. Ellis, 183

Streams; Eutrophication; Oxygen content; Plants; Sanitary engineering
Variable Respiration in Aquatic Plant Communities, Archie J. McDonnell and Dennis W. Weeter, 348

Streams; Surveying; Water pollution; Water resources; Aerial photography; Flooding; Lakes; Remote sensing
Aerial Photography for Water Resource Studies, Ralph W. Kiefer and James P. Scherz, 149

Streams; Suspended sediments; Bed load; Canals; Channels; Desilting; Hydraulic models; Hydraulics; Sedimentation
Chapter V: Sediment Control Methods: C. Control of Sediment in Canals, By the Task Committee on Preparation of Sedimentation Manual, Committee on Sedimentation of the Hydraulics Division, Vito A. Vanoni, Chmn., 455

Streams; Thermoelectric power generation; Heated water; Hydraulic models; Hydraulics; Jets; Pollution; Rivers
Surface Jet Model for Heated Discharges, Louis H. Motz and Barry A. Benedict, 136

Streams; Urban planning; Environmental engineering; Esthetics; Land use; Parks; Recreational facilities
Evaluating Recreational Potential of Small Streams, John A. Dearinger, 478

Street railroads; Subways; Transportation; Construction costs; Elevated railroads; Rapid transit railways; Regional planning; Right-of-way; Right of way acquisition
Expressway Rapid Transit, George Krambles, 590

Strength; Stress analysis; Bridge design; Bridges (structures); Cracking (fracturing); Criteria; Failure; Fractures; Safety factors; Steels
Fracture Mechanics, With High-Strength Steels A Must, Stanley T. Rolfe, 357

Strength; Structural engineering; Beams (supports); Buckling; Deflection
Alternative Approach to Light-Gage Beam Design, James Rhodes and James M. Harvey, 9

Strength; Structural engineering; Deformation; Elasto-plastic; Frames; Plane structures; Plastic analysis
Deformation Analysis of Elastic - Plastic Frames, Donald E. Grierson, 499

Stress analysis; Bridge design; Bridges (structures); Cracking (fracturing); Criteria; Failure; Fractures; Safety factors; Steels; Strength
Fracture Mechanics, With High-Strength Steels A Must, Stanley T. Rolfe, 357

Stress analysis; Deformation; Guyed towers; Guy wires
Approximate Stress Analysis for Guyed Towers, Stan H. Lowy, 169

Stress distribution; Cracking; Failure; Safety factors; Slope stability; Soil mechanics
Influence of Progressive Failure On Slope Stabilities, Fredy Romani, C. William Lovell, Jr. and Milton E. Harr, 530

Stress distribution; Stress strain diagrams; Elastic shells; Engineering mechanics; Shells (structural forms)
Invariant Multicouple Theory of Shells, Gerald A. Wempner, 577

Stress distribution; Velocity distribution; Walls; Earth pressure; Mobility; Retaining walls; Soil mechanics; Soil-structure interaction
Effect of Wall Movement on Active and Passive Pressures, Ian K. Lee and John R. Herington, 347

Stresses; Bearing capacity; Deformation; Finite elements; Soil mechanics; Strains
Finite Element Analysis of Strain-Softening Clay, Kaare Hoeg, 141

Stresses; Computer programming; Engineering mechanics; Equations; Frames; Plasticity; Quadratic equations
Elastic-Plastic Analysis by Quadratic Programming, Antone F. Sayegh and Moshe F. Rubinstein, 564

Stresses; Deflection; Design; Engineering mechanics; Epoxy resins; Loads (forces); Orthotropic plate; Plates (structural members)
Large Deflection of Rectangular Orthotropic Plates, Chuen-Yuan Chia, 514

Stresses; Deflection; Elastic foundations; Engineering mechanics; Plates
Stresses in Circular Plates on Elastic Foundations, Richard Bolton, 297

Stresses; Engineering mechanics; Integral transformations; Punches
Boussinesq Problems for Nonhomogeneous Solid, Mumtaz K. Kassir, 236

Stresses; Structural engineering; Bridges (box girder); Bridges (orthotropic); Plastics; Strains
Bending and Torsion in Orthotropic Deck Box Girder, Michael S. Troitsky and Abdul K. Azad, 427

Stresses; Structural engineering; Deformation; Elastic properties; Finite elements
Finite Element Approach to Plane Microelasticity, Mohammed H. Baluch, John E. Goldberg and Severino L. Koh, 461

Stresses; Structural engineering; Joints (connections); Joints (junctions); Stiffness
Shear Lag Analysis of Rectangular Full-Width Tube Junctions, Bharat L. Mehrotra and Ashok K. Govil, 128

Stresses; Structural engineering; Tensile strength; Tests; Concrete (reinforced); Reinforcement
Strength of Fiber-Reinforced Concrete, Jitendra N. Kar and Anil K. Pal, 253

Stresses; Structural engineering; Tests; Beams (supports); Buildings; Reinforcement
Tests on Beams with Reinforced Web Openings, Peter B. Cooper and Robert R. Snell, 189

Stresses; Structural engineering; Webs (supports); Beams (supports); Bending; Curved beams
Bending Behavior of Cylindrical Web Panels, Charles G. Culver, Clive L. Dym and Darryl K. Brogan, 507

Stresses; Subgrades; Transportation; Dynamic loads; Elastic properties; Materials; Pavements; Soil mechanics; Strains
Dynamic Response of Model Pavement Structure, Stephen F. Brown and David I. Bush, 541

Stresses; Tall buildings; Computer programming; Computers; Design; Dynamic response; Dynamics; Earthquakes; Engineering mechanics; Nonlinear programming; Optimization
Optimum Earthquake Design of Shear Buildings, Ben Kato, Yuji Nakamura and Hidetake Anraku, 343

Stresses; Thickness; Transportation; Computer programs; Fatigue (materials)
Structural Design of Concrete Pavement by Computer, Cloyd E. Warnes, 25

Stresses; Torsion; Tubes; Warpage; Beams (supports); Curved beams; Engineering mechanics
Torsion and Flexure of Curved, Thin-Walled Beams or Tubes, Ray N. Nitzsche and Robert E. Miller, 382

Stresses; Viscoelasticity; Base courses; Cracking; Shrinkage; Soil cement; Soil mechanics
Viscoelastic Shrinkage Stress in Soil-Cement Base, Bal K. Sanan and Kalankamary P. George, 598

Stresses; Wind bracing; Wooden structures; Coastal engineering; Construction; Design; Foundations; Hurricanes; Piers; Storms
Wood Structures Can Resist Hurricanes, Gerald E. Sherwood, 417

Stress-strain curves; Bond stress; Composite materials; Cracking (fracturing); Discontinuities; Engineering mechanics
Deformation and Fracture of Particulate Composite, Oral Buyukozturk and Arthur H. Nelson, 292

Stress-strain curves; Cohesive soils; Field tests; Shear strength; Soil mechanics
Expansion of Cylindrical Probes in Cohesive Soils, Francois Baguelin, Jean-Francois Jezequel, Eugene LeMee and Alain LeMehaute, 553

Stress-strain curves; Consolidation; Consolidation coefficient; Soil mechanics; Strain rate
Consolidation at Constant Rate of Strain, Anwar E Z. Wissa, John T. Christian, Edward H. Davis and Sigurd Heiberg, 51

Stress-strain curves; Vibration; Analysis; Damping; Design data; Earthquakes; Repeated loading; Shear modulus; Soils
Shear Modulus and Damping in Soils: Design Equations and Curves, Bobby O. Hardin and Vincent P. Drnevich, 354

Stress strain diagrams; Elastic shells; Engineering mechanics; Shells (structural forms); Stress distribution
Invariant Multicouple Theory of Shells, Gerald A. Wempner, 577

Strip mining; Pollution control; Sanitary engineering; Sewage; Sludge; Sludge disposal
Chicago Reclaiming Strip Mines With Sewage Sludge427

Structural analysis; Beams (supports); Deflection; Graphs (charts)
Design Aid for Deflection Calculation for a Uniformly Loaded Flexural Member, Thomas M. Chura, 114

Structural analysis; Bending; Deformation; Loads (forces); Pipeline transportation; Pipes; Reactions (mechanics)
Systematic Stress Analysis of Circular Pipe, Junkichi Katoh, 584

Structural analysis; Buildings (codes); Earthquake damage; Professional engineering
Badly Needed: Changes in Building Codes for Houses, Melvin W. Jackson, 190

Structural analysis; Calculators; Computer systems programs; Hydraulic models; Mathematical models
Guidelines for Selecting a Programmable Calculator, Eugene E. Dallaire, 129

Structural analysis; Computer models; Computer programming; Finite element method; Mathematical models
Responsibilities of Computer-Aided Design, Charles F. Beck, 288

Structural analysis; Continuum mechanics; Engineering mechanics; Sandwich panels; Shells (structural forms)
Cosserat Surface and Sandwich Shell Equilibrium, David J. Malcolm and Peter G. Glockner, 453

Structural analysis; Design; Earthquake resistant structures; Earthquakes; Engineering mechanics; Failure
Expected Fatigue Damage of Seismic Structures, Jhy-Pyng Tang and James T.P. Yao, 317

Structural analysis; Rigid frames; Static structural analysis
Rapid Design of Tapered Rigid Frames, Duane S. Ellifritt, 323

Structural analysis; Structural engineering; Beams (supports); Bolted joints; Joints (connections); Lap joints; Moment distribution
Double Overlap Beam, Oliver A. Baer, 542

Structural analysis; Structural engineering; Bridges (box girder); Computer programs; Finite elements; Folded plates; Interchanges; Orthotropic plate; Skew bridges; Stiffness methods
Cellular Structures of Arbitrary Plan Geometry, Kaspar J. William and Alexander C. Scordelis, 315

Structural analysis; Structural engineering; Buckling; Cantilevers; Frames
Buckling of Lateral Restrained Thin-Walled Cantilevers of Open Cross Section, Jacob Gluck and Menachem Gelbert, 451

Structural analysis; Structural engineering; Tall buildings; Walls; Rigid frames; Shear
Approximate Inelastic Analysis of Shear Wall-Frame Structures, James G. MacGregor, Sauren N. Guha Majumdar, Rajendra P. Nikhed and Peter F. Adams, 551

Structural analysis; Structural engineering; Torsion; Bridges (structures); Matrix methods; Stiffness matrix
Stiffness Analysis of Grids Including Warping, Robert J. Reilly, 333

Structural design; Buildings; Buildings (residential); Collapse; Explosions
Design for Prevention of Progressive Collapse, Ramzi H. Ferahian, 102

Structural design; Structural engineering; Optimization; Stiffness methods
Optimum Design by Partitioning into Substructures, Uri Kirsch, Max Reiss and Uri Shamir, 117

Structural design; Structural engineering; Tests; Bolted joints; Bolts
Behavior and Design of Shingle Joints, Edward H. Power and John W. Fisher, 454

Structural design; Structural engineering; Webs (supports); Beams (supports); Specifications
Suggested Design Guides for Beams with Web Holes, by the Subcommittee on Beams with Web Openings of the Task Committee on Flexural Members of the Structural Division, John E. Bower, Chmn., 30

Structural design; Structural members; Algorithms; Engineering mechanics; Matrices (mathematics); Revisions; Stiffness matrix
Reanalysis for Limited Structural Design Modifications, Uri Kirsch and Moshe F. Rubinstein, 75

Structural engineering; Adaptive systems; Algorithms; Computer applications; Optimum design
On Adaptive Structural Design, William R. Spillers and Lewis Friedland, 480

Structural engineering; Airy function; Boundary conditions; Finite difference method; Harmonic functions; Hyperbolic parabolic shells
Finite Difference Approach to Hyperbolic Paraboloids, M. I. Beg, 146

Structural engineering; Algorithms; Matrices (mathematics); Matrix methods; Stiffness
General Treatment of Structural Modifications, John H. Argyris and John R. Roy, 150

Structural engineering; Aluminum; Folded plates; Honeycomb cores; Sandwich panels
Failure Modes of Folded Sandwich Panel Roofs, Paul P. Fazio, 261

Structural engineering; Aluminum; Girders; Shear strength
Thin Aluminum Shear Webs, Maurice L. Sharp and John W. Clark, 5

Structural engineering; Anisotropy; Elastic properties; Finite element method; Mechanics
Finite Element Method for Wood Mechanics, Adam Al-Dabbagh, James R. Goodman and Jozsef Bodig, 174

Structural engineering; Arches; Design; Education; Moment distribution
Hardy Cross and the Rise of Numerical Methods, James Michalos, 153

Structural engineering; Architecture; Bibliographies; History; Lattice design; Stability
"Bibliography on Latticed Structures," by the Subcommittee on Latticed Structures of the Task Committee on Special Structures of the Committee on Metals of the Structural Division, Donald R. Sherman, Chmn., 365

Structural engineering; ASCE (Committees); Buildings (codes); Lateral forces; Seismic design; Standards
Basic Design Criteria of the Recommended Lateral Force Requirements and Commentary, By the Ad Hoc Committee on Direction Study of the Joint SEAOC-ASCE Committee on Seismic Forces of the Committee on Dynamic Forces of the Structural Division, Henry J. Degenkolb, Chmn., 433

Structural engineering; Axial compression; Buckling; Elastic-plastic analysis; Imperfections
Post-Buckling of Axially Compressed Plates, Archibald N. Sherbourne and Robert M. Korol, 477

Structural engineering; Bauschinger effect; Beams (supports); Columns (supports); Concrete (reinforced); Flexural strength
Reinforced Concrete Members with Cyclic Loading, Robert Park, Dudley Charles Kent and Richard A. Sampson, 310

Structural engineering; Beam columns; Beams (supports); Buckling; Columns (supports); Stability; Steels
Finite Deformation of Biaxially Loaded Columns, Lawrence A. Soltis and Paul P. Christiano, 568

Structural engineering; Beam columns; Bending; Plasticity; Stability
Simple Interaction Equations for Beam-Columns, Wai F. Chen and Toshio Atsuta, 326

Structural engineering; Beam columns; Buckling; Framed structures; Sidesway; Stability
Approximate Determination of Frame Critical Loads, F. David Edmonds and Ian C. Medland, 161

Structural engineering; Beam columns; Buckling; Frames; Stability
Unbraced Multistory Steel Frames with Wind Load, E. Whitman Wright, 78

Structural engineering; Beam columns; Buildings; Columns (supports); Skyscrapers; Steel structures
Aspects of Column Design in Tall Steel Buildings, John Springfield and Peter F. Adams, 258

Structural engineering; Beams (supports); Bolted joints; Joints (connections); Lap joints; Moment distribution; Structural analysis
Double Overlap Beam, Oliver A. Baer, 542

Structural engineering; Beams (supports); Bonding strength; Concrete (reinforced); Cracking; Slipping
Cracking and Bond Slip in Concrete Beams, Bandaru Venkateswarlu and Hans Gesund, 578

Structural engineering; Beams (supports); Boundary value problems; Buckling; Composite structures; Rotation
Moment-Rotation Curves for Locally Buckling Beams, J. Jay Climenhaga and R. Paul Johnson, 290

Structural engineering; Beams (supports); Buckling; Cantilevers; Stability
Stability of Monosymmetric Beams and Cantilevers, John M. Anderson and Nicholas S. Trahair, 122

Structural engineering; Beams (supports); Buckling; Deflection; Strength
Alternative Approach to Light-Gage Beam Design, James Rhodes and James M. Harvey, 9

Structural engineering; Beams (supports); Buckling; I beams; Stability
Elastic Stability of Tapered I-Beams, Sritawat Kitipornchai and Nicholas S. Trahair, 165

Structural engineering; Beams (supports); Concrete (prestressed); Concrete (reinforced); Cracking; Spacing
Theory of Cracking in Concrete Members, Arthur D. Edwards and Andre Picard, 584

Structural engineering; Beams (supports); Contact pressure; Foundations; Isotropy; Soil mechanics
Behavior of Crossed Beams on Elastic Foundations, Ami Glassman, 125

Structural engineering; Beams (supports); Plates; Runge-Kutta method; Stiffness methods
Nonlinear Beam and Plate Elements, Jimmy H. Smith, 158

Structural engineering; Bending; Biaxial loads; Columns (supports); Limit design method
Interaction Equations for Biaxially Loaded Sections, Wai F. Chen and Toshio Atsuta, 245

Structural engineering; Biaxial stresses; Concrete
Biaxial Stress-Strain Relations for Concrete, Tony C.Y. Liu and Arthur H. Nilson, 247

Structural engineering; Bibliographies; Construction; Probability theory; Safety; Safety engineering
Structural Safety--A Literature Review, Task Committee on Structural Safety of the Administrative Committee on Analysis and Design for the Structural Division, Alfredo H.S. Ang, Chmn., 214

Structural engineering; Box girders; Bridges (box girder); Bridges (railroad); Bridges (structures)
Railway Box-Girder Bridge Erected by Launching, Jackson L. Durkee, 342

Structural engineering; Box girders; Bridges (structures); Buckling; Composite structures; Design; Models
Ultimate Design of Hollow Thin-Walled Box Girders, Dennis H. Parr, 329

Structural engineering; Bridge decks; Bridges (box girder); Bridges (cable-stayed); Bridges (piers); Bridges (structures); Bridges (suspension); Concrete (prestressed); Prefabrication
Denmark's Lillebaelt Suspension Bridge, Christen Ostenfeld, 526

Structural engineering; Bridge decks; Bridges (orthotropic); Bridges (structures); Floors; Fourier series; Plates (structural members)
Rapid Design of Orthotropic Floor Beams, Peter G. Perry and Conrad P. Heins, Jr., 526

Structural engineering; Bridges (box girder); Bridges (girder); Bridges (structures); Curved beams
Multicell Curved Girder Model Studies, Conrad P. Heins, Jr., Bijan P. Bonakdarpour and Lansford C. Bell, 210

Structural engineering; Bridges (box girder); Bridges (orthotropic); Plastics; Strains; Stresses
Bending and Torsion in Orthotropic Deck Box Girder, Michael S. Troitsky and Abdul K. Azad, 427

Structural engineering; Bridges (box girder); Bridges (structures); Curved beams
Analysis of Horizontally Curved Box Girder Bridges, Kuang-Han Chu and Suresh G. Pinjarkar, 24

Structural engineering; Bridges (box girder); Computer programs; Finite elements; Folded plates; Interchanges; Orthotropic plate; Skew bridges; Stiffness methods; Structural analysis
Cellular Structures of Arbitrary Plan Geometry, Kaspar J. William and Alexander C. Scordelis, 315

Structural engineering; Bridges (cable-stayed); Bridges (girder); Bridges (structures)
Design of Cable-Stayed Girder Bridges, Man-Chung Tang, 416

Structural engineering; Bridges (cable-stayed); Bridges (structures); Buildings; Cables (ropes); Roofs
Mechanical Properties of Structural Cables, John B. Scalzi and William K. McGrath, 52

Structural engineering; Bridges (girder); Bridges (spans); Collapse; Composite structures; Curved beams
Plastic Collapse of Horizontally Curved Bridge Girders, Chai Hong Yoo and Conrad P. Heins, Jr., 221

Structural engineering; Bridges (girder); Bridges (structures); Curved beams; Field tests; Impact; New York
Dynamic Testing of Curved Bridge - Huyck Stream, William L. Armstrong, 429

Structural engineering; Bridges (structures); Concrete (reinforced); Field tests; Folded plates; Strains
Model and Prototype Studies of Box Girder Bridge, Raymond Eugene Davis, Charles F. Scheffey, Gary A. Castleton and Evan E. Evans, 70

Structural engineering; Bridges (structures); Construction materials; Plastics
Why Not Plastics Bridges?, Fred C. McCormick, 399

Structural engineering; Bridges (structures); Design criteria; Dynamic structural analysis; Earthquakes; Seismic design
Seismic Design of Highway Structures, Keith D. Bull, 393

Structural engineering; Bridges (structures); Dynamic structural analysis; Earthquake engineering; Earthquake resistant structures; Earthquakes; Liquefaction
The San Fernando Earthquake - A Lesson in Highway and Bridge Design, Arthur L. Elliott, 424

Structural engineering; Bridges (suspension); Cables (ropes); Dynamic structural analysis; Hydrodynamics; Mechanics; Ocean engineering
Dynamic Analysis of Cable Systems, Richard F. Dominguez and Charles E. Smith, 388

Structural engineering; Bridges (suspension); Cables (ropes); Rhode island; Strands
Main Cables of Newport Suspension Bridge, Blair Birdsall, 58

Structural engineering; Bridges (suspension); Compatibility methods; Computer applications; Computers; Equilibrium methods; Newton-Raphson method
Static Analysis of Suspension Bridges, Alan Jennings and John E. Mairs, 508

Structural engineering; Buckling; Cantilevers; Frames; Structural analysis
Buckling of Lateral Restrained Thin-Walled Cantilevers of Open Cross Section, Jacob Gluck and Menachem Gelbert, 451

Structural engineering; Buckling; Chimneys; Design; Liner plates; Loads (forces); Power; Research; Steels
Design of Steel Chimney Liners, Max Zar, Shih-Lung Chu and James M. Doyle, 500

Structural engineering; Buckling; Columns (supports); Deflection; Elastic properties; Engineering mechanics; Probability theory; Stability; Statistical analysis
Nonstationary Random Column Buckling Problem, Raymond G. Jacquot, 501

Structural engineering; Buckling; Deflection; Matrix methods; Space frames; Stability
Large Deflection Buckling of Space Frames, Kuang-Han Chu and Robert H. Rampetsreiter, 589

Structural engineering; Buckling; Hyperbolic parabolic shells; Membranes; Roofs; Shells (structural forms)
Analysis of Thin-Steel Hyperbolic Paraboloid Shells, Prabodh V. Banavalkar and Peter Gergely, 557

Structural engineering; Buckling; Moments; Stability; Strain hardening
Buckling of Inelastic I-Beams Under Uniform Moment, Nicholas S. Trahair and Sritawat Kitipornchai, 536

Structural engineering; Buckling; Plates; Stability
Post-Buckling of Geometrically Imperfect Plates, Ralph G. Dawson and Alastair C. Walker, 67

Structural engineering; Buildings; Buildings (apartment); Finite elements; Panels
Influence of Joints in Panelized Structural Systems, Eric F.P. Burnett and R. Clement S. Rajendra, 465

Structural engineering; Buildings; Buildings (codes); Earthquakes; Soil mechanics; Soil-structure interaction
Earthquake Design Formula Considering Local Soil Conditions, Semih S. Tezcan, 15

Structural engineering; Buildings; Computer programs; Frames; Plastic design; Skyscrapers
Storywise Plastic Design for Multistory Steel Frames, Leroy Z. Emkin and William A. Litle, 139

Structural engineering; Buildings; Curved beams; Folded plates; Stiffness methods
Analysis of Curved Folded Plate Structures, Christian Meyer and Alexander C. Scordelis, 20

Structural engineering; Buildings; Dynamics; Earthquakes; Monte Carlo method; Probability theory; Shear
Probabilistic Response of Nonlinear Buildings During Earthquakes, Alain H. Peyrot, 531

Structural engineering; Buildings; Fire protection; Fire resistance; Optimization; Probability theory
Optimum Fire Resistance of Structures, T. T. Lie, 97

Structural engineering; Buildings; Live loads; Statistical analysis
Statistical Analysis of Live Load in Column Design, Ross B. Corotis, 384

Structural engineering; Buildings (codes); Computers; Design; Dynamics; Earthquake resistant structures; Earthquakes; Loads (forces); Plasticity
Earthquake Resistant Design of Unbraced Frames, James C. Anderson and Raj P. Gupta, 540

Structural engineering; Cables (ropes); Computation; Finite elements; Prestressing; Roofs; Stiffness methods
Large Deflection Analysis of Prestressed Networks, John H. Argyris and Dieter W. Scharpf, 185

Structural engineering; Cements; Concrete; Concrete (reinforced); Dams; Distribution systems; Foundations; Heat of hydration; Reinforcement
Temperature Rises in Low-Heat Cement Concrete, Barry P. Hughes, 43

Structural engineering; Columns (supports); Curvature; Metals
Tangent Stiffness Method for Biaxial Bending, Sakda Santathadaporn and Wai F. Chen, 93

Structural engineering; Columns (supports); Fire protection
Steel Column Buckling Under Thermal Gradients, Charles G. Culver, 414

Structural engineering; Composite structures; Engineering mechanics; Failure; Fibers; Limit design method; Reinforcement
Limit Analysis of Ductile Fiber-Reinforced Structures, Richard H. Lance and David N. Robinson, 130

Structural engineering; Computation; Concrete structures; Elastic properties; Plates (structural members)
Column-Plate Interaction in Flat Slab Structures, Dieter D. Pfaffinger, 134

Structural engineering; Computation; Dynamics; Dynamic structural analysis; Engineering mechanics; Finite differences; Mathematics; Numerical integration
Temporal Operators for Nonlinear Structural Dynamics Problems, George Weeks, 495

Structural engineering; Computer programs; Continuum mechanics; Elastic-plastic analysis; Finite element method
Finite Element Thermoelastoplastic Analysis, Norman A. Cyr, Roger D. Teter and Brian B. Stocks, 372

Structural engineering; Computers; Iteration; Linear programming; Optimization
Structural Optimization by Inscribed Hyperspheres, Roman Baldur, 242

Structural engineering; Concrete; Concrete (reinforced); Cracks; Shear strength; Shear tests
Experimental Studies of Membrane Shear Transfer, Richard N. White and Myle J. Holley, Jr., 406

Structural engineering; Concrete (precast); Concrete (prestressed); Cost analysis; Design; Poles (supports)
Optimal Design of Prestressed Concrete Poles, Manhar C. Thakkar and Bakul S. Bulsari, 77

Structural engineering; Concrete (precast); Concrete slabs; Housing
High-Rise Panel Structures, Matthys P. Levy and Istvan S. Varga, 240

Structural engineering; Concrete (reinforced); Containment vessels; Shells (structural forms); Ship hulls
Impact Resistance of Ferro-Cement, Surendra P. Shah and William H. Key, Jr., 101

Structural engineering; Concrete (reinforced); Cylindrical shells; Models; Shells (structural forms)
Inelastic Behavior Of R/C Cylindrical Shells, Harry G. Harris and Richard N. White, 376

Structural engineering; Concrete (reinforced); Elastic-plastic analysis; Finite element method; Initial stress
Nonlinear Stress Analysis of Reinforced Concrete, Somasundaram Valliappan and T. F. Doolan, 218

Structural engineering; Concrete (reinforced); Folded plates; Fragmented materials; Loads (forces)
Safe Limit Loading of Folded Plate Structures, Morris N. Fialkow, 483

Structural engineering; Concrete (reinforced); Plates; Shells (structural forms); Slabs; Stiffness
Stiffness of Reinforced Concrete Plates, Alex E. Cardenas, Rolf J. Lenschow and Mete A. Sozen, 566

Structural engineering; Cooling towers; Hyperbolic parabolic shells; Mathematical logic; Shell structures
Differential Settlement of Hyperbolic Cooling Towers, Phillip L. Gould, 487

Structural engineering; Cyclic loads; Plastic theory; Steel structures; Strain hardening
Shakedown of Strain-Hardening Structures, John D. Meyer and Kurt H. Gerstle, 106

Structural engineering; Cylindrical shells; Deformation; Differential equations; Engineering mechanics; Shells (structural forms)
Accurate Fourth Order Equation for Circular Cylindrical Shells, Shun Cheng, 311

Structural engineering; Cylindrical shells; Finite elements; Matrix methods
Analysis of Eccentrically Stiffened Cylindrical Shells, Peter C. Kohnke and William C. Schnobrich, 344

Structural engineering; Damage; Fatigue (materials)
Fatigue Damage Factor in Structural Design, Jhy-Pyng Tang and James T.P. Yao, 126

Structural engineering; Deflection; Finite difference theory; Plates (structural members)
Large Deflections of Curved Plates, Henry W.L. Lee and Conrad P. Heins, Jr., 1

Structural engineering; Deflection; Plates
Analysis of Space Truss as Equivalent Plate, William R. Flower and Lewis C. Schmidt, 38

Structural engineering; Deformation; Elastic properties; Finite elements; Stresses
Finite Element Approach to Plane Microelasticity, Mohammed H. Baluch, John E. Goldberg and Severino L. Koh, 461

Structural engineering; Deformation; Elasto-plastic; Frames; Plane structures; Plastic analysis; Strength
Deformation Analysis of Elastic - Plastic Frames, Donald E. Grierson, 499

Structural engineering; Design; Earthquakes; Engineering mechanics; Probability theory; Statistical analysis
Reliability Optimization in Isostatic Structures, Emilio Rosenblueth and Enrique Mendoza, 38

Structural engineering; Dynamics; Earthquake loads; Safety factor
Concept of Structural Control, James T. P. Yao, 357

Structural engineering; Dynamic structural analysis; Earthquakes; Frames
Dynamic Analysis of Staggered Truss Framing System, Raj P. Gupta and Subhash C. Goel, 352

Structural engineering; Eigenvalues; Eigenvectors; Engineering mechanics; Mode (statistics); Statistical analysis; Statistical dispersion
Modal Analysis of Random Structural Systems, Timothy K. Hasselman and Gary C. Hart, 273

Structural engineering; Elastic properties; Foundations; Frames; Soil mechanics; Soil-structure interaction
Structure-Foundation Interaction Analyses, Ian K. Lee and Peter T. Brown, 554

Structural engineering; Fatigue (materials); Galvanizing; High strength bolts; Joints (junctions); Steels
High Strength Bolted Galvanized Joints, D. J. Laurie Kennedy, 576

Structural engineering; Fourier analysis; Moment distribution; Plates (structural members)
Iterative Method for Solving Rectangular Plates, B. Sen, S. Sengupta and T. K. Nath, 113

Structural engineering; Hyperbaric medicine; Hyperbaric oxygenation; Materials stability; Pressurized cabins
Material Safety Requirements of Hyperbaric Facilities, William J. Bobisch and Michael Yachnis, 322

Structural engineering; Joints (connections); Joints (junctions); Stiffness; Stresses
Shear Lag Analysis of Rectangular Full-Width Tube Junctions, Bharat L. Mehrotra and Ashok K. Govil, 128

Structural engineering; Optimization; Stiffness methods; Structural design
Optimum Design by Partitioning into Substructures, Uri Kirsch, Max Reiss and Uri Shamir, 117

Structural engineering; Structural models; Bridges (box girder); Bridges (structures); Curved beams; Loads (forces); Models; Model tests
Model Analysis of Curved Box-Beam Highway Bridge, Ish K. Aneja and Frederic Roll, 48

Structural engineering; Structural plastics; Computation; Construction procedure; Finite elements; Glass fibers; Roofs; Sandwich structures; Shells (structural forms)
Plastic Sandwich Buckle-Shell Structures, V. James Meyers, Dhamo T. Ramani and Mark E. Greenwood, 515

Structural engineering; Struts; Tees; Thickness ratio; Width; Angle iron; Buckling; Columns (supports); Inelastic action; Slenderness ratio
Buckling of Steel Angle and Tee Struts, John B. Kennedy and Madugula K.S. Murty, 547

Structural engineering; Subassemblies; Buildings; Frames; Plasticity; Steels
Plastic Subassemblage Analysis for Unbraced Frames, J. Hartley Daniels and Le-Wu Lu, 409

Structural engineering; Systems engineering; Urban planning; Architecture; Buildings; Environmental engineering; Planning
Tall Buildings--A Technological Assessment, Thomas C. Kavanagh, 54

Structural engineering; Tall buildings; Buckling; Frames; Lateral stability; Stability
Long-Wave Extensional Buckling of Large Regular Frames, Zdenek P. Bazant and M. Christensen, 504

Structural engineering; Tall buildings; Computers; Limit design method; Moment distribution; Plasticity
Optimum Plastic Design of Steel Frames, Bogdan O. Kuzmanovic and Nicholas Willems, 423

Structural engineering; Tall buildings; Walls; Rigid frames; Shear; Structural analysis
Approximate Inelastic Analysis of Shear Wall-Frame Structures, James G. MacGregor, Sauren N. Guha Majumdar, Rajendra P. Nikhed and Peter F. Adams, 551

Structural engineering; Tall buildings; Wind (meteorology); Amplitude; Chicago; Columns (supports); Loads (forces); Steels
Bundled-tube Structure for Sears Tower, Hal S. Iyengar, 509

Structural engineering; Temperature; Towers; Vibration; Dynamics; Guyed towers; Guy wires
Dynamics of Guyed Towers, Richard J. McCaffrey and Alois J. Hartmann, 303

Structural engineering; Tensile strength; Tests; Concrete (reinforced); Reinforcement; Stresses
Strength of Fiber-Reinforced Concrete, Jitendra N. Kar and Anil K. Pal, 253

Structural engineering; Tests; Beams (supports); Buildings; Reinforcement; Stresses
Tests on Beams with Reinforced Web Openings, Peter B. Cooper and Robert R. Snell, 189

Structural engineering; Tests; Beams (supports); Concrete (reinforced); Shear strength
Shear Strength of Large Beams, Howard P.J. Taylor, 533

Structural engineering; Tests; Bolted joints; Bolts; Structural design
Behavior and Design of Shingle Joints, Edward H. Power and John W. Fisher, 454

Structural engineering; Tests; Box beams; Box girders; Slenderness ratio
Plastic Behavior of Hollow Structural Sections, Robert M. Korol and John Hudoba, 230

Structural engineering; Tests; Bridges (girder); Concrete (precast); Concrete (prestressed); Models
81-ft Model of Prestressed Bridge477

Structural engineering; Tests; Buckling; Columns (supports); Rigid frames; Skyscrapers
Inelastic Multistory Frame Buckling, Bernard M. McNamee and Le-Wu Lu, 368

Structural engineering; Tests; Buildings (office); Comfort; Human factors engineering
Human Perception Thresholds of Horizontal Motion, Peter W. Chen and Leslie E. Robertson, 397

Structural engineering; Tests; Columns (supports); Continuous beams; Plates (structural members); Shear strength
Shear Strength of Continuous Plates, M. Daniel Vanderbilt, 237

Structural engineering; Tests; Hyperbolic parabolic shells; Membranes; Roofs; Shells (structural forms)
Experimental Investigation Of Thin-Steel Hyperbolic Paraboloid Structures, Peter Gergely and George Winter, 473

Structural engineering; Tests; Thin-wall structures; Ultimate strength; Web beams; Buckling; Finite elements; Loading
Failure of Thin-Walled Members Under Patch Loading, Kenneth C. Rockey, Mohamed A. El-Gaaly and Debal K. Bagchi, 572

Structural engineering; Tests; Time dependence; Columns (supports); Concrete (reinforced); Deflection
Slender Concrete Columns Under Sustained Load, Brij B. Goyal and Neil Jackson, 35

Structural engineering; Tests; Torsion; Beams (supports); Concrete (reinforced); Reinforcement; Research; Shear strength
Total Interaction Method for Torsion Design, K. S. Rajagopalan, Umakanta Behera and Phil M. Ferguson, 467

Structural engineering; Tests; Vibration; Fatigue limit; Fatigue (materials)
Fatigue of Cover Plated Beams Under Varying Loads, Francis A. Murad and Conrad P. Heins, Jr., 225

Structural engineering; Tests; Welding; Bridges (decking); Bridges (orthotropic); Fatigue (materials); Ribs (supports); Steels
Fatigue of Orthotropic Steel Decks, Hacik Erzurumlu and A. Anthony Toprac, 205

Structural engineering; Thin plates; Concentrated loads; Deflection; Dynamic properties; Finite differences; Loads (forces); Rectangular bodies; Relaxation (mechanics)
Large Deflection of Elastic Plates Under Patch Loading, Bijan Aalami, 559

Structural engineering; Tides; Underwater construction; Fatigue (materials); Ocean engineering; Offshore structures
Offshore Structures - Statistical Strain Recording, Michael A. Garnett, Bhan Mabin and Terrence E.H. Lemmon, 177

Structural engineering; Timber construction; Wooden structures; Beams (supports); Buckling; Floors
Lateral Stability of Beam and Deck Structure, Paul M. Jenkinson and John J. Zahn, 181

Structural engineering; Topology; Algorithms; Computers; Matrices (mathematics)
Algorithm for Matrix Bandwidth Reduction, Henry R. Grooms, 88

Structural engineering; Torsion; Beams (structural); Composite structures; Concrete (reinforced)
Composite Beams in Torsion, Conrad P. Heins, Jr. and John T.C. Kuo, 275

Structural engineering; Torsion; Beams (supports); Buckling
Lateral Buckling of Constrained Beams, Thomas G. Morrison, 199

Structural engineering; Torsion; Bridges (girder); Bridges (structures); Buckling; Deflection; Design; Plates
Some Design Problems of Large Box Girder Bridges, Bogdan O. Kuzmanovic, 439

Structural engineering; Torsion; Bridges (structures); Matrix methods; Stiffness matrix; Structural analysis
Stiffness Analysis of Grids Including Warping, Robert J. Reilly, 333

Structural engineering; Torsion; Torsional strength; Beams (supports); Numerical analysis
Torsion of Nonprismatic Beams of Open Section, Donald R. Evick and Conrad P. Heins, Jr., 587

Structural engineering; Torsion; Walls; Buildings; Frames; Stability
Analysis of Three-Dimensional Structures, Jacobus H. Wynhoven and Peter F. Adams, 109

Structural engineering; Torsion; Walls; Buildings; Frames; Stability
Behavior of Structures Under Loads Causing Torsion, Jacobus H. Wynhoven and Peter F. Adams, 306

Structural engineering; Towers; Transmission lines; Wind (meteorology); Buildings (codes); Cables; Design criteria; Loading; Power lines
Wind Recommendations for Transmission Towers, Gene M. Wilhoite, 142

Structural engineering; Transmission towers; Aluminum; Aluminum alloys; Field tests; Loads (forces)
Guide for the Design of Aluminum Transmission Towers, by the Task Committee on Lightweight Alloys of the Committee on Metals of the Structural Division, Robert J. Brungraber, Chmn., 596

Structural engineering; Trenches; Buried structures; Culverts; Field tests; Pressure gages; Research
Concrete Arch Culvert Behavior-Phase 2, Raymond Eugene Davis and Alfred E. Bacher, 521

Structural engineering; Trusses; Automation; Computers; Design; Geometry; Optimization
Automated Design of Trusses for Optimum Geometry, Garret N. Vanderplaats and Fred Moses, 202

Structural engineering; Trusses; Costs; Optimum design; Probability theory; Statically determinate structures
Minimum Expected Cost Optimization, Shengtaur Mau and Robert G. Sexsmith, 447

Structural engineering; Trusses; Interactions; Loads (forces); Nonlinear systems
Nonlinear Elastic Truss Analysis Partitioning, N. M. Singaraj and Jawalker K. Sridhar Rao, 562

Structural engineering; Tube joints; Welded joints; Welding; Fatigue (materials); Fractures (materials); Offshore structures; Steels
Fatigue Failure of Welded Tubular Joints, James M. Becker, William W. Gerberich and Jack G. Bouwkamp, 62

Structural engineering; Tubes; Beams (supports); Joints (connections); Loads (forces)
Strength of Square-Tube Connections Under Combined Loads, Roger L. Brockenbrough, 581

Structural engineering; Tubes; Construction; Earthquakes; Frames; Sidesway; Steel
Perimetral Tube for 37-Story Steel Building, L. Agustin Mazzeo and Armin De Fries, 288

Structural engineering; Turbulence; Vibration; Wind (meteorology); Aerodynamics; Drag; Loads (forces)
Drag Spectra of Simple Structures in Turbulence, John Brian Roberts, 448

Structural engineering; Ultimate strength; Axial compression; Buckling; Forecasting; Loads (forces); Plates
Strength Predictions of Plates in Uniaxial Compression, Robert M. Korol and Archibald N. Sherbourne, 444

Structural engineering; Underwater structures; Concrete; Field tests; Hydrostatic tests
Cylindrical Concrete Hulls Under Hydrostatic Loading, Harvey H. Haynes, Robert J. Ross and Norman D. Albertsen, 294

Structural engineering; Underwater structures; Vibration; Damping; Hydrodynamic pressure; Natural frequency
Virtual Mass of Submerged Structures, Anjur R. Chandrasekaran, Sarjit S. Sani and M. M. Malhotra, 308

Structural engineering; Vibration; Arches; Dynamics; Engineering mechanics; Numerical analysis; Rings
Free In-Plane Vibration of Circular Arches, Anestis S. Veletsos, Walter J. Austin, Carlos A. Lopes Pereia and Shyr-Jen Wung, 176

Structural engineering; Vibration; Computation; Dynamics; Engineering; Frames; Matrices (mathematics); Mechanics
Convergence in Modal Synthesis, Stephen E. Johnson and Walter C. Hurty, 527

Structural engineering; Vibration; Dams; Dams (concrete); Dams (gravity); Earthquakes; Finite elements
Behavior of Koyna Dam - Dec. 11, 1967 Earthquake, Sarjit S. Saini, Jai Krishna and Anjur R. Chandrasekaran, 319

Structural engineering; Vibration; Wind pressure; Chimneys; Shear flow
Lift or Across-Wind Response to Tapered Stacks, Barry J. Vickery and Arthur W. Clark, 85

Structural engineering; Walls; Buildings (apartment); Shear; Skyscrapers
Model Investigations of Shear Wall Structures, Alexander Coull and A. W. Irwin, 284

Structural engineering; Walls; Wind (meteorology); Bearing capacity; Bending stress; Bricks; Buildings; Computer programs; Computers; Masonry; Shear
Computer Design of Engineered Brick Masonry, Alan H. Yorkdale and Robert P. Anderson, 271

Structural engineering; Webs (supports); Beams (supports); Bending; Curved beams; Stresses
Bending Behavior of Cylindrical Web Panels, Charles G. Culver, Clive L. Dym and Darryl K. Brogan, 507

Structural engineering; Webs (supports); Beams (supports); Specifications; Structural design
Suggested Design Guides for Beams with Web Holes, by the Subcommittee on Beams with Web Openings of the Task Committee on Flexural Members of the Structural Division, John E. Bower, Chmn., 30

Structural engineering; Welding; Beams (supports); Cyclic loads; Earthquakes; Joints (junctions)
Beam-Column Subassemblages Under Repeated Loading, Vitelmo V. Bertero, Egor P. Popov and Helmut Krawinkler, 268

Structural engineering; White noise; Earthquakes; Foundations; Soil-structure interaction
Dynamic Soil-Structure Interaction, Mauricio A. Sarrazin, 338

Structural engineering; Wind (meteorology); Analysis; Concrete (reinforced); Cooling towers; Design; Earthquakes; Loads (forces); Moments; Powerplants; Shells (structural forms)
Analysis and Design of Hyperbolic Cooling Towers, German Gurfinkel and Adolf Walser, 340

Structural engineering; Wind (meteorology); Wind pressure; Buildings; Gust loads
Failures of Structures Due to Extreme Winds, Joseph E. Minor, Kishor C. Mehta and James R. McDonald, 517

Structural engineering; Wind pressure; Loads (forces)
Drag or Along-Wind Response of Slender Structures, Barry J. Vickery and Kwan H. Kao, 86

Structural engineering; Wood; Wooden structures; Elastic properties; Fasteners; Joints (junctions); Nails; Slip joints
Analysis of Nailed Joints with Dissimilar Members, Thomas Lee Wilkinson, 437

Structural engineering; Wooden bridges; Bridges (decking); Bridges (structures); Glued joints; Laminated wood
FPL Timber Bridge Deck Research, Billy Bohannan, 169

Structural members; Algorithms; Engineering mechanics; Matrices (mathematics); Revisions; Stiffness matrix; Structural design
Reanalysis for Limited Structural Design Modifications, Uri Kirsch and Moshe F. Rubinstein, 75

Structural models; Bridges (box girder); Bridges (structures); Curved beams; Loads (forces); Models; Model tests; Structural engineering
Model Analysis of Curved Box-Beam Highway Bridge, Ish K. Aneja and Frederic Roll, 48

Structural plastics; Computation; Construction procedure; Finite elements; Glass fibers; Roofs; Sandwich structures; Shells (structural forms); Structural engineering
Plastic Sandwich Buckle-Shell Structures, V. James Meyers, Dhamo T. Ramani and Mark E. Greenwood, 515

Structural stability; Uplift pressure; Foundations; Hydraulics; Permeability; Stability
Boundary Effects on Stability of Structures, A. S. Chawla, 481

Struts; Tees; Thickness ratio; Width; Angle iron; Buckling; Columns (supports); Inelastic action; Slenderness ratio; Structural engineering
Buckling of Steel Angle and Tee Struts, John B. Kennedy and Madugula K.S. Murty, 547

Subassemblies; Buildings; Frames; Plasticity; Steels; Structural engineering
Plastic Subassemblage Analysis for Unbraced Frames, J. Hartley Daniels and Le-Wu Lu, 409

Subdivisions; Urban planning; Waterways (watercourses); Drainage; Floods; Hydraulics; Hydrology; Land use; Legislation; Municipal engineering; Professional practice; Runoff
An Engineer Looks at Drainage Law, Alfred R. Pagan, 511

Subgrade; Clays; Infiltration; Pavement bases; Soil mechanics; Soil moisture
Subgrade Moisture Under Oklahoma Highways, T. Allan Haliburton, Donald R. Snethen, Larry K. Shaw and B. Dan Marks, 114

Subgrades; Lime; Soil stabilization; Stabilization
Lime Reclaims Unstable Interior Subgrade During Construction, James M. Sheahan, 303

Subgrades; Transportation; Construction; Construction procedure; Flexible pavements; Highway engineering; Lime; Soil stabilization
Deep-Plow Lime Stabilization for Pavement Construction, Marshall R. Thompson, 107

Subgrades; Transportation; Dynamic loads; Elastic properties; Materials; Pavements; Soil mechanics; Strains; Stresses
Dynamic Response of Model Pavement Structure, Stephen F. Brown and David I. Bush, 541

Subsidence; Fills; Fire protection; Foundations; Pile driving; Reclamation; Soil mechanics
Industry Builds on a Refuse Dump, Hans J. Pfister, 487

Subsidence; Water conduits; Water distribution; Water resources development; California; Earthquake engineering; Recreational facilities
California Water Project, William R. Gianelli and Robert B. Jansen, 307

Subsurface drainage; Subsurface drains; Underdrains; Drainage; Filtration; Seepage
Prefabricated Filter-Fin for Subsurface Drains, Kent A. Healy and Richard P. Long, 594

Subsurface drains; Subsurface irrigation; Tiles; Water; Drainage; Irrigation
Irrigation Through Subsurface Drains, R. Wayne Skaggs, George J. Kriz and Reynaldo Bernal, 460

Subsurface drains; Underdrains; Drainage; Filtration; Seepage; Subsurface drainage
Prefabricated Filter-Fin for Subsurface Drains, Kent A. Healy and Richard P. Long, 594

Subsurface investigations; Tunneling (excavation); Freezing; Noise reduction; Sewage disposal; Sewers
Subsurface Freezing Used In Tunneling, Charles P. Gail, 221

Subsurface irrigation; Convolution integrals; Hydrograph analysis; Irrigation
Subsurface Hydrograph Analysis by Convolution, Willard M. Snyder and Loris E. Asmussen, 514

Subsurface irrigation; Tiles; Water; Drainage; Irrigation; Subsurface drains
Irrigation Through Subsurface Drains, R. Wayne Skaggs, George J. Kriz and Reynaldo Bernal, 460

Subsurface structures; Cavities; Creep; Frozen soils; Soil mechanics; Stability criteria
In Situ Creep Analysis of Room in Frozen Soil, Erik G. Thompson and Francis H. Sales, 464

Subsurface structures; Waves; Coastal engineering; Hydrodynamics; Ocean engineering; Ocean waves
Wave Forces on Submerged Bodies, C. J. Garrison and P. Y. Chow, 371

Subways; Transportation; Construction costs; Elevated railroads; Rapid transit railways; Regional planning; Right-of-way; Right of way acquisition; Street railroads
Expressway Rapid Transit, George Krambles, 590

Subways; Washington, D.C.; Contracts; Noise reduction; Rapid transit railways; Social needs
Washington D.C.'s Metro--A Progress Report, Robert S. O'Neil, 194

Sulfides; Catalysts; Inhibition; Oxygenation; Sanitary engineering
Oxidation of Sulfide by O_2: Catalysis and Inhibition, Kenneth Y. Chen and J. Carrell Morris, 181

Supercritical flow; Channels (waterways); Design; Drag; Hydraulic jump; Hydraulics
Supercritical Flow Over Sills at Incipient Jump Conditions, Karam S. Karki and Subhash Chander, 503

Supercritical flow; Supersonic flow; Water flow; Channels (waterways); Hydraulic models; Hydraulics
Supercritical Flow in Rectangular Expansions, John B. Herbich and Peter Walsh, 497

Supercritical flow; Weir crests; Baffles; Conformal mapping; Drag; Hydraulics
Supercritical Flow Over Sills, John A. McCorquodale and M. K. Giratalla, 239

Supersonic flow; Water flow; Channels (waterways); Hydraulic models; Hydraulics; Supercritical flow
Supercritical Flow in Rectangular Expansions, John B. Herbich and Peter Walsh, 497

Surcharge; Cargo transportation; Containerizing; Harbor facilities; Land reclamation; Marine terminals
Containerization and Its Impact on Port Development, Anthony J. Tozzoli, 426

Surface irrigation; Trickle irrigation; Water application rate; Water management (applied); Irrigation; Irrigation efficiency; Sprinkler irrigation
Attainable Irrigation Efficiencies, Lyman S. Willardson, 331

Surface irrigation; Water; Water flow; Infiltration; Infiltration rate; Irrigation; Soil properties
Shape Factors in Irrigation Water Advance Equation, Pratap Singh and H. S. Chauhan, 502

Surface irrigation; Water distribution (applied); Flow distribution; Hydraulics; Irrigation; Irrigation canals
Distribution Channels with Multiple Outlets, William E. Hart and John Borelli, 356

Surface preparation; Temperature control; Tunnel linings; Concrete; Construction; Epoxy mortar; Epoxy resins
Application of Epoxy Resins in Tunnel Lining Concrete Repair, Russell C. Borden and Carl E. Selander, 405

Surveying; Accuracy; Adjustment; Computation; Control surveys
Adjusting Radial Surveys, James R. Baker, 501

Surveying; Accuracy; Algorithms; Computation; Least squares method; Photogrammetry
Nonlinear Least Squares Algorithm, Mohamed F. Madkour, 572

Surveying; Boundaries (property); Land surveys; Public land; Right of way acquisition
Recommended Right-of-Way Practices, Harmer A. Weeden, 211

Surveying; Concrete (precast); Concrete (reinforced); Construction; Nuclear power plants; Soil properties
Civil Engineers Help Construct the World's Largest Proton Accelerator, William D. Alexander, Marvin E. Warner, E. Parke Rohrer and Richard E. Pages, 474

Surveying; Contours; Mapping; Reports; Scale (ratio)
Selection of Maps for Engineering and Planning, by the Task Committee for the Preparation of a Manual on Selection of Map Types, Scales, and Accuracies for Engineering and Planning of the Committee on Cartographic Surveying of the Surveying and Mapping Division, Antonio M. Aguilar, Chmn., 420

Surveying; Environments; Land ownership; Maps; Maps; Photogrammetry
The Environment and a Two-Billion Dollar Property, Carl Hammerstrom, 393

Surveying; Surveying instruments; Temperature; Atmospheric pressure; Barometers; Density; Measuring instruments; Statistical analysis
Barometric Leveling Analysis, James D. Gruendler, Frederick P. Thomack and James L. Clapp, 313

Surveying; Surveys; Aerial surveys; Computer programs; Orientation
Comparison of Analytical Relative-Orientation Methods, Santosh K. Mahajan and Singh Vijay, 340

Surveying; Surveys; Civil engineering; Engineering; Management; Planning; Projects
Project Planning, John M. Shields, 202

Surveying; Television systems; Geodetic surveys; Mapping; Natural resources; Photogrammetry; Space reconnaissance
Applications of Extraterrestrial Surveying and Mapping, Robert B. McEwen and David A. Tyler, 604

Surveying; Terminology; Definitions; Metric system
Definitions of Surveying and Associated Terms -- Manual and Report on Engineering Practice No. 34606

Surveying; Tidal effects; Tides; Elevation; Granular materials; Mapping; Pressure
Elevation Changes Due to Tides, Long Beach, Calif., Dale S. Kunitomi, 445

Surveying; Triangulation; Aerial photography; Computer programs; Photogrammetry
Computer Program System for Aerotriangulation, Kam W. Wong and G. Elphingstone, 470

Surveying; Variance (statistics); Weighting functions; Distribution; Focal length; Photogrammetry; Probability theory; Random error; Standard deviation
Theoretical Weighting of Photogrammetric Equations, Charles Kendall Paul, 550

Surveying; Vector analysis; Aerial surveys; Computation; Geodesy
Three-Dimensional Forward and Inverse Computations, William E. Ball, Jr., 595

Surveying; Water pollution; Water resources; Aerial photography; Flooding; Lakes; Remote sensing; Streams
Aerial Photography for Water Resource Studies, Ralph W. Kiefer and James P. Scherz, 149

Surveying; Water surface; Optics; Photogrammetry; Photography
Photogrammetry and Hydraulic Surfaces, Wolfgang Faig, 525

Surveying instruments; Surveys; Colorado; Construction; Dams (earth); Planning
Planning Concrete Dam Construction Control Surveys, Maynard J. Willis, 255

Surveying instruments; Temperature; Atmospheric pressure; Barometers; Density; Measuring instruments; Statistical analysis; Surveying
Barometric Leveling Analysis, James D. Gruendler, Frederick P. Thomack and James L. Clapp, 313

Surveys; Aerial photography; Coordinates; Linearity; Photogrammetry
Space Resection from Collinearity Conditions, Kunwar K. Rampal, 92

Surveys; Aerial surveys; Analytical techniques; Dams (earth); Lakes; Mapping; Photogrammetric surveys
Survey Design and Procedures, William E. Kreisle, 77

Surveys; Aerial surveys; Computer programs; Orientation; Surveying
Comparison of Analytical Relative-Orientation Methods, Santosh K. Mahajan and Singh Vijay, 340

Surveys; Astronomy; Computation; Navigation
Solar Astronavigation in High Latitudes, Gerald W. Johnson and James L. Clapp, 29

Surveys; Awards; Civil engineers; Engineering education; Geodetic surveys; Mapping; Reports
Status Report of Surveying and Mapping Division, William A. White, 121

Surveys; Civil engineering; Engineering; Management; Planning; Projects; Surveying
Project Planning, John M. Shields, 202

Surveys; Colorado; Construction; Dams (earth); Planning; Surveying instruments
Planning Concrete Dam Construction Control Surveys, Maynard J. Willis, 255

Surveys; Computer programs; Curves; Highway engineering; Offsets
Offsets to Sight Obstructions Near the Ends of Horizontal Curves, William L. Raymond, Jr., 58

Surveys; Construction; Delay time; Questionnaires
Causes of Delay in the Construction Industry, John R. Baldwin, James M. Manthei, Harold Rothbart and Robert B. Harris, 27

Surveys; Orientation; Photogrammetric surveys; Photogrammetry
Explicit Approach to Exterior Orientation, Santosh K. Mahajan, 62

Suspended load; Temperature; Bed load; Hydraulics; Open channel flow; Sediment deposits
Temperature Effects in High-Transport, Flat-Bed Flows, Brent D. Taylor and Vito A. Vanoni, 597

Suspended sediments; Bed load; Canals; Channels; Desilting; Hydraulic models; Hydraulics; Sedimentation; Streams
Chapter V: Sediment Control Methods: C. Control of Sediment in Canals, By the Task Committee on Preparation of Sedimentation Manual, Committee on Sedimentation of the Hydraulics Division, Vito A. Vanoni, Chmn., 455

Suspended solids; Filters; Filtration; Membrane processes; Sanitary engineering; Sewage treatment
Filtrability Study on Secondary Effluent Filtration, Kou-Ying Hsiung, 384

Suspended solids; Water treatment; Backwashing; Desorption; Filters; Filtration; Sanitary engineering
Desorption and Retentivity of Filtering Materials, Andre Leclerc and Truong Tri Vu, 498

Suspended structures; Cables (ropes); Germany; Roofs; Stadiums
Cable Suspended Roof for Munich Olympics, Fritz Leonhardt and Jorg Schlaich, 319

Suspension; Transportation; Vehicles; Automation; Electric drives; Pallets
Pallet Systems for Integrating Urban Transportation, David Gordon Wilson, 212

Sweden; Traffic; Traffic control; Transportation; Urban planning; Air pollution; Environmental engineering
Gothenburg (Sweden) Uses Barriers to Cut Traffic, Curt M. Elmberg, 406

Synthesis; Time series analysis; Hydraulics; Hydrology; Markov processes; Mathematical models; Rainfall
Stochastic Generation of Rainfall, Kazimierz Adamowski and Anthony F. Smith, 548

Synthetic rubber; Joints (connections); Joint sealers; Polyvinyl chloride; Rigid pavements
Pavement Joint Seals, Kneeland A. Godfrey, Jr., 127

Systems analysis; Civil engineering; Civil engineers; Professional activities; Social needs
The Civil Engineer in the Multidisciplinary Design Team, David A. Novick, 277

Systems analysis; Computer programs; Mathematical models; Simulation
Delaware River Basin Modeling, Lewis G. Hulman and David K. Ericson, 132

Systems analysis; Systems engineering; Buildings (hospitals); Construction; Construction management; Health
A Systems Approach to Hospital Planning and Design, Tung Au, Ernest W. Parti and Andrew K.C. Wong, 592

Systems analysis; Systems engineering; Civil engineering; Engineering education
Systems Approach and the Civil Engineer, Kenneth W. Heathington and R. Brian Bonton, 10

Systems analysis; Texas; Estuaries; Mathematical models; Sanitary engineering
Optimal Water Quality Management for Houston Ship Channel, Almond J. Hays, Jr. and Earnest F. Gloyna, 200

Systems analysis; Transportation; Urban development; Mathematical models; Modal split
Evaluation of New Systems For Urban Transportation, Reed H. Winslow and Jerry L. Pfeffer, 518

Systems analysis; Water tunnels; Computer systems programs; Design; Networks; New york
Systems Analysis of Water Distribution Networks, Richard de Neufville, John C. Schaake, Jr. and Joseph H. Stafford, 105

Systems engineering; Air transportation; Buses (vehicles); Costs
Airport Access Cost-Effectiveness Analysis, Richard de Neufville and Edward Mierzejewski, 428

Systems engineering; ASCE (Committees); ASCE (Education); ASCE (Publications); Reports; Reviews; Sanitary engineering
Professional Papers in Sanitary Engineering, By the Committee on Publications of the Sanitary Engineering Division, Roy E. Ramseier, Chmn., 461

Systems engineering; Benefit-cost ratios; Esthetics; Planning; Site selection
Inclusion of Social Values in Facility Location Planning, David Morris, 167

Systems engineering; Bioengineering; Buildings (hospitals); Civil engineering; Engineering education; Health
Civil Engineering and National Goals in Bioengineering, George Bugliarello, 591

Systems engineering; Buildings (hospitals); Construction; Construction management; Health; Systems analysis
A Systems Approach to Hospital Planning and Design, Tung Au, Ernest W. Parti and Andrew K.C. Wong, 592

Systems engineering; Civil engineering; Engineering education; Systems analysis
Systems Approach and the Civil Engineer, Kenneth W. Heathington and R. Brian Bonton, 10

Systems engineering; Data systems; Hydraulics; Nevada; Regulation; Simulation; Statistical analysis
Streamflow Synthesis - A Case Study, Vulli L. Gupta and John W. Fordham, 336

Systems engineering; Economics; Refuse disposal; Sanitary engineering; Solid wastes
Fleet Selection for Solid Waste Collection Systems, Robert M. Clark and Billy P. Helms, 216

Systems engineering; Management; Quality control
System for Control of Construction Quality, Roland M. Parsons, 159

Systems engineering; Traffic; Traffic control; Traffic regulations; Highways; Highway transportation
Strategies for Practical Expressway Control, Allan G.R. Bullen, 417

Systems engineering; Transportation; Airports; Air transportation; Electronics; Passenger transportation
Satellite Transit at Seattle-Tacoma Airport, Ralph Mason, 566

Systems engineering; Urban planning; Architecture; Buildings; Environmental engineering; Planning; Structural engineering
Tall Buildings--A Technological Assessment, Thomas C. Kavanagh, 54

Systems engineering; Urban planning; Waste disposal; Mathematics; Refuse disposal; Sanitary engineering; Solid wastes
Selecting Solid Waste Disposal Facilities, Billy P. Helms and Robert M. Clark, 4

Systems engineering; Utilities; Costs; Economics; Hydraulics; Sanitary engineering; Sewers
Optimal Design of Urban Wastewater Collection Networks, Jarir S. Dajani, Robert S. Gemmell and Edward K. Morlok, 534

Systems engineering; Vibration; Computers; Dynamics; Earthquakes; Engineering mechanics; Filters; Fourier transformation; Mathematics
Dynamic Analysis by Extra Fast Fourier Transform, Jethro W. Meek and Anestis S. Veletsos, 218

Systems engineering; Water resources; California; Computers; Forecasting; Models
Optimum Operations Model for Shasta-Trinity System, Dan M. Fults and Lawrence F. Hancock, 450

Systems engineering; Water resources; Hydraulics; Planning; Regional planning
Use of Systems Analysis in Water Resources Planning, William K. Johnson, 446

Systems management; Concrete (precast); Floors; Modular structures; Modules
Floor-Ceiling System Features Precast Concrete Units, Jerome S.B. Iffland, 186

Tall buildings; Buckling; Frames; Lateral stability; Stability; Structural engineering
Long-Wave Extensional Buckling of Large Regular Frames, Zdenek P. Bazant and M. Christensen, 504

Tall buildings; Building materials; Cost analysis; Dimensions; Economics; Floors; Height
The Economics of High-Rise Apartment Buildings of Alternate Design Configuration, Richard D. Steyert, 387

Tall buildings; Computer programming; Computers; Design; Dynamic response; Dynamics; Earthquakes; Engineering mechanics; Nonlinear programming; Optimization; Stresses
Optimum Earthquake Design of Shear Buildings, Ben Kato, Yuji Nakamura and Hidetake Anraku, 343

Tall buildings; Computers; Limit design method; Moment distribution; Plasticity; Structural engineering
Optimum Plastic Design of Steel Frames, Bogdan O. Kuzmanovic and Nicholas Willems, 423

Tall buildings; Vibration; Buildings; Earthquakes; Engineering mechanics; Soil-structure interaction
Earthquake Interaction for Multistory Building, Lawrence W. Fagel and Shih-Chi Liu, 416

Tall buildings; Walls; Rigid frames; Shear; Structural analysis; Structural engineering
Approximate Inelastic Analysis of Shear Wall-Frame Structures, James G. MacGregor, Sauren N. Guha Majumdar, Rajendra P. Nikhed and Peter F. Adams, 551

Tall buildings; Wind (meteorology); Amplitude; Chicago; Columns (supports); Loads (forces); Steels; Structural engineering
Bundled-tube Structure for Sears Tower, Hal S. Iyengar, 509

Tanks (containers); Trickling filters; Bacteria; Chlorine; Detention reservoirs; Filtration; Hydraulics; Pollution; Sanitary engineering; Settling basins; Sewage disposal
Chlorine Disinfection in Final Settling Basins, Darrell W. Monroe and Donald C. Phillips, 296

Taxes; Transportation; Government policies; Highway planning; Michigan; Revenues
Michigan Transportation in the Seventies, William C. Taylor, 510

Technical writing; Communication; Professional activities; Professional development; Professional practice
Clear Communication--Key to Professional Development, M. D. Morris, 131

Technicians; Engineering education; Engineers; Personnel
The Engineering Technician: An Underutilized Resource, Ronald P. Shumate, 98

Technology; Animal behavior; Books; Human engineering; Philosophy; Reviews
Anti-Technology--The New Myth, Samuel C. Florman, 53

Technology; Civil engineers; Problem solving; Social needs
Engineering and Today's Social Problems, Donald C. Slichter, 147

Technology; Environmental engineering; Professional practice; Social needs
In Defense of Dubos and Ellul, Kim de Rubertis, 534

Tees; Thickness ratio; Width; Angle iron; Buckling; Columns (supports); Inelastic action; Slenderness ratio; Structural engineering; Struts
Buckling of Steel Angle and Tee Struts, John B. Kennedy and Madugula K.S. Murty, 547

Telecommunication; Transportation; Urban development; Urban planning; Buildings (office); Communication; Forecasting; Social needs
Communications Substitutes for Intra-Urban Travel, Richard C. Harkness, 307

Television systems; Geodetic surveys; Mapping; Natural resources; Photogrammetry; Space reconnaissance; Surveying
Applications of Extraterrestrial Surveying and Mapping, Robert B. McEwen and David A. Tyler, 604

Temperature; Atmospheric pressure; Barometers; Density; Measuring instruments; Statistical analysis; Surveying; Surveying instruments
Barometric Leveling Analysis, James D. Gruendler, Frederick P. Thomack and James L. Clapp, 313

Temperature; Bed load; Bedload movement; Hydraulics; Sedimentation; Sediments; Stream flow
Temperature Effects in Low-Transport, Flat-Bed Flows, Brent D. Taylor and Vito A. Vanoni, 412

Temperature; Bed load; Hydraulics; Open channel flow; Sediment deposits; Suspended load
Temperature Effects in High-Transport, Flat-Bed Flows, Brent D. Taylor and Vito A. Vanoni, 597

Temperature; Density stratification; Hydraulics; Powerplants; Stream flow
Cooling Water Density Wedges in Streams, Edward M. Polk, Jr., Barry A. Benedict and Frank L. Parker, 37

Temperature; Tests; Thermal pollution; Coefficients; Evaporation; Heat exchangers; Hydraulic models; Hydraulics
Evaluating Water Surface Heat Exchange Coefficients, Peter D. Hindley and Russell M. Miner, 421

Temperature; Thermal shock; Water pollution; Bioassay; Estuaries; Fishkill; Nuclear electric power generation; Powerplants; Sanitary engineering
Parameters Necessary for Analyzing Thermal Bioassays, Robert D. Smith, 569

Temperature; Thermal stratification; Water quality; Hydraulics; Reservoirs
Temperature Prediction in Stratified Reservoirs, Wayne C. Huber, Donald R.F. Harleman and Patrick J. Ryan, 234

Temperature; Towers; Vibration; Dynamics; Guyed towers; Guy wires; Structural engineering
Dynamics of Guyed Towers, Richard J. McCaffrey and Alois J. Hartmann, 303

Temperature; Turbulence; Buoyancy; Fluid flow; Hydraulics; Jet flow; Mathematics
Buoyant Jets with Three-Dimensional Trajectories, Eric Hirst, 563

Temperature; Turbulence; Velocity; Hot film anemometers; Laboratory tests; Mixing; Power; Salt
Velocity and Temperature in Buoyant Jet, Richard Dornhelm, Manuel Nouel and Robert L. Wiegel, 148

Temperature; Water quality; Algorithms; Coefficients; Evaporation; Mathematical models; Predictions; Statistical tests
Stream Temperature Prediction Under Reduced Flow, William L. Morse, 332

Temperature; Wind (meteorology); Drainage; Perlite; Reservoirs
Reducing Pond Evaporation with Perlite Ore, Keith R. Cooley and C. Brent Cluff, 305

Temperature control; Tunnel linings; Concrete; Construction; Epoxy mortar; Epoxy resins; Surface preparation
Application of Epoxy Resins in Tunnel Lining Concrete Repair, Russell C. Borden and Carl E. Selander, 405

Tendons; Transportation; Bridges (structures); City planning; Concrete (post-tensioned); Concrete (precast); Foundations; Highways; Prefabrication; Slabs
Prefabricated Highways, William Zuk, 204

Tennessee Valley Authority; Water supply; Environmental engineering; Flood control; Hydroelectric power generation; Multiple purpose reservoirs
Impact of Multiple-Purpose Reservoir System on Regional Environment, Edward H. Lesesne, 370

Tensile strength; Tests; Concrete (reinforced); Reinforcement; Stresses; Structural engineering
Strength of Fiber-Reinforced Concrete, Jitendra N. Kar and Anil K. Pal, 253

Tension; Ties; Water flow; Failure; Joints (connections); Pipelines; Pipeline transportation
Considerations of Pipeline Tension Tie Problems, Lloyd C. Fowler, Richard P. Lundahl and Robert W. Purdie, 573

Terminal facilities; Traffic; Transportation; Urban transportation; Buses (vehicles); Passenger transportation
Location of Bus Stops, Walter H. Kraft and Thomas J. Boardman, 79

Terminal facilities; Transmission lines; Urban planning; Urban transportation; Waterways (transportation); Freight terminals; Investments; Land use; Pipelines; Planning; Railroads; Regional planning
Restructuring Freight Transportation in Chicago, James Robert Blaze, 353

Terminal facilities; Transportation; Containerizing; Design; Mathematical models
Basis for Simulation Model of Container Terminal, Fraser Dunford, 299

Terminal facilities (elect); Transportation; Urban planning; Land use; Passenger transportation
Environmental Factors in Passenger Terminal Design, John J. Fruin, 71

Terminology; Definitions; Metric system; Surveying
Definitions of Surveying and Associated Terms -- Manual and Report on Engineering Practice No. 34606

Terminology; Field tests; Foundation investigations; Foundations; Soil properties
Subsurface Investigations for Design and Construction of Foundations of Buildings: Appendices A and B, Task Committee for Foundation Design Manual of the Committee on Shallow Foundations of the Soil Mechanics and Foundations Division, William F. Swiger, Chmn., 413

Terminology; Tests; Field tests; Foundation investigations; Foundations; Soil properties
Subsurface Investigation for Design and Construction of Foundations of Buildings: Part II, Task Committee for Foundation Design Manual of the Committee on Shallow Foundations of the Soil Mechanics and Foundations Division, William F. Swiger, Chmn., 309

Terzaghi lecture; Dams (earth); Engineering education; Foundations; Pile driving; Pile foundations; Settlement (structural); Soil mechanics
The Integrated Civil Engineering Project, T. William Lambe, 337

Test equipment; Triaxial shear; Vane shear tests; Measuring instruments; Saturated soils
A Direct-Reading Pocket Shear Vane, Stanley Serota and Anil Jangle, 63

Test procedures; Chemical grouts; Chemical reactions; Compacting; Research and development; Soil mechanics
Strength Properties of Chemically Solidified Soils, James Warner, 503

Tests; Agriculture; Aquifers; Artesian wells; Drainage; Irrigation; Pumping; Salinity
Pumping an Artesian Source for Water Table Control, Eugene J. Doering and Leo C. Benz, 344

Tests; Asphalts; Bituminous concretes; Concrete; Dams; Dikes; Embankments; Pumped storage; Reservoirs; Sealers
Bituminous Blanket for Dike, F. P. Robertson and Johannes Lehnert, 537

Tests; Automation; Buildings (hospitals); Design; Professional activities; Public health
Multiphase Health Screening Facility Design, Paul R. DeCicco, 593

Tests; Beams (supports); Buildings; Reinforcement; Stresses; Structural engineering
Tests on Beams with Reinforced Web Openings, Peter B. Cooper and Robert R. Snell, 189

Tests; Beams (supports); Concrete (reinforced); Shear strength; Structural engineering
Shear Strength of Large Beams, Howard P.J. Taylor, 533

Tests; Bolted joints; Bolts; Structural design; Structural engineering
Behavior and Design of Shingle Joints, Edward H. Power and John W. Fisher, 454

Tests; Box beams; Box girders; Slenderness ratio; Structural engineering
Plastic Behavior of Hollow Structural Sections, Robert M. Korol and John Hudoba, 230

Tests; Bridges (girder); Concrete (precast); Concrete (prestressed); Models; Structural engineering
81-ft Model of Prestressed Bridge477

Tests; Buckling; Columns (supports); Rigid frames; Skyscrapers; Structural engineering
Inelastic Multistory Frame Buckling, Bernard M. McNamee and Le-Wu Lu, 368

Tests; Buildings (office); Comfort; Human factors engineering; Structural engineering
Human Perception Thresholds of Horizontal Motion, Peter W. Chen and Leslie E. Robertson, 397

Tests; Columns (supports); Continuous beams; Plates (structural members); Shear strength; Structural engineering
Shear Strength of Continuous Plates, M. Daniel Vanderbilt, 237

Tests; Concrete (reinforced); Reinforcement; Stresses; Structural engineering; Tensile strength
Strength of Fiber-Reinforced Concrete, Jitendra N. Kar and Anil K. Pal, 253

Tests; Construction; Consulting engineers; Inspection; Personnel development; Quality control
Summary Report of Questionnaire on Construction Inspection, by the Task Committee on Inspection of the Construction Division, Joseph Goldbloom, Chmn., 524

Tests; Dams; Dams (arch); Dams (concrete); Foundations; Hydraulic models; Hydraulics; Materials tests; Rock mechanics
Auburn Dam -- World's Longest Arch Dam, Alfred T. Lewis, 445

Tests; Field tests; Foundation investigations; Foundations; Soil properties; Terminology
Subsurface Investigation for Design and Construction of Foundations of Buildings: Part II, Task Committee for Foundation Design Manual of the Committee on Shallow Foundations of the Soil Mechanics and Foundations Division, William F. Swiger, Chmn., 309

Tests; Hyperbolic parabolic shells; Membranes; Roofs; Shells (structural forms); Structural engineering
Experimental Investigation Of Thin-Steel Hyperbolic Paraboloid Structures, Peter Gergely and George Winter, 473

Tests; Thermal pollution; Coefficients; Evaporation; Heat exchangers; Hydraulic models; Hydraulics; Temperature
Evaluating Water Surface Heat Exchange Coefficients, Peter D. Hindley and Russell M. Miner, 421

Tests; Thin-wall structures; Ultimate strength; Web beams; Buckling; Finite elements; Loading; Structural engineering
Failure of Thin-Walled Members Under Patch Loading, Kenneth C. Rockey, Mohamed A. El-Gaaly and Debal K. Bagchi, 572

Tests; Time dependence; Columns (supports); Concrete (reinforced); Deflection; Structural engineering
Slender Concrete Columns Under Sustained Load, Brij B. Goyal and Neil Jackson, 35

Tests; Time dependence; Vibration; Viscoelasticity; Data systems; Dynamics; Engineering mechanics; Field tests; Materials tests; Statistical analysis
Statistical Theory for Viscoelastic Materials, Joseph Soussou and Fred Moavenzadeh, 532

Tests; Torsion; Beams (supports); Concrete (reinforced); Reinforcement; Research; Shear strength; Structural engineering
Total Interaction Method for Torsion Design, K. S. Rajagopalan, Umakanta Behera and Phil M. Ferguson, 467

Tests; Tractive forces; Alluvial channels; Bed load; Hydraulics
Bed Load Transportation in Alluvial Channels, Satya P. Garg, Ashutosh K. Agrawal and Prem Raj Singh, 2

Tests; Transportation; Attenuators; Collisions; Highways; Safety; Safety devices
Recent Developments in Roadside Crash Cushions, John G. Viner, 99

Tests; Triaxial tests; Bubbles; Hydraulics; Laboratories; Pipe flow; Soil mechanics
Time to Dissolve Air Bubbles in Drain Line, Kenneth L. Lee and David K. Black, 179

Tests; Undrained shear tests; Confining pressure; Cyclic loads; Damping; Resonance; Sands; Shear modulus; Soil mechanics
Undrained Cyclic Shear of Saturated Sand, Vincent P. Drnevich, 431

Tests; Vibration; Fatigue limit; Fatigue (materials); Structural engineering
Fatigue of Cover Plated Beams Under Varying Loads, Francis A. Murad and Conrad P. Heins, Jr., 225

Tests; Welded joints; Welding; Fasteners; Joints (connections); Safety factors
Eccentrically Loaded Welded Connections, Lorne J. Butler, Shubendu Pal and Geoffrey L. Kulak, 233

Tests; Welding; Bridges (decking); Bridges (orthotropic); Fatigue (materials); Ribs (supports); Steels; Structural engineering
Fatigue of Orthotropic Steel Decks, Hacik Erzurumlu and A. Anthony Toprac, 205

Texas; Estuaries; Mathematical models; Sanitary engineering; Systems analysis
Optimal Water Quality Management for Houston Ship Channel, Almond J. Hays, Jr. and Earnest F. Gloyna, 200

Thailand; Alluvial streams; Bank protection (waterways); France; Inland waterways; River regulation; River training
Development of Bottom Panels in River Training, Maurice Remillieux, 300

Thailand; Capacity; Cargo transportation; Harbors; Queueing theory; Rates (costs)
Capacity-Feedback Relationship for Port of Bangkok, Donald R. Drew, Pakorn Adulbhan, Wai Ling Woo and Manu Juaseekoon, 441

Thawing; Bending stress; Ice; Permafrost; Pipelines; Settlement (structural); Soil mechanics
Settlement of Pipeline on Thawing Permafrost, Andrew C. Palmer, 276

Thermal conductivity; Flow patterns; Freeze-thaw cycle; Hydraulics; Ice; Rivers; Stability
Ripples on Underside of River Ice Covers, George D. Ashton and John F. Kennedy, 470

Thermal pollution; Coefficients; Evaporation; Heat exchangers; Hydraulic models; Hydraulics; Temperature; Tests
Evaluating Water Surface Heat Exchange Coefficients, Peter D. Hindley and Russell M. Miner, 421

Thermal pollution; Waste heat; Cooling systems; Cooling water; Heat budget; Stratification
Impact of Cooling Water on Lake Temperatures, Heinz Stefan, Chung-Sang Chu and Ho Wing, 392

Thermal pollution; Water conservation; Air cooling; Cooling systems; Cooling towers; Electric power generation; Power
Dry-Type Cooling Towers, Edward A. Cecil, Paul R. Cunningham, Clarence J. Steiert and Roger O. Young, 92

Thermal pollution; Water pollution; Water quality; Abstracts; Indexes (documentation); Information retrieval; Reports; Sanitary engineering
Information Sources on Water Quality, Including Thermal Pollution, the Committee on Thermal Pollution of the Sanitary Engineering Division, Fred A. Limpert, Chmn., 407

Thermal powerplants; Cooling towers; Dynamics; Finite element method; Nonlinear systems; Power
Nonlinear Dynamic Analysis of Cooling Tower, Chang-hua Yeh, 228

Thermal shock; Water pollution; Bioassay; Estuaries; Fishkill; Nuclear electric power generation; Powerplants; Sanitary engineering; Temperature
Parameters Necessary for Analyzing Thermal Bioassays, Robert D. Smith, 569

Thermal stratification; Water quality; Biota; Dissolved oxygen; Environmental engineering; Hydroelectric power generation; Mathematical models
Predicting Quality Effects of Pumped Storage, Carl W. Chen and Gerald T. Orlob, 255

Thermal stratification; Water quality; Hydraulics; Reservoirs; Temperature
Temperature Prediction in Stratified Reservoirs, Wayne C. Huber, Donald R.F. Harleman and Patrick J. Ryan, 234

Thermoelectric power generation; Dams; Environmental engineering; Hydroelectric power generation; Professional activities
Positive Points on Electric Power, George R. Higgins, 204

Thermoelectric power generation; Environmental engineering; Finite element method; Fluid flow; Heated water; Hydraulics; Jets; Lakes; Rivers
Hydrothermal Analysis by Finite Element Method, Larry A. Loziuk, James C. Anderson and Ted Belytschko, 559

Thermoelectric power generation; Heated water; Hydraulic models; Hydraulics; Jets; Pollution; Rivers; Streams
Surface Jet Model for Heated Discharges, Louis H. Motz and Barry A. Benedict, 136

Thermoelectric power generation; Utilities; Waste disposal; Cooling systems; Cooling towers; Nuclear electric power generation; Powerplants
Power Plant Cooling Systems, George Kinsman, 364

Thermoelectric power generation; Water hammer; Cooling systems; Cooling water; Powerplants; Pump intakes; Pumps
Circulating Water Systems Without Valves, Rudolf J. Wahanik, 571

Thickness; Transportation; Computer programs; Fatigue (materials); Stresses
Structural Design of Concrete Pavement by Computer, Cloyd E. Warnes, 25

Thickness ratio; Width; Angle iron; Buckling; Columns (supports); Inelastic action; Slenderness ratio; Structural engineering; Struts; Tees
Buckling of Steel Angle and Tee Struts, John B. Kennedy and Madugula K.S. Murty, 547

Thin plates; Concentrated loads; Deflection; Dynamic properties; Finite differences; Loads (forces); Rectangular bodies; Relaxation (mechanics); Structural engineering
Large Deflection of Elastic Plates Under Patch Loading, Bijan Aalami, 559

Thin shell structures; Hyperbolic parabolic shells; Roofs; Shells (structural forms)
Analysis of Hipped Roof Hyperbolic Paraboloid Structures, William C. Schnobrich, 359

Thin-wall structures; Ultimate strength; Web beams; Buckling; Finite elements; Loading; Structural engineering; Tests
Failure of Thin-Walled Members Under Patch Loading, Kenneth C. Rockey, Mohamed A. El-Gaaly and Debal K. Bagchi, 572

Tidal currents; Tracers; Turbulence; Diffusion; Effluents; Field tests; Hydraulics; Models; Simulation
Tracer Tests of Eddy Diffusion in Field and Model, Maurice J. Crickmore, 509

Tidal currents; Water pollution; Water pollution control; Coastal engineering; Industrial wastes
Oil Booms in Tidal Currents, Ralph H. Cross and David P. Hoult, 192

Tidal effects; Tides; Elevation; Granular materials; Mapping; Pressure; Surveying
Elevation Changes Due to Tides, Long Beach, Calif., Dale S. Kunitomi, 445

Tidal energy; Tidal power generation; Dams; Estuaries; Power; Powerplants; Pumped storage
Integration Of Pumped-Storage With Tidal Power, Thomas L. Shaw and Geoffrey R. Thorpe, 29

Tidal power generation; Dams; Estuaries; Power; Powerplants; Pumped storage; Tidal energy
Integration Of Pumped-Storage With Tidal Power, Thomas L. Shaw and Geoffrey R. Thorpe, 29

Tidal power generation; Tidal power plants; Nuclear power plants; Powerplants; Pumped storage
Tidal Energy from the Bay of Fundy, Thomas L. Shaw and J. van den Heuvel, 531

Tidal power plants; Dams; Electric networks; Estuaries; Hydroelectric power; Powerplants
Pumped Storage and Tidal Power in Energy Systems, Charles K. Haswell, Stephen W. Huntington, Thomas L. Shaw, Geoffrey R. Thorpe and Ian J. Westwood, 603

Tidal power plants; Nuclear power plants; Powerplants; Pumped storage; Tidal power generation
Tidal Energy from the Bay of Fundy, Thomas L. Shaw and J. van den Heuvel, 531

Tidal waters; Waste assimilative capacity; Water pollution; California; Estuaries; Sanitary engineering
Tidal Exchange at Golden Gate, Denny S. Parker, Dan P. Norris and Austin W. Nelson, 276

Tides; Elevation; Granular materials; Mapping; Pressure; Surveying; Tidal effects
Elevation Changes Due to Tides, Long Beach, Calif., Dale S. Kunitomi, 445

Tides; Tidewater; Waterways (transportation); Estuaries; India; Mathematical models; Models; Rivers
Mathematical Model of River Hooghly, Donald M. McDowell and David Prandle, 209

Tides; Underwater construction; Fatigue (materials); Ocean engineering; Offshore structures; Structural engineering
Offshore Structures - Statistical Strain Recording, Michael A. Garnett, Bhan Mabin and Terrence E.H. Lemmon, 177

Tides; Water waves; Waterways; Hydraulic models; Hydraulics; Inlets (waterways); Rivers; Simulation
Simulation of Long Waves in Branching Waterways, Robert F. Henry, 224

Tidewater; Waterways (transportation); Estuaries; India; Mathematical models; Models; Rivers; Tides
Mathematical Model of River Hooghly, Donald M. McDowell and David Prandle, 209

Ties; Water flow; Failure; Joints (connections); Pipelines; Pipeline transportation; Tension
Considerations of Pipeline Tension Tie Problems, Lloyd C. Fowler, Richard P. Lundahl and Robert W. Purdie, 573

Tile drainage; Transient flow; Conformal mapping; Drains; Engineering mechanics; Seepage
Transient Seepage Flow Toward Two Parallel Drains, Imre Gyuk and Gabor M. Karadi, 138

Tile drains; Water table; Drainage; Hele-Shaw model
Moving Water Tables in Tile-Drained Soils, Nazar M. Awan and Terence O'Donnell, 411

Tiles; Water; Drainage; Irrigation; Subsurface drains; Subsurface irrigation
Irrigation Through Subsurface Drains, R. Wayne Skaggs, George J. Kriz and Reynaldo Bernal, 460

Timber construction; Wooden structures; Beams (supports); Buckling; Floors; Structural engineering
Lateral Stability of Beam and Deck Structure, Paul M. Jenkinson and John J. Zahn, 181

Time; Anisotropy; Consolidation; Settlement (structural); Soil mechanics
Consolidation of a Layer Under a Strip Load, John T. Christian, Jan Willem Boehmer and Philippe P. Martin, 374

Time and motion studies; Construction; Efficiency; Films; Photography; Productivity
Analysis of Time-Lapse Construction Films, Howard B. Sprinkle, 502

Time dependence; Columns (supports); Concrete (reinforced); Deflection; Structural engineering; Tests
Slender Concrete Columns Under Sustained Load, Brij B. Goyal and Neil Jackson, 35

Time dependence; Transportation; Urban planning; Markov processes; Mathematical models
Markov Renewal Model of Linked Trip Travel Behavior, Gorman Gilbert, George L. Peterson and Joseph L. Schofer, 339

Time dependence; Underwater construction; Bearing capacity; Deformation; Earth pressure; Ocean engineering; Pore water pressure; Soil mechanics
Breakout Resistance of Objects Embedded in Ocean Bottom, Aleksandar Sedmak Vesic, 19

Time dependence; Vibration; Viscoelasticity; Data systems; Dynamics; Engineering mechanics; Field tests; Materials tests; Statistical analysis; Tests
Statistical Theory for Viscoelastic Materials, Joseph Soussou and Fred Moavenzadeh, 532

Time of concentration; Tracers; Dispersions; Hydraulics
Hydraulic Treatment Efficiency of Waste Stabilization, Kenneth A. Mangelson and Gary Z. Watters, 333

Time of concentration; Turbulence; Turbulent diffusion; Dispersion; Hydraulics; Mathematical models; Mississippi
Dispersion in Natural Streams, Mahendra K. Bansal, 50

Time series analysis; Hydraulics; Hydrology; Markov processes; Mathematical models; Rainfall; Synthesis
Stochastic Generation of Rainfall, Kazimierz Adamowski and Anthony F. Smith, 548

Time sharing; Computers; Construction; Construction management; Critical path method
Project Planning and Control by Time-Sharing Computer, Norman L. Scott and Edward L. Murphree, 184

Tires; Traffic safety; Human behavior; Pavements; Rolling friction; Safety
Current Methods For Improved Tire-Pavement Interaction, Bob M. Galloway and Jon A. Epps, 505

Tires; Tramways; Urban transportation; Automatic control; Elevated railroads; Mass transportation
Transit System Employs Three Modes, Robert F. Seedlock, 226

Tolerances (mechanics); High strength concretes; High strength steels; Monorail railways
Walt Disney World Monorail Designed for Smooth Riding, Robert F. Mast and Charles W. Dolan, 135

Toll roads; Traffic; Transportation; Urban planning; Economics; Highway engineering; Parking facilities
Urban Road Pricing Through Selective Parking Taxes, Robert E. Burns, 440

Topography; Abutments; Construction; Foundations; Geology; Grouting; Seepage; Soil mechanics
Current Practice in Abutment and Foundation Treatment, Harris H. Burke, Charles S. Content and Richard L. Kulesza, 489

Topology; Algorithms; Computers; Matrices (mathematics); Structural engineering
Algorithm for Matrix Bandwidth Reduction, Henry R. Grooms, 88

Tornadoes; Vortices; Air entrainment; Drains; Dust storms; Engineering mechanics; Fluid mechanics; Friction; Hydraulics; Inlets (waterways); Jets; Meteorology; Momentum
Experiments on Unstable Vortices, Enzo Levi, 249

Torque; Arches; Buckling; Fixed structures; Hinged structures; Parabolic bodies
Lateral-Torsion Buckling of Parabolic Arches, Frank J. Tokarz and Raghbir S. Sandhu, 280

Torsion; Beams (structural); Composite structures; Concrete (reinforced); Structural engineering
Composite Beams in Torsion, Conrad P. Heins, Jr. and John T.C. Kuo, 275

Torsion; Beams (supports); Buckling; Structural engineering
Lateral Buckling of Constrained Beams, Thomas G. Morrison, 199

Torsion; Beams (supports); Concrete (reinforced); Reinforcement; Research; Shear strength; Structural engineering; Tests
Total Interaction Method for Torsion Design, K. S. Rajagopalan, Umakanta Behera and Phil M. Ferguson, 467

Torsion; Bridges (girder); Bridges (structures); Buckling; Deflection; Design; Plates; Structural engineering
Some Design Problems of Large Box Girder Bridges, Bogdan O. Kuzmanovic, 439

Torsion; Bridges (structures); Matrix methods; Stiffness matrix; Structural analysis; Structural engineering
Stiffness Analysis of Grids Including Warping, Robert J. Reilly, 333

Torsion; Torsional strength; Beams (supports); Numerical analysis; Structural engineering
Torsion of Nonprismatic Beams of Open Section, Donald R. Evick and Conrad P. Heins, Jr., 587

Torsion; Tubes; Warpage; Beams (supports); Curved beams; Engineering mechanics; Stresses
Torsion and Flexure of Curved, Thin-Walled Beams or Tubes, Ray N. Nitzsche and Robert E. Miller, 382

Torsion; Vibration; Beam columns; Buckling; Columns (supports); Computation; Dynamic stability; Engineering mechanics; Stability
Coupled, Nonconservative Stability-Finite Element, C. D. Mote, Jr. and Gerald Y. Matsumoto, 286

Torsion; Walls; Buildings; Frames; Stability; Structural engineering
Analysis of Three-Dimensional Structures, Jacobus H. Wynhoven and Peter F. Adams, 109

Torsion; Walls; Buildings; Frames; Stability; Structural engineering
Behavior of Structures Under Loads Causing Torsion, Jacobus H. Wynhoven and Peter F. Adams, 306

Torsional strength; Beams (supports); Numerical analysis; Structural engineering; Torsion
Torsion of Nonprismatic Beams of Open Section, Donald R. Evick and Conrad P. Heins, Jr., 587

Torsion shear tests; Vibration; Damping; Laboratory tests; Shear stress; Shear tests; Soil mechanics
Shear Modulus and Damping in Soils: Measurement and Parameter Effects, Bobby O. Hardin and Vincent P. Drnevich, 328

Towers; Transmission lines; Environmental engineering; Esthetics; Impact; Land use
Transthetics, Harold P. Hulett, 313

Towers; Transmission lines; Wind (meteorology); Buildings (codes); Cables; Design criteria; Loading; Power lines; Structural engineering
Wind Recommendations for Transmission Towers, Gene M. Wilhoite, 142

Towers; Vibration; Dynamics; Guyed towers; Guy wires; Structural engineering; Temperature
Dynamics of Guyed Towers, Richard J. McCaffrey and Alois J. Hartmann, 303

Towing; Tugboats; Barges; Coastal engineering; Marine transportation
Ocean Tug-Barge Systems, Lawrence R. Glosten, 243

Tracers; Dispersions; Hydraulics; Time of concentration
Hydraulic Treatment Efficiency of Waste Stabilization, Kenneth A. Mangelson and Gary Z. Watters, 333

Tracers; Turbines; Field tests; Penstocks; Physics; Pipelines; Power
Radioisotopes and Turbine Flow Measurement, Jack C. Schuster and Robert L. Hansen, 61

Tracers; Turbulence; Diffusion; Effluents; Field tests; Hydraulics; Models; Simulation; Tidal currents
Tracer Tests of Eddy Diffusion in Field and Model, Maurice J. Crickmore, 509

Tractive forces; Alluvial channels; Bed load; Hydraulics; Tests
Bed Load Transportation in Alluvial Channels, Satya P. Garg, Ashutosh K. Agrawal and Prem Raj Singh, 2

Traffic; Benefit-cost ratios; Costs; Federal agencies; Highways; Safety; Signals
Federal Experience in TOPICS, Hugh B. Henry, 292

Traffic; Data systems; Parking areas; Parking facilities; Personnel; Regulations; Safety; Schools
Management System for Campus Traffic Planning, Michael J. Quillem and Jason C. Yu, 527

Traffic; Traffic control; Traffic regulations; Highways; Highway transportation; Systems engineering
Strategies for Practical Expressway Control, Allan G.R. Bullen, 417

Traffic; Traffic control; Transportation; Urban planning; Air pollution; Environmental engineering; Sweden
Gothenburg (Sweden) Uses Barriers to Cut Traffic, Curt M. Elmberg, 406

Traffic; Traffic surveys; Transportation; Urban planning; Highways; South Carolina
Annual Surveillance of Urban Traffic Growth, Peter S. Parsonson, 346

Traffic; Transportation; Mathematical models; Parking areas; Parking facilities; Site selection
Location Model for Parking Facilities, Adib K. Kanafani, 54

Traffic; Transportation; Urban planning; Economics; Highway engineering; Parking facilities; Toll roads
Urban Road Pricing Through Selective Parking Taxes, Robert E. Burns, 440

Traffic; Transportation; Urban transportation; Buses (vehicles); Passenger transportation; Terminal facilities
Location of Bus Stops, Walter H. Kraft and Thomas J. Boardman, 79

Traffic; Transportation; Vehicles; Vehicular traffic; Ground vehicles; Passenger transportation; Rapid transit railways
Curbside Service Subways, Charles J. Swet, 469

Traffic control; Traffic engineering; Buses (vehicles); Bus lines; Highway engineering; Passenger transportation
Federal Research in Urban Traffic Control, Juri Raus and Philip J. Tarnoff, 434

Traffic control; Traffic regulations; Highways; Highway transportation; Systems engineering; Traffic
Strategies for Practical Expressway Control, Allan G.R. Bullen, 417

Traffic control; Transportation; Urban planning; Air pollution; Environmental engineering; Sweden; Traffic
Gothenburg (Sweden) Uses Barriers to Cut Traffic, Curt M. Elmberg, 406

Traffic control; Tunnels; Underwater construction; Vehicular tunnels; Cofferdams; Fabrication; Prefabrication; Reinforcement; Steels
Submerged-Tube Tunnel in Mobile, Ray R. Slocum, 368

Traffic engineering; Buses (vehicles); Bus lines; Highway engineering; Passenger transportation; Traffic control
Federal Research in Urban Traffic Control, Juri Raus and Philip J. Tarnoff, 434

Traffic engineering; Drainage; Freeways; Highway engineering; Highways; Maintenance; Pavements; Safety
Current Practices in Highway Maintenance: A Reference List, Committee on Construction, Maintenance and Operation of Highways of the Highway Division., Walter E. Capper, Chmn., 260

Traffic engineering; Transportation; Automobiles; Computers; Dynamics; Highways; Safety
Vehicle-Roadway Interaction Studies by Math Model, Hayes E. Ross, Jr. and Don L. Ivey, 249

Traffic engineering; Transportation; Transportation management; Human factors engineering; Management
Four-Day Week and Transportation, Vincent R. Desimone, 361

Traffic regulations; Highways; Highway transportation; Systems engineering; Traffic; Traffic control
Strategies for Practical Expressway Control, Allan G.R. Bullen, 417

Traffic safety; Human behavior; Pavements; Rolling friction; Safety; Tires
Current Methods For Improved Tire-Pavement Interaction, Bob M. Galloway and Jon A. Epps, 505

Traffic signals; Transportation; Display devices; Electronic equipment; Guidance; Highways
Benefit Measurements of Highway Electronic Route Guidance, Salvatore J. Bellomo and George K. Young, Jr., 90

Traffic surveys; Mathematical models; Modal split
Impedance Minimization Travel Choice Process, Edward A. Beimborn, 140

Traffic surveys; Transit systems; Transportation; Accessibility; Mathematical models; Planning
Analytical Estimation of Transit Access Impedances, Paul R. Rassam and Raymond H. Ellis, 154

Traffic surveys; Transportation; Community relations; Decision making; Disadvantaged groups; Government; Research; Schools
Transportation Research for Community Objectives, Arthur Saltzman, Sidney H. Evans, Alice E. Kidder and Florentine Sowell, 555

Traffic surveys; Transportation; Measurement; Planning
Integrated Measurement Framework for Transportation Planning, George C. Wickstrom, 241

Traffic surveys; Transportation; Transportation models; Trip length; Mathematical models; Modal split
Variations of Urban Travel Characteristics with Age, Norman Ashford and Frank M. Holloway, 385

Traffic surveys; Transportation; Urban planning; Forecasting; Mathematical models; Regression analysis
Time Stability of Zonal Trip Production Models, Norman Ashford and Frank M. Holloway, 535

Traffic surveys; Transportation; Urban planning; Highways; South Carolina; Traffic
Annual Surveillance of Urban Traffic Growth, Peter S. Parsonson, 346

Traffic surveys; Transportation models; Urban planning; Behavior; Forecasting; Modal split
Behavioral Models in Transportation Planning, Frank E. Horton, 234

Training; Construction industry; Engineering education; Engineers; Foreign engineering; Great Britain; Management; Metric system; Planning; Standards
Metrication Progress in the United Kingdom, Gordon Bowen, 523

Training; Hydraulic engineering; Hydraulics; Innovation; Professional societies; Sciences; Sociology
Technological Innovation and Hydraulic Engineering, George Bugliarello, 278

Tramways; Urban transportation; Automatic control; Elevated railroads; Mass transportation; Tires
Transit System Employs Three Modes, Robert F. Seedlock, 226

Transfer functions; Composite structures; Elastic properties; Engineering mechanics; Matrices (mathematics); Sandwich laminates
Transfer Matrix Approach to Layered Systems, Leon Y. Bahar, 479

Transient flow; Conformal mapping; Drains; Engineering mechanics; Seepage; Tile drainage
Transient Seepage Flow Toward Two Parallel Drains, Imre Gyuk and Gabor M. Karadi, 138

Transient flow; Unsteady flow; Water tunnels (conveyance); Computers; Hydraulics; Open channel flow; Pressure pipes
Transient Flow in Free-Surface, Pressurized Systems, David C. Wiggert, 87

Transition flow; Turbulence; Fluid flow; Hydraulics; Research; Skin friction
Experiments on Plane Couette Flow, Hans J. Leutheusser and Vincent H. Chu, 7

Transit systems; Transportation; Accessibility; Mathematical models; Planning; Traffic surveys
Analytical Estimation of Transit Access Impedances, Paul R. Rassam and Raymond H. Ellis, 154

Transmission lines; Blasting; Costs; Excavation; Foundations; Installation; Power; Power lines; Railroads
Powerline Foundations Installed along Railroad Tracks, Roger S. Chapman, 462

Transmission lines; Environmental engineering; Esthetics; Impact; Land use; Towers
Transthetics, Harold P. Hulett, 313

Transmission lines; Transportation; Utilities; Zoning; Costs; Engineering societies; Failure; Gas pipelines; Legislation; Natural gas
Responsibility of Gas Utilities for Pipeline Safety, Carl T. Kallina, 148

Transmission lines; Turbulence; Vibration; Wind (meteorology); Aerodynamics; Engineering mechanics; Fluid flow
Galloping Oscillations of Prismatic Structures, Milos Novak, 50

Transmission lines; Urban planning; Urban transportation; Waterways (transportation); Freight terminals; Investments; Land use; Pipelines; Planning; Railroads; Regional planning; Terminal facilities
Restructuring Freight Transportation in Chicago, James Robert Blaze, 353

Transmission lines; Wind (meteorology); Buildings (codes); Cables; Design criteria; Loading; Power lines; Structural engineering; Towers
Wind Recommendations for Transmission Towers, Gene M. Wilhoite, 142

Transmission towers; Alignment; Highways; Land use; Pipelines; Regional planning; Right-of-way; Right of way acquisition
Joint Utilization of Rights-of-Way, Francis J. Stastny, 130

Transmission towers; Aluminum; Aluminum alloys; Field tests; Loads (forces); Structural engineering
Guide for the Design of Aluminum Transmission Towers, by the Task Committee on Lightweight Alloys of the Committee on Metals of the Structural Division, Robert J. Brungraber, Chmn., 596

Transpiration; Water consumption; Evaporation; Evapotranspiration; Irrigation; Phreatophytes
Simulation of Salt Cedar Evapotranspiration, William C. Hughes, 570

Transpiration; Water loss; Darcys law; Irrigation; Root systems
Simulation of Post-Irrigation Moisture Movement, Fred J. Molz, 580

Transportation; Accessibility; Mathematical models; Planning; Traffic surveys; Transit systems
Analytical Estimation of Transit Access Impedances, Paul R. Rassam and Raymond H. Ellis, 154

Transportation; Aircraft; Air transportation; Construction; Joints (junctions); Keys (splines); Pavements; Rigid pavements
Keyed Joint Performance Under Heavy Loaded Aircraft, John L. Rice, 561

Transportation; Aircraft landing areas; Durability; Highways
Effect of Load Placement on Rigid Pavement Behavior, Harvey J. Treybig, William Ronald Hudson and B. Frank McCullough, 6

Transportation; Air pollution; Benefit-cost ratios; Community development; Noise reduction; Real property
Community Values in Transport Network Evaluation, Dan G. Haney and George E. Klein, 449

Transportation; Airports; Air transportation; Electronics; Passenger transportation; Systems engineering
Satellite Transit at Seattle-Tacoma Airport, Ralph Mason, 566

Transportation; Airports; Bibliographies; Information retrieval; Publications
List of Information Sources for Airport Planners, Robert K. Palmer, 65

Transportation; Attenuators; Collisions; Highways; Safety; Safety devices; Tests
Recent Developments in Roadside Crash Cushions, John G. Viner, 99

Transportation; Automation; Concrete (reinforced); Parking facilities; Rapid transit railways
Novel Features on Lindenwold Line, Richard E. Pinkham, 187

Transportation; Automobiles; Computers; Dynamics; Highways; Safety; Traffic engineering
Vehicle-Roadway Interaction Studies by Math Model, Hayes E. Ross, Jr. and Don L. Ivey, 249

Transportation; Benefit cost analysis; Canada; Economic analysis; Highway engineering; Highway planning; Highways; Investments; Land use; Regional planning
Programming of Regional Highway Investments, Bruce G. Hutchinson, 269

Transportation; Bituminous coatings; Concrete (reinforced); Costs; Critical path method; Highways; Pavements
Rehabilitating Chicago's Expressways, Thomas T. Morimoto, 541

Transportation; Bridges (structures); Buses (vehicles); Foundations; Geology; Pile driving; Piles (foundations); Pollution
First U.S. Center-City People Mover, Debuts in Morgantown, W. Va., Frank E. Lo Presti, 499

Transportation; Bridges (structures); City planning; Concrete (post-tensioned); Concrete (precast); Foundations; Highways; Prefabrication; Slabs; Tendons
Prefabricated Highways, William Zuk, 204

Transportation; Cements; Deformation; Highways; Soil cement
Soil-Cement Bases Under Thin Bituminous Surfacing, Boniface C. Obi, 124

Transportation; Community relations; Decision making; Disadvantaged groups; Government; Research; Schools; Traffic surveys
Transportation Research for Community Objectives, Arthur Saltzman, Sidney H. Evans, Alice E. Kidder and Florentine Sowell, 555

Transportation; Computer programs; Fatigue (materials); Stresses; Thickness
Structural Design of Concrete Pavement by Computer, Cloyd E. Warnes, 25

Transportation; Construction; Construction procedure; Flexible pavements; Highway engineering; Lime; Soil stabilization; Subgrades
Deep-Plow Lime Stabilization for Pavement Construction, Marshall R. Thompson, 107

Transportation; Construction costs; Elevated railroads; Rapid transit railways; Regional planning; Right-of-way; Right of way acquisition; Street railroads; Subways
Expressway Rapid Transit, George Krambles, 590

Transportation; Containerizing; Design; Mathematical models; Terminal facilities
Basis for Simulation Model of Container Terminal, Fraser Dunford, 299

Transportation; Containerizing; Materials handling; Rapid transit railways
Goods Movement on Urban Transit Systems, John J. Fruin, 411

Transportation; Costs; Economics; Highways; Roads; Statistical analysis
Local Rural Road Costs and Economies of Scale, William D. Berg, 478

Transportation; Cracking; Flexible pavements; Highway engineering; Pavements; Shrinkage; Shrinkproofing
Cracking Mechanism of Flexible Pavements, Jacob Uzan, Moshe Livneh and Elisha Shklarsky, 16

Transportation; Design; Environmental engineering; Highway engineering; Highways; Noise; Noise masking
Baltimore Plans Highways for Minimum Noise, Grant S. Anderson, Frederick Gottemoeller and Daniel G. Page, 410

Transportation; Display devices; Electronic equipment; Guidance; Highways; Traffic signals
Benefit Measurements of Highway Electronic Route Guidance, Salvatore J. Bellomo and George K. Young, Jr., 90

Transportation; Drainage; Environmental engineering; Highways; Land use; Legislation; Regional planning
Impact of Environmental Controls on Highways, Wm. Campbell Graeub, Albert A. Grant and Robley Winfrey, 219

Transportation; Dynamic loads; Elastic properties; Materials; Pavements; Soil mechanics; Strains; Stresses; Subgrades
Dynamic Response of Model Pavement Structure, Stephen F. Brown and David I. Bush, 541

Transportation; Earth movements; Highways; Inclinometers; Instrumentation; Soil stability; Stability
Instrumentation Applied to Slope Stability Problems, Stanley D. Wilson and David E. Hilts, 316

Transportation; Elastic foundations; Foundations; Highway engineering; Pavements; Rigid pavements
Advanced Analysis of Rigid Pavements, Sue K. Wang, Michel Sargious and Yau Kai Cheung, 36

Transportation; Government policies; Highway planning; Michigan; Revenues; Taxes
Michigan Transportation in the Seventies, William C. Taylor, 510

Transportation; Mathematical models; Parking areas; Parking facilities; Site selection; Traffic
Location Model for Parking Facilities, Adib K. Kanafani, 54

Transportation; Measurement; Planning; Traffic surveys
Integrated Measurement Framework for Transportation Planning, George C. Wickstrom, 241

Transportation; Transportation management; Human factors engineering; Management; Traffic engineering
Four-Day Week and Transportation, Vincent R. Desimone, 361

Transportation; Transportation models; Trip length; Mathematical models; Modal split; Traffic surveys
Variations of Urban Travel Characteristics with Age, Norman Ashford and Frank M. Holloway, 385

Transportation; Urban development; Land use; Models; Research
Analysis of BART Impacts on Bay Area Land Use, Douglass B. Lee, Jr., 226

Transportation; Urban development; Mathematical models; Modal split; Systems analysis
Evaluation of New Systems For Urban Transportation, Reed H. Winslow and Jerry L. Pfeffer, 518

Transportation; Urban development; Urban planning; Buildings (office); Communication; Forecasting; Social needs; Telecommunication
Communications Substitutes for Intra-Urban Travel, Richard C. Harkness, 307

Transportation; Urban planning; Air pollution; Environmental engineering; Sweden; Traffic; Traffic control
Gothenburg (Sweden) Uses Barriers to Cut Traffic, Curt M. Elmberg, 406

Transportation; Urban planning; Commercial transportation; Commodity management; Models
Analysis of Need for Goods Movement Forecasts, Davit Fresko, Gordon Shunk and Franklin Spielberg, 87

Transportation; Urban planning; Economics; Highway engineering; Parking facilities; Toll roads; Traffic
Urban Road Pricing Through Selective Parking Taxes, Robert E. Burns, 440

Transportation; Urban planning; Forecasting; Mathematical models; Regression analysis; Traffic surveys
Time Stability of Zonal Trip Production Models, Norman Ashford and Frank M. Holloway, 535

Transportation; Urban planning; Highways; South Carolina; Traffic; Traffic surveys
Annual Surveillance of Urban Traffic Growth, Peter S. Parsonson, 346

Transportation; Urban planning; Land use; Passenger transportation; Terminal facilities (elect)
Environmental Factors in Passenger Terminal Design, John J. Fruin, 71

Transportation; Urban planning; Markov processes; Mathematical models; Time dependence
Markov Renewal Model of Linked Trip Travel Behavior, Gorman Gilbert, George L. Peterson and Joseph L. Schofer, 339

Transportation; Urban planning; Water management (applied); Flood control; Hydraulics
Effect of Transportation Planning on Flood Plain Management, Thomas M. Lee, 178

Transportation; Urban transportation; Automobiles; Ethnic groups; Mobility; Passenger transportation; Retirement
Transportation and Retirement, Frances M. Carp, 484

Transportation; Urban transportation; BART; Rail transportation; Rapid transit railways
BART Rail Transit System Begins Operations505

Transportation; Urban transportation; Buses (vehicles); Passenger transportation; Routing; Social needs
Demand Activated Transportation for The Elderly, Charles B. Notess and Robert E. Paaswell, 456

Transportation; Urban transportation; Buses (vehicles); Passenger transportation; Terminal facilities; Traffic
Location of Bus Stops, Walter H. Kraft and Thomas J. Boardman, 79

Transportation; Urban transportation; Chicago; Employment opportunities; Passenger transportation; Social needs
Public Transit and Job Access in Chicago, Martin Wachs and Joseph L. Schofer, 170

Transportation; Urban transportation; Environments; Freeways; Highways; Multiple use; Right of way acquisition
Multiple Use of City Transportation Corridor, Harry R. Powell and F. G. Alden, 285

Transportation; Urban transportation; Mathematical models; Rapid transit railways; Statistical analysis
Assessing Impact of Urban Transportation, David E. Boyce, 330

Transportation; Utilities; Government; Pipelines; Safety; Standards
The State's Role in Gas Safety, Harold E. Shutt, 46

Transportation; Utilities; Zoning; Costs; Engineering societies; Failure; Gas pipelines; Legislation; Natural gas; Transmission lines
Responsibility of Gas Utilities for Pipeline Safety, Carl T. Kallina, 148

Transportation; Vehicles; Automation; Electric drives; Pallets; Suspension
Pallet Systems for Integrating Urban Transportation, David Gordon Wilson, 212

Transportation; Vehicles; Vehicular traffic; Ground vehicles; Passenger transportation; Rapid transit railways; Traffic
Curbside Service Subways, Charles J. Swet, 469

Transportation; Vibration; Noise; Noise reduction; Passenger transportation; Rapid transit railways
Noise and Vibration Control in New Rapid Transit, Marshall L. Silver, 579

Transportation management; Forecasting; Land use; Population; Statistical analysis; Statistical distributions
Statistical Decision in Forecasting Planning Data, Kumares C. Sinha, 547

Transportation management; Human factors engineering; Management; Traffic engineering; Transportation
Four-Day Week and Transportation, Vincent R. Desimone, 361

Transportation models; Trip length; Mathematical models; Modal split; Traffic surveys; Transportation
Variations of Urban Travel Characteristics with Age, Norman Ashford and Frank M. Holloway, 385

Transportation models; Urban planning; Behavior; Forecasting; Modal split; Traffic surveys
Behavioral Models in Transportation Planning, Frank E. Horton, 234

Trashracks; Vibration; Water flow; Bars; Jets
Flow-Induced Vibrations of Trashrack Bars, J. W. Fortey and Robert F. Tiry, 230

Travel; Forecasting; Highways; Mathematical models; North carolina; Regional analysis; Regional planning
Forecasting Regional Travel on Regional Highway Network, Arun Chatterjee and Paul D. Cribbins, 162

Trenches; Buried structures; Culverts; Field tests; Pressure gages; Research; Structural engineering
Concrete Arch Culvert Behavior-Phase 2, Raymond Eugene Davis and Alfred E. Bacher, 521

Triangulation; Aerial photography; Computer programs; Photogrammetry; Surveying
Computer Program System for Aerotriangulation, Kam W. Wong and G. Elphingstone, 470

Triaxial shear; Vane shear tests; Measuring instruments; Saturated soils; Test equipment
A Direct-Reading Pocket Shear Vane, Stanley Serota and Anil Jangle, 63

Triaxial tests; Bubbles; Hydraulics; Laboratories; Pipe flow; Soil mechanics; Tests
Time to Dissolve Air Bubbles in Drain Line, Kenneth L. Lee and David K. Black, 179

Triaxial tests; Grain sizes; Model studies; Rock fills; Shear strength; Soil mechanics
Evaluation of Properties of Rockfill Materials, N. Dean Marschi, Clarence K. Chan and H. Bolton Seed, 160

Trickle irrigation; Irrigation; Pipe flow
Uniform Irrigation with Low-Pressure Trickle Systems, Lloyd E. Myers and Dale A. Bucks, 436

Trickle irrigation; Water application rate; Water management (applied); Irrigation; Irrigation efficiency; Sprinkler irrigation; Surface irrigation
Attainable Irrigation Efficiencies, Lyman S. Willardson, 331

Trickling filters; Bacteria; Chlorine; Detention reservoirs; Filtration; Hydraulics; Pollution; Sanitary engineering; Settling basins; Sewage disposal; Tanks (containers)
Chlorine Disinfection in Final Settling Basins, Darrell W. Monroe and Donald C. Phillips, 296

Trickling filters; Biochemical oxygen demand; Biological treatment; Mathematical models; Oxygen transport mechanisms; Plastics; Sanitary engineering
Oxygen Theory in Biological Treatment Plant Design, Dilip S. Mehta, Harry H. Davis and Robert P. Kingsburg, 360

Trickling filters; Chemical removal (sewage treatment); Sanitary engineering; Sewage treatment; Slime; Sludge; Statistical analysis
Enhanced Phosphorus Removal in Trickling Filters, Harold J. Jebens and William C. Boyle, 399

Trip length; Mathematical models; Modal split; Traffic surveys; Transportation; Transportation models
Variations of Urban Travel Characteristics with Age, Norman Ashford and Frank M. Holloway, 385

Trucks; Urban development; Cargo transportation; Freight terminals; Social values
Urban Commodity Flow - Suggested Research Projects, Warren B. Lovejoy, 554

Trusses; Automation; Computers; Design; Geometry; Optimization; Structural engineering
Automated Design of Trusses for Optimum Geometry, Garret N. Vanderplaats and Fred Moses, 202

Trusses; Costs; Optimum design; Probability theory; Statically determinate structures; Structural engineering
Minimum Expected Cost Optimization, Shengtaur Mau and Robert G. Sexsmith, 447

Trusses; Interactions; Loads (forces); Nonlinear systems; Structural engineering
Nonlinear Elastic Truss Analysis Partitioning, N. M. Singaraj and Jawalker K. Sridhar Rao, 562

Tsunamis; Walls; Water waves; Coastal engineering; Hydraulic models
Waves Generated by Horizontal Motion of a Wall, Madan M. Das and Robert L. Wiegel, 137

Tube joints; Welded joints; Welding; Fatigue (materials); Fractures (materials); Offshore structures; Steels; Structural engineering
Fatigue Failure of Welded Tubular Joints, James M. Becker, William W. Gerberich and Jack G. Bouwkamp, 62

Tubes; Beams (supports); Joints (connections); Loads (forces); Structural engineering
Strength of Square-Tube Connections Under Combined Loads, Roger L. Brockenbrough, 581

Tubes; Construction; Earthquakes; Frames; Sidesway; Steel; Structural engineering
Perimetral Tube for 37-Story Steel Building, L. Agustin Mazzeo and Armin De Fries, 288

Tubes; Warpage; Beams (supports); Curved beams; Engineering mechanics; Stresses; Torsion
Torsion and Flexure of Curved, Thin-Walled Beams or Tubes, Ray N. Nitzsche and Robert E. Miller, 382

Tugboats; Barges; Coastal engineering; Marine transportation; Towing
Ocean Tug-Barge Systems, Lawrence R. Glosten, 243

Tunnel construction; Compressed air; Excavation; Shields (tunneling); Slurries
Pressurized-Slurry Shields Bore Submarine Tunnels, Takuya Ohira and Shunta Shiraishi, 248

Tunneling (excavation); Freezing; Noise reduction; Sewage disposal; Sewers; Subsurface investigations
Subsurface Freezing Used In Tunneling, Charles P. Gail, 221

Tunneling (excavation); Underground storage; Cost savings; Rock drilling; Room and pillar mining
How to Cut Underground Construction Costs, R. L. Loofbourow, 310

Tunneling (excavation); Vehicular tunnels; Boring machines; Construction; Faults (geology); Rocks; Shields (tunneling)
Vehicular Tunnels in Rock - Direction for Development, Richard J. Robbins, 379

Tunnel linings; Concrete; Construction; Epoxy mortar; Epoxy resins; Surface preparation; Temperature control
Application of Epoxy Resins in Tunnel Lining Concrete Repair, Russell C. Borden and Carl E. Selander, 405

Tunnels; Aqueducts; Conduits; Mortars (material); Pipelines; Pipe linings; Protective coatings; Steel pipes
Cement Mortar Lining of 20-Ft Diameter Steel Pipe, James E. Wolfe, 462

Tunnels; Underwater construction; Vehicular tunnels; Cofferdams; Fabrication; Prefabrication; Reinforcement; Steels; Traffic control
Submerged-Tube Tunnel in Mobile, Ray R. Slocum, 368

Tunnels; Velocity; Water; Water flow; Canals; Construction; Financing; Fluid flow; Hydraulic radius; Linings; Pipelines; Power; Pressure tunnels
Aqueducts for the Least Cost Conveyance of Water, Nephi A. Christensen, 46

Turbines; Conservation; Costs; Dams (concrete); Dams (gravity); Economics; Environmental engineering; Hydroelectric power generation; Models; Powerplants; Pumped storage
Wallace Dam, Major H. Thompson, Jr., 550

Turbines; Field tests; Penstocks; Physics; Pipelines; Power; Tracers
Radioisotopes and Turbine Flow Measurement, Jack C. Schuster and Robert L. Hansen, 61

Turbulence; Axial flow; Boundary layer; Engineering mechanics; Flow resistance; Fluid flow; Shear stress
Helical Flow Through Concentric Annulus, M. H. Abdul Khader and H. Suresh Rao, 231

Turbulence; Boundaries; Boundary layer flow; Gates; Hydraulics; Jets
Theoretical Analysis of Flow Past Leaf-Gate, Rangaswami Narayanan, 320

Turbulence; Boundary shear; Energy dissipators; Hydraulic jump; Hydraulics; Stilling basins
Boundary Layer Effects on Hydraulic Jump Location, Edward H. Wilson and Andrew A. Turner, 341

Turbulence; Buoyancy; Fluid flow; Hydraulics; Jet flow; Mathematics; Temperature
Buoyant Jets with Three-Dimensional Trajectories, Eric Hirst, 563

Turbulence; Covariance; Flow rate; Hot film anemometers; Hydraulics
Measurement of Velocity-Concentration Covariance, Raul S. McQuivey and Thomas N. Keefer, 459

Turbulence; Diffusion; Effluents; Field tests; Hydraulics; Models; Simulation; Tidal currents; Tracers
Tracer Tests of Eddy Diffusion in Field and Model, Maurice J. Crickmore, 509

Turbulence; Fluid flow; Hydraulics; Reaeration
Wind Shear-Turbulence and Reaeration Coefficient, Aziz F. Eloubaidy and Erich J. Plate, 111

Turbulence; Fluid flow; Hydraulics; Research; Skin friction; Transition flow
Experiments on Plane Couette Flow, Hans J. Leutheusser and Vincent H. Chu, 7

Turbulence; Hydraulics; Statistical analysis
Lagrangian Characteristics of Surface Turbulence, Eggert Hansen, 346

Turbulence; Turbulent diffusion; Dispersion; Hydraulics; Mathematical models; Mississippi; Time of concentration
Dispersion in Natural Streams, Mahendra K. Bansal, 50

Turbulence; Turbulent flow; Boundary shear; Engineering mechanics; Measuring instruments; Porous materials
Turbulent Shear Flow in Porous Boundary, James F. Ruff and Lynn W. Gelhar, 404

Turbulence; Velocity; Hot film anemometers; Laboratory tests; Mixing; Power; Salt; Temperature
Velocity and Temperature in Buoyant Jet, Richard Dornhelm, Manuel Nouel and Robert L. Wiegel, 148

Turbulence; Velocity distribution; Water flow; Hydrodynamics; Jet flow
Mean and Turbulent Velocities for Plane Jet, Walter C. Mih and John A. Hoopes, 378

Turbulence; Vibration; Coefficients; Fluid flow; Hydraulics; Hydrodynamics
Turbulence Effects On Drag of Sharp-Edged Bodies, John A. Roberson, Chi Yu Lin, Scott G. Rutherford and Marvin D. Stine, 386

Turbulence; Vibration; Wind (meteorology); Aerodynamics; Drag; Loads (forces); Structural engineering
Drag Spectra of Simple Structures in Turbulence, John Brian Roberts, 448

Turbulence; Vibration; Wind (meteorology); Aerodynamics; Engineering mechanics; Fluid flow; Transmission lines
Galloping Oscillations of Prismatic Structures, Milos Novak, 50

Turbulence; Water flow; Boundary shear; Flow rate; Hydraulic jump; Hydraulics; Inflow
Effects of Inflow Condition on Hydraulic Jump, Hans J. Leutheusser and Viswanathan C. Kartha, 401

Turbulence; Water flow; Drainage; Erosion; Friction; Impact; Overland flow; Rainfall
Mechanics of Sheet Flow Under Simulated Rainfall, Yong Nam Yoon and Harry G. Wenzel, Jr., 13

Turbulence; Wind pressure; Boundary layer; Buildings; Engineering mechanics; Pressure gradients
Turbulence Effect on Wall Pressure Fluctuations, Willy Z. Sadeh and Jack E. Cermak, 579

Turbulent boundary layer; Fluid flow; Hydraulics; Jets; Laminar flow
Appearance of Unstable Buoyant Jet, Habib O. Anwar, 354

Turbulent diffusion; Dispersion; Hydraulics; Mathematical models; Mississippi; Time of concentration; Turbulence
Dispersion in Natural Streams, Mahendra K. Bansal, 50

Turbulent flow; Boundary shear; Engineering mechanics; Measuring instruments; Porous materials; Turbulence
Turbulent Shear Flow in Porous Boundary, James F. Ruff and Lynn W. Gelhar, 404

Turbulent flow; Cylinders; Drag; Hydraulics
Drag Coefficient of Cylinders in Turbulent Flow, Stephen C. Ko and Walter H. Graf, 305

Turnkey projects; ASCE (Code of Ethics); ASCE (Professional Practice); Bids; Contractors; Contracts; Costs
Draft Guide to Turnkey Construction Contracts444

Two phase flow; Capillary flow; Hydraulics; Infiltration; Soil moisture; Soil moisture movement
Perturbation Analysis of Two-Phase Infiltration, Alain Noblanc and Hubert J. Morel-Seytoux, 463

Two phase flow; Computation; Density; Estuaries; Fluid flow; Hydraulics; Salinity
Numerical Computation of Stratified Nearly Horizontal Flows, John P. Grubert and Michael B. Abbott, 530

Two phase flow; Flow characteristics; Fluid flow; Hydraulics; Jets; Shear flow
Turbulent Compound Annular Shear Layers, Nallamuthu Rajaratnam and B. S. Pani, 350

Two phase flow; Hydraulics; Pipe flow; Sedimentation; Sediment deposits
Pipelining of Low-Concentration Sand-Water Mixtures, Millard P. Robinson, Jr. and Walter H. Graf, 381

Two phase flow; Water pollution; Density; Estuaries; Hydraulics; Shear stress
Gradually Varying Two-Layer Stratified Flow, Flemming Bo Pedersen, 155

Ultimate strength; Axial compression; Buckling; Forecasting; Loads (forces); Plates; Structural engineering
Strength Predictions of Plates in Uniaxial Compression, Robert M. Korol and Archibald N. Sherbourne, 444

Ultimate strength; Web beams; Buckling; Finite elements; Loading; Structural engineering; Tests; Thin-wall structures
Failure of Thin-Walled Members Under Patch Loading, Kenneth C. Rockey, Mohamed A. El-Gaaly and Debal K. Bagchi, 572

Underdrains; Drainage; Filtration; Seepage; Subsurface drainage; Subsurface drains
Prefabricated Filter-Fin for Subsurface Drains, Kent A. Healy and Richard P. Long, 594

Underground storage; Cost savings; Rock drilling; Room and pillar mining; Tunneling (excavation)
How to Cut Underground Construction Costs, R. L. Loofbourow, 310

Underground storage; Wells; Aquifers; Density; Hydraulics
Gravitational and Dispersive Mixing in Aquifers, Lynn W. Gelhar, John L. Wilson, III and John S. Miller, 588

Underpinning; Foundations; Grillage footings; Pile foundations
Underpinning Massive Structures, Charles E. Mergentime, 123

Underwater construction; Bearing capacity; Deformation; Earth pressure; Ocean engineering; Pore water pressure; Soil mechanics; Time dependence
Breakout Resistance of Objects Embedded in Ocean Bottom, Aleksandar Sedmak Vesic, 19

Underwater construction; Fatigue (materials); Ocean engineering; Offshore structures; Structural engineering; Tides
Offshore Structures - Statistical Strain Recording, Michael A. Garnett, Bhan Mabin and Terrence E.H. Lemmon, 177

Underwater construction; Vehicular tunnels; Cofferdams; Fabrication; Prefabrication; Reinforcement; Steels; Traffic control; Tunnels
Submerged-Tube Tunnel in Mobile, Ray R. Slocum, 368

Underwater structures; Concrete; Field tests; Hydrostatic tests; Structural engineering
Cylindrical Concrete Hulls Under Hydrostatic Loading, Harvey H. Haynes, Robert J. Ross and Norman D. Albertsen, 294

Underwater structures; Dynamic structural analysis; Engineering mechanics; Shells (structural forms); Spherical shells
Acoustic Approximations in Fluid-Shell Interactions, Bedros Bedrosian and Frank L. DiMaggio, 337

Underwater structures; Vibration; Damping; Hydrodynamic pressure; Natural frequency; Structural engineering
Virtual Mass of Submerged Structures, Anjur R. Chandrasekaran, Sarjit S. Sani and M. M. Malhotra, 308

Undrained shear tests; Confining pressure; Cyclic loads; Damping; Resonance; Sands; Shear modulus; Soil mechanics; Tests
Undrained Cyclic Shear of Saturated Sand, Vincent P. Drnevich, 431

Unionization; ASCE (committees); ASCE (professional activities); Economic factors; Salaries
National ASCE Drafts Proposed Salary Guidelines9

Unionization; ASCE (Employment Conditions); ASCE (Salaries and Fees); Collective bargaining; Engineering societies; Salaries
Civil Engineer's Compensation - ASCE's Future, Daniel J. Smyers, 500

Unionization; Civil engineers; Collective bargaining; Education; Engineering education; Labor relations; Management; Salaries; Schools
Collective Bargaining on the Campus, B. Austin Barry, 563

United States government; Foreign projects; History; Legislation; Measurement; Metric system
Metrication in the United States, a Status Report, L. E. Barbrow, 555

Universities; ASCE (education); Careers; Engineering education; Professional development
University of Wisconsin Offers Professional Development Degree, John P. Klus and C. Allen Wortley, 20

Universities; Education; Engineering education; Professional activities; Public relations
The Continuing Challenge of Engineering Education, Arthur G. Hansen, 395

Unsteady flow; Hydraulics; Hydrographs; Storm drains; Storm water
Routing Storm Water Through a Drainage System, Subin Pinkayan, 102

Unsteady flow; Water tunnels (conveyance); Computers; Hydraulics; Open channel flow; Pressure pipes; Transient flow
Transient Flow in Free-Surface, Pressurized Systems, David C. Wiggert, 87

Uplift pressure; Chute spillways; Dams (earth); Eductors; Ejectors; Failure; Hydraulic jump; Hydraulics; Slabs
Damage to Karnafuli Dam Spillway, Mohammad A. Rahman, 596

Uplift pressure; Foundations; Hydraulics; Permeability; Stability; Structural stability
Boundary Effects on Stability of Structures, A. S. Chawla, 481

Urban areas; Watersheds; Hydraulics; Hydrographs; Hydrology; Mathematical models; Runoff
University of Cincinnati Urban Runoff Model, Constantine Papadakis and Herbert C. Preul, 523

Urban development; Cargo transportation; Freight terminals; Social values; Trucks
Urban Commodity Flow - Suggested Research Projects, Warren B. Lovejoy, 554

Urban development; Land use; Models; Research; Transportation
Analysis of BART Impacts on Bay Area Land Use, Douglass B. Lee, Jr., 226

Urban development; Mathematical models; Modal split; Systems analysis; Transportation
Evaluation of New Systems For Urban Transportation, Reed H. Winslow and Jerry L. Pfeffer, 518

Urban development; Urban planning; Buildings (office); Communication; Forecasting; Social needs; Telecommunication; Transportation
Communications Substitutes for Intra-Urban Travel, Richard C. Harkness, 307

Urban development; Urban planning; Community relations; Planning; Problem solving; Social needs
Goals for Dallas Program, Erik Jonsson, 394

Urban development; Urban planning; Economics; Erosion; Hydraulics; Land use; Research; Sedimentation; Sediment control
Urban Sedimentation in Perspective, Harold P. Guy and D. Earl Jones, Jr., 574

Urban development; Urban transportation; Water reuse; Water supply; Population growth; Social needs
The Urban Growth Syndrome, William H. Wisely, 358

Urbanization; Costs; Drainage; Economic analysis; Hydraulics; Mathematical models; Sewers
Methods for Predicting Urban Drainage Costs, Walter J. Rawls and John W. Knapp, 486

Urbanization; Hydraulic models; Hydraulics; Instantaneous unit hydrograph; Mathematical models; Storm drains
Conceptual Hydrologic Models for Urbanizing Basins, Ramachandra A. Rao, Jacques W. Delleur and B. S.P. Sarma, 362

Urban planning; Air pollution; Environmental engineering; Sweden; Traffic; Traffic control; Transportation
Gothenburg (Sweden) Uses Barriers to Cut Traffic, Curt M. Elmberg, 406

Urban planning; Airports; Air transportation; Dikes; Environmental engineering; Offshore structures
Trends in Offshore Airports, Richard D. Harza, 497

Urban planning; Architecture; Buildings; Environmental engineering; Planning; Structural engineering; Systems engineering
Tall Buildings--A Technological Assessment, Thomas C. Kavanagh, 54

Urban planning; ASCE (National Affairs); ASCE (Policy); Buildings (codes); Foreign engineering; Housing
The Challenge to Civil Engineering, Dennis Warner, 339

Urban planning; Behavior; Forecasting; Modal split; Traffic surveys; Transportation models
Behavioral Models in Transportation Planning, Frank E. Horton, 234

Urban planning; Bibliographies; Engineering education; History; Planning
City Planning Bibliography, George C. Bestor and Holway R. Jones, 266

Urban planning; Buildings (office); Communication; Forecasting; Social needs; Telecommunication; Transportation; Urban development
Communications Substitutes for Intra-Urban Travel, Richard C. Harkness, 307

Urban planning; Commercial transportation; Commodity management; Models; Transportation
Analysis of Need for Goods Movement Forecasts, Davit Fresko, Gordon Shunk and Franklin Spielberg, 87

Urban planning; Community relations; Planning; Problem solving; Social needs; Urban development
Goals for Dallas Program, Erik Jonsson, 394

Urban planning; Conflict; Highways; Regional planning
Regional-Local Conflicts in Transportation Planning, Harvey R. Joyner, 394

Urban planning; Economics; Erosion; Hydraulics; Land use; Research; Sedimentation; Sediment control; Urban development
Urban Sedimentation in Perspective, Harold P. Guy and D. Earl Jones, Jr., 574

Urban planning; Economics; Highway engineering; Parking facilities; Toll roads; Traffic; Transportation
Urban Road Pricing Through Selective Parking Taxes, Robert E. Burns, 440

Urban planning; Employment; Engineering education; Minority groups; Professional activities; Professional advancement
Minority Programs for ASCE, Sol E. Cooper, Austin B. Milhollin and Benito A. Sinclair, 485

Urban planning; Environmental engineering; Esthetics; Land use; Parks; Recreational facilities; Streams
Evaluating Recreational Potential of Small Streams, John A. Dearinger, 478

Urban planning; Forecasting; Mathematical models; Regression analysis; Traffic surveys; Transportation
Time Stability of Zonal Trip Production Models, Norman Ashford and Frank M. Holloway, 535

Urban planning; Highways; South Carolina; Traffic; Traffic surveys; Transportation
Annual Surveillance of Urban Traffic Growth, Peter S. Parsonson, 346

Urban planning; Land use; Passenger transportation; Terminal facilities (elect); Transportation
Environmental Factors in Passenger Terminal Design, John J. Fruin, 71

Urban planning; Markov processes; Mathematical models; Time dependence; Transportation
Markov Renewal Model of Linked Trip Travel Behavior, Gorman Gilbert, George L. Peterson and Joseph L. Schofer, 339

Urban planning; Urban renewal; Government; Revenue
HUD Sewer Policy in Urban Renewal Areas, Francis J. Blesso, 246

Urban planning; Urban transportation; Automobiles; Buses (vehicles); Mass transportation; Social needs
Shopping and Work Trips in the Black Ghetto, Charles B. Notess, 325

Urban planning; Urban transportation; Waterways (transportation); Freight terminals; Investments; Land use; Pipelines; Planning; Railroads; Regional planning; Terminal facilities; Transmission lines
Restructuring Freight Transportation in Chicago, James Robert Blaze, 353

Urban planning; Waste disposal; Mathematics; Refuse disposal; Sanitary engineering; Solid wastes; Systems engineering
Selecting Solid Waste Disposal Facilities, Billy P. Helms and Robert M. Clark, 4

Urban planning; Water management (applied); Flood control; Hydraulics; Transportation
Effect of Transportation Planning on Flood Plain Management, Thomas M. Lee, 178

Urban planning; Water pollution; Air pollution; Esthetics; Housing; Land use; Noise reduction; Parks
Esthetic Considerations in Urban General Planning, Wm. H. Claire, 404

Urban planning; Water resources; Zoning; Land use; Recreational facilities; Regional planning; Regulations
Wisconsin's Shoreland Management Program, Thomas M. Lee, 605

Urban planning; Waterways (watercourses); Drainage; Floods; Hydraulics; Hydrology; Land use; Legislation; Municipal engineering; Professional practice; Runoff; Subdivisions
An Engineer Looks at Drainage Law, Alfred R. Pagan, 511

Urban renewal; Government; Revenue; Urban planning
HUD Sewer Policy in Urban Renewal Areas, Francis J. Blesso, 246

Urban transportation; Automatic control; Elevated railroads; Mass transportation; Tires; Tramways
Transit System Employs Three Modes, Robert F. Seedlock, 226

Urban transportation; Automobiles; Buses (vehicles); Mass transportation; Social needs; Urban planning
Shopping and Work Trips in the Black Ghetto. Charles B. Notess. 325

Urban transportation; Automobiles; Ethnic groups; Mobility; Passenger transportation; Retirement; Transportation
Transportation and Retirement. Frances M. Carp. 484

Urban transportation; BART; Rail transportation; Rapid transit railways; Transportation
BART Rail Transit System Begins Operations505

Urban transportation; Buses (vehicles); Passenger transportation; Routing; Social needs; Transportation
Demand Activated Transportation for The Elderly. Charles B. Notess and Robert E. Paaswell. 456

Urban transportation; Buses (vehicles); Passenger transportation; Terminal facilities; Traffic; Transportation
Location of Bus Stops. Walter H. Kraft and Thomas J. Boardman. 79

Urban transportation; Chicago; Employment opportunities; Passenger transportation; Social needs; Transportation
Public Transit and Job Access in Chicago. Martin Wachs and Joseph L. Schofer. 170

Urban transportation; Environments; Freeways; Highways; Multiple use; Right of way acquisition; Transportation
Multiple Use of City Transportation Corridor. Harry R. Powell and F. G. Alden. 285

Urban transportation; Mathematical models; Rapid transit railways; Statistical analysis; Transportation
Assessing Impact of Urban Transportation. David E. Boyce. 330

Urban transportation; Water reuse; Water supply; Population growth; Social needs; Urban development
The Urban Growth Syndrome. William H. Wisely. 358

Urban transportation; Waterways (transportation); Freight terminals; Investments; Land use; Pipelines; Planning; Railroads; Regional planning; Terminal facilities; Transmission lines; Urban planning
Restructuring Freight Transportation in Chicago. James Robert Blaze. 353

USCOLD; Bids; Construction; Contract administration; Contractors; Contract terms
Responsibilities of the Engineer and the Contractor Under Fixed-Price Construction Contracts. Wayne S. Byrne. 257

U.S. Corps of Engineers; Civil engineers; Education; Engineering education; Missouri
Corps of Engineers Promotes Continuing Education. Melford E. Monsees. 39

Use rates; Ice cover; Oxygen; Oxygen consumption; Rivers; Sag; Sanitary engineering; Stream pollution
Oxygen Depletion in Ice Covered River. Patrick H. Bouthillier. 326

Utilities; Costs; Economics; Hydraulics; Sanitary engineering; Sewers; Systems engineering
Optimal Design of Urban Wastewater Collection Networks. Jarir S. Dajani, Robert S. Gemmell and Edward K. Morlok. 534

Utilities; Government; Pipelines; Safety; Standards; Transportation
The State's Role in Gas Safety. Harold E. Shutt. 46

Utilities; Waste disposal; Cooling systems; Cooling towers; Nuclear electric power generation; Powerplants; Thermoelectric power generation
Power Plant Cooling Systems. George Kinsman. 364

Utilities; Zoning; Costs; Engineering societies; Failure; Gas pipelines; Legislation; Natural gas; Transmission lines; Transportation
Responsibility of Gas Utilities for Pipeline Safety. Carl T. Kallina. 148

Values; Vibration; Embedding; Foundations; Half Space; Sliding
Coupled Sliding and Rocking of Embedded Foundations. Raymond J. Krizek, Dinesh C. Gupta and Richard A. Parmelee. 582

Valves; Cavitation; Energy dissipators; Hydraulics; Jets; Orifices
Cavitation in High-Head Conduit Control Dissipators. John F. Ripken and Norio Hayakawa. 151

Valves; Cavitation; Hydraulics; Pipe flow; Pipelines
Choking and Supercavitating Valves. J. Paul Tullis. 69

Valves; Water; Water tunnels; Aqueducts; Earthquakes; Manifolds; Pumps
Edmonston Pumping Plant: Nation's Mightiest. Robert B. Jansen. 465

Vane shear tests; Measuring instruments; Saturated soils; Test equipment; Triaxial shear
A Direct-Reading Pocket Shear Vane. Stanley Serota and Anil Jangle. 63

Variance (statistics); Weighting functions; Distribution; Focal length; Photogrammetry; Probability theory; Random error; Standard deviation; Surveying
Theoretical Weighting of Photogrammetric Equations. Charles Kendall Paul. 550

Variations; Curvature; Fluid flow; Hydraulics; Nappe; Parabolas; Spillways
Flow Over Rounded Spillways. Kamil H.M. Ali. 163

Vector analysis; Aerial surveys; Computation; Geodesy; Surveying
Three-Dimensional Forward and Inverse Computations. William E. Ball, Jr., 595

Vehicles; Automation; Electric drives; Pallets; Suspension; Transportation
Pallet Systems for Integrating Urban Transportation. David Gordon Wilson. 212

Vehicles; Clays; Limit design method; Sands; Slipping; Soil mechanics
Stress Field Under Slipping Rigid Wheel. Mohammed K. Elsamny and Ahmed A. Ghobarah. 113

Vehicles; Vehicular traffic; Ground vehicles; Passenger transportation; Rapid transit railways; Traffic; Transportation
Curbside Service Subways, Charles J. Swet, 469

Vehicular traffic; Ground vehicles; Passenger transportation; Rapid transit railways; Traffic; Transportation; Vehicles
Curbside Service Subways, Charles J. Swet, 469

Vehicular tunnels; Boring machines; Construction; Faults (geology); Rocks; Shields (tunneling); Tunneling (excavation)
Vehicular Tunnels in Rock - Direction for Development, Richard J. Robbins, 379

Vehicular tunnels; Cofferdams; Fabrication; Prefabrication; Reinforcement; Steels; Traffic control; Tunnels; Underwater construction
Submerged-Tube Tunnel in Mobile, Ray R. Slocum, 368

Velocity; Axisymmetric flow; Computers; Eddies; Engineering mechanics; Inviscid flow; Shear flow
Inviscid Shear Flow with Corner Eddies, P.A. Aswatha Narayana and M.V. Krishna Murthy, 81

Velocity; Hot film anemometers; Laboratory tests; Mixing; Power; Salt; Temperature; Turbulence
Velocity and Temperature in Buoyant Jet, Richard Dornhelm, Manuel Nouel and Robert L. Wiegel, 148

Velocity; Vessels; Concrete (lightweight); Concrete (prestressed); Design criteria; Effectiveness; Energy; Harbors
Ultimate Energy Design of Prestressed Concrete Fender Piling, Shu-t'ien Li and Venkataswamy Ramakrishnan, 81

Velocity; Water; Water flow; Canals; Construction; Financing; Fluid flow; Hydraulic radius; Linings; Pipelines; Power; Pressure tunnels; Tunnels
Aqueducts for the Least Cost Conveyance of Water, Nephi A. Christensen, 46

Velocity distribution; Walls; Earth pressure; Mobility; Retaining walls; Soil mechanics; Soil-structure interaction; Stress distribution
Effect of Wall Movement on Active and Passive Pressures, Ian K. Lee and John R. Herington, 347

Velocity distribution; Water flow; Hydrodynamics; Jet flow; Turbulence
Mean and Turbulent Velocities for Plane Jet, Walter C. Mih and John A. Hoopes, 378

Velocity distribution; Water pollution; Diffusion; Dispersion; Estuaries; Flow; Sanitary engineering; Shear flow
Velocity Profiles and Dispersion in Estuarine Flow, Burton A. Segall and Erik R. Gidlund, 435

Venezuela; Damage; Earthquake resistant structures; Earthquakes; Soil mechanics
Soil Conditions and Building Damage in 1967 Caracas Earthquake, H. Bolton Seed, Ricardo V. Whitman, Houshang Dezfulian, Ricardo Dobry and Izzat M. Idriss, 423

Venezuela; Weathering; Abutments; Dams (rockfill); Foundations; Geologic investigations; Grouting; Iraq; Philippines
Foundation and Abutment Treatment for Rockfill Dams, Richard C. Acker and Jack C. Jones, 494

Ventilation; Air conditioning; Computer programs; Electrical design; Heating
Computers: Key to Integrated Building Design, Kenneth F. Reinschmidt, 158

Vessels; Concrete (lightweight); Concrete (prestressed); Design criteria; Effectiveness; Energy; Harbors; Velocity
Ultimate Energy Design of Prestressed Concrete Fender Piling, Shu-t'ien Li and Venkataswamy Ramakrishnan, 81

Vibration; Analysis; Damping; Design data; Earthquakes; Repeated loading; Shear modulus; Soils; Stress-strain curves
Shear Modulus and Damping in Soils: Design Equations and Curves, Bobby O. Hardin and Vincent P. Drnevich, 354

Vibration; Arches; Dynamics; Engineering mechanics; Numerical analysis; Rings; Structural engineering
Free In-Plane Vibration of Circular Arches, Anestis S. Veletsos, Walter J. Austin, Carlos A. Lopes Pereia and Shyr-Jen Wung, 176

Vibration; Beam columns; Buckling; Columns (supports); Computation; Dynamic stability; Engineering mechanics; Stability; Torsion
Coupled, Nonconservative Stability-Finite Element, C. D. Mote, Jr. and Gerald Y. Matsumoto, 286

Vibration; Beam columns; Buckling; Dynamics; Engineering mechanics; Mathematical models; Stability
Beams Subjected to a Follower Force Within the Span, Jack C. Wiley and Richard E. Furkert, 569

Vibration; Buildings; Earthquakes; Engineering mechanics; Soil-structure interaction; Tall buildings
Earthquake Interaction for Multistory Building, Lawrence W. Fagel and Shih-Chi Liu, 416

Vibration; Coefficients; Fluid flow; Hydraulics; Hydrodynamics; Turbulence
Turbulence Effects On Drag of Sharp-Edged Bodies, John A. Roberson, Chi Yu Lin, Scott G. Rutherford and Marvin D. Stine, 386

Vibration; Cohesionless soils; Earthquakes; Sands; Shear strain; Soil mechanics
Settlement of Dry Sands During Earthquakes, H. Bolton Seed and Marshall L. Silver, 264

Vibration; Computation; Dynamics; Engineering; Frames; Matrices (mathematics); Mechanics; Structural engineering
Convergence in Modal Synthesis, Stephen E. Johnson and Walter C. Hurty, 527

Vibration; Computers; Dynamics; Earthquakes; Engineering mechanics; Filters; Fourier transformation; Mathematics; Systems engineering
Dynamic Analysis by Extra Fast Fourier Transform, Jethro W. Meek and Anestis S. Veletsos, 218

Vibration; Cooling towers; Engineering mechanics; Finite elements; Hyperbolic parabolic shells; Pressure; Shells (structural forms)
Vibrations of Pressure Loaded Hyperboloidal Shells, Mehran Lashkari, Victor I. Weingarten and David S. Margolias, 431

Vibration; Cylinders; Differential equations; Elastic properties; Engineering mechanics
Three-Dimensional Vibrations of Orthotropic Cylinders, Fang-Hui Chou and Jan D. Achenbach, 362

Vibration; Damping; Hydrodynamic pressure; Natural frequency; Structural engineering; Underwater structures
Virtual Mass of Submerged Structures, Anjur R. Chandrasekaran, Sarjit S. Sani and M. M. Malhotra, 308

Vibration; Damping; Laboratory tests; Shear stress; Shear tests; Soil mechanics; Torsion shear tests
Shear Modulus and Damping in Soils: Measurement and Parameter Effects, Bobby O. Hardin and Vincent P. Drnevich, 328

Vibration; Dams; Dams (concrete); Dams (gravity); Earthquakes; Finite elements; Structural engineering
Behavior of Koyna Dam - Dec. 11, 1967 Earthquake, Sarjit S. Saini, Jai Krishna and Anjur R. Chandrasekaran, 319

Vibration; Deflection; Dynamics; Engineering mechanics; Forced vibration; Grid systems; Moments
Dynamic Field Analysis of Torsionless Grids, Hota V.S. GangaRao and J. C. Smith, 330

Vibration; Design; Field tests; Gates; Hydraulics; Spillways
Spillway Gate Vibration on Arkansas River Dams, Tasso Schmidgall, 146

Vibration; Dynamic response; Dynamic structural analysis; Engineering mechanics; Environmental tests; Excitation; Linear responses; Random processes
Linear Response to Nonstationary Random Excitation, Timothy K. Hasselman, 278

Vibration; Dynamics; Elastic foundations; Engineering mechanics; Frequencies; Mathematical models
Vibrations of Elastically Connected Ring Systems, Vincent X. Kunukkasseril and K. Rami Reddy, 350

Vibration; Dynamics; Engineering mechanics; Footings; Foundations; Shielding
Shear Waves in Plane Infinite Structures, John Lysmer and Gunter Waas, 89

Vibration; Dynamics; Engineering mechanics; Probability theory; Spectral energy distribution
Properties of Spectral Moments with Applications to Random, Erik H. Vanmarcke, 211

Vibration; Dynamics; Foundations; Soil mechanics
Vertical Vibration of Embedded Footings, Milos Novak and Youpele O. Beredugo, 568

Vibration; Dynamics; Guyed towers; Guy wires; Structural engineering; Temperature; Towers
Dynamics of Guyed Towers, Richard J. McCaffrey and Alois J. Hartmann, 303

Vibration; Earthquakes; Engineering mechanics; Power spectra; Shock
An Approach to Time-Varying Spectral Analysis, Shih-Chi Liu, 126

Vibration; Embedding; Foundations; Half Space; Sliding; Values
Coupled Sliding and Rocking of Embedded Foundations, Raymond J. Krizek, Dinesh C. Gupta and Richard A. Parmelee, 582

Vibration; Engineering mechanics; Finite elements; Natural frequency; Plates; Sandwich laminates
Triangular Element for Multilayer Sandwich Plates, Tara P. Khatua and Yau Kai Cheung, 443

Vibration; Engineering mechanics; Forced vibration; Harmonics; Nonlinear systems
Transverse Beam Vibration Nonlinear Constraint, Mohammed Ali Dokainish and Rajnish Kumar, 556

Vibration; Engineering mechanics; Statistical analysis; Stochastic processes
First Passage of Nonstationary Random Processes, Ross B. Corotis, Erik H. Vanmarcke and C. Allin Cornell, 205

Vibration; Fatigue limit; Fatigue (materials); Structural engineering; Tests
Fatigue of Cover Plated Beams Under Varying Loads, Francis A. Murad and Conrad P. Heins, Jr., 225

Vibration; Noise; Noise reduction; Passenger transportation; Rapid transit railways; Transportation
Noise and Vibration Control in New Rapid Transit, Marshall L. Silver, 579

Vibration; Vibratory compaction; Mechanics; Sands; Soil mechanics
Subsidence of Sand Due to Surface Vibration, William F. Brumund and Gerald A. Leonards, 133

Vibration; Viscoelasticity; Data systems; Dynamics; Engineering mechanics; Field tests; Materials tests; Statistical analysis; Tests; Time dependence
Statistical Theory for Viscoelastic Materials, Joseph Soussou and Fred Moavenzadeh, 532

Vibration; Water flow; Bars; Jets; Trashracks
Flow-Induced Vibrations of Trashrack Bars, J. W. Fortey and Robert F. Tiry, 230

Vibration; Wind (meteorology); Aerodynamics; Drag; Loads (forces); Structural engineering; Turbulence
Drag Spectra of Simple Structures in Turbulence, John Brian Roberts, 448

Vibration; Wind (meteorology); Aerodynamics; Engineering mechanics; Fluid flow; Transmission lines; Turbulence
Galloping Oscillations of Prismatic Structures, Milos Novak, 50

Vibration; Wind pressure; Chimneys; Shear flow; Structural engineering
Lift or Across-Wind Response to Tapered Stacks, Barry J. Vickery and Arthur W. Clark, 85

Vibratory compaction; Mechanics; Sands; Soil mechanics; Vibration
Subsidence of Sand Due to Surface Vibration, William F. Brumund and Gerald A. Leonards, 133

Virginia; Estuaries; Hydraulic models; Hydraulics; Models; Salinity; Statistical analysis
Repeatability in Estuarine Hydraulic Model, Paul V. Hyer, 229

Viruses; Waste disposal; Purification; Sanitary engineering; Sewage; Sewage treatment
Inactivation of Virus in Sewage, Vincent P. Olivieri, Thomas K. Donovan and Kazuyoshi Kawata, 41

Viscoelasticity; Base courses; Cracking; Shrinkage; Soil cement; Soil mechanics; Stresses
Viscoelastic Shrinkage Stress in Soil-Cement Base, Bal K. Sanan and Kalankamary P. George, 598

Viscoelasticity; Data systems; Dynamics; Engineering mechanics; Field tests; Materials tests; Statistical analysis; Tests; Time dependence; Vibration
Statistical Theory for Viscoelastic Materials, Joseph Soussou and Fred Moavenzadeh, 532

Viscosity; Bioengineering; Hydraulics
Streamlines in Two-Dimensional Laminar Branch Flows, David Charles Blest, 127

Vortices; Air entrainment; Drains; Dust storms; Engineering mechanics; Fluid mechanics; Friction; Hydraulics; Inlets (waterways); Jets; Meteorology; Momentum; Tornadoes
Experiments on Unstable Vortices, Enzo Levi, 249

Vortices; Beds under water; Dikes; Erosion; Hydraulics; Sands; Scour
Erosion of Sand Beds Around Spur Dikes, Mohammad Akram Gill, 476

Vortices; Wave energy; Waves; Coastal engineering; Drilling; Offshore completion; Pile structures
Laboratory Study of Lift Forces on Circular Piles, Devidas D. Bidde, 60

Walls; Beams (supports); Columns (supports); Compaction; Concrete; Consolidation; Distribution; Mass concrete; Placement; Reinforcement; Slabs
Pertinent Techniques for Compacting Concrete, Shu-t'ien Li and Donald A. Stewart, 429

Walls; Buildings; Frames; Stability; Structural engineering; Torsion
Analysis of Three-Dimensional Structures, Jacobus H. Wynhoven and Peter F. Adams, 109

Walls; Buildings; Frames; Stability; Structural engineering; Torsion
Behavior of Structures Under Loads Causing Torsion, Jacobus H. Wynhoven and Peter F. Adams, 306

Walls; Buildings (apartment); Shear; Skyscrapers; Structural engineering
Model Investigations of Shear Wall Structures, Alexander Coull and A. W. Irwin, 284

Walls; Earth pressure; Mobility; Retaining walls; Soil mechanics; Soil-structure interaction; Stress distribution; Velocity distribution
Effect of Wall Movement on Active and Passive Pressures, Ian K. Lee and John R. Herington, 347

Walls; Rigid frames; Shear; Structural analysis; Structural engineering; Tall buildings
Approximate Inelastic Analysis of Shear Wall-Frame Structures, James G. MacGregor, Sauren N. Guha Majumdar, Rajendra P. Nikhed and Peter F. Adams, 551

Walls; Water waves; Coastal engineering; Hydraulic models; Tsunamis
Waves Generated by Horizontal Motion of a Wall, Madan M. Das and Robert L. Wiegel, 137

Walls; Wind (meteorology); Bearing capacity; Bending stress; Bricks; Buildings; Computer programs; Computers; Masonry; Shear; Structural engineering
Computer Design of Engineered Brick Masonry, Alan H. Yorkdale and Robert P. Anderson, 271

Warpage; Beams (supports); Curved beams; Engineering mechanics; Stresses; Torsion; Tubes
Torsion and Flexure of Curved, Thin-Walled Beams or Tubes, Ray N. Nitzsche and Robert E. Miller, 382

Washington; Bridges (arch); Bridges (concrete); Concrete (prestressed)
Longest Concrete-Arch Bridge in North America, Ernest C. Harris and John A. Talbott, 329

Washington; Water pollution control; Eutrophication; Sewage disposal
Swimming Again in Lake Washington, Walter E. Jessup, 139

Washington, D.C.; Contracts; Noise reduction; Rapid transit railways; Social needs; Subways
Washington D.C.'s Metro--A Progress Report, Robert S. O'Neil, 194

Waste assimilative capacity; Water pollution; California; Estuaries; Sanitary engineering; Tidal waters
Tidal Exchange at Golden Gate, Denny S. Parker, Dan P. Norris and Austin W. Nelson, 276

Waste disposal; Cooling systems; Cooling towers; Nuclear electric power generation; Powerplants; Thermoelectric power generation; Utilities
Power Plant Cooling Systems, George Kinsman, 364

Waste disposal; Dissolved solids; Groundwater flow; Groundwater quality; Leaching
Scientific and Administrative Criteria for Shallow Waste Disposal, George M. Hughes and Keros Cartwright, 153

Waste disposal; Dynamic characteristics; Hauling; Management; Optimization; Sanitary engineering; Solid wastes
Facility Selection and Haul Optimization Model, Houshang Esmaili, 528

Waste disposal; Economic feasibility; Environmental engineering; Resources; Sanitary landfill; Solid wastes
How Urgent the Need to Recycle Solid Waste, Robert D. Bargman, 434

Waste disposal; Environmental engineering; Powerplants; Sanitary engineering; Solid wastes
St. Louis Powerplant Burns City Refuse, F. E. Wisely, G. Wayne Sutterfield and David L. Klumb, 518

Waste disposal; Landfills; Sanitary engineering; Sanitary landfill; Solid wastes
Demonstration Sanitary Landfill in Kansas City, Kans., Gerald A. Neely and Nicholas S. Artz, 468

Waste disposal; Mathematics; Refuse disposal; Sanitary engineering; Solid wastes; Systems engineering; Urban planning
Selecting Solid Waste Disposal Facilities, Billy P. Helms and Robert M. Clark, 4

Waste disposal; Purification; Sanitary engineering; Sewage; Sewage treatment; Viruses
Inactivation of Virus in Sewage, Vincent P. Olivieri, Thomas K. Donovan and Kazuyoshi Kawata, 41

Waste disposal; Waste treatment; Water quality; Research; Sanitary engineering; Sewage treatment
Research Needs for Advanced Waste Treatment, Francis M. Middleton and Robert L. Stenburg, 367

Waste disposal; Wind (meteorology); Coastal engineering; Ocean currents; Outfall sewers; Sewers
Coastal Current of Pacific Northwest, Bard Glenne and Robert H. Bourke, 574

Waste heat; Cooling systems; Cooling water; Heat budget; Stratification; Thermal pollution
Impact of Cooling Water on Lake Temperatures, Heinz Stefan, Chung-Sang Chu and Ho Wing, 392

Waste stabilization ponds; Algae; Bacteriology; Enteric bacteria; Sanitary engineering
Bacterial Dieoff in Ponds, Ernst M. Davis and Earnest F. Gloyna, 193

Waste stabilization ponds; Waste treatment; Algae; Chlorination; Coliform bacteria; Disinfection; Kinetics; Pollution control; Sanitary engineering
Kinetics of Chlorine Disinfection in an Ecosystem, Leonard W. Hom, 231

Waste treatment; Activated carbon; Adsorption; Irreversible processes; Kinetics; Sanitary engineering; Sorption
Sorption Kinetics in Finite-Bath Systems, Francis A. DiGiano and Walter J. Weber, Jr., 546

Waste treatment; Algae; Chlorination; Coliform bacteria; Disinfection; Kinetics; Pollution control; Sanitary engineering; Waste stabilization ponds
Kinetics of Chlorine Disinfection in an Ecosystem, Leonard W. Hom, 231

Waste treatment; Bacteria; Chlorination; Coliform bacteria; Sanitary engineering; Sewage treatment
Problems in Obtaining Adequate Sewage Disinfection, Harvey F. Collins, Robert E. Selleck and George C. White, 66

Waste treatment; Missouri; Outfall sewers; Pollution abatement; Sewage treatment
St. Louis Cleans up the Mississippi259

Waste treatment; Water pollution; Water reclamation; Refineries; Sanitary engineering
Treatment of Refinery Waste by Physicochemical Processes, Ju-Chang Huang and Michael G. Hardie, 14

Waste treatment; Water quality; Research; Sanitary engineering; Sewage treatment; Waste disposal
Research Needs for Advanced Waste Treatment, Francis M. Middleton and Robert L. Stenburg, 367

Waste water; Dispersion; Engineering mechanics; Injection wells; Mathematical studies; Recharge wells
Dispersion from Recharge Well, Charles W. Lenau, 197

Waste water; Water resources; Water treatment; Air pollution; Industrial wastes; Municipal water; Research; Sanitary engineering; Solid wastes
Research Needs in Sanitary Engineering, Sanitary Engineering Research Committee of the Sanitary Engineering Division, Jack M. Betz, Chmn., 321

Wastewater disposal; Water quality; Water reuse; Water treatment; California; Irrigation
Wastewater Reclamation in Southern California, Jack J. Coe and Finley B. Laverty, 450

Wastewater treatment; Activated sludge; Anaerobic digestion; Anaerobic processes; Computer applications; Mathematical models; Optimum design; Sanitary engineering
Optimal Design of Wastewater Treatment Systems by Enumeration, Gene F. Parkin and Richard R. Dague, 513

Wastewater treatment; Wastewater use; Water treatment; California; Desalting; Irrigation; Sea water intrusion
Orange County Water District's Water Factory 21, James R. Cofer, 549

Waste water treatment; Water pollution control; Design standards; Manuals; Professional societies
Design Standards for Wastewater Treatment Systems, Robert A. Canham and Louis L. Guy, Jr., 70

Wastewater treatment; Water quality; Adsorption; Chemical removal (sewage treatment); Filtration; Sewage treatment
No Innovation in Wastewater Treatment, Russell L. Culp, 327

Wastewater use; Water treatment; California; Desalting; Irrigation; Sea water intrusion; Wastewater treatment
Orange County Water District's Water Factory 21, James R. Cofer, 549

Water; Drainage; Irrigation; Subsurface drains; Subsurface irrigation; Tiles
Irrigation Through Subsurface Drains, R. Wayne Skaggs, George J. Kriz and Reynaldo Bernal, 460

Water; Hydrography; Hydrology; Mapping; Maps
Water Features on Topographic Maps, Morris M. Thompson, 175

Water; Water flow; Canals; Construction; Financing; Fluid flow; Hydraulic radius; Linings; Pipelines; Power; Pressure tunnels; Tunnels; Velocity
Aqueducts for the Least Cost Conveyance of Water, Nephi A. Christensen, 46

Water; Water flow; Infiltration; Infiltration rate; Irrigation; Soil properties; Surface irrigation
Shape Factors in Irrigation Water Advance Equation, Pratap Singh and H. S. Chauhan, 502

Water; Water purification; Bromates; Bromine; Purification; Sanitary engineering
Bromine and Bromamine Disinfection Chemistry, J. Donald Johnson and Ragnar Overby, 49

Water; Water supply; Desalting; Electric power generation; Nuclear electric power generation; Regional planning
Dual-Purpose Desalting in Pacific Southwest, Sam Shiozawa, 140

Water; Water supply; Economic analysis; Economics; Market value; Sanitary engineering
Economics of Water Quality and Wastewater Control, Fred E. Case, 353

Water; Water tunnels; Aqueducts; Earthquakes; Manifolds; Pumps; Valves
Edmonston Pumping Plant: Nation's Mightiest, Robert B. Jansen, 465

Water application rate; Water management (applied); Irrigation; Irrigation efficiency; Sprinkler irrigation; Surface irrigation; Trickle irrigation
Attainable Irrigation Efficiencies, Lyman S. Willardson, 331

Water conduits; Water distribution; Water resources development; California; Earthquake engineering; Recreational facilities; Subsidence
California Water Project, William R. Gianelli and Robert B. Jansen, 307

Water conservation; Air cooling; Cooling systems; Cooling towers; Electric power generation; Power; Thermal pollution
Dry-Type Cooling Towers, Edward A. Cecil, Paul R. Cunningham, Clarence J. Steiert and Roger O. Young, 92

Water consumption; Agricultural engineering; Irrigation; Irrigation operation " maintenance; Management; Soil moisture
Irrigation Management - A Tool for Agribusiness, Neil W. Schild and Harvey R. Nelson, Jr., 486

Water consumption; Climatology; Consumptive use (water); Evaporation; Evapotranspiration; Irrigation; Solar radiation
Coastal California Evapotranspiration Frequencies, Paul R. Nixon, G. Paul Lawless and Gary V. Richardson, 279

Water consumption; Evaporation; Evapotranspiration; Frequency distribution; Idaho; Irrigation
Peak Water Requirements of Crops in Southern Idaho, James L. Wright and Marvin E. Jensen, 236

Water consumption; Evaporation; Evapotranspiration; Irrigation; Phreatophytes; Transpiration
Simulation of Salt Cedar Evapotranspiration, William C. Hughes, 570

Water demand; Ground water; Groundwater management; Ground water recharge; Hydraulics; Hydrology; Legislation
Ground Water Management, by the Committee on Ground Water, Manual and Report on Engineering Practice No. 40, Jack J. Coe, Chmn., 512

Water deprivation; Agriculture; Droughts; Economic development; Irrigation
Water Deficits -Irrigation Design and Programming, Robert M. Hagan and J. Ian Stewart, 318

Water distribution; Computers; Hydraulic models; Hydraulics; Pipe flow
Graph-Theoretic Models for Pipe Network Analysis, H. K. Kesavan and M. Chandrashekar, 167

Water distribution; Water hammer; Crushing; Pipe design; Pipe flow; Polyvinyl chloride
Design of PVC Water-Distribution Pipe, Robert T. Hucks, Jr., 298

Water distribution; Water resources development; California; Earthquake engineering; Recreational facilities; Subsidence; Water conduits
California Water Project, William R. Gianelli and Robert B. Jansen, 307

Water distribution; Water supply; Algorithms; Computers; Hydraulics; Pipe flow
Efficient Algorithm For Distribution Networks, Pierre F. Lemieux, 545

Water distribution (applied); Algorithms; Computer programs; Head losses; Hydraulics; Steady flow
Computer Analysis of Water Distribution Systems: Part I - Formulation of Equations, Chan F. Lam and M. L. Wolla, 173

Water distribution (applied); Computer programs; Hydraulics; Mathematical models; Newton-Raphson method
Computer Analysis of Water Distribution Systems: Part II--Numerical Solution, Chan F. Lam and M. L. Wolla, 207

Water distribution (applied); Flow distribution; Hydraulics; Irrigation; Irrigation canals; Surface irrigation
Distribution Channels with Multiple Outlets, William E. Hart and John Borelli, 356

Water distribution (applied); Water law; Water rights; Drainage; Ground water; Irrigation; Safety
General Statement of Principles to be Included in State Water Rights Laws, Committee on Water Laws of the Irrigation and Drainage Division, Floyd A. Bishop, Chmn., 396

Water distribution (applied); Water requirements; Irrigation practices; Soil moisture
Water Requirements of Rostered Irrigation Schemes, Patrick D. Fitzgerald and Gregory C. Arnold, 131

Water filters; Water treatment; Filters; Filtration; Fluidized bed processing; Sanitary engineering; Sewage treatment
Backwashing of Granular Water Filters, Thomas R. Camp, S. David Graber and Gerard T. Conklin, 143

Water flow; Bars; Jets; Trashracks; Vibration
Flow-Induced Vibrations of Trashrack Bars, J. W. Fortey and Robert F. Tiry, 230

Water flow; Boundary shear; Flow rate; Hydraulic jump; Hydraulics; Inflow; Turbulence
Effects of Inflow Condition on Hydraulic Jump, Hans J. Leutheusser and Viswanathan C. Kartha, 401

Water flow; Canals; Construction; Financing; Fluid flow; Hydraulic radius; Linings; Pipelines; Power; Pressure tunnels; Tunnels; Velocity; Water
Aqueducts for the Least Cost Conveyance of Water, Nephi A. Christensen, 46

Water flow; Channel stabilization; Curves; Hydraulics; Rivers
Flow Processes in Open Channel Bends, Robert P. Apmann, 263

Water flow; Channels (waterways); Hydraulic models; Hydraulics; Supercritical flow; Supersonic flow
Supercritical Flow in Rectangular Expansions, John B. Herbich and Peter Walsh, 497

Water flow; Coefficients; Engineering mechanics; Gates; Sluice gates
Solution of Flow Under Sluice Gate, Yong K. Chung, 152

Water flow; Drainage; Erosion; Friction; Impact; Overland flow; Rainfall; Turbulence
Mechanics of Sheet Flow Under Simulated Rainfall, Yong Nam Yoon and Harry G. Wenzel, Jr., 13

Water flow; Failure; Joints (connections); Pipelines; Pipeline transportation; Tension; Ties
Considerations of Pipeline Tension Tie Problems, Lloyd C. Fowler, Richard P. Lundahl and Robert W. Purdie, 573

Water flow; Flow distribution; Hydraulic control; Open channel flow; Sanitary engineering
Hydraulic Control for Flow Distribution, Kuan M. Yao, 271

Water flow; Flow resistance; Friction; Head losses; Hydraulics; Nonuniform flow; Open channel flow; Overland flow; Rainfall
Resistance Coefficients for Steady Spatially Varied Flow, Ben Chie Yen, Harry G. Wenzel, Jr. and Yong Nam Yoon, 415

Water flow; Flow resistance; Overland flow; Runoff
Obtaining Overland Flow Resistance by Optimization, David L. Schreiber and Donald L. Bender, 196

Water flow; Hydrodynamics; Jet flow; Turbulence; Velocity distribution
Mean and Turbulent Velocities for Plane Jet, Walter C. Mih and John A. Hoopes, 378

Water flow; Infiltration; Infiltration rate; Irrigation; Soil properties; Surface irrigation; Water
Shape Factors in Irrigation Water Advance Equation, Pratap Singh and H. S. Chauhan, 502

Water hammer; Cavitation; Hydraulics; Pipelines
Cavitation in Horizontal Pipelines Due to Water Hammer, J. P. Th. Kalkwijk and C. Kranenburg, 32

Water hammer; Computer programming; Computers; Conduits; Discharge; Hydraulics; Models; Pipe flow; Powerplants; Pumps
Computer Simulation of Waterhammer Effects, George Belonogoff, 323

Water hammer; Cooling systems; Cooling water; Powerplants; Pump intakes; Pumps; Thermoelectric power generation
Circulating Water Systems Without Valves, Rudolf J. Wahanik, 571

Water hammer; Crushing; Pipe design; Pipe flow; Polyvinyl chloride; Water distribution
Design of PVC Water-Distribution Pipe, Robert T. Hucks, Jr., 298

Water hammer; Water pressure; Discharge lines; Hydraulics; Pipe flow; Pipelines; Pumps
Start-up Pressures in Short Pump Discharge Lines, Irving Joseph and Frank A. Hamill, 359

Water law; Water resources; Forecasting; Legislation; Sanitary engineering
Can Engineering Forecasters Effect Water Law?, George W. Reid, E. Edd Pritchett and Susan Pritchett, 22

Water law; Water rights; Drainage; Ground water; Irrigation; Safety; Water distribution (applied)
General Statement of Principles to be Included in State Water Rights Laws, Committee on Water Laws of the Irrigation and Drainage Division, Floyd A. Bishop, Chmn., 396

Water loss; Darcys law; Irrigation; Root systems; Transpiration
Simulation of Post-Irrigation Moisture Movement, Fred J. Molz, 580

Water management (applied); Drainage; Irrigation; Maintenance; Operations; Organizations; Public opinion
Operation and Maintenance of Irrigation and Drainage Systems: Section II--Organization for Operation and Maintenance, Committee on Operation and Maintenance of Irrigation and Drainage Systems of the Irrigation and Drainage Division, Richard J. Willson, Chmn., 76

Water management (applied); Flood control; Hydraulics; Transportation; Urban planning
Effect of Transportation Planning on Flood Plain Management, Thomas M. Lee, 178

Water management (applied); Irrigation; Irrigation efficiency; Sprinkler irrigation; Surface irrigation; Trickle irrigation; Water application rate
Attainable Irrigation Efficiencies, Lyman S. Willardson, 331

Water management (applied); Water pollution; Environmental engineering; Maryland; Pollution control; Sanitary engineering; State governments
Statewide Management-What Does the Future Hold?, Frank A. Butrico and James B. Coulter, 244

Water management (applied); Waterways; Federal-state cooperation; Land use; Legislation
Management Problems in Flood Plain Areas, Thomas M. Lee, 408

Water pipes; Aqueducts; Inspection; Maintenance
The Undersea Aqueduct -- A New Concept in Transportation, Ellis L. Armstrong, 195

Water pollution; Aeration; Bacteria; Beaches; Chlorination; Sanitary engineering
Pneumatic Barrier and Beach Pollution, Martin S. Hertzendorf, Joseph V. Fiore, Herbert E. Klei and I. J. Kopelman, 304

Water pollution; Air pollution; Esthetics; Housing; Land use; Noise reduction; Parks; Urban planning
Esthetic Considerations in Urban General Planning, Wm. H. Claire, 404

Water pollution; Baffles; Hydraulics; Sanitary engineering; Siphons; Stilling basins; Storm water
Stilling Pond Storm Overflow Studies, Y. R. Reddy and John Pickford, 428

Water pollution; Bioassay; Estuaries; Fishkill; Nuclear electric power generation; Powerplants; Sanitary engineering; Temperature; Thermal shock
Parameters Necessary for Analyzing Thermal Bioassays, Robert D. Smith, 569

Water pollution; Biochemical oxygen demand; Estuaries; Mathematical models; Oxygen demand; Sanitary engineering; Stochastic processes
Stochastic Model of BOD and OD in Segmented Estuary, William R. Schofield and Richard G. Krutchkoff, 488

Water pollution; Booms (equipment); Containment; Oily water; Pollution; Rivers; Sea water
Dynamics of Contained Oil Slicks, David L. Wilkinson, 324

Water pollution; California; Estuaries; Sanitary engineering; Tidal waters; Waste assimilative capacity
Tidal Exchange at Golden Gate, Denny S. Parker, Dan P. Norris and Austin W. Nelson, 276

Water pollution; Density; Estuaries; Hydraulics; Shear stress; Two phase flow
Gradually Varying Two-Layer Stratified Flow, Flemming Bo Pedersen, 155

Water pollution; Diffusion; Dispersion; Estuaries; Flow; Sanitary engineering; Shear flow; Velocity distribution
Velocity Profiles and Dispersion in Estuarine Flow, Burton A. Segall and Erik R. Gidlund, 435

Water pollution; Environmental engineering; Maryland; Pollution control; Sanitary engineering; State governments; Water management (applied)
Statewide Management-What Does the Future Hold?, Frank A. Butrico and James B. Coulter, 244

Water pollution; Water pollution control; Coastal engineering; Industrial wastes; Tidal currents
Oil Booms in Tidal Currents, Ralph H. Cross and David P. Hoult, 192

Water pollution; Water quality; Abstracts; Indexes (documentation); Information retrieval; Reports; Sanitary engineering; Thermal pollution
Information Sources on Water Quality, Including Thermal Pollution, the Committee on Thermal Pollution of the Sanitary Engineering Division, Fred A. Limpert, Chmn., 407

Water pollution; Water quality; Waterways; Density; Harbors; Locks (waterways); Salinity; Salt water intrusion; Stratification
Mardyck Lock Acts as Salt-Water Barrier, Ch. Blanchet and B. Quetin, 600

Water pollution; Water reclamation; Refineries; Sanitary engineering; Waste treatment
Treatment of Refinery Waste by Physicochemical Processes, Ju-Chang Huang and Michael G. Hardie, 14

Water pollution; Water resources; Aerial photography; Flooding; Lakes; Remote sensing; Streams; Surveying
Aerial Photography for Water Resource Studies, Ralph W. Kiefer and James P. Scherz, 149

Water pollution; Water resources; Analogs; Aquifers; Ground water; Hydraulics; Hydrology; Salt water intrusion
Hele-Shaw Model of Long Island Aquifer System, Michael A. Collins, Lynn W. Gelhar and John L. Wilson, III, 489

Water pollution; Water treatment plants; Biochemical oxygen demand; Government; Nitrogen oxides; Sanitary engineering
Implications of Nitrogenous BOD in Treatment Plant Design, Russell C. Mt. Pleasant and Warren Schlickenrieder, 82

Water pollution control; Coastal engineering; Industrial wastes; Tidal currents; Water pollution
Oil Booms in Tidal Currents, Ralph H. Cross and David P. Hoult, 192

Water pollution control; Design standards; Manuals; Professional societies; Waste water treatment
Design Standards for Wastewater Treatment Systems, Robert A. Canham and Louis L. Guy, Jr., 70

Water pollution control; Environmental engineering; Environments; Federal agencies; Organizations; Pollution control; Professional activities
Federal Reorganization to Protect the Environment, John F. Wall and Leonard B. Dworsky, 289

Water pollution control; Eutrophication; Sewage disposal; Washington
Swimming Again in Lake Washington, Walter E. Jessup, 139

Water pollution control; Water pollution effects; California; Estuaries; Recreational facilities
Cleanup of San Diego Bay, Roy E. Dodson, 142

Water pollution control; Water quality control; Water treatment; Federal government; Storm runoff
Corps of Engineers Plans Regional Water Quality Program, William Whipple, Jr., 118

Water pollution effects; California; Estuaries; Recreational facilities; Water pollution control
Cleanup of San Diego Bay, Roy E. Dodson, 142

Water pressure; Discharge lines; Hydraulics; Pipe flow; Pipelines; Pumps; Water hammer
Start-up Pressures in Short Pump Discharge Lines, Irving Joseph and Frank A. Hamill, 359

Water pressure; Flow control; Fluid flow; Gates; Hydraulics; Pressure head
Reattaching Flow Downstream of Leaf Gate, Rangaswami Narayanan and Alan J. Reynolds, 301

Waterproofing; Corrosion; Corrosion control; Pipe cover; Pipelines; Sealants
Oil Based Fluid Corrosion-Proofs Gas Line, Buford Mizell, 280

Water purification; Bromates; Bromine; Purification; Sanitary engineering; Water
Bromine and Bromamine Disinfection Chemistry, J. Donald Johnson and Ragnar Overby, 49

Water purification; Water quality; Water resources; Droughts; Environmental engineering; Estuaries; Hydrology; Irrigation; Meteorology; New Jersey
Impact of Drought on New Jersey's Water Resources, Peter W. Anderson, Samuel D. Faust and John E. McCall, 472

Water quality; Abstracts; Indexes (documentation); Information retrieval; Reports; Sanitary engineering; Thermal pollution; Water pollution
Information Sources on Water Quality, Including Thermal Pollution, the Committee on Thermal Pollution of the Sanitary Engineering Division, Fred A. Limpert, Chmn., 407

Water quality; Adsorption; Chemical removal (sewage treatment); Filtration; Sewage treatment; Wastewater treatment
No Innovation in Wastewater Treatment, Russell L. Culp, 327

Water quality; Algorithms; Coefficients; Evaporation; Mathematical models; Predictions; Statistical tests; Temperature
Stream Temperature Prediction Under Reduced Flow, William L. Morse, 332

Water quality; Biochemical oxygen demand; Concrete (reinforced); Hydrology; Pollution control; Sanitary engineering; Sewage
In-Line Structure Stores and Treats Combined Overflows, Theodore G. Biehl and David M. Waring, 398

Water quality; Biota; Dissolved oxygen; Environmental engineering; Hydroelectric power generation; Mathematical models; Thermal stratification
Predicting Quality Effects of Pumped Storage, Carl W. Chen and Gerald T. Orlob, 255

Water quality; Coastal engineering; Dredging; Estuaries; Salt marshes; Sediments
Environmental Aspects of Dredging in Estuaries, Herbert L. Windom, 529

Water quality; Computer models; Mathematical models; Sanitary engineering
Water Quality Simulation Model, George R. Grantham, John C. Schaake, Jr. and Edwin E. Pyatt, 57

Water quality; Cooling water; Diffusion; Hydraulics; Stratified flow
Dilution of Buoyant Two-Dimensional Surface Discharges, Heinz Stefan, 124

Water quality; Ecology; Environmental engineering; Institutional constraints; Planning; Sanitary engineering
Clean Water -- An Environmental Challenge, Percy H. McGauhey, 290

Water quality; Environmental engineering; Eutrophication; Florida; Lakes; Multivariate analysis; Sanitary engineering
Eutrophication Analysis: A Multivariate Approach, Earl E. Shannon and Patrick L. Brezonik, 237

Water quality; Hydraulics; Reservoirs; Temperature; Thermal stratification
Temperature Prediction in Stratified Reservoirs, Wayne C. Huber, Donald R.F. Harleman and Patrick J. Ryan, 234

Water quality; Land use; Management; Pollution control; Regional planning; Sanitary engineering; Sewerage
Basin Management Techniques for Sewerage Agencies, Charles V. Gibbs and Allan L. Poole, 375

Water quality; Research; Sanitary engineering; Sewage treatment; Waste disposal; Waste treatment
Research Needs for Advanced Waste Treatment, Francis M. Middleton and Robert L. Stenburg, 367

Water quality; Water resources; Droughts; Environmental engineering; Estuaries; Hydrology; Irrigation; Meteorology; New Jersey; Water purification
Impact of Drought on New Jersey's Water Resources, Peter W. Anderson, Samuel D. Faust and John E. McCall, 472

Water quality; Water reuse; Water treatment; California; Irrigation; Wastewater disposal
Wastewater Reclamation in Southern California, Jack J. Coe and Finley B. Laverty, 450

Water quality; Watersheds; Erosion; Hydraulics; Hydrology; Mathematical models; Reservoirs; Sedimentation
Sediment Yield Computed With Universal Equation, Jimmy R. Williams and Harold D. Berndt, 578

Water quality; Water treatment; Bacteria; Calcium carbonates; Disinfection; Environmental engineering
Effect of Calcium Bicarbonate on Disinfection by Halogens, Lawrence N. Kuzminski, Tsuan H. Feng and Chih C. Liu, 222

Water quality; Waterways; Density; Harbors; Locks (waterways); Salinity; Salt water intrusion; Stratification; Water pollution
Mardyck Lock Acts as Salt-Water Barrier, Ch. Blanchet and B. Quetin, 600

Water quality control; Environmental engineering; Government; Institutions; Professional activities; Regional planning
Water Pollution Control Institutions, William Whipple, Jr., 215

Water quality control; Water treatment; Federal government; Storm runoff; Water pollution control
Corps of Engineers Plans Regional Water Quality Program, William Whipple, Jr., 118

Water reclamation; Refineries; Sanitary engineering; Waste treatment; Water pollution
Treatment of Refinery Waste by Physicochemical Processes, Ju-Chang Huang and Michael G. Hardie, 14

Water requirements; Irrigation practices; Soil moisture; Water distribution (applied)
Water Requirements of Rostered Irrigation Schemes, Patrick D. Fitzgerald and Gregory C. Arnold, 131

Water resources; Aerial photography; Flooding; Lakes; Remote sensing; Streams; Surveying; Water pollution
Aerial Photography for Water Resource Studies, Ralph W. Kiefer and James P. Scherz, 149

Water resources; Agriculture; Hydraulics; Rivers; Salinity; Salt removal
Present and Future Salinity of Colorado River, Myron B. Holburt and Vernon E. Valentine, 192

Water resources; Analogs; Aquifers; Ground water; Hydraulics; Hydrology; Salt water intrusion; Water pollution
Hele-Shaw Model of Long Island Aquifer System, Michael A. Collins, Lynn W. Gelhar and John L. Wilson, III, 489

Water resources; Assessments; Drainage; Droughts; Environments; Social needs
Assessing Social Consequences of Water Deficiencies, William K. Johnson, 60

Water resources; California; Computers; Forecasting; Models; Systems engineering
Optimum Operations Model for Shasta-Trinity System, Dan M. Fults and Lawrence F. Hancock, 450

Water resources; Community relations; Decision making; Decisions; Planning; Publicity; Public opinion
Fishbowl Planning Immerses Pacific Northwest Citizens in Corps Projects, Howard L. Sargent, 389

Water resources; Cost effectiveness; Economic analysis; Environmental engineering; Ground water; Impact; Sanitary engineering; Sewage disposal
Cost-Effectiveness Analysis of Wastewater Reuses, Stephen C. Ko and Lucien Duckstein, 552

Water resources; Droughts; Environmental engineering; Estuaries; Hydrology; Irrigation; Meteorology; New Jersey; Water purification; Water quality
Impact of Drought on New Jersey's Water Resources, Peter W. Anderson, Samuel D. Faust and John E. McCall, 472

Water resources; Flood control; Hydraulics; Hydroelectric power; Irrigation; Low-flow augmentation; Multiple purpose projects; Optimization; Recreation
Multireservoir Optimization Model, James S. Windsor and Ven Te Chow, 532

Water resources; Forecasting; Legislation; Sanitary engineering; Water law
Can Engineering Forecasters Effect Water Law?, George W. Reid, E. Edd Pritchett and Susan Pritchett, 22

Water resources; Hydraulics; Planning; Regional planning; Systems engineering
Use of Systems Analysis in Water Resources Planning, William K. Johnson, 446

Water resources; Land use; Professional activities; Regional planning; Social needs
Principals and Standards for Water and Land Resources Planning, W. Don Maughn, 452

Water resources; Water reuse; Water use; Civil engineering; Forecasting; Professional activities
Water Resources in the Future: Directions and Prospects, Joseph L. Fisher, 407

Water resources; Water treatment; Air pollution; Industrial wastes; Municipal water; Research; Sanitary engineering; Solid wastes; Waste water
Research Needs in Sanitary Engineering, Sanitary Engineering Research Committee of the Sanitary Engineering Division, Jack M. Betz, Chmn., 321

Water resources; Water users; Connecticut; Costs; Drainage; Precipitation (atmospheric)
Potential of Precipitation Modification, Eugene J. Aubert, Gurbachan P. Malhotra and D. B. Spiegler, 212

Water resources; Weather modification; Cloud seeding; Irrigation; Meteorology; Rainfall; Rivers
Cloud Seeding Interpreted Through Atmospheric Water Balance, James L. Rasmussen, 562

Water resources; Weather modification; Hydraulics; Rainfall; Silver iodide; South Dakota
Weather Modification Program for South Dakota, Richard A. Schleusener and Edwin I. Boyd, 466

Water resources; Zoning; Land use; Recreational facilities; Regional planning; Regulations; Urban planning
Wisconsin's Shoreland Management Program, Thomas M. Lee, 605

Water resources development; California; Earthquake engineering; Recreational facilities; Subsidence; Water conduits; Water distribution
California Water Project, William R. Gianelli and Robert B. Jansen, 307

Water resources development; Water supply; Draft-storage curves; Irrigation; Low-flow augmentation; Probability theory; Reservoir storage; Safe yield
Potential United States Water-Supply Development, Clayton H. Hardison, 528

Water reuse; Water supply; Population growth; Social needs; Urban development; Urban transportation
The Urban Growth Syndrome, William H. Wisely, 358

Water reuse; Water treatment; California; Irrigation; Wastewater disposal; Water quality
Wastewater Reclamation in Southern California, Jack J. Coe and Finley B. Laverty, 450

Water reuse; Water use; Civil engineering; Forecasting; Professional activities; Water resources
Water Resources in the Future: Directions and Prospects, Joseph L. Fisher, 407

Water rights; Drainage; Ground water; Irrigation; Safety; Water distribution (applied); Water law
General Statement of Principles to be Included in State Water Rights Laws, Committee on Water Laws of the Irrigation and Drainage Division, Floyd A. Bishop, Chmn., 396

Watersheds; Density; Forest land; Idaho; Organic matter; Reservoirs; Sediment deposits
Volume Weight of Reservoir Sediment in Forested Areas, Walter F. Megahan, 435

Watersheds; Discharge; Drainage; Evaporation; Hydraulics; Precipitation (meteorology); Runoff
A Model to Predict Mean Annual Watershed Discharge, Steven I. Majtenyi, 373

Watersheds; Erosion; Hydraulics; Hydrology; Mathematical models; Reservoirs; Sedimentation; Water quality
Sediment Yield Computed With Universal Equation, Jimmy R. Williams and Harold D. Berndt, 578

Watersheds; Hydraulics; Hydrographs; Hydrology; Mathematical models; Runoff; Urban areas
University of Cincinnati Urban Runoff Model, Constantine Papadakis and Herbert C. Preul, 523

Water supply; Algorithms; Computers; Hydraulics; Pipe flow; Water distribution
Efficient Algorithm For Distribution Networks, Pierre F. Lemieux, 545

Water supply; Construction costs; Costs; Inflation (economics); Mathematical models; Models; Sewage disposal
Mathematical Model for Rate Studies, Kuan M. Yao, 442

Water supply; Construction costs; Poland; Sanitary engineering; Sewage
Construction Costs of Water Supply and Sewage Networks in Poland 1961-1970, Miroslaw Gorczyca, 580

Water supply; Desalting; Electric power generation; Nuclear electric power generation; Regional planning; Water
Dual-Purpose Desalting in Pacific Southwest, Sam Shiozawa, 140

Water supply; Draft-storage curves; Irrigation; Low-flow augmentation; Probability theory; Reservoir storage; Safe yield; Water resources development
Potential United States Water-Supply Development, Clayton H. Hardison, 528

Water supply; Drainage; Droughts; Irrigation; Reservoir storage; Reservoir yield; Stream flow
Drought Severity and Water Supply Dependability, Leo R. Beard and Harold E. Kubik, 539

Water supply; Economic analysis; Economics; Market value; Sanitary engineering; Water
Economics of Water Quality and Wastewater Control, Fred E. Case, 353

Water supply; Environmental engineering; Flood control; Hydroelectric power generation; Multiple purpose reservoirs; Tennessee Valley Authority
Impact of Multiple-Purpose Reservoir System on Regional Environment, Edward H. Lesesne, 370

Water supply; Population growth; Social needs; Urban development; Urban transportation; Water reuse
The Urban Growth Syndrome, William H. Wisely, 358

Water surface; Optics; Photogrammetry; Photography; Surveying
Photogrammetry and Hydraulic Surfaces, Wolfgang Faig, 525

Water table; Drainage; Hele-Shaw model; Tile drains
Moving Water Tables in Tile-Drained Soils, Nazar M. Awan and Terence O'Donnell, 411

Water treatment; Activated sludge; Chlorine; Coagulation; Epidemiology; Filtration; Protamines; Sanitary engineering
Integrated Approach to Problem of Viruses in Water, Gerald Berg, 122

Water treatment; Air pollution; Industrial wastes; Municipal water; Research; Sanitary engineering; Solid wastes; Waste water; Water resources
Research Needs in Sanitary Engineering, Sanitary Engineering Research Committee of the Sanitary Engineering Division, Jack M. Betz, Chmn., 321

Water treatment; Amoeba; Chlorine; Cysts; Disinfection; Dysentery; Iodine; Meningitis; Microorganism control (water)
Amoebic Cysticidal Properties of Halogens in Water, Richard Stringer and Cornelius W. Kruse, 98

Water treatment; Aquatic plants; Biodegradation; Environmental engineering; Herbicides; Sanitary engineering
Herbicidal Control of Aquatic Plants, Edward O. Ganstad, 341

Water treatment; Backwashing; Desorption; Filters; Filtration; Sanitary engineering; Suspended solids
Desorption and Retentivity of Filtering Materials, Andre Leclerc and Truong Tri Vu, 498

Water treatment; Bacteria; Calcium carbonates; Disinfection; Environmental engineering; Water quality
Effect of Calcium Bicarbonate on Disinfection by Halogens, Lawrence N. Kuzminski, Tsuan H. Feng and Chih C. Liu, 222

Water treatment; California; Desalting; Irrigation; Sea water intrusion; Wastewater treatment; Wastewater use
Orange County Water District's Water Factory 21, James R. Cofer, 549

Water treatment; California; Irrigation; Wastewater disposal; Water quality; Water reuse
Wastewater Reclamation in Southern California, Jack J. Coe and Finley B. Laverty, 450

Water treatment; Federal government; Storm runoff; Water pollution control; Water quality control
Corps of Engineers Plans Regional Water Quality Program, William Whipple, Jr., 118

Water treatment; Filters; Filtration; Fluidized bed processing; Sanitary engineering; Sewage treatment; Water filters
Backwashing of Granular Water Filters, Thomas R. Camp, S. David Graber and Gerard T. Conklin, 143

Water treatment; Water treatment plants; Potable water; Sewage; Sewage effluents; Sewage filtration
Windhoek Reclaiming Sewage for Drinking Water, A. J. Clayton and P. J. Pybus, 430

Water treatment plants; Biochemical oxygen demand; Government; Nitrogen oxides; Sanitary engineering; Water pollution
Implications of Nitrogenous BOD in Treatment Plant Design, Russell C. Mt. Pleasant and Warren Schlickenrieder, 82

Water treatment plants; Potable water; Sewage; Sewage effluents; Sewage filtration; Water treatment
Windhoek Reclaiming Sewage for Drinking Water, A. J. Clayton and P. J. Pybus, 430

Water tunnels; Aqueducts; Earthquakes; Manifolds; Pumps; Valves; Water
Edmonston Pumping Plant: Nation's Mightiest, Robert B. Jansen, 465

Water tunnels; Computer systems programs; Design; Networks; New york; Systems analysis
Systems Analysis of Water Distribution Networks, Richard de Neufville, John C. Schaake, Jr. and Joseph H. Stafford, 105

Water tunnels (conveyance); Computers; Hydraulics; Open channel flow; Pressure pipes; Transient flow; Unsteady flow
Transient Flow in Free-Surface, Pressurized Systems, David C. Wiggert, 87

Water use; Civil engineering; Forecasting; Professional activities; Water resources; Water reuse
Water Resources in the Future: Directions and Prospects, Joseph L. Fisher, 407

Water users; Connecticut; Costs; Drainage; Precipitation (atmospheric); Water resources
Potential of Precipitation Modification, Eugene J. Aubert, Gurbachan P. Malhotra and D. B. Spiegler, 212

Water vapor; Cooling towers; Electric power generation; Hyperbolic parabolic shells; Pollution abatement; Shell structures
Wet-Type Hyperbolic Cooling Towers, Paul Rogers, 262

Water waves; Coastal engineering; Hydraulic models; Tsunamis; Walls
Waves Generated by Horizontal Motion of a Wall, Madan M. Das and Robert L. Wiegel, 137

Water waves; Waterways; Hydraulic models; Hydraulics; Inlets (waterways); Rivers; Simulation; Tides
Simulation of Long Waves in Branching Waterways, Robert F. Henry, 224

Waterways; Aeration; Backwater; Dams (movable); Dikes; Gates; Ice; Ice control; Mississippi River
Reducing Ice Formation at Navigation Dams, Henry W. Harich, 387

Waterways; Canals; Design; Ecology; Environmental engineering; Fish; Florida; Locks (waterways); Navigation
Design Versus Ecology in St. Johns and Indian Rivers, Harold A. Scott, 475

Waterways; Degradation; Open channel flow; Sedimentation; Sediments
Laboratory Study of Degradation and Aggradation, Suryanarayana Bhamidipaty and Hsieh W. Shen, 40

Waterways; Density; Harbors; Locks (waterways); Salinity; Salt water intrusion; Stratification; Water pollution; Water quality
Mardyck Lock Acts as Salt-Water Barrier, Ch. Blanchet and B. Quetin, 600

Waterways; Docks; Drydocks; Graving docks; Pennsylvania; Sheet piling; Shipbuilding
1,200-Ft Graving Dock, Frederick E. Krauss and George H. Plude, 605

Waterways; Federal-state cooperation; Land use; Legislation; Water management (applied)
Management Problems in Flood Plain Areas, Thomas M. Lee, 408

Waterways; Hydraulic models; Hydraulics; Inlets (waterways); Rivers; Simulation; Tides; Water waves
Simulation of Long Waves in Branching Waterways, Robert F. Henry, 224

Waterways; Waves; Hydraulics; Rivers; Sands; Statistical analysis
Statistical Properties of Missouri River Bed Forms, V.S. Shastri Annambhotla, William W. Sayre and Robert H. Livesey, 544

Waterways experiment station; ASCE (awards & prizes); History; Hydraulic laboratories; Hydraulic laboratories; Hydraulics
Hydraulicians are Human Too, Hunter Rouse, 257

Waterways (transportation); Estuaries; India; Mathematical models; Models; Rivers; Tides; Tidewater
Mathematical Model of River Hooghly, Donald M. McDowell and David Prandle, 209

Waterways (transportation); Freight terminals; Investments; Land use; Pipelines; Planning; Railroads; Regional planning; Terminal facilities; Transmission lines; Urban planning; Urban transportation
Restructuring Freight Transportation in Chicago, James Robert Blaze, 353

Waterways (watercourses); Drainage; Floods; Hydraulics; Hydrology; Land use; Legislation; Municipal engineering; Professional practice; Runoff; Subdivisions; Urban planning
An Engineer Looks at Drainage Law, Alfred R. Pagan, 511

Wave action; Wave height; Wavelength; Wave period; Coastal engineering
Regular Wave Effects on Walls Made of Cylinders, G. D. Khaskhachikh and O. M. Vanchagov, 101

Wave energy; Coastal engineering; Mass; Offshore structures; Periodic functions; Resonance
Resonant Response of Offshore Structures, Lawrence G. Selna and David Cho, 155

Wave energy; Waves; Coastal engineering; Drilling; Offshore completion; Pile structures; Vortices
Laboratory Study of Lift Forces on Circular Piles, Devidas D. Bidde, 60

Wave energy; Waves; Cylinders; Diffraction; Hydraulics; Nonlinear systems
Nonlinear Wave Forces on a Vertical Cylinder, Subrata K. Chakrabarti, 542

Wave energy; Wind pressure; Windward drift; Air water interactions; Coastal engineering
Physical Scales for Generation of Wind Waves, Jin Wu, 281

Wave height; Breakwaters; Coastal engineering; Harbors; Rubble mounds
Effect of Irregular Wave Trains on Rubble-Mound Breakwaters, Yvon Ouellet, 119

Wave height; Breakwaters; Coastal engineering; Ocean waves; Spectral energy distribution; Standing waves
Spectral Resolution of Breakwater Reflected Waves, Edward B. Thornton and Ronald J. Calhoun, 512

Wave height; Wavelength; Wave period; Coastal engineering; Wave action
Regular Wave Effects on Walls Made of Cylinders, G. D. Khaskhachikh and O. M. Vanchagov, 101

Wave height; Wave runup; Waves; Coastal engineering; Coastal structures
Maximum Breaker Height, J. Richard Weggel, 586

Wavelength; Wave period; Coastal engineering; Wave action; Wave height
Regular Wave Effects on Walls Made of Cylinders, G. D. Khaskhachikh and O. M. Vanchagov, 101

Wave period; Coastal engineering; Wave action; Wave height; Wavelength
Regular Wave Effects on Walls Made of Cylinders, G. D. Khaskhachikh and O. M. Vanchagov, 101

Wave propagation; Basins; Coastal engineering; Harbors
Oscillations in Harbors with Connected Basins, Jiin-Jen Lee and Fredric Raichlen, 351

Wave propagation; Dynamics; Engineering mechanics; Finite elements; Porous media flow
Variational Formulation of Dynamics of Fluid-Saturated Porous Elastic Solids, Jamshid Ghaboussi and Edward L. Wilson, 425

Wave runup; Waves; Coastal engineering; Coastal structures; Wave height
Maximum Breaker Height, J. Richard Weggel, 586

Waves; Coastal engineering; Coastal structures; Wave height; Wave runup
Maximum Breaker Height, J. Richard Weggel, 586

Waves; Coastal engineering; Coefficients; Hydrodynamics; Models; Offshore structures
Mechanical Excitation of Offshore Tower Model, Charles P. Rains and Subrata K. Chakrabarti, 172

Waves; Coastal engineering; Drilling; Offshore completion; Pile structures; Vortices; Wave energy
Laboratory Study of Lift Forces on Circular Piles, Devidas D. Bidde, 60

Waves; Coastal engineering; Hydrodynamics; Ocean engineering; Ocean waves; Subsurface structures
Wave Forces on Submerged Bodies, C. J. Garrison and P. Y. Chow, 371

Waves; Cylinders; Diffraction; Hydraulics; Nonlinear systems; Wave energy
Nonlinear Wave Forces on a Vertical Cylinder, Subrata K. Chakrabarti, 542

Waves; Dikes; Dunes; Flood control; Floods; Netherlands; New Jersey; Savannas; Shore protection
Best Shore Protection: Nature's Own Dunes, Ian McHarg, 400

Waves; Hydraulics; Rivers; Sands; Statistical analysis; Waterways
Statistical Properties of Missouri River Bed Forms, V.S. Shastri Annambhotla, William W. Sayre and Robert H. Livesey, 544

Weathering; Abutments; Dams (rockfill); Foundations; Geologic investigations; Grouting; Iraq; Philippines; Venezuela
Foundation and Abutment Treatment for Rockfill Dams, Richard C. Acker and Jack C. Jones, 494

Weather modification; Cloud seeding; Hydraulics; Hydrometeorology; Precipitation gages
Colorado Pilot Project: Design Hydrometeorology, Patrick A. Hurley, 291

Weather modification; Cloud seeding; Irrigation; Meteorology; Rainfall; Rivers; Water resources
Cloud Seeding Interpreted Through Atmospheric Water Balance, James L. Rasmussen, 562

Weather modification; Hydraulics; Rainfall; Silver iodide; South Dakota; Water resources
Weather Modification Program for South Dakota, Richard A. Schleusener and Edwin I. Boyd, 466

Web beams; Buckling; Finite elements; Loading; Structural engineering; Tests; Thin-wall structures; Ultimate strength
Failure of Thin-Walled Members Under Patch Loading, Kenneth C. Rockey, Mohamed A. El-Gaaly and Debal K. Bagchi, 572

Webs (supports); Beams (supports); Bending; Curved beams; Stresses; Structural engineering
Bending Behavior of Cylindrical Web Panels, Charles G. Culver, Clive L. Dym and Darryl K. Brogan, 507

Webs (supports); Beams (supports); Specifications; Structural design; Structural engineering
Suggested Design Guides for Beams with Web Holes, by the Subcommittee on Beams with Web Openings of the Task Committee on Flexural Members of the Structural Division, John E. Bower, Chmn., 30

Weighting functions; Distribution; Focal length; Photogrammetry; Probability theory; Random error; Standard deviation; Surveying; Variance (statistics)
Theoretical Weighting of Photogrammetric Equations, Charles Kendall Paul, 550

Weir crests; Baffles; Conformal mapping; Drag; Hydraulics; Supercritical flow
Supercritical Flow Over Sills, John A. McCorquodale and M. K. Giratalla, 239

Weirs; Adsorption; Coefficients; Oxidation; Oxygen; Sanitary engineering; Sewage; Sewers
Oxygen Adsorption in Streams, John D. Parkhurst and Richard D. Pomeroy, 156

Weirs; Broad-crested weirs; Control structures; Flow measurement; Hydraulics
Characteristics of Flow Weirs of Finite Crest Width, Singamsetti Surya Rao and Manoj Kumar Shukla, 42

Weirs; Discharge coefficients; Fluid flow; Hydraulics; Spatial distribution
Spatially Varied Flow Over Side-Weirs, Kanakatti Subramanya and Subhash Chandra Awasthy, 84

Weirs; Foundations; Permeability; Seepage
End Effects in Models for Seepage Below Weirs, S. Muthukumaran and V. C. Kulandaiswamy, 216

Weld defects; Welded pipes; Brittle fracturing; Pipe joints; Pipelines; Slip joints; Steel pipes
Brittle Fracture of Steel Pipe Analyzed, Robert V. Phillips and Stephen M. Marynick, 345

Welded joints; Welding; Fasteners; Joints (connections); Safety factors; Tests
Eccentrically Loaded Welded Connections, Lorne J. Butler, Shubendu Pal and Geoffrey L. Kulak, 233

Welded joints; Welding; Fatigue (materials); Fractures (materials); Offshore structures; Steels; Structural engineering; Tube joints
Fatigue Failure of Welded Tubular Joints, James M. Becker, William W. Gerberich and Jack G. Bouwkamp, 62

Welded pipes; Brittle fracturing; Pipe joints; Pipelines; Slip joints; Steel pipes; Weld defects
Brittle Fracture of Steel Pipe Analyzed, Robert V. Phillips and Stephen M. Marynick, 345

Welding; Beams (supports); Cyclic loads; Earthquakes; Joints (junctions); Structural engineering
Beam-Column Subassemblages Under Repeated Loading, Vitelmo V. Bertero, Egor P. Popov and Helmut Krawinkler, 268

Welding; Bridges (decking); Bridges (orthotropic); Fatigue (materials); Ribs (supports); Steels; Structural engineering; Tests
Fatigue of Orthotropic Steel Decks, Hacik Erzurumlu and A. Anthony Toprac, 205

Welding; Fasteners; Joints (connections); Safety factors; Tests; Welded joints
Eccentrically Loaded Welded Connections, Lorne J. Butler, Shubendu Pal and Geoffrey L. Kulak, 233

Welding; Fatigue (materials); Fractures (materials); Offshore structures; Steels; Structural engineering; Tube joints; Welded joints
Fatigue Failure of Welded Tubular Joints, James M. Becker, William W. Gerberich and Jack G. Bouwkamp, 62

Wells; Aquifers; Density; Hydraulics; Underground storage
Gravitational and Dispersive Mixing in Aquifers, Lynn W. Gelhar, John L. Wilson, III and John S. Miller, 588

Wells; California; Drainage; Ground water; Sea water intrusion; Seepage
Seawater Intrusion Extraction Barrier, Jack J. Coe, 425

White noise; Earthquakes; Foundations; Soil-structure interaction; Structural engineering
Dynamic Soil-Structure Interaction, Mauricio A. Sarrazin, 338

Width; Angle iron; Buckling; Columns (supports); Inelastic action; Slenderness ratio; Structural engineering; Struts; Tees; Thickness ratio
Buckling of Steel Angle and Tee Struts, John B. Kennedy and Madugula K.S. Murty, 547

Wind bracing; Wooden structures; Coastal engineering; Construction; Design; Foundations; Hurricanes; Piers; Storms; Stresses
Wood Structures Can Resist Hurricanes, Gerald E. Sherwood, 417

Wind (meteorology); Aerodynamics; Drag; Loads (forces); Structural engineering; Turbulence; Vibration
Drag Spectra of Simple Structures in Turbulence, John Brian Roberts, 448

Wind (meteorology); Aerodynamics; Engineering mechanics; Fluid flow; Transmission lines; Turbulence; Vibration
Galloping Oscillations of Prismatic Structures, Milos Novak, 50

Wind (meteorology); Amplitude; Chicago; Columns (supports); Loads (forces); Steels; Structural engineering; Tall buildings
Bundled-tube Structure for Sears Tower, Hal S. Iyengar, 509

Wind (meteorology); Analysis; Concrete (reinforced); Cooling towers; Design; Earthquakes; Loads (forces); Moments; Powerplants; Shells (structural forms); Structural engineering
Analysis and Design of Hyperbolic Cooling Towers, German Gurfinkel and Adolf Walser, 340

Wind (meteorology); Bearing capacity; Bending stress; Bricks; Buildings; Computer programs; Computers; Masonry; Shear; Structural engineering; Walls
Computer Design of Engineered Brick Masonry, Alan H. Yorkdale and Robert P. Anderson, 271

Wind (meteorology); Buildings (codes); Cables; Design criteria; Loading; Power lines; Structural engineering; Towers; Transmission lines
Wind Recommendations for Transmission Towers, Gene M. Wilhoite, 142

Wind (meteorology); Coastal engineering; Ocean currents; Outfall sewers; Sewers; Waste disposal
Coastal Current of Pacific Northwest, Bard Glenne and Robert H. Bourke, 574

Wind (meteorology); Drainage; Perlite; Reservoirs; Temperature
Reducing Pond Evaporation with Perlite Ore, Keith R. Cooley and C. Brent Cluff, 305

Wind (meteorology); Wind pressure; Buildings; Gust loads; Structural engineering
Failures of Structures Due to Extreme Winds, Joseph E. Minor, Kishor C. Mehta and James R. McDonald, 517

Wind pressure; Boundary layer; Buildings; Engineering mechanics; Pressure gradients; Turbulence
Turbulence Effect on Wall Pressure Fluctuations, Willy Z. Sadeh and Jack E. Cermak, 579

Wind pressure; Buildings; Gust loads; Structural engineering; Wind (meteorology)
Failures of Structures Due to Extreme Winds, Joseph E. Minor, Kishor C. Mehta and James R. McDonald, 517

Wind pressure; Chimneys; Shear flow; Structural engineering; Vibration
Lift or Across-Wind Response to Tapered Stacks, Barry J. Vickery and Arthur W. Clark, 85

Wind pressure; Loads (forces); Structural engineering
Drag or Along-Wind Response of Slender Structures, Barry J. Vickery and Kwan H. Kao, 86

Wind pressure; Windward drift; Air water interactions; Coastal engineering; Wave energy
Physical Scales for Generation of Wind Waves, Jin Wu, 281

Windward drift; Air water interactions; Coastal engineering; Wave energy; Wind pressure
Physical Scales for Generation of Wind Waves, Jin Wu, 281

Wisconsin; Docks; Ice; Marinas; Pile extraction; Piles (foundations); Reclamation
Lake Superior Yachting Marinas Resist Ravages of Ice, C. Allen Wortley, 79

Wood; Wooden structures; Elastic properties; Fasteners; Joints (junctions); Nails; Slip joints; Structural engineering
Analysis of Nailed Joints with Dissimilar Members, Thomas Lee Wilkinson, 437

Wooden bridges; Bridges (decking); Bridges (structures); Glued joints; Laminated wood; Structural engineering
FPL Timber Bridge Deck Research, Billy Bohannan, 169

Wooden structures; Beams (supports); Buckling; Floors; Structural engineering; Timber construction
Lateral Stability of Beam and Deck Structure, Paul M. Jenkinson and John J. Zahn, 181

Wooden structures; Coastal engineering; Construction; Design; Foundations; Hurricanes; Piers; Storms; Stresses; Wind bracing
Wood Structures Can Resist Hurricanes, Gerald E. Sherwood, 417

Wooden structures; Elastic properties; Fasteners; Joints (junctions); Nails; Slip joints; Structural engineering; Wood
Analysis of Nailed Joints with Dissimilar Members, Thomas Lee Wilkinson, 437

Working conditions; ASCE (local sections); California; Civil engineers; Salaries
California ASCE Sections Prepare Employment Guidelines, George S. Korbay and Ronald P. Gallagher, 25

Yield; Engineering mechanics; Limit design method; Plastic analysis; Plasticity; Plates (structural members)
Plastic Analysis of Anisotropic Disks and Plates, Archibald N. Sherbourne and Sridhara D.N. Murthy, 59

Zoning; Computer programs; Economic analysis; Flood control; Hydraulics; Land use
Role of Economics in Planning Flood Plain Land Use, L. Douglas James, 314

Zoning; Costs; Engineering societies; Failure; Gas pipelines; Legislation; Natural gas; Transmission lines; Transportation; Utilities
Responsibility of Gas Utilities for Pipeline Safety, Carl T. Kallina, 148

Zoning; Land use; Recreational facilities; Regional planning; Regulations; Urban planning; Water resources
Wisconsin's Shoreland Management Program, Thomas M. Lee, 605
